3186. ● GENERAL SERVICES ADMINISTRATION ACQUISITION REGULATION; ACQUISITION CIRCULAR AC-88-2, CHANGES TO THE GOVERNMENT PROCUREMENT CODE

Legal Authority: 40 USC 486(c)

CFR Citation: 48 CFR 505; 48 CFR 514; 48 CFR 525

Legal Deadline: None

Abstract: This Acquisition Circular temporarily amends Parts 505, 514 and 525 of the General Services Administration Acquisition Regulation to implement Item II of Federal Acquisition Circular 84-38, published in the Federal Register on July 20, 1988. Item II of the FAC revised the Federal Acquisition Regulation to implement amendments to the Agreement on Government Procurement that were negotiated by the United States Trade Representative.

3194. ● TELECOMMUNICATIONS ACCESSIBILITY FOR THE HEARING AND SPEECH IMPAIRED

Significance: Regulatory Program

Legal Authority: 40 USC 486(c); 40 USC 751(f)

CFR Citation: 41 CFR 201

Legal Deadline: Final, Statutory, October 24, 1989.

Abstract: The Telecommunication Accessibility Enhancement Act of 1988 (PL 100-542) directs GSA to prescribe regulations that make the Federal Telecommunications System fully accessible to hearing and speech impaired individuals. GSA plans to issue a FIRMR rule requiring agencies to use telecommunications devices for the deaf (TDD's) or related equipment and update TDD directories. A FIRMR bulletin will probably also be issued to describe the types of TDD's and related devices available to agencies.

Merit Systems Protection Board

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

MERIT SYSTEMS PROTECTION BOARD (MSPB)

MERIT SYSTEMS PROTECTION BOARD

5 CFR Ch. II

Regulatory Agenda

AGENCY: Merit Systems Protection Board.

ACTION: Semiannual agenda of regulations.

SUMMARY: The following Merit Systems Protection Board (MSPB) regulations are scheduled for review or development from April 1989 through March 1990. They are submitted herein for publication in the Unified Agenda of Federal Regulations, E.O. 12291. Regulatory action may not be limited to the items listed.

FOR FURTHER INFORMATION CONTACT: Paul D. Mahoney, Director, Office of Management Analysis, (202) 653-8892.

Dated: February 22, 1989.

Merit Systems Protection Board.

Daniel R. Levinson,

Chairman.

MERIT SYSTEMS PROTECTION BOARD (MSPB) — Prerule Stage

3195. PART 1205 - PRIVACY ACT

Legal Authority: 5 USC 552a Privacy Act

CFR Citation: 5 CFR 1205

Legal Deadline: None

Abstract: Pursuant to 5 USC 552a(f), the Board is required to promulgate regulations pursuant to notice and receipt of public comment establishing procedures for responding to individual requests for access to records covered by the Privacy Act; for the amendment of records covered by the Act and for appeals of adverse rulings on such requests; and for fees to be charged for copying requested records. Such regulations were issued in 44 FR 43448, July 24, 1979. The Board proposes to review these regulations to ensure that they are easily understood by all persons. If indicated by the review, the Board plans to publish these regulations in "plain English."

Timetable:

Action	Date	FR Cite

3196. PART 1206 - OPEN MEETINGS

Legal Authority: 5 USC 552b Government in the Sunshine Act

CFR Citation: 5 CFR 1206

Legal Deadline: None

Abstract: Pursuant to 5 USC 552b, the Board is required to promulgate regulations, pursuant to notice and receipt of public comment, establishing procedures by which it will conduct open meetings. Such regulations were issued in 44 FR 43448, July 24, 1979. The Board proposes to review these regulations to ensure that they are easily understood by all persons. If indicated by the review, the Board plans to publish these regulations in "plain English."

National Aeronautics and Space Administration

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Ch. V

Regulatory Agenda

AGENCY: National Aeronautics and Space Administration.

ACTION: Regulatory agenda.

SUMMARY: This regulatory agenda describes the proposed regulations being considered for development or amendment by NASA, the need and legal basis for the actions being considered, the name and telephone number of a knowledgeable official, whether a regulatory analysis is required, and the status of regulations previously reported.

ADDRESS: Director, General Management Division (Code NPN), Office of Management, NASA Headquarters, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Margaret M. Herring, 202/453-2922.

SUPPLEMENTARY INFORMATION: OMB Bulletin No. 89-02, "Regulatory Program of the United States Government (April 1, 1989 - March 31, 1990) and Unified Agenda of Federal Regulations for April 1989," Executive Order 12291, "Federal Regulation," and NASA Management Instruction 1410.10F, "Federal Register: Delegation of Authority and Requirements for Publication of NASA Documents," require a regulatory agenda of proposed regulations under development and review be published in the **Federal Register** each April and October.

Philip A. Waller,

Director, General Management Division.

Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
3207	General Provisions Regarding Flight of Reimbursable Payloads Aboard the Space Shuttle	2700-AA14
3208	Space Transportation System; Mementos Aboard Space Shuttle Flights	2700-AA18
3209	Personnel Security Adjudication and Procedures	2700-AA31
3210	Space Transportation System; Reimbursement for Shuttle Services Provided to Non-U.S. Government Users; Reimbursement for Shuttle Services Provided to Civil U.S. Government Users and Foreign Etc	2700-AA45
3211	Delegation of Authority of Certain Civil Rights Functions to the Department of Health, Education, and Welfare	2700-AA47
3212	Payload Specialists for NASA or NASA Related Payloads	2700-AA52
3213	Extraterrestrial Exposure	2700-AA53
3214	Policy Concerning Data Obtained from Space Science Flight Investigations	2700-AA54
3215	Nondiscrimination on the Basis of Sex in Education Programs and Activities Receiving or Benefiting from Assistance by NASA	2700-AA69
3216	National Space Grant College and Fellowship Program	2700-AA75
3217	Care and Use of Animals in the Conduct of NASA Activities	2700-AA78
3218	Limited Arrest Authority and Use of Force by NASA Security Force Personnel	2700-AA80

Final Rule Stage

Sequence Number	Title	Regulation Identifier Number
3219	Space Transportation System; Insurance and Indemnification of NASA Space Vehicle Users	2700-AA00
3220	Space Transportation System; Reimbursement for Spacelab Services	2700-AA01
3221	Tracking and Data Relay Satellite System (TDRSS); Use and Reimbursement Policy for Non-U.S. Government Users	2700-AA29
3222	Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally-Assisted Programs	2700-AA32
3223	Availability of Agency Records to Members of the Public	2700-AA49
3224	Nondiscrimination in Federally-Assisted Programs of NASA	2700-AA50
3225	Duty-Free Entry of Space Articles	2700-AA62
3226	Policy On The Protection Of Human Subjects	2700-AA76
3227	Governmentwide Debarment and Suspension (nonprocurement) and Governmentwide Requirements for Drug Free Workplace (Grants)	2700-AA81
3228	Processing of Monetary Claims (General)	2700-AA82

Completed Actions

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Ch. XII

Unified Agenda of Federal Regulations

AGENCY: National Archives and Records Administration.

ACTION: Semiannual agenda.

SUMMARY: This agenda announces the proposed regulatory actions that the National Archives and Records Administration (NARA) plans for the next 12 months and those actions that have been completed since October 1988. This agenda was developed under the guidelines in OMB Bulletin No. 89-02, dated November 4, 1988. NARA's purpose in publishing this agenda is to allow interested persons an opportunity to have more comprehensive documentation of NARA's regulatory plans and to provide a systematic means of monitoring regulatory activity in NARA. None of the regulations listed in the agenda are considered major under Executive Order 12291, Federal Regulation.

FOR FURTHER INFORMATION CONTACT: John A. Constance, Acting Chief, Information Management and Directives Branch, (202) 523-3214.

Dated: February 24, 1989.

Don W. Wilson,

Archivist of the United States.

3241. UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS

Legal Authority: 44 USC 2104; 44 USC 2504

CFR Citation: 36 CFR 1207

Legal Deadline: None

Abstract: This action proposes a common rule updating and replacing agencies' implementation of OMB Circular A-110 with a single, government-wide common rule establishing consistency and uniformity among Federal agencies in the administration of grants and cooperative agreements to institutions of higher education, hospitals, other nonprofit organizations, and commercial or for-profit entities. This result is achieved by amending the common rule issued by the agencies on March 11, 1988, to similarly update and replace implementation of OMB Circular A-102. The provisions of the common rule are largely drawn from the existing departmental rules issued by the several agencies which in the past developed a single, comprehensive rule implementing the circulars. This proposed common rule contains fiscal and administrative requirements applicable to grantees.

Regulatory Agenda

AGENCY: National Capital Planning Commission (NCPC).

ACTION: Regulatory agenda.

SUMMARY: The purpose of this agenda is to report the proposed rulemaking activities of the NCPC as required by Executive Order 12291. This information will allow the public to participate in the Commission's decision-making at an early stage.

FOR FURTHER INFORMATION CONTACT: Linda Dodd-Major, Legal Counsel, National Capital Planning Commission, 1325 G Street, NW., Washington, DC 20576, Telephone (202) 724-0187.

DATED: March 21, 1989.

Reginald W. Griffith,

Executive Director.

NATIONAL CAPITAL PLANNING COMMISSION (NCPC) — Final Rule Stage

3255. ● GUIDELINES AND SUBMISSIONS REQUIREMENTS FOR INSTALLATION OF ANTENNAS ON FEDERAL PROPERTY IN NATIONAL CAPITAL REGION

Legal Authority: 40 USC 71d; PL 90-553 International Center Act of 1968, as amended

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: These amended guidelines, intended to supplement submissions requirements for installation of microwave antennas on Federal sites in the Nation's Capital, permit Federal agencies to install certain other classes of antennas "as a matter of right" and delegate authority to the Executive Director to approve antennas consistent with approved master plans.

NATIONAL ENDOWMENT FOR THE ARTS (NEA) — Proposed Rule Stage

3256. COLLECTION OF CLAIMS

Significance: Agency Priority

Legal Authority: PL 97-365; 31 USC 3711; 31 USC 3716 to 3718; 5 USC 5514; 5 USC 552a

CFR Citation: 45 CFR 1150

Legal Deadline: None

Abstract: The proposed rule amends the National Endowment for the Arts regulation for collecting debts. Principally, the amendments implement the Debt Collection Act of 1982 (PL 97-365), which amended the Federal Claims Collection Act of 1966 (31 USC 3711, 3716-3718) to authorize among other things, charging of interest penalties and administrative costs, and the use of administrative offset, private collection agencies and credit agencies by the government. The amendments also implement government-wide regulations issued by the Department of Justice and the General Accounting Office (49 FR 8889) and Office of Personnel Management (49 FR 27470).

3257. NONDISCRIMINATION ON THE BASIS OF AGE

Significance: Agency Priority

Legal Authority: 42 USC 6101 et seq

CFR Citation: 45 CFR 1154

Legal Deadline: None

Abstract: This rule prohibits discrimination on the basis of age in programs and activities receiving assistance from the National Endowment for the Arts. These regulations are proposed pursuant to the requirements of the Age Discrimination Act and consistent with the general government-wide regulations issued by the Department of Health and Human Services.

3258. CLAIMS COLLECTION: SALARY OFFSET

Legal Authority: 5 USC 5514; EO 11809 (redesignated EO 12107); 5 CFR 550, Subpart K

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: This regulation provides procedures for the collection by administrative offset of a Federal employee's salary without his/her consent to satisfy certain debts owed to the Federal Government. The regulation outlines certain procedural protections that must be accorded to an employee prior to commencing offset.

NATIONAL ENDOWMENT FOR THE HUMANITIES (NEH)

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

45 CFR Ch. XI

Unified Agenda of Regulations

AGENCY: National Endowment for the Humanities.

ACTION: Publication of the unified agenda of regulations.

SUMMARY: Pursuant to the Regulatory Flexibility Act, Pub. L. 96-354, and Executive Order 12291, "Federal Regulations," dated February 17, 1981, the National Endowment for the Humanities is required to publish in April and October of each year an agenda of proposed regulations that the Endowment has issued or expects to issue and current rules that are under agency review.

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Deputy General Counsel, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; 202/786-0322.

Lynne V. Cheney,
Chairman.

NATIONAL ENDOWMENT FOR THE HUMANITIES (NEH) — Proposed Rule Stage

3259. ● NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS AND ACTIVITIES

Legal Authority: 42 USC 2000d to 2000d4

CFR Citation: 45 CFR 1110; 45 CFR 1173

Legal Deadline: None

Abstract: This proposed regulation implements Title VI of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, color, or national origin in federally assisted programs and activities, with respect to programs and activities receiving federal financial assistance from the National Endowment for the Humanities.

Programs and activities receiving federal financial assistance from the National Endowment for the Humanities are currently covered by a regulation implementing Title VI that was issued by the National Foundation on the Arts and the Humanities in 1973 (45 CFR 1110). The proposed rule will remove NEH programs from the coverage of the earlier rule and replace it with a new part applicable only to NEH-assisted programs and activities. Programs and activities assisted by the National Endowment for the Arts remain covered under the existing regulation.

NATIONAL ENDOWMENT FOR THE HUMANITIES (NEH) — Final Rule Stage

3260. ● GOVERNMENT REQUIREMENTS FOR DRUG-FREE WORKPLACE (GRANTS)

Legal Authority: PL 100-690, Title V, Subtitle D, Secs 5151 to 5160; EO 12549

CFR Citation: 45 CFR 1189

Legal Deadline: Final, Statutory, February 16, 1989.
Section 5156 of the Drug-Free Workplace Act of 1988 requires agencies to issue regulations 90 days after the Act is signed into law.

Abstract: This rule is for the purpose of implementing the statutory requirements of the Drug-Free Workplace Act of 1988 which requires that recipients of Federal grants certify that they will maintain a drug-free workplace. If the grantee is an individual, certification that his or her conduct under the grant will be drug-free is required. This rule directs that grantees submit certifications and establish sanctions of violation for drug-free workplace requirements.

3261. ● UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS

Legal Authority: Budget and Accounting Act of 1921, as amended; Budget and Accounting Procedures Act of 1950, as amended; Reorganization Plan No. 2 of 1970; EO 11541; 31 USC 6301 to 6308; Pres. Memo. for Heads of Exec. Depts & Agencies (Mar. 12, 1987)

CFR Citation: 45 CFR 1174

Legal Deadline: None

Abstract: This action proposes a common rule to be published by various agencies establishing consistency and uniformity in the administration of grants and cooperative agreements to state, local, and federally-recognized Indian tribal governments, as well as institutions of higher education, hospitals, and other nonprofit organizations, and commercial or for profit entities.

NATIONAL SCIENCE FOUNDATION (NSF)

NATIONAL SCIENCE FOUNDATION

45 CFR Ch. VI

Federal Regulation; Semiannual Regulations Agenda

AGENCY: National Science Foundation.

ACTION: Publication of semiannual regulations agenda.

SUMMARY: The National Science Foundation (NSF) publishes its semiannual agenda of regulations under development or review as required by Executive Order 12291, Federal Regulation (46 FR 13193, February 17, 1981). This agenda has been prepared in accordance with OMB Bulletin No. 89-02, Unified Agenda of Federal Regulations.

FOR FURTHER INFORMATION CONTACT: For additional information regarding any particular regulatory action contained in the agenda, contact the individual identified as the contact person in the agenda. Comments or inquiries of a general nature about the agenda should be directed to Sukari S. Smith, Office of the General Counsel, National Science Foundation, Washington, DC 20550, (202) 357-9435.

Dated: February 23, 1989.

Sukari S. Smith,

Regulatory Contact.

NATIONAL SCIENCE FOUNDATION (NSF) — Final Rule Stage

3262. PATENTS

Legal Authority: 42 USC 1870(a) The Natl. Sci. Found. Act of 1950, as amended; 35 USC 200 et seq The Bayh-Dole Act, as amended

CFR Citation: 45 CFR 650

Legal Deadline: None

Abstract: The Bayh-Dole Act (34 USC 200 et seq) was amended by Title V of PL 98-620 (98 Stat. 3364, 3368). The Department of Commerce has prepared a government-wide implementing regulation. The Foundation's Patents regulation (45 CFR 650) conforms to it. Because the revision to the NSF patents regulation will merely echo a government-wide regulation on which the public will have had an opportunity to comment, the Foundation expects that the revision will be published as a final rule. No additional costs will be imposed on the public as a result of the revision.

Timetable:

Action	Date	FR Cite
Final Action	00/00/00	

Small Entities Affected: None

Government Levels Affected: None

Additional Information: The notable changes to be made in the revision of the NSF patents regulation will be: elimination of restrictions on the licensing of NSF-supported inventions by nonprofit organizations, including universities; modification of the criteria and procedures for determining that "exceptional circumstances" warrant restricting a grantee's right to retain principal patent rights to its employees' NSF-supported inventions; and elimination of the Foundation's authority to waive the government license and "march-in" rights in awards not subject to the Bayh-Dole Act. All these changes are required by amendments to the Bayh-Dole Act.

OFFICE OF MANAGEMENT AND BUDGET (OMB)

OFFICE OF MANAGEMENT AND BUDGET

5 CFR Ch. III

Federal Regulations; OMB Circulars and Policy Letters Included in the Semiannual Agenda of Upcoming Activities

AGENCY: Office of Management and Budget.

ACTION: Publication of semiannual agenda.

SUMMARY: The Office of Management and Budget (OMB) is publishing its semiannual agenda of upcoming activities on OMB Circulars and Office of Federal Procurement Policy Letters (OFPP Policy Letters). This action is in accordance with OMB's internal procedures for implementing Executive Order No. 12291. OMB policy guidelines are issued under authority derived from several sources including: Subtitles I, II, and V of Title 31, United States Code, Executive Order No. 11541, and other specific authority as cited. The agenda includes actions on issuances which are not guidelines, but which are of public interest.

OMB Circulars and OFPP Policy Letters are policy guidelines that communicate government-wide policy of a continuing nature. For purposes of this agenda, we have excluded directives that outline procedures to be followed in connection with the President's budget and legislative programs, and directives that affect only the internal functions, management, or personnel of Federal agencies.

FOR FURTHER INFORMATION CONTACT: See agency person listed for each entry in the agenda, c/o Office of Management and Budget, Washington, DC 20503. On the overall agenda, contact Darrell A. Johnson (202/395-7250) at the above address.

Darrell A. Johnson,

Assistant Director for Administration.

OFFICE OF MANAGEMENT AND BUDGET (OMB) — Prerule Stage

3265. POLICIES ON GOVERNMENT PUBLICATIONS (CIRCULAR NO. A-3)

Significance: Agency Priority

Legal Authority: 44 USC 1108

CFR Citation: None

Legal Deadline: None

Abstract: OMB Circular No. A-3, "Government Publications", last revised in May 1985, prescribes policies and procedures for approving funding for government periodicals to fulfill the requirements of 44 USC 1108, and for reporting periodicals and non-recurring publications. OMB is proposing to incorporate this Circular, with minor revisions, into OMB Circular No. A-130, "Management of Federal Information Resources", and published a proposed revision for comment on January 4, 1989.

Significance: Agency Priority

Legal Authority: 44 USC 35; 5 USC 552a; 40 USC 759; 40 USC 487; 31 USC 11

CFR Citation: None

Legal Deadline: None

Abstract: OMB Circular No. A-130, "Management of Federal Information Resources", issued December 12, 1985, establishes policy for the management of Federal information resources, and provides certain procedural and analytic guidelines for implementing specific aspects of these policies. OMB is reviewing the Circular for consistency with the Computer Security Act of 1987 (PL 100-235). OMB published for comment on January 4, 1989, a proposed further policy on dissemination of information that includes electronic dissemination of information and user charges for government information products.

3277. ● POLICY GUIDANCE FOR DEVELOPMENT OF GOVERNMENT-WIDE REGULATIONS CONCERNING "PROCUREMENT INTEGRITY"

Significance: Agency Priority

Legal Authority: PL 100-679, Sec 6 OFPP Act Amendments of 1988

CFR Citation: None

Legal Deadline: Final, Statutory, May 17, 1989.
Sec 6(a) provides that regulations and guidelines are required to be issued 180 days after enactment of PL 100-679 (November 17, 1988).

Abstract: Section 6 of PL 100-679 establishes a "Procurement Integrity" requirement applicable to all government contractors having contracts with federal agencies that are subject to the Office of Federal Procurement Policy Act. The Policy and Regulations will cover: Prohibited Conduct by Competing Contractors; Prohibited Conduct by Procurement Officials; Disclosure of Information to Unauthorized Persons; Post-Employment Restrictions on Government Officials; Contractual Penalties; Administrative Actions; Criminal Penalties; and Civil Penalties.

Regulatory Agenda

AGENCY: Office of Personnel Management.

ACTION: Semiannual agenda of regulations.

SUMMARY: The following Office of Personnel Management regulations are scheduled for development or review from April 1, 1989, through March 31, 1990. This agenda carries out OPM's responsibilities to publish a semiannual agenda under E.O. 12291, Federal Regulation, and the Regulatory Flexibility Act (5 U.S.C. chapter 6). This publication in the **Federal Register** does not impose a binding obligation on the Office of Personnel Management with regard to any specific item on the agenda. Regulatory action in addition to the items listed is not precluded.

FOR FURTHER INFORMATION CONTACT: JoAnn G. Blackler, (202) 632-0373.

U.S. Office of Personnel Management.

3281. PERSONNEL SECURITY AND RELATED PROGRAMS

Legal Authority: 5 USC 3301; 5 USC 3302; 5 USC 7312; 50 USC 403; EO 10450; EO 10577

CFR Citation: 5 CFR 732

Legal Deadline: None

Abstract: Comprehensive review of security standards. Current revision of personnel security program by Presidential task force will likely result in the need for conforming changes in personnel security standards.

Timetable:

Action	Date	FR Cite
Begin Review	11/01/85	
End Review	01/01/90

RIN: 3206–AC21

3282. INVESTIGATIONS

Legal Authority: PL 93-579; 5 USC 552a

CFR Citation: 5 CFR 736

Legal Deadline: None

Abstract: Review of Governmentwide background investigations standards. Current revision of personnel security program by Presidential task force will likely result in the need for conforming changes in personnel investigations standards.

Timetable:

Action	Date	FR Cite
Begin Review	11/01/85	
End Review	01/01/90

Government Levels Affected: None

Agency Contact: Frances A. Sclafani, Associate Director, Investigations Group, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415, 202 632-4426

RIN: 3206–AB92

OFFICE OF PERSONNEL MANAGEMENT (OPM) — Proposed Rule Stage

3283. ORGANIZATION OF THE GOVERNMENT FOR PERSONNEL MANAGEMENT; PERSONNEL MANAGEMENT IN AGENCIES

Legal Authority: 5 USC 1104; 5 USC 1302; 5 USC 3301; 5 USC 3302; EO 10577

CFR Citation: 5 CFR 230; 5 CFR 250

Legal Deadline: None

Abstract: Deletes Part 230 and transfers its regulations to Part 250, to maintain parallel structure with 5 U.S.C. Combines material formerly in Part 230 with regulations now found in Part 250 to present all regulations on agencies' authorities for personnel management in a single part of the Code of Federal Regulations. Changes improve the technical integrity of the CFR by eliminating redundancies and improving the efficiency of OPM's regulations. No change in the coverage or substance of affected regulations.

RIN: 3206–AA66

3284. PERFORMANCE MANAGEMENT SYSTEM

Significance: Regulatory Program

Legal Authority: 5 USC Ch 43; 5 USC Ch 45; 5 USC Ch 53; 5 USC Ch 54; 5 USC 552; EO 12107; 5 USC 1103; 5 USC 1104; 5 USC 1302; 5 CFR 7.2; EO 9830

CFR Citation: 5 CFR 293; 5 CFR 430

Legal Deadline: None

Abstract: Revises requirements for the Performance Management Systems for General Schedule, Prevailing Rate, and SES employees. Regulations will be streamlined to eliminate impediments to management flexibility while still assuring pay-for-performance systems. The section on filing and transfer of performance records contains a technical change that would bring the Official Personnel Folder (OPF) subpart into conformance with the Employee Performance Folder (EPF) subpart, indicating that performance ratings of record, and the performance plans on which they are based, may be filed in either the OPF or the EPF.

RIN: 3206–AD22

3285. ● EMPLOYMENT IN THE EXCEPTED SERVICE

Legal Authority: 5 USC 1302; 5 USC 3301; 5 USC 3302

CFR Citation: 5 CFR 302

Legal Deadline: None

Abstract: Regulations will respond to substantive issues raised during revision of Part 302 in FY 88: (1) distinction between candidates who should receive priority consideration for reemployment and other reemployment candidates (currently all are referred on same list); (2) delegation to agencies of authority to establish alternative ranking plans under 5 CFR 302.105.

RIN: 3206–AC12

3287. PREVAILING RATE SYSTEMS

Legal Authority: 5 USC 5343; 5 USC 5346

CFR Citation: 5 CFR 532

Legal Deadline: None

Abstract: Proposed rule would revise Monroney regulations by removing DOD employees from the employee count in determining whether a dominant industry exists in a wage area. The proposed rule would also limit the use of private sector specialized industry data obtained outside a wage area in setting pay rates for positions in that area.

3289. PAY ADMINISTRATION (GENERAL); SEVERANCE PAY

Significance: Regulatory Program

Legal Authority: 5 USC 5595; EO 11228

CFR Citation: 5 CFR 550, Subpart G

Legal Deadline: None

Abstract: Proposed regulations would make eligibility for involuntary retirement and severance pay parallel, since the same circumstances give rise to both. Proposed regulations also would clarify severance pay coverage for certain employees serving under time-limited appointments and make other changes related to eligibility for severance pay.

RIN: 3206–AB73

3295. RETIREMENT; CSRS OFFSET SERVICE

Legal Authority: 5 USC 8347

CFR Citation: 5 CFR 831, Subpart J

Legal Deadline: None

Abstract: The Federal Employees' Retirement System Act of 1986 provided that certain employees would continue to be covered by both the Civil Service Retirement System and social security. Their CSRS deductions are offset by social security taxes (FICA), and, when they retire, their CSRS benefits are offset by the value of this service in their social security benefits. The regulations will implement this provision of law.

3311. EMPLOYMENT (GENERAL); EMPLOYMENT PRACTICES

Legal Authority: 5 USC 3301; 5 USC 3302; 5 USC 3304

CFR Citation: 5 CFR 300

Legal Deadline: None

Abstract: Clarification of the policy and appeal procedures used in developing and implementing employment practices in the recruitment, measurement and selection of individuals for appointments and promotion within the competitive service. The proposed amendments would remove a non-statutory appeal procedure which was created to provide a simple, streamlined administrative review procedure but which has, instead, become a time-consuming, convoluted process. Additionally, the proposed changes would avoid a duplicative enforcement procedure currently subject to review by OPM and MSPB, which is, more properly, within the sole jurisdiction of the EEOC.

3312. ● AMENDMENT TO SELECTIVE SERVICE REGISTRATION REQUIREMENTS

Legal Authority: 5 USC 3328

CFR Citation: 5 CFR 300, Subpart G

Legal Deadline: None

Abstract: We will issue a final rule delegating authority to agencies to determine whether a Federal job applicant's failure to register with the Selective Service System was knowing and willful. This change was authorized by an amendment to 5 USC 3328 which imposes the selective service registration requirement as a condition of employment in Federal executive agencies. The delegation will permit faster decisions for interested job seekers and reduce paperwork.

3314. REMOVAL FROM THE SENIOR EXECUTIVE SERVICE; GUARANTEED PLACEMENT IN OTHER PERSONNEL SYSTEMS

Legal Authority: 5 USC 1302; 5 USC 3594; 5 USC 3596

CFR Citation: 5 CFR 359

Legal Deadline: None

Abstract: Regulations on (1) the removal of SES career appointees during probation or for less than fully successful executive performance, (2) the removal of other than career appointees, (3) placement rights in other personnel systems of certain SES career appointees. These actions are authorized by law. The regulations establish procedures for implementing previous law and the new Pub. L. 98-615, November 8, 1984.

3315. REMOVAL FROM THE SENIOR EXECUTIVE SERVICE; GUARANTEED PLACEMENT IN OTHER PERSONNEL SYSTEMS

Legal Authority: 5 USC 3595; 5 USC 3596

CFR Citation: 5 CFR 359

Legal Deadline: None

Abstract: Regulations to add a new subpart to implement Pub. L. 97-35, August 13, 1981, as amended by Pub.L. 97-346, October 15, 1982, and Pub. L. 98-615, November 8, 1984, which added provisions to Title 5 to govern SES reduction-in-force actions affecting career executives. Regulations are needed to cover certain areas not in the law, such as notification to employees and retention of records, and to implement the provisions in the law dealing with OPM's responsibility to help place career executives identified for reduction in force and with "fallback" rights following a RIF.

3318. PAY UNDER THE GENERAL SCHEDULE

Legal Authority: 5 USC 5334(a); 5 USC 5338

CFR Citation: 5 CFR 531

Legal Deadline: None

Abstract: Under current regulations, Federal agencies must request prior OPM approval to use a special rate as an employee's "highest previous rate" upon reassignment to another position. The proposed regulations would revise the "highest previous rate" provisions of the regulations to remove this requirement and to clarify an agency's authority to establish an employee's rate of basic pay upon promotion, demotion, reassignment, transfer, reemployment, or change in type of appointment.

3322. ABSENCE AND LEAVE; VOLUNTARY LEAVE TRANSFER PROGRAM

Significance: Regulatory Program

Legal Authority: 5 USC 6311; 5 USC 6332; PL 100-202; PL 100-284; PL 100-440; PL 100-566

CFR Citation: 5 CFR 630

Legal Deadline: Final, Statutory, January 31, 1989.

Abstract: Public Law 100-202 authorized the Office of Personnel Management to establish a program under which Federal employees may transfer annual leave to other employees who need such leave because of a "personal emergency." Interim regulations issued in 1988 established administrative procedures for Federal agencies to permit the transfer of annual leave for this purpose. The statutory authority for this program has been extended through FY 89. In addition, Public Law 100-566 authorized a 5-year experimental voluntary leave transfer program, which will expire on October 31, 1993. Regulations to implement the new program by Public Law 100-566 will supersede previous regulations governing this program.

3323. ● ABSENCE AND LEAVE; VOLUNTARY LEAVE BANK PROGRAM

Significance: Regulatory Program

Legal Authority: 5 USC 6362; PL 100-566

CFR Citation: 5 CFR 630

Legal Deadline: Final, Statutory, April 30, 1989.

Abstract: Public Law 100-566 authorizes the Office of Personnel Management to establish a 5-year experimental voluntary leave bank program to be implemented in at least 3 executive agencies. Under the voluntary leave bank program, employees can donate annual leave to a common leave fund within each agency, and then can apply to withdraw leave from the fund if they encounter a medical emergency. The regulations will establish the administrative procedures for participating agencies to permit the contribution and use of annual leave for this purpose. The statutory authority for this program expires on October 31, 1993. Further action is dependent upon whether continuing or permanent authorization is enacted.

Legal Authority: 5 USC 552; 5 USC 1103 (a)(5); 5 USC 3301; 5 USC 3302; EO 10577

CFR Citation: 5 CFR 300

Legal Deadline: None

Abstract: We will issue a final rule establishing criteria and conditions under which agencies may consider using temporary help service firms for meeting short term temporary work needs. The rule responds to agencies' requests for flexibility to provide public services and to maintain productivity. As a result of this rule, agencies will have an optional, additional tool for meeting short term needs which has long been available to other public and private organizations.

Panama Canal Commission

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

PANAMA CANAL COMMISSION (PANAMA)

PANAMA CANAL COMMISSION

35 CFR Ch. I

Unified Agenda of Federal Regulations

AGENCY: Panama Canal Commission.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The purpose of this agenda is to report the proposed rulemaking activities of the Panama Canal Commission. This information will allow the public to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: For information about a particular regulatory project, contact the person listed in the subheading "Agency Contact" for that project. For general information, contact Michael Rhode, Jr., Assistant to the Chairman and Secretary, Panama Canal Commission, 2000 L Street, NW., Suite 550, Washington, DC 20036-4996, (202) 634-6441 TDD; or John L. Haines, Jr., Esquire, General Counsel, Panama Canal Commission, APO Miami 34011-5000.

SUPPLEMENTARY INFORMATION: Executive Order 12291, Federal Regulation, and the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* require that executive agencies publish in the Federal Register a semiannual notice of regulations which are under development or review or for which action has been completed. The Panama Canal Commission agenda contains certain regulations which are limited in public impact, but they are included to increase public awareness of Commission activities and to allow for increased public participation in the agency's regulatory review and development process. This agenda was prepared under the guidelines established by OMB Bulletin No. 89-02.

Dated: February 23, 1989.

Michael Rhode, Jr.,

Assistant to the Chairman and Secretary, Panama Canal Commission.

PANAMA CANAL COMMISSION (PANAMA) — Prerule Stage

3367. TOLLS FOR USE OF CANAL

Significance: Agency Priority

Legal Authority: PL 96-70, Sec 1601

CFR Citation: 35 CFR 133. (Revision)

Legal Deadline: None

Abstract: Due to operating cost increases, including inflation, since the last toll rate increase (March 1983), the Panama Canal Commission is currently considering increasing the rates of tolls charged vessels transiting the Canal. An increase will be proposed effective in FY 1990 to achieve the Commission's regulatory requirement to recover from users all costs of operating and maintaining the waterway.

Timetable:

Action	Date	FR Cite
Next Action Undetermined		

Small Entities Affected: None

Government Levels Affected: Federal

Agency Contact: Michael Rhode, Jr., Secretary, Panama Canal Commission, 2000 L Street NW, Suite 550, Washington, DC 20036-4996, 202 634-6441

RIN: 3207-AA04

3368. TOLLS FOR USE OF CANAL RULES FOR MEASUREMENT OF VESSELS

Significance: Agency Priority

Legal Authority: PL 96-70, Sec 1601

CFR Citation: 35 CFR 133.32; 35 CFR 133.34; 35 CFR 135.285(a); 35 CFR 135.352

Legal Deadline: None

Abstract: The proposed changes correct authority to issue Panama Canal Tonnage Certificate (no financial impact); eliminate the "125 percent of engine room as measured" limitation for ballast rate (negligible negative impact on canal revenues); increase size limitation on manholes to water ballast spaces from 30 to 34 inch diameter, to align our rules with I.M.O.'s (small negative impact on canal revenues); allow deductible items located in the engine room to be deducted as part of engine room rather than separately, to streamline the method by which propulsion power deduction is determined (negligible impact on canal revenues).

These changes will not impact on most vessels already measured for Panama Canal tonnages. Vessels that qualify for increased deductions may choose to be remeasured.

3372. PANAMA CANAL COMMISSION ACQUISITION REGULATION

Significance: Agency Priority

Legal Authority: 40 USC 486(c)

CFR Citation: 48 CFR Chapter 35. (New)

Legal Deadline: None

Abstract: The Panama Canal Commission proposes to issue the Panama Canal Commission Acquisition Regulation (PAR) as Chapter 35 of Title 48 Code of Federal Regulations. The proposed PAR implements and supplements the Federal Acquisition Regulation (FAR), which is the primary acquisition regulation that governs the contracting process of all executive agencies or otherwise controls the relationship between such agencies and their contracts or prospective contractors. This action is necessary to provide regulatory coverage pertinent to Commission acquisitions that is not otherwise provided in the FAR.

PEACE CORPS (PEACE)

PEACE CORPS

22 CFR Ch. III

Executive Order 12291, Federal Regulations, Semiannual Agenda of Regulations

AGENCY: Peace Corps.

ACTION: Publication of semiannual agenda.

SUMMARY: This agenda announces the regulations the Peace Corps will have under development during the 12-month period from April 1, 1989 through March 31, 1990. The purpose for publishing this agenda is to give notice of any regulatory activity by the Agency in order to allow the public an opportunity to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: The public is encouraged to contact the Agency official listed for the particular agenda item. For other information concerning Peace Corps' regulations or this semiannual agenda, contact Robert Martin, Associate General Counsel, Peace Corps, 1990 K Street, NW., Washington, DC 20526, (202) 254-3114.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291, Federal Regulations, and the Regulatory Flexibility Act (5 U.S.C. 605) executive agencies are required to publish in the **Federal Register** semiannual regulatory agendas in April and October of each year.

The regulations being considered by Peace Corps are not "major" rules within the meaning of E.O. 12291 and no Regulatory Impact Analysis is required. Peace Corps has determined that the regulations under consideration will not impose compliance costs or reporting burdens on the public; and that the regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, no Regulatory Analysis is required under 5 U.S.C. 602.

Margaret H. Thome,

Associate Director for Management.

3376. IMPLEMENTATION OF REHABILITATION ACT OF 1973, PART 504 - HANDICAPPED DISCRIMINATION PROHIBITION

Legal Authority: 29 USC 794

CFR Citation: 22 CFR 311

Legal Deadline: None

Abstract: The regulation implements section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) which prohibits discrimination on the basis of handicap in programs or activities conducted by Executive agencies or the Postal Service.

Unified Agenda of Federal Regulations

AGENCY: Pennsylvania Avenue Development Corporation.

ACTION: Unified Agenda of Federal Regulations.

SUMMARY: This document sets forth the Pennsylvania Avenue Development Corporation's regulatory agenda issued under Executive Order 12291 and the Regulatory Flexibility Act. The Agenda lists regulations currently under rulemaking review that PADC expects to have as a final rule during the next twelve months.

FOR FURTHER INFORMATION CONTACT: Talbot J. Nicholas II, Attorney, Office of the General Counsel, Pennsylvania Avenue Development Corporation, Suite 1220 North, 1331 Pennsylvania Avenue, NW., Washington, DC 20004; (202) 724-9088.

Dated: March 9, 1989.

M. J. Brodie,

Executive Director.

3377. PROCEDURES AND UNIFORM STANDARDS FOR PUBLIC USE OF PARKS AND PLAZAS

Legal Authority: 40 USC 875(5)

CFR Citation: 36 CFR 912

Legal Deadline: None

Abstract: The Pennsylvania Avenue Development Corporation (PADC) has received an increasing number of requests for public use of parks and plazas within the Pennsylvania Avenue Development Area. The proposed regulations would ensure equality of opportunity for use of PADC parks and plazas while protecting public property, safety, and tranquility.

PENSION BENEFIT GUARANTY CORPORATION (PBGC)

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Ch. XXVI

Agenda of Regulations Under Development

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Agenda of regulations.

SUMMARY: This document sets forth the Pension Benefit Guaranty Corporation's regulatory agenda issued under Executive Order 12291 and the Regulatory Flexibility Act. The agenda lists regulations that are currently under development or that PBGC expects to have under development during the next twelve months. The effect of this agenda is to advise the public of PBGC's current and future regulatory activities.

ADDRESS: Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: For further information on the agenda in general, contact J. Ronald Goldstein, Attorney, Office of the General Counsel, 202-778-8850. For information about a specific regulation project listed on the agenda, contact the person designated in the agenda for that regulation.

SUPPLEMENTARY INFORMATION: Under the President's Order on Federal Regulation, Executive Order 12291, 46 FR 13193, each agency is required to publish in April and October an agenda of regulations currently or soon to be under development. The Executive Order requires that the agenda also include those currently effective regulations that are being reviewed by the agency pursuant to the Executive Order. The Regulatory Flexibility Act, Pub. L. 98-354, 5 U.S.C. 601, has a similar agenda requirement. Under that law, the agenda must list any regulation that is likely to have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has issued guidelines (OMB Bulletin No. 89-02) prescribing the form and content of the regulatory agenda. Under those guidelines, the agenda must list all regulatory activities being conducted or reviewed in the next twelve months and provide certain specified information on each regulation. All of the items on this agenda are current or projected rulemakings.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

PENSION BENEFIT GUARANTY CORPORATION (PBGC) — Proposed Rule Stage

3380. TRANSFERS FROM MULTIEMPLOYER PLANS TO SINGLE-EMPLOYER PLANS

Legal Authority: 29 USC 1302(b)(3); 29 USC 1412; 29 USC 1414

CFR Citation: 29 CFR 2678

Legal Deadline: None

Abstract: Sections 4232 and 4234 of ERISA prescribe rules governing the transfer of liabilities and assets from a multiemployer plan to a single-employer plan and prohibit certain transfers unless approved by PBGC. The regulation will establish procedures for requesting and criteria for PBGC approval of transfers which require approval and guidelines for satisfying the statutory requirements pertaining to other transfers. The regulation will also establish standards for the PBGC's waiver of a multiemployer plan's contingent liability arising from the transfer of unfunded vested benefits to a single-employer plan.

Timetable:

Action	Date	FR Cite
Next Action Undetermined		

Small Entities Affected: None

Government Levels Affected: None

Additional Information: Publication of this proposed regulation was delayed because of the need to revise the portions dealing with waiver of a multiemployer plan's contingent liability to reflect certain changes in related statutory provisions made by the Single-Employer Pension Plan Amendments Act of 1986. Work on this rule was subsequently deferred because the enactment of SEPPAA and the 1987 Pension Protection Act amendments required that staff be reassigned to work on higher priority regulations necessitated by those laws.

3381. PLAN RULES FOR REDUCTION OR WAIVER OF COMPLETE WITHDRAWAL LIABILITY

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1387(b)

CFR Citation: 29 CFR 2647 (Amendment)

Legal Deadline: None

Abstract: Under section 4207(a) of ERISA, the PBGC has issued a regulation [29 CFR Part 2647] providing for the reduction or waiver of an employer's liability for complete withdrawal upon the employer's resumption of participation under the plan from which it withdrew. The statute also requires the PBGC to prescribe procedures and standards under which multiemployer plans may adopt their own rules abating complete withdrawal liability upon an employer's return to the plan (section 4207(b)).

The purpose of letting plans adopt their own abatement rules is obvious: a specific rule adopted by a plan may well work better under the facts and circumstances of that particular plan than the broad rules adopted by the PBGC. This regulation will permit a plan to fashion the rules it needs to encourage the return of withdrawn employers, while at the same time protecting the plan from the loss of withdrawal liability payments without a compensating resumption of contributions to the plan by a formerly withdrawn employer. The PBGC is unable to (cont)

3382. PAYMENT OF BENEFITS IN PBGC-TRUSTEED PLANS

Legal Authority: 29 USC 1302(b)(3); 29 USC 1322; 29 USC 1342

CFR Citation: 29 CFR 2624

Legal Deadline: None

Abstract: When the PBGC assumes trusteeship of a terminated pension plan pursuant to sections 4041 and 4042 of ERISA, it pays benefits to participants pursuant to plan provisions and section 4022 of ERISA. This regulation will contain rules and policies relating to the payment of such benefits. The regulation will enable the PBGC to process and administer PBGC-trusteed plans more efficiently with resultant cost savings. It also will reduce costs to the public and the PBGC by providing payment rules, thereby reducing the number of requests for administrative review.

RIN: 1212-AA35

3383. EMPLOYER LIABILITY FOR WITHDRAWALS FROM AND TERMINATIONS OF SINGLE-EMPLOYER PLANS: INTEREST RATE

Legal Authority: 29 USC 1302(b); 29 USC 1362 to 1364; 29 USC 1367 to 1368

CFR Citation: 29 CFR 2622

Legal Deadline: None

Abstract: The PBGC's employer liability regulation incorporates by reference the interest rate charged under section 6601 of the Internal Revenue Code as the interest rate charged, or credited, on late payments, or overpayments, of employer liability. The Tax Reform Act of 1986 significantly changed the way in which the section 6601 rate is established and creates two interest rates: one for underpayments and another, lower rate for overpayments. Because of these changes, the PBGC plans to conduct a new rulemaking proceeding to determine whether it should continue to use the section 6601 interest rates under the employer liability regulation or whether it should adopt a new rate(s) for this purpose.

3384. PAYMENTS BY PBGC OF UNFUNDED NONGUARANTEED BENEFITS

Significance: Regulatory Program

Legal Authority: PL 100-203, Sec 9312(b)(3)

CFR Citation: 29 CFR Not yet determined

Legal Deadline: None

Abstract: The Pension Protection Act repealed ERISA section 4049 and 4062(c). Those provisions established new employer liability to plan participants and beneficiaries in the event of a distress termination or involuntary termination by the PBGC of a plan without sufficient assets to pay all benefit commitments; the section 4049 trust was the vehicle for collecting and distributing these liability amounts. This system proved flawed in several respects, however, and Congress therefore created a new scheme by which to channel employer liability recoveries to plan participants and beneficiaries, amended ERISA section 4022(c).

Under section 4022(c), participants no longer have a direct claim for employer liability. Instead, the PBGC's claim covers both its shortfall (unfunded guaranteed benefits) and participants' losses (unfunded benefit liabilities in excess of guaranteed benefits). In turn, the PBGC is to pay a portion of its employer liability recovery to participants and beneficiaries. The amount to be paid is based on the PBGC "recovery ratio" (as defined in amended sec. 4022(c)(3)).(cont)

Action	Date	FR Cite
NPRM	03/00/90	
NPRM Comment Period End	05/00/90	

Small Entities Affected: None

Government Levels Affected: None

Additional Information: This new statutory rule contains several ambiguities and also leaves to the PBGC the development of specific rules and procedures necessary to make this system work. The regulation will, for example, contain rules on how the PBGC will value its employer liability recoveries for purposes of computing the recovery ratio, whether the allocation of amounts payable under this provision will be done as part of the regular section 4044 asset allocation, and whether the PBGC will pay these benefits by increasing the amount of annuity payments it is making to participants or making lump sum payments.

PBGC — **Proposed Rule Stage**

3385. RETIREMENT EQUITY ACT AMENDMENTS - VALUATION OF PLAN BENEFITS

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1341

CFR Citation: 29 CFR 2619

Legal Deadline: None

Abstract: The Retirement Equity Act of 1984 ("REA") requires plans to provide certain benefits, prohibits the elimination of benefit options and certain early retirement benefits and retirement- type subsidies, and mandates the range of interest rates that may be used in calculating the amount of a non-consensual lump sum benefit. The Tax Reform Act of 1986 ("TRA '86") slightly modified the interest rate restrictions and extended them to the calculation of all lump sum benefits.

These rules necessitate several amendments to the PBGC's valuation of benefits regulation (29 CFR Part 2619). The major changes will address the rules on determining the form of benefit to be valued on plan termination and the interest rate rules for lump sum payments in standard terminations.

The PBGC had planned to issue the amendments to the valuation of benefits regulation concurrently with the two revised termination regulations. However, work on these amendments has been delayed pending PBGC's efforts with the Internal Revenue Service to develop a definition of the term "benefit liabilities", which was introduced by the Pension (cont.)

PENSION BENEFIT GUARANTY CORPORATION (PBGC) — **Final Rule Stage**

3386. RULES UNDER SECTIONS 4041A AND 4281 FOR PLANS TERMINATED BY MASS WITHDRAWAL

Legal Authority: 29 USC 1302(b)(3) ERISA; 29 USC 1341A ERISA; 29 USC 1441 ERISA

CFR Citation: 29 CFR 2675

Legal Deadline: None

Abstract: Section 4041A of ERISA provides rules with respect to the termination of multiemployer plans and the payment of benefits under those plans. Under section 4041A(f)(2), PBGC is authorized to prescribe rules for the administration of those plans that are appropriate to protect the interests of plan participants and beneficiaries or to prevent unreasonable loss to the insurance system. Under section 4281(b), the plan sponsor of a plan that has terminated by mass withdrawal is required annually to determine the value of the plan's nonforfeitable benefits and assets. If the value of the benefits exceeds the value of the assets, the sponsor must amend the plan to eliminate benefits not eligible for PBGC's guarantee under section 4022A(b), to the extent necessary to insure that the plan assets are sufficient to pay all nonforfeitable benefits. This determination of sufficiency is to be made in accordance with rules prescribed by PBGC. This regulation would establish the rules for administering plans that have terminated by mass withdrawal, including the rules for determining sufficiency in the circumstances described above. The primary purpose (cont)

3387. REDUCTION OR WAIVER OF PARTIAL WITHDRAWAL LIABILITY

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1388(e)(3)

CFR Citation: 29 CFR 2646

Legal Deadline: None

Abstract: Section 4208 of ERISA provides for the reduction or elimination under certain circumstances of an employer's partial withdrawal liability arising from a 70 percent reduction in contribution base units. That section also authorizes the PBGC to prescribe rules for the reduction or elimination of partial withdrawal liability under other conditions. The regulation will provide for the abatement of partial withdrawal liability arising from the cessation of the obligation to contribute under a collective bargaining agreement or with respect to a facility. Section 4208 also requires the PBGC to issue a regulation under which a multiemployer plan may adopt rules for the reduction or elimination of partial withdrawal liability. This regulation will allow plans to ease the statutory partial withdrawal liability rules where, for example, the rules are harmful to the plan because they discourage an employer from increasing its participation under the plan, or where the statutory rules create administrative burdens which outweigh the protections afforded by the rules.

3388. ADJUSTMENT OF WITHDRAWAL LIABILITY FOR A WITHDRAWAL SUBSEQUENT TO A PARTIAL WITHDRAWAL

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1386(b)

CFR Citation: 29 CFR 2649

Legal Deadline: None

Abstract: Under section 4206(b) of ERISA, if an employer partially or completely withdraws from a multiemployer plan subsequent to an earlier partial withdrawal from that plan, the employer's liability for the second withdrawal must be reduced by the amount of its liability for the earlier partial withdrawal. The purpose of this credit is to avoid plans double-charging employers for the same unfunded liabilities. Section 4206(b) also requires the PBGC to prescribe regulations adjusting this credit to ensure that the employer's liability for its second withdrawal properly reflects the employer's share of liability with respect to the plan.

PBGC — **Final Rule Stage**

The need for this adjustment to the credit can be seen from the following example. In a plan that uses the rolling-5 allocation method, an employer's withdrawal liability is based on its last five years' participation in the plan. If an employer's second withdrawal occurs more than five years after its partial withdrawal, the liability for the second withdrawal is based solely on plan participation subsequent to the partial (cont)

Final Action Effective	10/00/89	

Small Entities Affected: None

Government Levels Affected: None

Additional Information: ABSTRACT CONT: withdrawal. Thus, there is no double-charging with respect to the old liabilities and no reason to give the employer a credit against its liability for the second withdrawal. However, without this regulation, the employer would get that credit under the statute. There are many other possible situations in which the employer's credit should similarly be reduced in order to ensure equitable treatment of the withdrawing employer vis-a-vis the other employers still contributing to the plan.

This regulation will result in some shifting of liabilities among employers contributing to a multiemployer plan. An employer that has another withdrawal following a partial withdrawal may incur greater liability for the second withdrawal because of the reduction in the credit for the prior partial withdrawal. However, this increase in liability would reduce the unfunded vested benefits allocable to other employers that withdraw thereafter. In the aggregate, the regulation will impose no new costs.

Agency Contact: Ms. Debra Bisco, Attorney, Pension Benefit Guaranty Corporation, Office of the General Counsel, (22500), 2020 K St., NW, Washington, DC 20006, 202 778-8824

RIN: 1212-AA37

3389. DETERMINATION OF WITHDRAWAL LIABILITY FOLLOWING A MERGER

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1391(f)

CFR Citation: 29 CFR 2642 (Amendment)

Legal Deadline: None

Abstract: The merger of two multiemployer plans creates a problem as to how the successor plan's unfunded vested benefits are to be allocated in order to determine withdrawal liability for post-merger withdrawals. Frequently, the two plans will have been using different allocation methods prior to the merger. Even if they were using the same method, if they had different plan years, that would create different allocations.

For this reason, section 4211(f) of ERISA requires the PBGC to issue regulations prescribing rules for the post-merger allocation of unfunded vested benefits. The PBGC proposes to establish rules that parallel the statutory allocation methods: i.e., there would be a presumptive allocation method that would apply to plans unless they chose otherwise, and plans would be permitted to adopt certain modifications to this presumptive method without the PBGC's approval and other more significant modifications with the PBGC's approval. (cont)

Timetable:

Action	Date	FR Cite
NPRM	11/09/87	52 FR 43082
NPRM Comment Period End	01/08/88	
Final Action	11/00/89	
Final Action Effective	12/00/89	

Small Entities Affected: None

Government Levels Affected: None

Additional Information: ABSTRACT CONT: This regulation will remove a significant impediment to multiemployer plan mergers by eliminating employers' concern and confusion over how their withdrawal liability would be calculated after a merger. Plan mergers are generally to be encouraged since a larger plan is typically a stronger plan because of its broader contribution base, and because portability of

VOL 54 ISS 77 AP 24 1989 UMI

benefits is increased. This regulation will impose no new costs.

3390. PAYMENT OF PREMIUMS

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1306; 29 USC 1307; PL 100-203, Sec 9331

CFR Citation: 29 CFR 2610

Legal Deadline: None

Abstract: The Pension Protection Act substantially altered the rules pertaining to single-employer plan premiums that are paid to the PBGC. Under the Act, there is a flat per capita charge (increased from that under prior law) plus a new variable rate charge tied to the value of a plan's unfunded vested benefits. The new premium rules are effective for plan years beginning after December 31, 1987.

On June 30, 1988, the PBGC issued an interim regulation implementing these rules. Because of the need to issue the regulation quickly to provide guidance for 1988 premium payments, the PBGC did not solicit public comment before issuing the regulation. For the same reason, the interim regulation did not address certain relevant, but secondary, issues pertaining to the new rules. Therefore, on October 5, 1988, the PBGC issued a notice of proposed rulemaking in order to permit public comment on the interim regulation. The NPRM also addressed problems or questions raised by the public in response to the interim regulation.

Final Action Effective	06/00/89	

Small Entities Affected: Undetermined

Government Levels Affected: None

Additional Information: ABSTRACT CONT: The PBGC expects to issue the final regulation in June 1989, effective for 1989 premium payment. As set forth in the proposed regulation, the final regulation will contain some new provisions further simplifying the rules for determining a plan's unfunded vested benefits and excluding more plans from having to calculate unfunded vested benefits.

Agency Contact: Mr. Harold Ashner, Attorney, Pension Benefit Guaranty Corporation, Office of the General Counsel, (22500), 2020 K St., NW, Washington, D.C. 20006, 202 778-8823

RIN: 1212-AA53

3391. DISTRESS TERMINATIONS OF SINGLE-EMPLOYER PLANS

Significance: Regulatory Program

Legal Authority: PL 99-272, Sec 11007; PL 99-272, Sec 11009; PL 100-203, Sec 9312(c) to 9312(d); PL 100-203, Sec 9313(b) to 9313(c); PL 100-203, Sec 9314(a)

CFR Citation: 29 CFR 2616

Legal Deadline: None

Abstract: The Single-Employer Pension Plan Amendments Act of 1986 substantially revised ERISA section 4041 dealing with the voluntary termination of single-employer pension plans. Under amended section 4041, a plan may voluntarily terminate only if the termination satisfies the statutory conditions for a standard or distress termination. These rules were further modified by the 1987 Pension Protection Act, which increased the benefits that must be provided, or for which the employer maintaining the plan is liable, upon plan termination. Thus, under current law, unless a plan has sufficient assets to satisfy all plan benefit liabilities, it may voluntarily terminate only in a "distress" termination; i.e., a termination in which the plan sponsor and all members of its controlled group are able to demonstrate either such financial hardship or unduly burdensome pension costs that, as a practical matter, they are unable to continue to maintain the plan. CONT.

Additional Information: ABSTRACT CONT:

The statutory rules and procedures for distress terminations are substantially different from the prior rules and procedures for terminating insufficient plans. Therefore, it is necessary to revise the PBGC's plan termination regulations to reflect these new rules and procedures. This regulation covering distress terminations and a companion rule covering standard terminations (to be codified in Part 2617) will replace the PBGC's principal termination regulations on notices of intent to terminate and termination of sufficient plans (existing Parts 2616 and 2617).

Although the notice of proposed rulemaking for this regulation was issued prior to enactment of the Pension Protection Act, the final rule will reflect the relevant statutory changes from that Act.

3392. STANDARD TERMINATIONS OF SINGLE-EMPLOYER PLANS

Significance: Regulatory Program

Legal Authority: PL 99-272, Sec 11007; PL 99-272, Sec 11008; PL 100-203, Sec 9311; PL 100-203, Sec 9313(a); PL 100-203, Sec 9313(c); PL 100-203, Sec 9314(a)

CFR Citation: 29 CFR 2617

Legal Deadline: None

Abstract: Under ERISA Section 4041, as amended by the Single-Employer Pension Plan Amendments Act of 1986 and the Pension Protection Act, absent a showing of financial hardship or unduly burdensome pension costs that would satisfy the requirements for a distress termination, a single-employer plan may be voluntarily terminated only if it is sufficient for all benefit liabilities (i.e., all benefits provided under the plan on the termination date, whether or not vested). This is referred to as a "standard" termination. SEPPAA also modified many of the termination rules and procedures that

applied under prior law, both to increase the protections afforded plan participants and beneficiaries and to simplify and expedite the PBGC's processing of these sufficient plan terminations. It is, therefore, necessary to promulgate this new regulation implementing the new rules and procedures for standard terminations. This regulation and its companion regulation covering distress terminations (to be codified in Part 2616) will replace the PBGC's principal termination regulations on notices of intent to terminate and termination of sufficient plans (existing Parts 2616 and 2617). 3393. MISCELLANEOUS SEPPAA/PPA AMENDMENTS

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b); 29 USC 1322; 29 USC 1343; 29 USC 1344; 29 USC 1362 to 1364; 29 USC 1367 to 1368; PL 99-272, Sec 11008 to 11011; PL 99-272, Sec 11016; PL 100-203, Sec 9311 to 9314; PL 100-203, Sec 9331

CFR Citation: 29 CFR 2606; 29 CFR 2615; 29 CFR 2622; 29 CFR 2623

Legal Deadline: None

Abstract: The Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") and the Pension Protection Act ("PPA") made several changes in Title IV rules and procedures that affect and, in some cases, override portions of several PBGC regulations. For this reason, these regulations - administrative review of agency decisions, benefit reductions in terminated plans, reportable events and employer liability - must be amended to conform them to the current law. For example, because SEPPAA altered the determinations that the PBGC may make with respect to voluntary plan terminations, the list in 29 CFR 2606.1(b) of determinations subject to agency review must be amended.

Similarly, SEPPAA contained, for distress terminations, specific benefit cutback rules. These rules differ somewhat from those set forth in 29 CFR Part 2623 and, therefore, conforming amendments to Part 2623 are required. SEPPAA and the PPA significantly changed the rules on employer liability to the PBGC in distress and involuntary terminations. Now, an employer is liable to the PBGC for the total plan underfunding. (CONT)

Government Levels Affected: None

Additional Information: ABSTRACT CONT: i.e., for all unfunded benefit liabilities. Further, the 30 percent of net worth limitation is now relevant only in determining the amount subject to PBGC's statutory lien and the status of PBGC's claim in bankruptcy. The employer liability regulation needs to be amended to reflect these changes.

Semiannual Regulatory Agenda

VOL. 54 ISS 77 AP 24 1989 UMI

RAILROAD RETIREMENT BOARD (RRB)

RAILROAD RETIREMENT BOARD

20 CFR Ch. II

Semiannual Agenda of Regulations Under Development or Review

AGENCY: Railroad Retirement Board.

ACTION: Agenda of regulations under development or review.

SUMMARY: This agenda contains lists of regulations that the Board is developing or proposes to develop in the next twelve months, and regulations that are scheduled to be reviewed in that period.

ADDRESS: 844 Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: Steven A. Bartholow, Deputy General Counsel, Railroad Retirement Board, (312) 751-4935 (FTS 386-4935).

SUPPLEMENTARY INFORMATION: Regulations that are routine in nature or pertain solely to internal agency management have not been included in the agenda. Current regulations that are proposed to be modified based on a completed review of the regulations are listed in the agenda.

Dated: February 24, 1989.
By Authority of the Board.

Beatrice Ezerski,

Secretary to the Board.

Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
3395	Part 220 Determining Disability	3220-AA01
3396	Eligibility for an Annuity	3220-AA15
3397	Recovery of Overpayments	3220-AA44
3398	Sickness Benefits	3220-AA45

3433	Collection of Debts by Federal Tax Refund Offset	3220-AA81

RAILROAD RETIREMENT BOARD (RRB) — Proposed Rule Stage

3395. PART 220 DETERMINING DISABILITY

Significance: Regulatory Program

Legal Authority: 45 USC 231f(b)(5)

CFR Citation: 20 CFR 220

Legal Deadline: None

Abstract: The Board's regulations with respect to disability determinations have not been updated for several years and they are, in certain respects, obsolete. When revised, this regulation should ease the administration of disability benefits and result in greater consistency in disability determinations.

3433. ● COLLECTION OF DEBTS BY FEDERAL TAX REFUND OFFSET

Legal Authority: 45 USC 231f(b)(5); 31 USC 3720A

CFR Citation: 20 CFR 366

Legal Deadline: None

Abstract: The Railroad Retirement Board amended its regulations by adding Part 366 to establish a procedure whereby delinquent debts owed to the Agency will be referred to the IRS for collection by offset against Federal income tax refunds. Title 31 USC 3720A authorizes agencies to notify the IRS of a past-due, legally enforceable debt, for the purpose of offsetting the debtor's tax refund. This regulation applies to tax refunds payable under section 6402 of the Internal Revenue Code of 1986 after December 31, 1988, and on or before January 10, 1994. This regulation had to become effective on the date of publication in the FR in order for the Board to participate in the Calendar Year 1989 Federal Tax Refund Offset Program.

Regulatory Agenda

AGENCY: Selective Service System.

ACTION: Regulatory agenda.

SUMMARY: The purpose of this agenda is to report the proposed rulemaking activities of the Selective Service System that might affect the processing of registrants under the Military Selective Service Act (50 U.S.C. App. 451 *et seq.*). This information will allow the public to participate in the System's decision-making at an early stage.

FOR FURTHER INFORMATION CONTACT: Henry N. Williams, General Counsel, Selective Service System, Washington, DC 20435, telephone (202) 724-1167.

SUPPLEMENTARY INFORMATION: The agenda is published in accord with the requirements of E.O. 12291. Selective Service Regulations appear in 32 CFR Chapter XVI.

Dated: March 10, 1989.

Samuel K. Lessey Jr.,

Director of Selective Service.

VOL 54 ISS 77 AP 24 1989 UMI

SMALL BUSINESS ADMINISTRATION (SBA)

SMALL BUSINESS ADMINISTRATION

13 CFR Ch. I

Improving Government Regulations; Semiannual Agenda

AGENCY: Small Business Administration.

ACTION: Publication of the semiannual agenda of regulations under review or development by the Small Business Administration.

SUMMARY: This is SBA's 20th semiannual agenda of regulations. Although not a regulatory Agency, SBA has attempted to draft agendas that meet both the criteria and the spirit of the regulatory review process. This agenda is published pursuant to Executive Order 12291 and the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, Pub. L. 96-354, effective January 1, 1981.

FOR FURTHER INFORMATION CONTACT: For further information on agenda items, the public is encouraged to contact the individual Agency official listed for the particular item.

For information concerning SBA overall Regulatory Review and Development Program or for general semiannual agenda questions, contact Martin D. Teckler, Deputy General Counsel, Small Business Administration, 1441 L Street, NW., Washington, DC 20416, 202/653-6644.

SUPPLEMENTARY INFORMATION: The SBA agenda will contain many regulations which are limited in public impact, but they are included to increase public knowledge of all SBA regulatory activities and allow for increased public participation in the review and development process.

Public comments on SBA's previous agendas have been general, and all were positive. None were directed at specific contents, nor were any changes suggested or recommended.

The agenda format has four parts. Part I, Pre-Rulemakings, includes investigations and reviews to be conducted prior to deciding whether or not to propose a rule or rule change. Part II, Proposed Rules, includes rulemaking which will be proposed during the six-month period covered by the agenda. Part III, Final Rules, includes proposed rules which will be finalized during the period covered by the agenda. Part IV, Completed Actions, includes regulations completed or withdrawn, and reviews completed since the preceding agenda.

Publication of this agenda does not impose any binding obligation on SBA with regard to any specific item in the agenda. Additional regulatory action not listed on the agenda is not precluded.

Dated: February 24, 1989.

James Abdnor,

Administrator.

BEST COPY AVAILABLE

VOL. 54 ISS 77 AP 24 1989 UMI

Abstract: Amend disaster loan regulation by authorizing SBA to establish a flexible repayment schedule during the first two years of a disaster loan, reflecting the borrower's ability to pay. Rule would also harmonize SBA's disaster loan making authority with the Federal Emergency Management Administration's (FEMA) standard flood insurance policy.

3479. SMALL BUSINESS SIZE STANDARDS FOR SURVEYING AND MAPPING SERVICES

Significance: Regulatory Program

Legal Authority: 15 USC 632(a); 15 USC 634(b)(6); PL 99-591, Sec 921; PL 99-661, Sec 921

CFR Citation: 13 CFR 121

Legal Deadline: None

Abstract: Review of size standards for surveying and mapping services pursuant to the National Defense Authorization Act of 1987 (PL 99-661). Purpose of the review is to ensure that small business set-aside plus 8(a) contracts together account for no more than approximately 30 percent of the total value of Federal contracts for each industry covered by the legislation. Adjustment of the size standard for both surveying and mapping services in Standard Industrial Classification (SIC) Code 8713 to $.75 million in gross annual receipts.

Semiannual Regulatory Agenda

VOL. 54 ISS 77 AP 24 1989 UMI

TENNESSEE VALLEY AUTHORITY (TVA)

TENNESSEE VALLEY AUTHORITY

18 CFR Ch. XIII

Regulatory Agenda

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Regulatory agenda.

SUMMARY: As a nonregulatory agency, TVA originates very few regulations. However, TVA has two regulations under development and also has published a notice of intent with regard to a third regulation. TVA is therefore publishing a regulatory agenda in voluntary compliance with Executive Order No. 12291.

FOR FURTHER INFORMATION CONTACT: For further information please contact the persons listed.

W. F. Willis,

Executive Vice President and Chief Operating Officer.

TENNESSEE VALLEY AUTHORITY (TVA) — Proposed Rule Stage

3484. PROTECTION OF ARCHAEOLOGICAL RESOURCES

Legal Authority: 16 USC 470aa to 470ll

CFR Citation: 18 CFR 1312

Legal Deadline: None

Abstract: The planned regulations will implement provisions of the Archaeological Resources Protection Act of 1979 by providing protection of archaeological resources on public lands in TVA custody and control. TVA will seek to protect such resources through permits authorizing excavation or removal of resources, through civil penalties for unauthorized excavation or removal, through preservation of archaeological resource collections and data, and through assuring confidentiality of information about resources when disclosure would threaten the resources. The planned regulations will supplement existing uniform regulations by assigning specific responsibilities within TVA.

Federal Acquisition Regulation; Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

DEPARTMENT OF DEFENSE/GENERAL SERVICES ADMINISTRATION NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (FAR)

DEPARTMENT OF DEFENSE/GENERAL SERVICES ADMINISTRATION/NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Ch. I

Semiannual Agenda

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Semiannual agenda.

SUMMARY: This agenda provides summary descriptions of regulations being developed by the Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council, in compliance with Executive Order 12291, Federal Regulation. This agenda is being published to allow interested persons an opportunity to participate in the rulemaking process.

The FAR Secretariat has attempted to list all regulations pending at the time of publication, except for minor and routine or repetitive actions, however, unanticipated requirements may result in the issuance of regulations that are not included in this agenda. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the dates shown.

FOR FURTHER INFORMATION CONTACT: Margaret A. Willis, FAR Secretariat, (202) 523-4755.

SUPPLEMENTARY INFORMATION: DOD, GSA, and NASA, under their several statutory authorities, jointly issue and maintain the Federal Acquisition Regulation (FAR) and prescribe the FAR system. Revisions to the FAR are made through periodic issuance of Federal Acquisition Circulars (FAC's). None of the regulations listed in this agenda are considered major under Executive Order 12291, Federal Regulation.

Dated: February 14, 1989.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition and Regulatory Policy.

DEPARTMENT OF DEFENSE/GENERAL SERVICES ADMINISTRATION/NATIONAL AERONAUTICS AND SPACE

Final Rule Stage
ADMINISTRATION (FAR)

3488. FEDERAL ACQUISITION REGULATION (FAR) - FEDERAL ACQUISITION CIRCULAR 84-10(FAR CASE 85-32)

Legal Authority: 40 USC 486(c); 42 USC 2473(c); 10 USC Chapter 137

CFR Citation: 48 CFR 7; 48 CFR 15; 48 CFR 19; 48 CFR 34; 48 CFR 52

Legal Deadline: Final, Statutory, May 1, 1985.

Abstract: (1) Implement Sec. 1213 of Pub. L. 98-525 and Sec. 201 of Pub. L. 98-577 by (a) requiring that the contracting officer, prior to contracting, review the acquisition history of the supplies or services and the description of the supplies, and (b) specifying new requirements applicable to planning for the solicitation of a major system production contract; (2) Implement Sec. 1245 of Pub. L. 98-525 and Sec. 501 of Pub. L. 98-577 by specifying that offerors/contractors (a) are required to distribute costs within contracts on a basis that ensures that unit prices of supplies are in proportion to the item's base cost, (b) may be required to identify supplies that they will not manufacture or to which they will not contribute significant value, and (c) are required to flow the requirement down to subcontractors; (3) Implement Sec. 1216 of Pub. L. 98-525 and Sec. 204 of Pub. L. 98-577 by requiring offerors/contractors in certain acquisitions to certify that the prices offered for those items of supply that the contractor offers for sale to the public are no higher than any lower price charged to any other customer during the preceding 60 days, or submit a written justification for any (cont)

Legal Deadline: None

Abstract: To amend the FAR to eliminate terminology that restricts use of the clause at 52.217-9 in solicitations and contracts for services. The clauses at 52.204-1 and 52.217-6 through 52.217-9 and related clause prefaces are also revised to make them "fill-in-the-blank" type clauses rather than requiring necessary additional information to be provided elsewhere in the contract (i.e., in the contract Schedule, rather than in Section I).

Commodity Futures Trading Commission

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

COMMODITY FUTURES TRADING COMMISSION (CFTC)

COMMODITY FUTURES TRADING COMMISSION

17 CFR Ch. I

Regulatory Flexibility Agenda

AGENCY: Commodity Futures Trading Commission.

ACTION: Publication of regulatory flexibility agenda.

SUMMARY: The Commodity Futures Trading Commission, in accordance with the requirements of the Regulatory Flexibility Act, is publishing a semiannual agenda of significant rules which the Commission expects to propose or promulgate over the next year. The Commission welcomes comments from small entities and others on the agenda.

ADDRESS: Comments should be sent to: Gerry Smith, Office of the Executive Director, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581 (202) 254-6090.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* ("RFA"), sets forth a number of requirements for agency rulemaking. Among other things, the RFA requires that:

(a) During the months of April and October of each year, each agency shall publish in the **Federal Register** a regulatory flexibility agenda which shall contain:

(1) A brief description of the subject area of any rule which the agency expects to propose or promulgate which is likely to have a significant economic impact on a substantial number of small entities;

(2) A summary of the nature of any such rule under consideration for each subject area listed in the agenda pursuant to paragraph (1), the objectives and legal basis for the issuance of the rule, and an approximate schedule for completing action on any rule for which the agency has issued a general notice of proposed rulemaking; and (3) The name and telephone number of an agency official knowledgeable concerning the items listed in paragraph (1).

5 U.S.C. 602(a). Accordingly, the Commission has prepared an agenda of significant rules which it presently expects may be considered during the course of the next year, irrespective of their potential impact on small entities.[1] In addition, the Commission notes that it has withdrawn its proposal entitled "Exchange Recordkeeping Regarding Clearing Organizations' Trade Registers" which proposed adding certain customer type indicator codes and was published on June 6, 1988 at 53 FR 21490.

The Commission's agenda represents its best estimate of significant rules which will be considered over the next twelve months.[2] In this regard, section 602(d) of the RFA, 5 U.S.C. 602(d), provides: "Nothing in [section 602] precludes an agency from considering or acting on any matter not included in a regulatory flexibility agenda or requires an agency to consider or act on any matter listed in such agenda."

The Commission is publishing its April 1989 Regulatory Flexibility Agenda as part of the Unified Agenda of Federal Regulations. The Unified Agenda of Federal Regulations is coordinated by the Office of Management and Budget pursuant to Executive Order 12291. While participation by executive agencies in the Agenda is mandatory, independent agencies, such as the Commission, participate in the Unified Agenda on a voluntary basis.

The Commission's April 1989 Regulatory Flexibility Agenda is set forth below.

Issued in Washington, DC on March 23, 1989, by the Commission.

Jean A. Webb,

Secretary of the Commission.

Prerule Stage

Sequence Number	Title	Regulation Identifier Number
3577	Distribution of "Risk Disclosure Statement" by Futures Commission Merchants and Introducing Brokers	3033-AA64

Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
3578	Minimum Financial and Related Reporting Requirements for Futures Commission Merchants	3038-AA10
3579	Rules Relating to Commission Review of National Futures Association Decisions in Disciplinary, Membership Denial, Registration and Member Responsibility Actions	3038-AA57

[1] The Commission has published its definition of small entity to be used by the Commission in connection with rulemaking proceedings. 47 FR 18618 (April 30, 1982). Pursuant to those definitions, the Commission is not required to list many of the agenda items contained in this regulatory flexibility agenda. *See* 5 U.S.C. 602(a)(1). Moreover, the Commission has previously certified, pursuant to section 605 of the RFA, 5 U.S.C. 605, that certain items contained in this agenda will not have a significant economic impact on a substantial number of small entities. Accordingly, listing of an event in this regulatory flexibility agenda should not, in any event, be taken as a determination that a rule, when proposed or promulgated, will in fact require a regulatory flexibility analysis. However, the Commission hopes that the publication of an agenda which includes significant rules, regardless of their potential impact on small entities, may serve the public generally by providing an early and meaningful opportunity to participate in and comment on the formulation of new or revised regulations.

[2] In addition to publishing the regulatory flexibility agenda, the Commission also makes available to the public, on a monthly basis, a calendar and, on a weekly basis, an advisory which list rules that the Commission is considering or will consider in the near future.

COMMODITY FUTURES TRADING COMMISSION (CFTC) — Prerule Stage

3577. ● DISTRIBUTION OF "RISK DISCLOSURE STATEMENT" BY FUTURES COMMISSION MERCHANTS AND INTRODUCING BROKERS

Legal Authority: 7 USC 6(b); 7 USC 6b; 7 USC 6g(1); 7 USC 6o; 7 USC 12a(5); 7 USC 24

CFR Citation: 17 CFR 1.55; 17 CFR 30.6; 17 CFR 190.10

Legal Deadline: None

Abstract: The Commission is considering whether to amend Rule 1.55, its basic rule with respect to risk disclosure by futures commission merchants and introducing brokers. Any such amendments would be designed to further simplify risk disclosure with respect to trading of domestic and foreign futures products so as to reduce the number of separate risk disclosure documents required by the Commission, the National Futures Association and other self regulatory organizations (SROs), including foreign SROs. The Commission may also consider whether the current rules need to be clarified regarding disclosure of the risk of bankruptcy and disclosures required when an account is transferred from one futures commission merchant or introducing broker to another futures commission merchant or introducing broker.

COMMODITY FUTURES TRADING COMMISSION (CFTC) — Proposed Rule Stage

3578. MINIMUM FINANCIAL AND RELATED REPORTING REQUIREMENTS FOR FUTURES COMMISSION MERCHANTS

Legal Authority: 7 USC 6c; 7 USC 6f; 7 USC 6g; 7 USC 12a

CFR Citation: 17 CFR 1.12; 17 CFR 1.17

Legal Deadline: None

Abstract: The Commission adopted two amendments to its minimum financial and related requirements for futures commission merchants (FCMs). One amendment preserves the one-day grace period for debit/ deficit accounts unless the account had been in debit/deficit status on the previous business day and the previous day's debit or deficit was not timely satisfied in its entirety by the deposit of new funds. The second amendment is an enhancement of the financial early warning system which requires an FCM to notify its designated self-regulatory organization and the Commission immediately when it determines that an account it is carrying is undermargined by an amount which exceeds its adjusted net capital. The Commission also reproposed a rule to clarify the requirements for and treatment of a guaranteed account.

3579. RULES RELATING TO COMMISSION REVIEW OF NATIONAL FUTURES ASSOCIATION DECISIONS IN DISCIPLINARY, MEMBERSHIP DENIAL, REGISTRATION AND MEMBER RESPONSIBILITY ACTIONS

Legal Authority: 7 USC 21(h); 7 USC 21(i); 7 USC 21(o)(2); 7 USC 12(a)(5); 7 USC 4a

CFR Citation: 17 CFR 3; 17 CFR 171

Legal Deadline: None

Abstract: The Commission proposes to adopt rules establishing standards and procedures for Commission review of decisions of registered futures associations such as the National Futures Association ("NFA"). The Commission is proposing specific standards of review for decisions by NFA in four types of actions - disciplinary actions, membership denial actions, registration actions and member responsibility actions. The proposed rules would establish a common procedure for seeking review and a stay of a final decision by NFA in disciplinary, membership denial and registrations actions. The proposed rules would also establish a procedure for seeking review of and a stay of decisions by NFA in a member responsibility action. In proposing these rules, the Commission seeks to promulgate standards for review that will permit NFA to exercise its expertise and independent judgment in the proceedings subject to these rules while providing a person aggrieved by the result of NFA's action an effective means to obtain relief from prejudicial errors in NFA's determination. The Commission also seeks to establish an appellate process that is comprehensive, balanced, efficient and fair.

3580. REGULATION OF HYBRID AND RELATED INSTRUMENTS

Legal Authority: 7 USC 2; 7 USC 6c; 7 USC 12a

CFR Citation: 17 CFR 34

Legal Deadline: None

Abstract: The Commodity Futures Trading Commission is proposing to adopt regulations concerning certain "hybrid" instruments that combine characteristics of commodity option contracts with debt or depository interests. The development of hybrid instruments with commodity-related components has raised questions concerning the status of such instruments under the Commodity Exchange Act and Commission regulations. The proposed rules would establish an exemption from CFTC regulations under the Act for hybrid instruments with limited commodity option components, based upon the limited nature of the option component and deference to other existing regulatory standards applicable to the noncommodity component of such instruments. In addition, the proposed rules would establish a notice requirement for hybrid instruments qualifying for the proposed exemption.

COMMODITY FUTURES TRADING COMMISSION (CFTC) — Final Rule Stage

3581. REGULATIONS PERMITTING THE GRANT, OFFER AND SALE OF OPTIONS ON PHYSICAL COMMODITIES (DEALER OPTIONS)

Legal Authority: 7 USC 6c(b); 7 USC 6c(d); 7 USC 12(a)(5)

CFR Citation: 17 CFR 1; 17 CFR 3; 17 CFR 32

Legal Deadline: None

Abstract: Congress has directed the Commission to issue regulations permitting grantors and futures commission merchants to grant, offer and sell so-called "dealer options" on certain physical commodities subject to certain conditions specified by statute and such other uniform and reasonable requirements as the Commission may prescribe. At present, the only persons who may lawfully grant dealer options are United States domiciles who, on

CFTC — Final Rule Stage

May 1, 1978, were in the business of buying, selling, producing or otherwise using that commodity. The Commission has reproposed rules, principally concerning registration of dealer option grantors, requirements for the segregation of customer funds, disclosure to customers and prospective customers, and minimum financial requirements. The Commission intends to re-evaluate the proposed rules in light of regulatory changes that have occurred since 1980.

RIN: 3038-AA03

3582. RECORDKEEPING AND THE EXCHANGE OF FUTURES FOR CASH COMMODITIES OR OF FUTURES IN CONNECTION WITH CASH COMMODITY TRANSACTIONS

Legal Authority: 7 USC 6; 7 USC 6c(a); 7 USC 6g; 7 USC 7; 7 USC 7a; 7 USC 12; 7 USC 12(a)(5)

CFR Citation: 17 CFR 1.35 (a)(2)

Legal Deadline: None

Abstract: The proposed regulation is necessary to ensure proper monitoring of exchanges of futures for physicals. The regulation would require records of customer cash transactions underlying EFPs which are now difficult to access to be routinely retained and provided to the contract market or the Commission upon request. The records would be used to monitor and ensure the bona fides of EFPs. The proposed regulation is intended to constitute the least burdensome method of achieving the Commission's goal of monitoring EFPs.

3583. ● INDEMNIFICATION OF CFTC EMPLOYEES

Legal Authority: 7 USC 4a(j)

CFR Citation: 17 CFR 140; 28 CFR 50.15

Legal Deadline: None

Abstract: The potential liability of individual CFTC employees for tortious conduct occurring within the scope of their employment has increased in the wake of recent Supreme Court decisions. Presently, the CFTC has no rules to indemnify Commission employees who are sued in their individual capacities and who suffer an adverse judgment as a result of conduct taken within the scope of their employment. The prospect of personal liability might adversely affect Commission operations, decision-making, and policy determination. A partial solution was provided when the "Federal Employees Liability Reform and Tort Compensation Act of 1988" (P.L. 100-694) was enacted. This new law removes the potential personal liability of federal employees for common law torts committed within the scope of their employment and provides that the exclusive remedy for such torts is through an action against the U.S. under the Federal Tort Claims Act. However, this does not extend to a civil action against a federal employee which is brought for a violation of the Constitution or federal statute which would authorize such action. A change to permit indemnification would help alleviate this problem.

3584. ● LEVERAGE TRANSACTIONS

Legal Authority: 7 USC 12a (5); 7 USC 23

CFR Citation: 17 CFR 1.3 (f); 17 CFR 3.2; 17 CFR 3.3; 17 CFR 3.18; 17 CFR 3.20; 17 CFR 3.21; 17 CFR 3.31; 17 CFR 3.32; 17 CFR 3.33; 17 CFR 3.40; 17 CFR 3.43; 17 CFR 31; 17 CFR 145.5(d)(2)(i)(H); 17 CFR 147.3(b)(4)(i)(A)(8)

Legal Deadline: None

Abstract: The Commodity Futures Trading Commission has proposed rules which will permit additional participation in the leverage business, as directed by Congress in the Futures Trading Act of 1986. The proposed amendments to existing rules and the proposed new rules are essentially procedural in nature. They are designed to provide for a regulatory structure of direct supervision by the National Futures Association (NFA) under Commission oversight. Such a structure is consistent with the other regulatory programs administered by the Commission under the Commodity Exchange Act. Under the proposed rules, each leverage transaction merchant (LTM) would be required to be a member of the NFA, which would be required to adopt rules establishing minimum financial, cover, segregation and sales practice requirements, and related reporting requirements. With respect to each area, these rules would have to be as least as stringent as the standards currently set forth by the Commission in Part 31 of its rules. The NFA also would be required to have an arbitration procedure to settle leverage customer claims and grievances.

Consumer Product Safety Commission

Semiannual Regulatory Agenda

VOL. 54 ISS 77 AP 24 1989 UMI

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Ch. II

Regulatory Flexibility Act; Semiannual Regulatory Flexibility and Unified Agendas

AGENCY: Consumer Product Safety Commission.

ACTION: Publication of regulatory flexibility and unified agendas.

SUMMARY: The Regulatory Flexibility Act (RFA) requires each Federal agency to publish twice each year a regulatory flexibility agenda listing the rules expected to be proposed or promulgated which are likely to have a significant economic impact on a substantial number of small entities, including small businesses, small organizations, and small governmental units. In this document, the Commission publishes its semiannual regulatory flexibility agenda.

Additionally, although not required to do so, the Commission has elected to comply voluntarily with those provisions of Executive Order 12291 which require executive agencies to publish an agenda of regulatory actions expected to be under development or review by the agency during the succeeding 12 months and which further provide that such an agenda may be combined with an agency's regulatory flexibility agenda published in accordance with the RFA.

DATE: The Commission welcomes comments on each subject area of the agenda, particularly from small entities. Written comments concerning the agenda should be received in the Office of the Secretary by June 30, 1989.

ADDRESS: Comments on the regulatory flexibility agenda should be sent to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207, telephone (301) 492-6800, and should be titled "Regulatory Flexibility Agenda."

FOR FURTHER INFORMATION CONTACT: For further information on the agenda in general, contact: Allen F. Brauninger, Office of the General Counsel, Consumer Product Safety Commission, Washington, DC 20207, telephone (301) 492-6980. For further information regarding a particular item on the agenda, consult the individual listed in the column headed "Contact" for that particular item.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, 5 U.S.C. 601-612, contains several provisions intended to reduce unnecessary and disproportionate regulatory requirements on small businesses, small governmental organizations, and other small entities. Section 602 of the Act. 5 U.S.C. 602, requires each agency to publish twice each year a regulatory flexibility agenda containing a brief description of the subject area of any rule expected to be proposed or promulgated which is likely to have a "significant economic impact" on a "substantial number" of small entities. The agency must also provide a summary of the nature of the rule, the objectives and legal basis for the rule, and a schedule for acting on each rule for which the agency has issued a notice of proposed rulemaking. The Regulatory Flexibility Agenda shall also contain the name and address of the agency official knowledgeable about the items listed. Further, agencies are required to provide notice of their agendas to small entities and to solicit their comments by direct notification or by inclusion in publications likely to be obtained by such entities.

In addition, Executive Order 12291 requires executive agencies to publish, twice each year, a regulatory agenda of proposed regulations under development or current regulations under review and further states that such an agenda may be combined with an agenda published under the RFA. While the Commission, as an independent regulatory agency, is not required to follow Executive Order 12291, the Commission is complying voluntarily with those provisions concerning publication of a regulatory agenda.

The regulatory flexibility agenda published below lists, for a 12-month period, the regulatory activities expected to be under development or review. These include all such activities, not only those which may have a significant economic impact on a substantial number of small entities.

The agenda contains a brief description and summary of each regulatory activity, including the objectives and legal basis for each; an approximate schedule of target dates, subject to revision, for the development or completion of each activity; and the name and telephone number of a knowledgeable agency official concerning particular items on the agenda. All agency contacts have the same address: Consumer Product Safety Commission, Washington, DC 20207.

Dated: March 22, 1989.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)

Prerule Stage

3585. REQUIREMENTS FOR THE SPECIAL PACKAGING OF HOUSEHOLD SUBSTANCES; REVISION OF TEST PROTOCOL FOR CHILD RESISTANT PACKAGING

Legal Authority: 15 USC 1472 Poison Prevention Packaging Act; 15 USC 1473 Poison Prevention Packaging Act

CFR Citation: 16 CFR 1700.20

Legal Deadline: None

Abstract: On January 19, 1983, the Commission published an Advance Notice of Proposed Rulemaking soliciting comments on ways to amend the existing requirements for child-resistant packaging to improve the effectiveness and efficiency of these requirements. In June 1985, the Commission staff completed testing to determine the feasibility of using some of the alternate procedures for evaluation of child-resistant packaging described in the ANPR. In August 1987, the Commission considered the comments received in response to the ANPR and the staff's recommendations regarding revision of existing requirements for child-resistant packaging. The Commission directed the staff to prepare draft proposals to amend the test protocols used to evaluate the effectiveness of child-resistant packaging. The staff is preparing a briefing package concerning specific revisions to the child test protocol and the adult test protocol. The staff anticipates that it will transmit the briefing package to the Commission in April 1989.

3588. ALL-TERRAIN VEHICLES

Significance: Agency Priority

Legal Authority: 15 USC 2051 et seq Consumer Product Safety Act; 15 USC 1262(f) Federal Hazardous Substances Act

CFR Citation: 16 CFR 00

Legal Deadline: None

Abstract: On May 31, 1985, the Commission published an advance notice of proposed rulemaking (ANPR) to announce its preliminary determination that an unreasonable risk of injury may be associated with all-terrain vehicles. An all-terrain vehicle (ATV) is a three- or four-wheeled motorized machine, designed for off-road use, and intended to be ridden by one person. A consent decree in the U.S. District Court of the District of Columbia in U.S. v. American Honda Motor Co. et al., approved on April 28, 1988, Civil Act. No. 87-3525 GAG), required ATV manufacturers to attempt in good faith to reach agreement on a voluntary standard for the Commission's consideration. The Commission accepted that standard, along with an industry agreement concerning lateral stability, on October 28, 1988. Except for lateral stability and youth models, the Commission will defer rulemaking for a time sufficient for the voluntary standard to be adopted by the American National Standards Institute. Also, the Commission concluded that for labeling, manuals, age recommendations, advertising, training, point-of-purchase materials, and other

3589. REQUIREMENTS TO MAKE CIGARETTE LIGHTERS CHILD RESISTANT

Legal Authority: 15 USC 2051 et seq Consumer Product Safety Act; 15 USC 1261 et seq Federal Hazardous Substances Act; 15 USC 1471 et seq Poison Prevention Packaging Act

CFR Citation: 00 CFR 00

Legal Deadline: None

Abstract: On March 3, 1988, the Commission published an Advance Notice of Proposed Rulemaking (ANPRM) to announce its preliminary determination that unreasonable risks of death and injury may be associated with cigarette lighters because they are not sufficiently resistant to operation by children. The Commission staff is analyzing comments received in response to the ANPRM. A test protocol using panels of children and adults is under development. The test protocol will be used to determine the child resistance of lighters now on the market and to evaluate lighter modifications reported to be more child resistant. A child resistant cigarette lighter standard will be developed using the test protocol as a basis.

3590. METHOD FOR IDENTIFYING TOYS AND OTHER ARTICLES INTENDED FOR CHILDREN UNDER 3 YEARS OF AGE WHICH PRESENT CHOKING, ASPIRATION, OR INGESTION HAZARDS BECAUSE OF SMALL PARTS

Legal Authority: 15 USC 1261 to 1262 Federal Hazardous Substance Act

CFR Citation: 16 CFR 1501

Legal Deadline: None

Abstract: The Commission has a regulation applicable to toys and other articles intended for children under three years old that prescribes a test cylinder to determine if articles, or detachable parts of such articles, present a choking hazard to young children. Articles or components which fit within the test cylinder are banned. Although this regulation has been in effect since January 1980, choking incidents have occurred since it went into effect involving products which either pass the test or which are exempt from the regulation. The Commission has established a project to gather information about the nature and causes of these incidents and to determine what, if any, additional measures are needed to reduce injuries and deaths from such incidents, including possible modification of the small parts test cylinder. The Commission published an ANPRM on June 7, 1988, to solicit comments on ways to address choking hazards to young children, including specific modifications of the test cylinder requested in a petition from the Consumer Federal of America and the New York State Attorney General's Office.

Legal Authority: 5 USC 553(e) Administrative Procedure Act; 15 USC 2051 Consumer Product Safety Act

CFR Citation: 00 CFR 00

Legal Deadline: None

Abstract: On September 5, 1988, David A. Snow, President of the Michele Snow Foundation, petitioned the Commission to issue a consumer product safety standard for hand-held electric hair dryers. The petition alleges that hand-held electric hair dryers are associated with five to ten fatal electrocutions of children each year. The petition requests the Commission to issue a safety standard for hand-held electric hair dryers to require immersion detection circuit interrupters to protect against electric shock injuries if the hair dryer accidentally falls into water. The Commission staff is preparing a briefing package for consideration by the Commission when deciding whether to grant or deny the petition. If the Commission grants the petition, it will begin a proceeding under the Consumer Product Safety Act for development of a consumer product safety standard.

Legal Authority: 5 USC 553(e) Administrative Procedure Act; 15 USC 2051 Consumer Product Safety Act

CFR Citation: 00 CFR 00

Legal Deadline: None

Abstract: On October 4, 1988, Edward Press, M.D. petitioned the Commission to issue a safety standard for saunas. A sauna is a wood-walled enclosure equipped with benches and a heater. The petition alleges that saunas are associated with risks of death and injury from heat stroke or hypothermia, cardiac arrhythmia and cardiac arrest, myocardial infarction, and syncope or fainting. The petition requests the Commission to issue a safety standard for saunas with requirements for signs to warn about hazards associated with use of saunas; a switch outside the sauna enclosure to limit operating time of the sauna to a maximum of ten minutes per setting; a switch inside the sauna enclosure to shut off the sauna when the dry-bulb temperature exceeds 195 degrees F.; adequate ventilation of the sauna enclosure; and an alarm signal which can be activated inside the sauna enclosure to summon aid. The staff is preparing a briefing package for consideration by the Commission when deciding whether to grant or deny the petition. If the Commission grants the petition, it will begin a proceeding for development of a consumer product safety standard under provisions of the Consumer Product Safety Act.

Legal Authority: 5 USC 553(e) Administrative Procedure Act; 15 USC 1471 Poison Prevention Packaging Act; 15 USC 2051 Consumer Product Safety Act

CFR Citation: 16 CFR 1700.14

Legal Deadline: None

Abstract: On June 27, 1988, the American Association of Poison Control Centers, Inc. petitioned the Commission to issue rules under provisions of the Poison Prevention Packaging Act to require child-resistant packaging for two types of cosmetics: products containing acetonitrile used to remove sculptured nails; and home cold-wave permanent kits containing sodium bromate. The petition alleges that children have suffered serious injuries after accidentally ingesting the products which are the subject of the petition. The staff is preparing a briefing package for consideration by the Commission when deciding whether to grant or deny the petition. If the Commission grants the petition it will begin a proceeding under the Poison Prevention Packaging Act to issue rules requiring child-resistant packaging of household products containing acetonitrile or sodium bromate.

3597. HOUSEHOLD SUBSTANCES CONTAINING METHYLENE CHLORIDE; STATUS AS HAZARDOUS SUBSTANCES; PROPOSED RULE

Legal Authority: 15 USC 1261 Federal Hazardous Substances Act; 15 USC 1262 Federal Hazardous Substances Act

CFR Citation: 16 CFR 1500.12(a)(2)

Legal Deadline: None

Abstract: On August 20, 1986, the Commission proposed a rule to declare that household products containing methylene chloride are hazardous substances under the Federal Hazardous Substances Act. These products include some paint strippers and spray paints. The Commission's concern arises from animal tests showing that methylene chloride is a carcinogen by inhalation and studies indicating a significant human exposure as a result of reasonably foreseeable use of products containing methylene chloride. The initiation of this rulemaking proceeding granted one part of a petition (HP 85-1) from the Consumer Federation of America. The staff provided an analysis of the comments on the proposed rule to the Commission in June 1987. In August 1987, the Commission determined that there was insufficient controversy over the status of methylene chloride as a hazardous substance; therefore, the Commission suspended the rulemaking and issued a statement of enforcement policy stating the Commission's view that household products that contain methylene chloride and that expose consumers to significant levels of methylene chloride are (cont.)

3598. POISON PREVENTION PACKAGING ACT REQUIREMENTS FOR CERTAIN EFFERVESCENT ACETAMINOPHEN TABLETS, PROPOSED AMENDMENT OF EXEMPTION

Legal Authority: 5 USC 553 Administrative Procedure Act; 15 USC 1471 et seq Poison Prevention Packaging Act

CFR Citation: 16 CFR 1700.14

Legal Deadline: None

Abstract: Regulations implementing the Poison Prevention Packaging Act exempt effervescent acetaminophen tablets containing less than 10 per cent acetaminophen from requirements for child-resistant packaging. In the Federal Register of October 20, 1988, the Commission published a proposed amendment of those regulations to increase the acetaminophen content of tablets exempted from requirements for child-resistant packaging from less than ten per cent to not more than 15 per cent. In March 1989 the staff expects to transmit a briefing package to the Commission which analyzes comments received in response to the proposed amendment and contains a draft notice to issue the proposed amendment on final basis.

CFR Citation: 16 CFR 1031; 16 CFR 1032

Legal Deadline: None

Abstract: The Commission has revised its regulations governing the Commission's participation in voluntary standards activities to reflect the policies set forth by Congress in the 1981 amendments of the Consumer Product Safety Act, the Federal Hazardous Substances Act, and the Flammable Fabrics Act. The revised regulation make several changes in the Commission's policies governing participation by the Commission staff in voluntary standards development activities.

FARM CREDIT ADMINISTRATION (FCA)

FARM CREDIT ADMINISTRATION

12 CFR Ch. VI

Unified Agenda of Federal Regulations

AGENCY: Farm Credit Administration.

ACTION: Department Unified Agenda of Regulations and review list.

SUMMARY: The Farm Credit Administration (FCA), as an independent regulatory agency in voluntary compliance with Executive Order 12291, sets forth the following agenda of regulations which it will have under development and review during the period of April 1989 through October 1989.

FOR FURTHER INFORMATION CONTACT: Cindy R. Nicholson, Office of General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*), contains several provisions intended to reduce unnecessary and disproportionate regulatory requirements on small entities. Farm Credit Administration regulations which apply to Farm Credit System banks and associations do not and will not have a substantial impact on small entities. None of the entities regulated by the FCA fall within the definition of small entities in the Regulatory Flexibility Act. While many associations through which banks lend are smaller in size than their banks, they are not independently operated, as they are closely supervised by the banks, which must approve most of their operating policies. The associations rely exclusively on their supervising banks for their source of funds. Furthermore, the associations do not compete with each other since, as with their supervising banks, each serves only a particular geographic area.

While FCA is an independent agency exempt from Executive Order 12291, we believe that participating in this joint publication will further the public interest by including FCA in a single source of information concerning current and projected rulemaking and reviews of existing regulations.

Dated: February 24, 1989.

David A. Hill,

Secretary, Farm Credit Administration Board.

Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
3612	Releasing Information; Examinations and Investigations; General Provisions; Releasing Information	3052-AA05
3613	Organization: Director Compensation	3052-AA09
3614	Eligibility and Scope of Financing; Loan Policies and Operations; Funding and Fiscal Affairs, Loan Policies and Operations, and Funding Operations; Coordination; General Provisions; Definitions	3052-AA94

FEDERAL COMMUNICATIONS COMMISSION (FCC)

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

Unified Agenda of Federal Regulations; April 1989

AGENCY: Federal Communications Commission.

ACTION: Publication of the Unified Agenda of Federal Regulations.

SUMMARY: Twice a year, the Commission publishes a list in the Unified Agenda of those major items and other significant proceedings under development or review that pertain to the Regulatory Flexibility Act. The agenda also provides the CFR Citations and Legal Authorities which govern these proceedings. The Regulatory Flexibility Act (94 Stat. 1167: 5 U.S.C. 605) includes notations on the applicability of the Regulatory Flexibility Act to each item.

The Unified Agenda is published in the **Federal Register** in April and October of each year.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Tenecia Moncrief, Office of Managing Director, (202) 632-3906.

SUPPLEMENTARY INFORMATION:

Unified Agenda of Major and Other Significant Proceedings.

The Commission encourages public participation in the FCC rulemaking process. To help keep the public informed of significant rulemaking proceedings, the Commission has prepared an agenda of important proceedings now in progress. OMB publishes the Unified Agenda in the **Federal Register** in April and October of each year.

The following terms may be helpful in understanding the status of the proceedings included in this report:

A Docket Number - is assigned to a proceeding if the Commission has issued either a Notice of Proposed Rulemaking or a Notice of Inquiry in regard to the matter under consideration. Since January 1, 1978, the Commission has used docket numbers which consist of the last two digits of the calendar year in which the docket was established plus a sequential number which begins at 1 with the first docket initiated during a calendar year (e.g., Docket 80-1 or Docket 83-1). The abbreviation for the responsible Bureau usually precedes the docket number, as in "MM Docket 79-164" which indicates that the responsible Bureau is the Mass Media Bureau. When a docket number consists of only five digits (e.g., Docket 29622), this indicates that the docket was established before January 1, 1978.

Notice of Inquiry (NOI) - issued by the Commission when it is seeking information on a broad subject or trying to generate ideas on a given topic. A comment period is specified during which all interested parties may submit comments.

Notice of Proposed Rulemaking (NPRM) - issued by the Commission when it is proposing a specific change to the FCC Rules and Regulations. Before any changes are actually made, interested parties may submit written comments on the proposals.

Memorandum Opinion and Order (MO&O) - issued by the Commission to deny a petition for rulemaking, conclude an inquiry, modify a decision, or deny a petition for reconsideration of a decision.

Rulemaking (RM) Number - assigned to a proceeding after the appropriate Bureau/Office has reviewed a petition for rulemaking, but before the Commission has taken action on the petition.

Report & Order (R&O) - issued by the Commission to state a new or amended rule or state that the FCC Rules will not be changed.

Donna R. Searcy,

Secretary, Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION (FCC) —COMMON CARRIER BUREAU

Proposed Rule Stage

3628. SATELLITE COMMUNICATIONS

Significance: Agency Priority

Legal Authority: 47 USC 303; 47 USC 553

CFR Citation: 47 CFR 25

Legal Deadline: None

Abstract: The Commission seeks to develop a record & to solicit comments on the proposed rules. These proposed rules are designed to implement recommendations made by the joint industry/government Advisory Committee on 2 degree satellite spacing; and they will codify basic applications requirements for satellite services. The proposed rules would apply to all entities including small entities who seek authorization under Part 25 of the Commission's rules to construct and operate Fixed-Satellite communications facilities. The proposed rules would establish operational and technical procedures designed to alleviate adjacent satellite interference and may increase the reporting and cost burdens on all satellite licensees. The rules codifying basic applications requirements are codifications of existing policies. Will impose no additional burdens, and may, in fact, reduce the burden by eliminating several current requirements. In order to be effective, these rules must apply to all licensees and thus there is no significant alternative.

Legal Deadline: None

Abstract: The Commission has issued a specific plan for implementing a proposed change in regulation of the rates of dominant carriers which would replace the current rate-of-return regulatory model with one that directly limits rates by means of price caps. The plan applies to dominant carriers other than Comsat and Alascom. The Commission reaffirms its tentative finding that the price cap method of regulation will promote efficiency and

innovation and benefit consumers more effectively than rate-of-return regulation

Legal Deadline: None

Abstract: This proceeding addresses the statutory restrictions which prohibit telephone companies from providing cable television service within their telephone service areas. The FCC has tentatively concluded that the statutory restrictions should be repealed. The Commission is soliciting comments and will decide whether to recommend to Congress whether the restrictions should be repealed. The Commission also issued an NPRM to modify the standards of affiliation between cable companies and telephone companies.

3654. IN THE MATTER OF AN AUTOMATIC TRANSMITTER IDENTIFICATION SYSTEM (ATIS) FOR RADIO TRANSMITTING EQUIPMENT (GEN. DOC. #86-337)

Significance: Agency Priority

Legal Authority: 47 USC 154(i); 47 USC 154(j); 47 USC 302; 47 USC 303; 47 USC 403

CFR Citation: 47 CFR 25

Legal Deadline: NPRM, Statutory, October 20, 1986. Other, Statutory, September 14, 1987.
Further Notice of Proposed Rulemaking

Abstract: This proceeding looks to establish a means by which radio emissions might be encoded with a distinct automatically transmitted identifier to benefit orderly management of the radio spectrum by identifying the source of radio frequency interference to other radio signals. For video satellite uplink stations regulated under Part 25 of the Commission's rules, it proposes rules regarding such identifiers. There are no significant alternatives being considered that are consistent with stated objectives. Every operator of a satellite video uplink would be required to purchase and operate a device to insert identification on all transmissions. Approximately 1,000 stations would be involved. Each encoder would cost under $2000. Operating upkeep expenses should be minimal.

Federal Deposit Insurance Corporation

Semiannual Regulatory Agenda

VOL. 54 ISS 77 AP 24 1989 UMI

FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC)

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Ch. III

Semiannual Agenda of Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") is hereby publishing items for the April 1989 Regulatory Agenda. The agenda contains information about FDIC's current and projected rulemakings, existing regulations under review, and completed rulemakings.

FOR FURTHER INFORMATION CONTACT: Persons identified under regulations listed in the agenda. The address for all FDIC staff identified in the agenda is Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: Twice each year, the FDIC publishes an agenda of regulations to inform the public of its regulatory actions and to enhance public participation in the rulemaking process. Publication of the agenda is in accordance with both the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) and the FDIC statement of policy entitled "Development and Review of FDIC Rules and Regulations" (44 FR 31007, May 30, 1979; 44 FR 32353, June 6, 1979; 44 FR 76858, December 28, 1979; 49 FR 7288, February 28, 1984).

The FDIC amends its regulations under the general rulemaking authority prescribed in section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819) and under specific authority granted by the Act and other statutes.

Interested persons may petition the FDIC for the issuance, amendment or repeal of any regulation by submitting a written petition to the Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429. Petitioners should include complete and concise statements of their interest in the subject matter and reasons why the petitions should be granted.

Dated: March 3, 1989.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

3695. RULES GOVERNING PUBLIC OBSERVATION OF MEETINGS OF THE CORPORATION'S BOARD OF DIRECTORS

Legal Authority: 5 USC 552b; 12 USC 1819

CFR Citation: 12 CFR 311

Legal Deadline: None

Abstract: Part 311 implements the policy of the "Government in the Sunshine Act," section 552b of Title 5, United States Code, which is to provide the public with as much information as possible regarding the decision-making processes of certain Federal agencies, including the FDIC, while preserving the rights of individuals and the ability of the agency to carry out its responsibilities.

This regulation has been selected for review under the FDIC's Regulation Review Program.

3697. ● PRIOR NOTICE BY INSURED BANKS OF INTENT TO DIRECTLY OR INDIRECTLY ENGAGE IN NONTRADITIONAL BANKING ACTIVITIES AND OF INTENT TO ACQUIRE OR ESTABLISH A NONTRADITIONAL SUBSIDIARY

Legal Authority: 12 USC 1816; 12 USC 1817; 12 USC 1818(a); 12 USC 1818(b); 12 USC 1819; 12 USC 1820; 12 USC 1821(f)

CFR Citation: 12 CFR 304; 12 CFR 332

Legal Deadline: None

Abstract: The FDIC is considering amending its regulations to require any FDIC-insured bank to provide 30-day prior written notice to the regional director of the FDIC region in which the bank is located of the bank's intent to engage in certain "nontraditional" banking activities and of its intent to acquire or establish a nontraditional subsidiary. The nontraditional banking activities being considered are real estate investment and brokerage activities, insurance underwriting, securities brokerage, underwriting, dealing or mutual fund activities, manufacturing, merchandising, and mortgage banking. The planned rule

BEST COPY AVAILABLE

3698. ● SALARY OFFSET

Legal Authority: 5 USC 5514; 12 USC 1819

CFR Citation: 12 CFR 355

Legal Deadline: None

Abstract: The FDIC is planning to propose new regulations to implement salary offset procedures required by 5 USC 5514 and 5 CFR 550, Subpart K. The proposal would set out procedures to be used by the FDIC to offset the salary of any FDIC employee who is indebted to the United States and refuses to pay voluntarily. The proposal would also enumerate procedures through which the FDIC may request another agency to offset the salary of one of its employees to satisfy a debt that employee may owe the FDIC.

3699. SECURITIES RECORDKEEPING AND CONFIRMATIONS

Legal Authority: 12 USC 1817; 12 USC 1818; 12 USC 1819

CFR Citation: 12 CFR 344

Legal Deadline: None

Abstract: The FDIC expects to propose an amendment to 12 CFR Part 344, which governs an insured nonmember bank's recordkeeping and confirmation requirements for securities transactions. The proposed amendment would expand an existing exception under Part 344 for low activity. The exception would be increased to allow banks which effect an average of fewer than 1,000 securities transactions per year to be exempt from certain recordkeeping and written policymaking requirements. The current "low-activity" threshold is 200 transactions per year. The amendment is needed to eliminate unnecessary paperwork burden and is intended to reduce the impact of FDIC's regulation on insured nonmember banks that engage in a low number of securities transactions per year.

3700. SECURITIES OF INSURED NONMEMBER BANKS

Legal Authority: 12 USC 1819 Federal Deposit Insurance Act; 15 USC 78l(i) Securities Exchange Act of 1934

CFR Citation: 12 CFR 335

Legal Deadline: None

Abstract: The Securities Exchange Act of 1934 requires the FDIC to issue regulations substantially similar to regulations of the Securities and Exchange Commission, or publish reasons for not doing so. The staff is currently preparing such conforming amendments for public comment based on recent rulemaking actions by the Commission.

3701. ● PRIOR NOTICE OF RAPID GROWTH IN INSURED BANKS

Legal Authority: 5 USC 552; 12 USC 1817; 12 USC 1818; 12 USC 1819; 12 USC 1820

CFR Citation: 12 CFR 304

Legal Deadline: None

Abstract: The FDIC plans to substitute for its current regulation on reporting fully insured brokered deposits and fully insured deposits placed directly by other depository institutions (12 CFR 304.6) a new requirement calling for the reporting of planned rapid growth by whatever means, including the solicitation and acceptance of brokered deposits and direct deposits by other depository institutions. Essentially the new rule would require an insured bank to report by means of a check-off question on its Reports of Condition and Income any intention to grow rapidly, that is, by more than nine percent during the following three months.

FDIC — **Proposed Rule Stage**

FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC) — Final Rule Stage

3702. DELEGATIONS OF AUTHORITY TO ACT ON APPLICATIONS

Legal Authority: 12 USC 1815; 12 USC 1816; 12 USC 1817; 12 USC 1818; 12 USC 1819; 12 USC 1828; 12 USC 1829; 15 USC 1607

CFR Citation: 12 CFR 303

Legal Deadline: None

Abstract: The FDIC is preparing final amendments to Part 303 of its rules and regulations to clarify and, in some cases, to modify the delegations of authority for acting on a variety of applications (e.g., mergers, branches, relocations, deposit insurance, trust and banking powers, change in control, and management interlocks). The amendments do not alter any rights or obligations of any person, bank, or other applicant.

3703. ● INSURANCE COVERAGE; UNIT INVESTMENT TRUST

Legal Authority: 12 USC 1813; 12 USC 1817; 12 USC 1821; 12 USC 1822

CFR Citation: 12 CFR 330

Legal Deadline: None

Abstract: The FDIC proposed amending Part 330 of its rules and regulations. Under the proposed rule, unit investment trusts would no longer be treated as corporations for purposes of insurance coverage limits where deposits in any one insured bank are insured to the maximum of $100,000. Instead, the proposal, if adopted, would result in deposit insurance up to $100,000 as to each beneficial owner of the trust's deposits.

3704. ● DEPOSIT LIABILITIES

Legal Authority: 12 USC 1813; 12 USC 1819

CFR Citation: 12 CFR 354

Legal Deadline: None

Abstract: The FDIC issued for public comment a proposed regulation expanding the definition of the term "deposit." The proposed rule would find that a bank's liability on a promissory note, bond, acknowledgement of advance, or similar obligation that is issued or undertaken by the insured bank as a means of obtaining funds is a deposit liability.

Legal Authority: 12 USC 378; 12 USC 1813; 12 USC 1815; 12 USC 1816; 12 USC 1817; 12 USC 1818; 12 USC 1819; 12 USC 1820; 12 USC 1828; 12 USC 1829; 12 USC 3103; 12 USC 3104; 12 USC 3108; 15 USC 1607

CFR Citation: 12 CFR 346; 12 CFR 303

Legal Deadline: None

Abstract: The FDIC has proposed changes to its regulations pertaining to insured branches of foreign banks. Substantial changes are proposed to the current provisions relating to exemptions from the deposit insurance requirement, the capital equivalency requirement, and the country exposure provision. Changes are also being proposed to the pledge of assets requirement and to the delegations of authority concerning it (12 CFR Part 303.8), as well as to miscellaneous provisions throughout the regulation.

FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC) — Completed Actions

3706. CAPITAL; RISK-BASED CAPITAL GUIDELINES

Legal Authority: 12 USC 1815; 12 USC 1816; 12 USC 1818; 12 USC 1819; 12 USC 1828; 12 USC 3907; 12 USC 3909

CFR Citation: 12 CFR 325

Legal Deadline: None

Abstract: The FDIC has amended Part 325 of its rules and regulations by adding an appendix to Part 325 regarding a statement of policy on risk-based capital that applies to all insured state nonmember banks. The risk-based capital framework reflected in the policy statement was developed jointly with representatives from the Federal Reserve System and the Office of the Comptroller of the Currency. It is largely based on the December 10, 1987, consultative paper prepared by the Basle Committee on Banking Regulations and Supervisory Practices.

Legal Authority: 12 USC 1817(j)(13); 12 USC 1819; PL 99-570, Sec 1360

CFR Citation: 12 CFR 303

Legal Deadline: None

Abstract: The FDIC amended section 303.4 of Part 303 of its regulations to implement certain amendments to the Change in Bank Control Act made by section 1360 of the Anti-Drug Abuse Act of 1986. Under the final rule, the FDIC may waive the newspaper publication or comment solicitation requirements of the regulation, or may act on a proposed change in control prior to the expiration of the comment period. The final rule also provides that the FDIC may shorten the public comment period to a period of not less than 10 days.

Legal Authority: 5 USC 504; 12 USC 1819; 12 USC 1972; 15 USC 78w

CFR Citation: 12 CFR 308

Legal Deadline: None

Abstract: The FDIC adopted a revised Part 308 to its rules and regulations which governs the conduct of administrative proceedings before the FDIC. The changes include a reorganization of existing sections of Part 308, revisions of some sections that existed previously, and the addition of new sections. The purpose of the revised regulation is to secure a just and orderly determination of administrative proceedings before the FDIC. The revised Part 308 is a result of the review conducted under FDIC's Regulation Review Program.

FEDERAL ENERGY REGULATORY COMMISSION (FERC)

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Ch. I

Semiannual Regulatory Agenda

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Semiannual regulatory agenda.

SUMMARY: In response to Office of Management and Budget Bulletin No. 89-02, the Federal Energy Regulatory Commission voluntarily submits information about rulemakings under development. Of the 16 rulemakings listed, 15 are current and projected rulemakings and 1 is a completed action.

DATES: The dates provided represent goals, not commitments, and may be revised due to shifts in workload, changes in priorities, or extensive public comments. See the various dates listed for each specific rulemaking.

ADDRESS: Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Person listed for each specific rulemaking.

Lois D. Cashell,

Secretary.

FEDERAL ENERGY REGULATORY COMMISSION (FERC) — Prerule Stage

3712. ● BLANKET SALES CERTIFICATES FOR FIRST SELLERS OF NATURAL GAS

Significance: Agency Priority

Legal Authority: 15 USC 717 to 717w (1982); EO 12009 3 CFR 1978 Comp., p. 142; 15 USC 3301 to 3432 (1982); 42 USC 7101 to 7352 (1982)

CFR Citation: 18 CFR 270; 18 CFR 271

Legal Deadline: None

Abstract: The proposed rule would grant blanket sales authority to first sellers of natural gas (except gas marketers) to make sales for resale in interstate commerce. Marketers would be required to apply individually for this authorization. The rule would eliminate virtually all of the certificate and filing requirements presently applicable to these sales. (This NOPR would consolidate Docket No. RM88-20-000 into this rule.) Docket No. RM89-2-000.

3717. 5-YEAR TAKE-OR-PAY MAKE-UP PROVISIONS IN NATURAL GAS PRODUCER-PIPELINE CONTRACTS

Significance: Agency Priority

Legal Authority: 15 USC 717 to 717w (1982) Natural Gas Act; 42 USC 7101 to 7352 (1982) Dept. of Energy Organ. Act; EO 12009 (1978) 3 CFR Part 142; 31 USC 9701 (1970) Independent Offices Approp. Act

CFR Citation: 18 CFR 154

Legal Deadline: None

Abstract: This notice of proposed rulemaking eliminates the requirement in the Commission's regulations that a gas purchase contract between an independent natural gas producer and an interstate natural gas pipeline must allow the pipeline a minimum 5-year make-up period in which to take gas for which payment has already been made. The Commission believes that this requirement, established in 1967, may no longer be necessary in light of current efforts by pipelines and producers to resolve take-or-pay issues and to enter into market-responsive contracts for future gas supplies. Docket No. RM88-20-000.(See Docket No. RM89-2-000).

Final Rule Stage

3719. CALCULATION OF CASH WORKING CAPITAL ALLOWANCE FOR PUBLIC UTILITIES

Legal Authority: 16 USC 791a to 828c

CFR Citation: 18 CFR 35

Legal Deadline: None

Abstract: The proposed rule would provide that the cash working capital requirements of a public utility that files an electric rate schedule will be presumed to be zero dollars, and thus will not affect the utility's rate base, unless the utility shows there is a significant difference between the time it pays certain current operating expenses and the time it receives revenues from ratepayers. The proposed rule would establish a threshold standard that must be met to support a cash working capital adjustment to a utility's rate base, the expense elements to be considered in calculating cash working capital adjustments to rate base, and criteria applicable to studies submitted in support of a request for an adjustment to rate base. Docket No. RM84-9-000.

3720. REGULATION OF NATURAL GAS PIPELINES AFTER PARTIAL WELLHEAD DECONTROL

Significance: Agency Priority

Legal Authority: 42 USC 7102 to 7352 (1982); EO 12009 3 CFR 1978 Comp., p.142; 5 USC 551 to 557 (1982); 15 USC 717 to 717w (1982); 16 USC 791 to 828c (1982); 15 USC 3301 to 3402 (1982); 16 USC 2601 to 2645 (1982)

CFR Citation: 18 CFR 2; 18 CFR 284.10; 18 CFR 284.8; 18 CFR 284.9; 18 CFR 2.104; 18 CFR 2.105

Legal Deadline: None

Abstract: Order No. 500 is an interim rule that readopted the regulations promulgated in Order No. 436 with one addition and one deletion. Order No. 500 added a requirement that producers submit an offer of take-or-pay credits to an open access pipeline in order to make the pipeline's gas eligible for transportation (unless the pipeline and producer agree to a different arrangement); it deleted the customers' contract demand reduction option. Order No. 500 also adopted a policy on passthrough mechanisms for take-or-pay buyout and buydown costs and on gas inventory charges. Order Nos. 500-A, 500-B, 500-C and 500-D made changes to the crediting provisions and extended certain deadlines. Rehearing of the Order No. 500 interim rule was denied in Order No. 500-E. Docket No. RM87-34-000.

3722. REGULATIONS GOVERNING INDEPENDENT POWER PRODUCERS

Significance: Agency Priority

Legal Authority: PL 99-509, Sec 3401; 42 USC 7101 to 7352 (1982); EO 12009 3 CFR (1978) Comp., p. 142; 5 USC 551 to 557 (1982); 15 USC 717 to 717w (1982); 16 USC 791a to 828c (1982); 15 USC 3301 to 3432 (1982); 16 USC 2601 to 2645 (1982); 49 USC 1 to 27 (1976)

CFR Citation: 18 CFR 38; 18 CFR 382

Legal Deadline: None

Abstract: The Commission proposed to streamline regulation of a class of non-traditional utility suppliers, called independent power producers (IPPS). The proposed regulations would: (1) authorize rates for IPPS to be determined through competition or rate negotiation subject to a price cap, thereby freeing IPPS from cost-based ratemaking while ensuring that rates fall within a zone of reasonableness: (2) authorize IPPs to file rate schedules without having to provide extensive cost support; (3) exempt IPPS from cost-related accounting, reporting and recordkeeping requirements; (4) streamline the corporate and financial regulation of IPPS; (5) provide the blanket prior authorizations to engage in certain corporate activities; and (6) adopt and advance certification procedures to qualify as an IPP. Docket No. RM88-4-000.

3724. RELICENSING REGULATIONS UNDER THE FEDERAL POWER ACT

Significance: Agency Priority

Legal Authority: 16 USC 791a to 825r; 16 USC 2601 to 2645; 42 USC 7101 to 7352; EO 12009 3 CFR 142 (1978)

CFR Citation: 18 CFR 4; 18 CFR 16

Legal Deadline: None

Abstract: In this notice of proposed rulemaking, the Commission proposes to revise its regulations governing the relicensing of hydroelectric power projects. The proposed changes include revised requirements for an application for a new license, a process for pre-filing consultation with resource agencies, a new standard and factors for evaluating a relicensing application for a nonpower license, a minor license, and an exemption from licensing upon expiration of an existing license and would provide for acceleration of a license expiration date and site access for competing applicants. The proposal implements in part changes made to the Federal Power Act by the Electric Consumers Protection Act of 1986. Docket No. RM87-33-000.

FEDERAL HOME LOAN BANK BOARD

12 CFR Ch. V

[No. 89-325]

Agenda of Federal Regulations

AGENCY: Federal Home Loan Bank Board.

ACTION: Publication of agenda items.

SUMMARY: The Federal Home Loan Bank Board is hereby publishing items for the "April Unified Agenda of Federal Regulations."

ADDRESS: Information Services Division, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

FOR FURTHER INFORMATION CONTACT: See persons listed below for specific agenda items.

Dated: February 22, 1989.
By the Federal Home Loan Bank Board.
John F. Ghizzoni,
Assistant Secretary.

FEDERAL HOME LOAN BANK BOARD (FHLBB) — Proposed Rule Stage

3728. ● RELEASE OF CUSTOMER FINANCIAL RECORDS BY FEDERAL ASSOCIATIONS

Significance: Agency Priority

Legal Authority: 12 USC 1425a; 12 USC 1425b; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1728; 12 USC 1728; 12 USC 1730; 12 USC 1730a

CFR Citation: 12 CFR 545.131; 12 CFR 545.132; 12 CFR 545.141; 12 CFR 552.11

Legal Deadline: None

Abstract: The Bank Board is proposing to revise its regulations concerning the releases by federally chartered savings and loan associations and savings banks of customer financial records. It would generally authorize a Federal association to disclose the names and addresses of its customers to any party unless the customer objects, but would prohibit the disclosure of confidential information regarding customers' savings or loan accounts subject to specific exceptions. It would also modify the requirement that Federal mutual associations obtain the prior approval of either the Board or a Supervisory Agent before releasing their customer records.

RIN: 3068–AA86

FEDERAL HOME LOAN BANK BOARD (FHLBB) — Final Rule Stage

3729. INSURANCE TERMINATION PROVISIONS

Legal Authority: 12 USC 1464; 12 USC 1727; 12 USC 1730

CFR Citation: 12 CFR 565

Legal Deadline: None

Abstract: The Bank Board is reviewing a number of issues relating to the extent to which institutions insured by the Federal Savings and Loan Insurance Corporation ("FSLIC") that terminate their insured status in connection with transfers by operation of law must pay a final insurance premium to the FSLIC. As part of its review, the Bank Board is soliciting public comment to ascertain whether to issue a proposal in this area. On October 7, 1986, the Bank Board adopted a clarifying amendment to the definition of "transfers" set forth in its statement of policy regarding mergers and transfers of assets. (12 CFR 571.5(a)). However, as the clarification indicates, the interpretation did not specifically address the separate issues of whether an insured institution undertaking a transfer of assets and liabilities by operation of law in which the surviving entity is not FSLIC-insured must pay a final insurance premium to the FSLIC, and if so, the amount of such payment. The Bank Board has been reviewing this so-called "exit premium" issue on an ongoing basis and as yet has made no final determination with respect to this matter.

3730. INVESTMENT PORTFOLIO POLICY AND ACCOUNTING GUIDELINES

Significance: Agency Priority

FHLBB — Final Rule Stage

Legal Authority: 12 USC 1730; 12 USC 1464; 12 USC 1725 to 1726; 15 USC 78c

CFR Citation: 12 CFR 571.19; 12 CFR 563c

Legal Deadline: None

Abstract: The Board is proposing to amend its regulations governing institutions insured by the Federal Savings and Loan Insurance Corporation by adopting a statement of policy and by amending its rules to clarify that insured institutions must account for securities held for investment sale and/or trading in accordance with generally acceptable accounting procedures ("GAAP"). The proposed policy statement requires an insured institution's board of directors to document and monitor its investment in policy and strategies; discuss the appropriate documentation of investment decisions; summarize GAAP applicable to securities held for investment,sale, and/or trading; and offer guidance on the application of GAAP by insured institutions in determining when securities should be accounted for as a security held for trading. The Board's intent is to provide guidance and clarifications to insured institutions on the accounting for and classification of investment in securities within the confines of existing accounting literature.

3731. RULES OF PRACTICE AND PROCEDURE

Significance: Agency Priority

Legal Authority: 12 USC 1730; 12 USC 1464; 12 USC 1730q; 12 USC 1730a; PL 89-695; PL 89-630

CFR Citation: 12 CFR 509; 12 CFR 512

Legal Deadline: None

Abstract: The Bank Board is proposing revisions to 12 CFR Parts 509 and 512 respectively, its regulations governing rules of practice and procedure in adjudicatory proceedings. The proposed revisions to Part 509 would streamline prehearing procedures with a view toward expediting the proceedings, clarify the authority of Administrative Law Judges appointed to conduct the proceedings, and add several new provisions. The proposed revisions to Part 512 would be of a clarifying and technical nature and would update several provisions of the rules relating to the conduct of investigative and formal examination proceedings.

There are no alternatives that would be less burdensome than the proposed amendments in addressing the concerns expressed above.

The potential costs and benefits of the proposed regulations on the industry have not been quantified.

3732. TRANSACTIONS WITH AFFILIATES

Significance: Agency Priority

Legal Authority: 12 USC 1730a; 12 USC 1425a; 12 USC 1462; 12 USC 1724; PL 100-86

CFR Citation: 12 CFR 584.3

Legal Deadline: None

Abstract: The Bank Board is proposing to amend its regulations pertaining to transactions between institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation and affiliates of those institutions. The proposed amendments (1) define and clarify the applicability of the limitations and prohibitions specified in sections 23A and 23B of the Federal Reserve Act and (2) clarify the applicability of the limitations and prohibitions specified in the Board's regulations existing prior to the Competitive Equality Banking Act (CEBA). The proposed amendments are intended to further the Congressional intent codified in CEBA by providing parity between a bank and a thrift holding company with respect to the treatment of transactions between the subsidiary depository institution and its affiliates engaged in activities permissible for a bank holding company under the Bank Holding Company Act and the regulations thereunder

There are no alternatives that would be less burdensome than the proposed rule in addressing the concerns expressed above.

The potential costs and benefits of the regulation on (cont)

3733. READMISSION OF FEDERAL HOME LOAN BANK MEMBERS TERMINATING THEIR STATUS AS INSURED INSTITUTIONS

Significance: Agency Priority

Legal Authority: 12 USC 1730(i); PL 89-695; 12 USC 1426(i)

CFR Citation: 12 CFR 523

Legal Deadline: None

Abstract: The Bank Board is proposing to amend its regulations governing applications for membership in the

VOL 54 ISS 77 AP 24 1989 UMI

Federal Home Loan Bank ("FHLBank") System by institutions that have been removed from membership under the National Housing Act by virtue of the termination of Federal Savings and Loan Insurance Corporation ("FSLIC") insurance of their accounts. Specifically, the proposal would amend Part 523 of the Board's Rules and Regulations for the Federal Home Loan Bank System, to provide that an FHLBank member that terminates its status as an FSLIC-insured institution and is thereby removed from FHLBank membership (as well as any other member whose membership is terminated pursuant to section 6(i) of the Federal Home Loan Bank Act), may be readmitted as a member only after the expiration of a five year period following its departure from the FHLBank System.

There are no alternatives that would be less burdensome than the proposal in addressing the concerns expressed above.

The potential costs and benefits of the proposed regulation on the industry have not been quantified.

3734. ● BONDS FOR DIRECTORS, OFFICERS, EMPLOYEES AND AGENTS; FORM AND AMOUNT OF BONDS

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563.19

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend 12 CFR 563.19 by deleting the current schedule for calculating the permissible deductible amount for bonds for directors, officers, employees, and agents of FSLIC-insured institutions. A new method for calculating the permissible deductible would be instituted making the maximum permissible deductible the higher of either five percent of tangible capital as defined in 12 CFR 563.9-8(b)(12) or $50,000, with some exceptions.

In addition, the allowance for institutions to increase the permissible deductible to a maximum of three times the permissible amount if losses under the bond exceed 50 percent of the premium would be eliminated as it would become unnecessary with the increase in permissible deductibles.

3735. ● ELECTION OF DIRECTORS OF THE FEDERAL HOME LOAN BANKS

Significance: Agency Priority

Legal Authority: 12 USC 1425b; 12 USC 1426; 12 USC 1427; 12 USC 1437; 12 USC 1464; 12 USC 1725; 12 USC 1726; 12 USC 1730; 18 USC 207; 42 USC 8101 et seq.

CFR Citation: 12 CFR 522

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend its rules and regulations governing the Election of Directors of the Federal Home Loan Banks ("Banks") due to its concern about the appearance of conflicts of interest that may exist when officers or directors of institutions that are of regulatory concern are elected to positions as directors of the Banks. The Board feels that it may not be appropriate for persons who have been the subject of regulatory concern to serve on the boards of the Banks as they are an important part of the supervision and regulation of the thrift industry.

3736. ● REGULATORY CAPITAL REQUIREMENTS FOR INSURED INSTITUTIONS

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 561.13; 12 CFR 563.13

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend its regulations concerning capital requirements for FSLIC-insured institutions. The proposal is more risk-based than the Board's current capital regulations, in order to ensure that institutions engaging in higher risk activities are adequately capitalized. The proposal also addresses interest-rate risk and collateralized borrowing.

3737. ● EQUITY-RISK INVESTMENTS

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563.9-8

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend 12 CFR 563.9-8 concerning investments by FSLIC-insured institutions in equity securities, real estate, service corporations, operating subsidiaries, and certain land loans and non-residential construction loans. The proposal would extend the current equity-risk investment regulation until August 14, 1989 to give the Board the opportunity to analyze the results of its recent regulatory capital proposal and the report on equity-risk investment due to Congress on February 10, 1989.

In addition, the proposal would remove the exclusion for Fannie Mae and Freddie Mac stock purchases by insured institutions, on or after an appropriate date, from the definition of "equity security" found in 12 CFR 563.9-8(b)(2).

3738. ● REQUIRED CAPITAL LEVELS FOR INSURED INSTITUTIONS; REGULATORY INTERVENTION

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724; 12 USC 1725 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563

Legal Deadline: None

Abstract:

In conjunction with its current proposal to amend its regulations to establish minimum capital requirements for FSLIC-insured institutions, the Bank Board is addressing whether the final capital regulation should contain specific language defining a particular level of capital as an "unsafe and unsound condition to transact business" for the purpose of activating the Board's statutory authority to appoint a conservator or receiver for an institution. The Board is considering setting its floor capital requirement at a level of 1.5% of total assets, to be held in the form of core equity capital.

3739. ● ISSUANCE AND USE OF SUBORDINATED DEBT SECURITIES

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563.8-1

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend 12 CFR 563.8-1, its regulations governing the issuance of subordinated debt securities by insured institutions, to codify certain interpretations of the rule and to incorporate technical revisions to the rule which are necessary due to recently- enacted legislation.

The proposal would also modify the bases for supervisory objection to approval of a subordinated debt application by giving the Office of Regulatory Activities ("ORA") the authority to develop guidelines outlining the bases for supervisory objection to the issuance of subordinated debt. The Principal Supervisory Agent ("PSA") would be given the authority to approve or deny subordinated debt applications, subject to an appeal process.

The proposal also includes a standard set of conditions which would apply to approvals of applications to include subordinated debt in regulatory capital.

3740. ● MUTUAL SAVINGS AND LOAN HOLDING COMPANIES

Significance: Agency Priority

Legal Authority: 12 USC 1437; 12 USC 1725

CFR Citation: 12 CFR Chapter V

Legal Deadline: None

Abstract:

The Bank Board is reviewing issues to be addressed through the implementation of the mutual holding company provisions of the National Housing Act ("NHA") added by the Competitive Equality Banking Act of 1987 ("CEBA"). The provisions permit any insured institution to reorganize to form a holding company by chartering an interim savings institution whose stock is wholly-owned by the mutual institution and transferring substantially all of the mutual institution's assets and liabilities

VOL 54 ISS 77 AP 24 1989 UMI

(including all insured liabilities) to the interim savings institution.

3741. ● ACQUISITION OF CONTROL OF INSURED INSTITUTIONS

Significance: Agency Priority

Legal Authority: 12 USC 1730; 12 USC 1730a

CFR Citation: 12 CFR 574.7

Legal Deadline: None

Abstract:

The Bank Board is proposing revisions to its applications processing regulations with regard to the approval of the formation of savings and loan holding companies by insured institutions. The revisions would include automatic approval of applications for routine reorganizations involving the formation of savings and loan holding companies, subject to certain requirements. Applications would be automatically approved 30 calendar days after filing if the Board has not notified the applicant in writing that more information is required, that it is materially deficient, or that it is denied.

The proposed revisions also provide for an improved approval process for permission to organize an interim federal institution for insurance of accounts, for Federal Home Loan Bank Membership and merger of any interim institution that is part of the reorganization transaction.

Significance: Agency Priority

Legal Authority: 12 USC 1730; 12 USC 1730a

CFR Citation: 12 CFR 574.6

Legal Deadline: None

Abstract:

The Bank Board is proposing to adopt a short-form application for use by insured institutions seeking approval for routine reorganizations involving the formation of savings and loan holding companies. The proposal is intended to improve the application process by limiting the required contents of routine reorganization applications to that which is necessary for the FSLIC to make informed decisions.

Significance: Agency Priority

Legal Authority: 12 USC 1464

CFR Citation: 12 CFR 541.0 et seq.; 12 CFR 542.1 et seq.

Legal Deadline: None

Abstract: The Bank Board is proposing extensive revisions to its regulations regarding the corporate governance of Federal associations in order to update and clarify these regulations. Due to the magnitude of the revisions, the Bank Board has presented the proposal in parts, issued separately for public comment. The proposed regulations would reorganize portions of Subchapter C (the regulations for federally chartered associations) and amend and add sections to provide a more cohesive and complete body of rules for the corporate governance of Federal associations. Part I would provide definitions and rules for the organization and incorporation of Federal associations.

The proposed rule would apply equally to all insured institutions.

FEDERAL HOME LOAN BANK BOARD (FHLBB) — Completed Actions

3747. CONSERVATORS AND RECEIVERS

Legal Authority: 12 USC 1464; 12 USC 1724(d); 12 USC 1729; PL 99-120, Sec 6

CFR Citation: 12 CFR 547; 12 CFR 548; 12 CFR 549; 12 CFR 563.8-3; 12 CFR 563.39(a); 12 CFR 569a; 12 CFR 569b; 12 CFR 569c

Legal Deadline: None

Abstract: The Board is proposing extensive revisions to its regulations governing the conservatorship and receivership of associations chartered by the Board or the accounts of which that are insured by the Federal Savings and Loan Insurance Corporation. The Board will unify the appointment of receiver procedures for state and federal institutions; adopt procedures for appointment of receivers under section 406(c)(1)(B) of the National Housing Act; and address the priorities in liquidation and participation interests in liquidation, which are absent from or inadequately covered in the present regulations. The Board is also proposing that its regulations cover topics such as the effect of the receivership appointment on executory contracts, employment agreements, certain "Golden Parachute" agreements, participation agreements, repurchase agreements, and on agreements relating to secured and unsecured borrowings by an insured institution, including agreements providing for prepayment or default penalties. The proposed regulations provide for new rules of general applicability in the areas previously mentioned, clarify existing provisions, and reorganize and recodify all the (cont)

VOL 54 ISS 77 AP 24 1989 UMI

Additional Information: ABSTRACT CONT: regulations governing conservatorships and receiverships.

There are no alternatives being considered by the Board in lieu of the proposed regulation that would have less impact on small institutions, consistent with the intended result, than the concerns expressed in the supplementary information to the proposed rule and the existing statutory requirements concerning receiverships and conservatorships.

The potential costs and benefits of the proposed regulation on the industry have not been quantified.

On July 5, 1988, the Board promulgated as a final rule certain portions of this proposed rule (53 FR 25129). The final rule establishes a priority structure for unsecured claims applicable to all FSLIC receiverships under a new Part 569c of Title 12 of the Code of Federal Regulations.

The time period for Board consideration of the proposal elapsed on December 1, 1988. It is expected that the proposal will be formally withdrawn and reproposed at a later date.

3749. ACCOUNTING POLICY RELATING TO ACQUISITION, DEVELOPMENT AND CONSTRUCTION LOANS

Legal Authority: Notice to Practitioners on ADC Loans, CPA Letter, Feb 10, 1986

CFR Citation: 12 CFR 571.17

Legal Deadline: None

Abstract: The Bank Board proposed to amend its statement of accounting policy relating to acquisition, development and construction ("ADC") loans used by all institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("FSLIC") or affiliates thereof when preparing reports or financial statements for filing with the Bank Board or the FSLIC. The amendments relate to the recent "Notice to Practitioners" issued by the American Institute of Certified Public Accountants, which superseded two prior notices issued in November 1983 and November 1984, and to the public position regarding the effective date of the recent notice taken by the Chief Accountant of the Securities and Exchange Commission. By proposing this amendment to its statement of policy, the Bank Board is adhering to its policy that insured institutions are expected to apply the guidance of the accounting profession for determining whether a transaction characterized as an ADC loan is in fact a loan or whether, in substance, it is a real estate investment or a joint venture. The proposed rule would apply equally to all insured institutions. (cont)

3750. INDEMNIFICATION OF DIRECTORS, OFFICERS AND EMPLOYEES OF FEDERAL HOME LOAN BANKS

Legal Authority: 5 USC 553

CFR Citation: 12 CFR 522.72

Legal Deadline: None

Abstract: The Bank Board is proposing to amend its regulations governing the indemnification of directors, officers, and employees of the Federal Home Loan Banks ("FHL Banks"). This amendment would clarify that expenses incurred by FHL Bank directors, officers, and employees in connection with litigation are to be reimbursed as they are incurred, but that, by majority vote of its board of directors, a FHL Bank could require repayment of expenses that it finds to have been beyond the scope of the Bank Board's indemnification regulation. The proposal applies only to directors, officers, and employees of the FHL Banks, none of which falls within the definition of a "small financial institution" given by the Small Business Administration.

There are no alternatives that would be less burdensome than the proposal in addressing the concerns expressed above.

The potential costs and benefits of the proposal on the industry have not been quantified.

The only portions of this proposal which reached the final rule stage were procedural clarifications and modifications.

3751. ASSESSMENT AND ADJUSTMENT OF ADDITIONAL PREMIUMS

Significance: Agency Priority

Legal Authority: 12 USC 1727

CFR Citation: 12 CFR 563.15; 12 CFR 563.18

Legal Deadline: None

Abstract: The Bank Board is proposing to amend its Insurance Regulations by adding a new regulation regarding the assessment of additional insurance premiums against institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("FSLIC").The proposal would implement by regulation the FSLIC's authority to assess additional insurance premiums and would provide for an adjustment of such premiums based on insured institutions' capital levels. In the Board's view, it is important to base the amount of additional insurance premiums assessed on the amount of capital held by an insured institution because capital provides the most effective buffer against loss and risk to the FSLIC fund.The primary purpose of the proposal is to offer insured institutions an incentive to raise capital.

There are no alternatives that would be less burdensome than the proposal in addressing the concerns expressed above.

The time period for Board action elapsed on December 6, 1988.

3752. PREAPPROVED SECURITIES BROKERAGE SERVICE CORPORATION ACTIVITIES

Significance: Agency Priority

Legal Authority: 12 USC 1464; 12 USC 1425a; 12 USC 1725 to 1726; 12 USC 1730

CFR Citation: 12 CFR 545.74

Legal Deadline: None

Abstract: The Board is proposing to adopt amendments to 12 CFR 545.74, its service corporation regulations, by inserting a new paragraph 545.74(c)(4) "security brokerage activities" and renumbering subsequent paragraphs. The purpose to the proposed amendments is to enable service corporations to commence certain types of securities brokerage activities, without preparing an application and obtaining individual Board approval. The amendments designate certain types of securities brokerage activities as preapproved service corporation activities.

Other alternatives, such as the present rules, may tend to prolong the waiting period for permission to engage in brokerage activities. More liberal provisions may raise questions of statutory authority.

The potential costs and benefits of the proposed regulation on the industry have not been quantified.

The time period for Board consideration of the proposal elapsed on December 6, 1988. It is expected that the proposal will be formally withdrawn and reproposed at a later date.

CFR Citation: 12 CFR 563.13-3

Legal Deadline: None

Abstract:

The Bank Board is adopting a final rule relating to the purchase and sale of Freddie Mac stock by insured institutions that fail to meet either their minimum or fully phased-in regulatory capital requirements. Any insured institution which fails to meet its minimum regulatory capital requirement must obtain prior approval from its Principal Supervisory Agent ("PSA") or his designee, subject to clearance by the Office of Regulatory Activities, in order to purchase or sell Freddie Mac preferred stock.

The rule also requires that any insured institution not meeting its fully phased-in capital requirement must obtain prior approval from its PSA in order to take certain actions based upon any purchase or sale of Freddie Mac stock that could adversely impact its ability to meet its fully phased-in capital requirement.

Abstract:

The Bank Board is amending its regulations concerning delegations of authority to grant or deny preliminary approval of charter amendments and to approve or deny bylaw amendments in order to delegate such authority to the Principal Supervisory Agent ("PSA"). The PSA is given the authority to grant or deny preliminary approval of charter amendments for mutual and stock associations, and to approve or deny bylaw amendments for such associations, provided that they do not include anti-takeover provisions and do not raise a significant issue of law or policy.

Any charter or bylaw amendments not eligible to be processed under this delegation of authority may be acted upon by the Office of General Counsel.

The Bank Board has also amended its related provisions concerning filing requirements and procedures.

3758. ● RECOGNITION BY RECEIVERS OF THE FSLIC'S CLAIM AS SUBROGEE OF INSURED DEPOSITORS AND ASSIGNMENTS OR PLEDGES OF SUCH CLAIMS

Significance: Agency Priority

Legal Authority: 12 USC 1464; 12 USC 1725; 12 USC 1729

CFR Citation: 12 CFR 569c.7-1

Legal Deadline: None

Abstract: The Bank Board is adopting a regulation concerning the FSLIC as receiver for federal and state institutions. It provides for recognition on the books of the receiver of claims to which the FSLIC, in its corporate capacity has been subrogated by payment of insurance and for recognition of transfers of such subrogated claims.

3760. ● TRUST POWERS OF FEDERAL ASSOCIATIONS

Significance: Agency Priority

Legal Authority: 12 USC 1464(n); 12 USC 1725 to 1726; 12 USC 1730

CFR Citation: 12 CFR 550.2; 12 CFR 550.14

Legal Deadline: None

Abstract: The Bank Board is amending its regulations concerning trust powers of Federal associations by delegating additional authority to the Principal Supervisory Agent ("PSA"), authorizing him to approve or disapprove any trust powers application which does not present any unusual policy determinations. The PSA would also be authorized to issue certification to associations surrendering approved trust powers.

FEDERAL MARITIME COMMISSION (FMC)

FEDERAL MARITIME COMMISSION

46 CFR Ch. IV

Unified Regulatory Agenda

AGENCY: Federal Maritime Commission.

ACTION: Unified Agenda of Federal Regulations.

SUMMARY: Pursuant to section 5 of E.O. 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Commission anticipates having under consideration during the period from April 1, 1989 to March 30, 1990 actions in the areas listed below.

FOR FURTHER INFORMATION CONTACT: For further information concerning Commission rulemaking proceedings or the status of any matter listed below, contact: Joseph C. Polking, Secretary, 1100 L Street, NW., Washington, DC 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION: Section 602 of the Regulatory Flexibility Act (5 U.S.C. 602) requires the publication of an agenda of items for which regulatory agencies may propose or promulgate a rule which is likely to have a significant economic impact on a substantial number of small entities. Section 5 of Executive Order 12291 also requires executive agencies to publish a regulatory agenda; the Commission voluntarily complies with this section.

The agendas include information on regulatory activities being conducted or reviewed during the succeeding 12 months by the Commission.

The following is the Commission's Unified Regulatory Agenda. The agenda does not necessarily include all petitions for rulemakings which are under staff review.

In addition, the Commission maintains a compilation of the status of pending rulemaking proceedings and a listing of rules that have become final since the publication of the most recent regulatory agenda. This will be made available to the public, including the press and interested persons.

Joseph C. Polking,

Secretary.

3761. COSTS OF PROCEEDINGS

Significance: Agency Priority

Legal Authority: 5 USC 553; 46 USC app 1716; 46 USC app 1717(a)(4)

CFR Citation: 46 CFR 502

Legal Deadline: Other, Statutory. September 20, 1989.

Abstract: Section 18(a)(4) of the Shipping Act requires the Commission to collect and analyze data concerning the impact of the Act on the costs of major types of regulatory proceedings before the Commission. This action will provide the regulations needed to obtain this information.

Semiannual Regulatory Flexibility Agenda

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Semiannual agenda.

SUMMARY: The Board is issuing this Agenda under the Regulatory Flexibility Act and the Board's Statement of Policy Regarding Expanded Rulemaking Procedures. The Board anticipates having under consideration regulatory matters as indicated below during the period from April 1 through October 1, 1989. The next Semiannual Agenda will be published in October 1989.

DATE: Comments about the form or content of the Agenda may be submitted any time during the next six months.

ADDRESS: Comments should be addressed to William W. Wiles, Secretary of the Board, Board of Governors of the Federal Reserve System, Washington, DC 20551.

FOR FURTHER INFORMATION CONTACT: A staff contact for each item is indicated with the regulatory description below.

SUPPLEMENTARY INFORMATION: The Board is publishing its April 1989 Agenda as part of the April 1989 Unified Agenda of Federal Regulations, which is coordinated by the Office of Management and Budget under Executive Order 12291. Participation by the Board in the Unified Agenda is on a voluntary basis.

The Board's Agenda is divided into three sections. The first, Proposed Rule Stage, reports on matters the Board may consider for public comment during the next six months. The second section, Final Rule Stage, reports on matters that have been proposed and are under Board consideration. A third section, Completed Actions, reports on regulatory matters the Board has completed or is not expected to consider further.

A dot (●) preceding an entry indicates a new matter that was not a part of the Board's previous Agenda, and which the Board has not completed.

Barbara R. Lowrey,

Associate Secretary of the Board.

Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
3780	Regulation: B - Equal Credit Opportunity	7100-AA97
3781	Regulation: E - Electronic Fund Transfers	7100-AA77
3782	Regulation: G - Securities Credit by Persons Other Than Banks, Brokers, or Dealers; and Regulation: U - Credit by Banks for the Purpose of Purchasing or Carrying Margin Stocks	7100-AA99

FEDERAL RESERVE SYSTEM (FRS)

Proposed Rule Stage

3780. ● REGULATION: B - EQUAL CREDIT OPPORTUNITY

Legal Authority: 15 USC 1691 *et seq* as amended Equal Credit Opportunity Act

CFR Citation: 12 CFR 202

Legal Deadline: None

Abstract: During the next four months the Board will propose for public comment revisions to Regulation B to implement amendments to the Equal Credit Opportunity Act that were part of H.R. 5050, enacted on October 25, 1988. The statutory amendments deal with the notice and record retention requirements applicable in business credit transactions. Once the revised regulation takes effect, covered lenders will be required to give notice of a business applicant's right to a written statement of reasons for a credit denial and will have to maintain records on credit applications for a minimum of one year.

Because the new requirements apply to all depository institutions, there will be some economic impact on a substantial number of small financial institutions.

Timetable:

3781. REGULATION: E - ELECTRONIC FUND TRANSFERS

Legal Authority: 15 USC 1693 *et seq* Electronic Fund Transfer Act

CFR Citation: 12 CFR 205

Legal Deadline: None

Abstract: During the next six months, the Board will conduct a review of Regulation E, which implements the Electronic Fund Transfer Act, and establishes the basic rights, liabilities, and responsibilities of consumers who use electronic fund transfer services and of financial institutions that offer these services (whether or not these institutions hold the consumer's account). The review will consider whether any provisions of the regulation are in need of updating and whether any substantive changes are necessary because of technological and other developments. The Board will also consider whether to make any legislative recommendations for statutory changes.

Public comment will be requested on any regulatory proposals that may be developed following the review. It is not anticipated that the revisions would have a significant economic impact on a substantial number of small banks.

RIN: 7100-AA77

3782. ● REGULATION: G - SECURITIES CREDIT BY PERSONS OTHER THAN BANKS, BROKERS, OR DEALERS; AND REGULATION: U - CREDIT BY BANKS FOR THE PURPOSE OF PURCHASING OR CARRYING MARGIN STOCKS

Legal Authority: 15 USC 78g Securities Exchange Act of 1934, as amended; 15 USC 78w Securities Exchange Act of 1934, as amended

CFR Citation: 12 CFR 221; 12 CFR 207

Legal Deadline: None

Abstract: During the next three months the Board may address the ability of lenders subject to Regulations G and U to transfer a credit between these two types of lenders without treating the transaction as creating a new extension of credit. The regulations currently permit a transfer only between lenders subject to the same regulation. Several law firms have expressed an interest in such a deregulatory amendment.

It is not anticipated that this proposal will affect a significant portion of the overall lending activities of a substantial number of small firms.

RIN: 7100-AA99

3783. REGULATION: K - INTERNATIONAL BANKING OPERATIONS

Legal Authority: 12 USC 601 et seq

CFR Citation: 12 CFR 211

Legal Deadline: None

Abstract: The Board will consider an amendment to its regulation governing the establishment of foreign operating subsidiaries by member banks. The amendment would eliminate the requirement in section 211.3(b)(9) of Regulation K that a member bank's operating subsidiary be established only where required by local law or regulation. The revision is intended to promote the efficiency of member banks' foreign operations. Because the revision would remove a restriction, it is not anticipated that comment will be requested.

The proposal would not have a significant economic impact on a substantial number of small businesses because it affects only U.S. banks operating abroad.

3784. REGULATION: K - INTERNATIONAL BANKING OPERATIONS

Legal Authority: 12 USC 1843 (c)(13); 12 USC 601 to 604a; 12 USC 611 to 631

CFR Citation: 12 CFR 211

Legal Deadline: None

Abstract: The Board will consider whether to publish for public comment a proposed amendment to Regulation K to permit U.S. banking organizations to engage in a broader range of activities abroad. Specifically, the Board will consider whether U.S. banking organizations should be permitted to underwrite, distribute, and deal in equity securities outside the United States in excess of the current restriction in Regulation K, which prohibits a subsidiary of a U.S. banking organization from making an underwriting commitment for shares of an issuer in excess of: (i) $2 million, or (ii) 20 percent of the capital and surplus of the issuer's voting shares, unless covered by binding commitments from subunderwriters or other purchasers.

In addition, the Board will consider whether the purchases of shares of companies held in trading accounts should continue to be subject to the investment procedures set out in Regulation K at 12 CFR 211.5(c).

It is not expected that the proposal would have a significant economic impact on a substantial number of small businesses, because it applies to U.S. banking organizations involved (cont)

3785. ● REGULATION: K - INTERNATIONAL BANKING OPERATIONS

Legal Authority: 12 USC 221 et seq; 12 USC 1841 et seq; 12 USC 3101 et seq

CFR Citation: 12 CFR 211

Legal Deadline: Other, Statutory, December 1989.
Section 3(b) of the International Banking Act of 1978 requires that Board review and revise Subpart A of Regulation K every five years, beginning in 1979.

Abstract: In 1989, the Board will conduct a zero-based review of Subpart A of Regulation K (International Operations of United States Banking Organizations), as required every five years by the International Banking Act. This review will include consideration of the powers of Edge corporations and additional overseas activities of U.S. banking organizations. In addition, Subpart B (Foreign Banking Organizations) will be reviewed, particularly with respect to the effect of the revisions of the Standard Industrial Classification (SIC) codes on that Subpart. Subpart C (Export Trading Companies) will be reviewed with a view toward bringing that Subpart into conformity with the Export Trading Company Act Amendments of 1988.

Separate, but related to this review of Regulation K, is the consideration of the liberalization of overseas securities activities (RIN: 7100-AA92).

It is not expected that any revisions would have an adverse impact on a substantial number of small banking organizations.

3786. REGULATION: P - MINIMUM SECURITY DEVICES AND PROCEDURES FOR FEDERAL RESERVE BANKS AND STATE MEMBER BANKS

Legal Authority: 12 USC 1881 to 1884

CFR Citation: 12 CFR 216

Legal Deadline: None

Abstract: During the next two months, the Board will conduct a zero-based review of Regulation P, which implements the Bank Protection Act of 1968, and establishes minimum security standards for Federal Reserve Banks and for State member banks. The review will consider whether any provisions of the regulation are outdated and whether any substantive changes are necessary because of new technological developments. The regulation will also be reorganized and revised for simplicity and clarity. Public comment will be requested following the zero-based review. It is not anticipated that the revised regulation will have a significant economic impact on a substantial number of small banks.

Legal Authority: 15 USC 78g Securities Exchange Act of 1934, as amended; 15 USC 78w Securities Exchange Act of 1934, as amended

CFR Citation: 12 CFR 220

Legal Deadline: None

Abstract: During the next three months the Board may consider proposing amendments to Regulation T to accommodate settlement and clearance of foreign securities in accounts covered by Regulation T. A request has been made that extensive amendments be proposed because of the growing internationalization of the securities markets.

It is not anticipated that any proposals in this area would affect a significant portion of the overall lending activities of a substantial number of small firms.

Legal Authority: 15 USC 78g Securities Exchange Act of 1934, as amended; 15 USC 78w Securities Exchange Act of 1934, as amended

CFR Citation: 12 CFR 220

Legal Deadline: None

Abstract: Several national securities exchanges have proposed trading new stock-index-related products, often called "index participations." Because these products may not fit the existing categories of securities in Regulation T, it is expected that the Board will address the marginability of these products at broker-dealers.

It is not anticipated that this proposal will affect a significant portion of the overall lending activities of a substantial number of small firms.

3789. PRIVATE SECTOR PRESENTMENT (DOCKET NUMBER: R-0631)

Legal Authority: 12 USC 4008(c)

CFR Citation: None

Legal Deadline: None

Abstract: In April 1988, the Board requested comment on whether it should require paying banks to pay for checks presented by private sector collecting banks before 2:00 p.m. in same-day funds and without imposing presentment fees (53 FR 11911, April 11, 1988). The purpose of such a regulation would be to speed the forward collection of checks by requiring paying banks to accept checks without charging a fee later in the day, thus increasing the number of checks that can be collected that day. It would give private sector collecting banks the same rights vis-a-vis paying banks as the Federal Reserve Banks now have.

The Board has not yet made a specific proposal to amend its regulation in this regard. Rather, it is merely requesting comment on the idea of same-day payment in private sector presentments. If such a regulation were to be adopted, small entities that might be affected include small banks and State and local governments.

The Board will review the public comments and determine whether to propose specific regulations.

3790. PROPOSALS FOR LONG-TERM IMPROVEMENT TO THE CHECK COLLECTION SYSTEM (DOCKET NUMBER: R-0622)

Legal Authority: 12 USC 4001 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In December 1987, the Board published for comment several proposals that have the potential to improve the check collection system (52 FR 47112, December 11, 1987). They are, however, long-term proposals that are not likely to be implemented in the immediate future. They include bar-code endorsements, digitized image processing of checks, electronic clearing zones, and an electronic clearing house.

If these were to be introduced, they would likely have a significant economic impact on a substantial number of small banks and small

3791. REGULATION: D - RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS (DOCKET NUMBER: R-0571)

Legal Authority: 12 USC 248(k); 12 USC 461(a)

CFR Citation: 12 CFR 204

Legal Deadline: None

Abstract: In May 1986, the Board issued for comment rules to clarify the definition of "deposit" in Regulation D to include the interest or liability associated with a borrowing in the form of certain sales of assets and related transactions by a depository institution (51 FR 16855, May 7, 1986). These transactions include a sale of assets that involves a full guarantee by the institution that, in effect, substitutes the institution's credit standing for that of the ultimate borrower and in which the institution retains the risk of borrower default after the asset is sold.

Further, the regulation currently treats obligations of an affiliate as deposits of the depository institution to the extent the proceeds are provided to the depository institution. The Board proposes to exclude proceeds received from a sale of assets without recourse to the affiliate. The proposal also would clarify the application of Regulation D to certain of these transactions involving organizations effectively controlled by the depository institution even though not formally affiliated. Finally, the proposal would (cont)

3792. REGULATION: K - INTERNATIONAL BANKING OPERATIONS (DOCKET NUMBER: R-0550)

Legal Authority: 12 USC 611 et seq

CFR Citation: 12 CFR 211

Legal Deadline: None

Abstract: In August 1985, the Board published for comment proposed regulations that would restrict lending by an Edge Corporation to its affiliates where the Edge Corporation is not subject to the restrictions of Section 23A of the Federal Reserve Act (12 USC 371c) because it is not owned by a U.S. insured bank (50 FR 35238, August 30, 1985). In taking this action, the Board noted the increasing number of owners of Edge Corporations that are not subject to Federal banking supervision and the potential adverse effects that might result from such affiliations, such as the impairment of the Edge's ability to act as an impartial arbiter of credit. The Board requested comment on the effect of the proposal on existing Edge Corporations, especially those owned by foreign banks and whether any exemptions from the restrictions are appropriate.

It is not expected that the proposal would have a significant economic impact on a substantial number of small businesses, because it applies only to organizations involved in international banking. (cont)

Legal Authority: 12 USC 371b

CFR Citation: 12 CFR 217

Legal Deadline: None

FRS — Final Rule Stage

Abstract: In January 1986, the Board issued for comment proposals to clarify, update, and simplify the advertising provisions of Regulation Q (51 FR 1379, January 13, 1986). The revisions incorporate and supersede the proposals of March 1984 concerning advertising of split-rate deposits and IRA/Keogh (HR 10) Plan accounts. The proposal is not expected to have a significant adverse effect on small banks.

The Board will review the comments and is expected to take further action within the next six months.

It is also anticipated that the Board will consider at that time various options with regard to providing written disclosures to consumers about their accounts.

3794. REGULATION: Y - BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (DOCKET NUMBER: R-0537)

Legal Authority: 12 USC 1841 Bank Holding Company Act; 12 USC 221 Federal Reserve Act; 12 USC 3901 International Lending Supervision Act of 1983

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: In December 1986, the Board requested public comment on a proposal to permit bank holding companies to engage in real estate investment activities within certain limits (52 FR 543, January 7, 1987). The proposed limits are designed to ensure that conduct of the activity does not result in unsafe or unsound practices, unfair competition, conflicts of interest or other adverse effects.

The Board requested public comment on a number of specific items, including whether real estate investment activities may be deemed to be closely related to banking and a proper incident thereto for purposes of Section 4(c)(8) of the Bank Holding Company Act; whether the proposed limits on the size, scope, and manner in which the activity would be conducted are appropriate; whether nonbank companies owned by holding company banks should be prohibited from conducting these activities; and whether the Board should establish special capital requirements for bank holding companies that control banks directly engaged in these activities.

The proposal, if adopted, would permit bank holding (CONT)

CFR Citation: 12 CFR 225.13(b)(1); 12 CFR 225, Appendix; 12 CFR 208.14

Legal Deadline: None

Abstract: In November 1987, the Board requested comment on whether, in evaluating proposals submitted under section 3 of the Bank Holding Company Act, the Board should consider the impact of real estate activities of the bank to be acquired by the bank holding company on the financial condition of the bank and bank holding company, and, where appropriate, should prohibit banks and savings banks that are acquired by bank holding companies from directly engaging in real estate investment and development activities (52 FR 42301, November 4, 1987).

The Board also requested comment on whether member banks that are not in a bank holding company should be made subject to the interaffiliate lending restrictions of section 23A of the Federal Reserve Act in their dealings with real estate investment and development subsidiaries of the bank.

Finally, the Board requested comment on whether the Board should impose special capital requirements on real estate subsidiaries of banks in a bank holding company, under the Board's authority in the International Lending Supervision Act. These three proposals supplement the Board's earlier (cont)

VOL 54 ISS 77 AP 24 1989 UMI

December 1986 regarding whether the Board should permit bank holding companies to engage in real estate investment activities.

This proposal is not expected to have a significant economic impact on small companies because the Board believes that very few small banks are currently engaged in real estate investment and development activities, and bank holding companies are not generally permitted to engage in these activities.

It is not expected that the Board would take action on this proposal until after resolution of pending rulemaking to rescind the Regulation Y provision permitting bank holding companies to acquire, through their subsidiary state banks, shares of companies engaged in activities that the bank is permitted to conduct under state law, so-called operations subsidiaries (R-0652).

3796. REGULATION: Y - BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (DOCKET NUMBER: R-0614)

Legal Authority: 12 USC 1843 (c)(8)

CFR Citation: 12 CFR 225.25 (b)(9)

Legal Deadline: None

Abstract: In September 1987, the Board requested public comment on whether the Board should authorize bank holding companies to acquire thrift institutions as a general matter under section 4(c)(8) of the Bank Holding Company Act (52 FR 36041, September 25, 1987). The Board currently permits bank holding companies to acquire thrift institutions only if the thrift is failing or has failed, and the acquisition is likely to result in revitalization of the thrift.

The Board has requested comment on whether changes in the economic and regulatory environment, in particular, the expansion of the powers of thrifts and the growth in state initiatives authorizing interstate banking, justify revisions of the Board's policy and the authorization of thrift acquisitions by bank holding companies. The Board also requested comment on what, if any, conditions the Board should impose on bank holding companies seeking to acquire thrifts.

The Board's proposal, if adopted, is not expected to impose a substantial economic burden on small bank holding companies because this action, if taken, would permit all bank (CONT)

3797. REGULATION: Y - BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (DOCKET NUMBER R-0652)

Legal Authority: 12 USC 1843 Bank Holding Company Act; 12 USC 1844(b) Bank Holding Company Act

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: A provision of Regulation Y permits a State bank subsidiary of a bank holding company to engage through a nonbank subsidiary in any activity that is permissible under State law for the bank subsidiary itself, subject to the same limits as if the bank engages in the activity directly. (A similar rule applies to national bank subsidiaries regarding activities permissible for such banks under Federal law.) The Board received comments on this provision in connection with its general request for comments in May 1983 regarding the proposed revision of Regulation Y. Some of the commenters challenged the Board's authority to issue this provision, although it has been part of Regulation Y since 1971. In taking final action on the revision of Regulation Y, the Board deferred consideration of the comments on this provision and allowed the existing rule to remain in effect in the interim (49 FR 794, January 5, 1984).

In December 1988, the Board requested public comment regarding whether this rule, as it applies to nonbanking companies owned by state banks in a holding company system, continues to be valid and appropriate in light of enactment of the (cont)

Additional Information: ABSTRACT CONT: Garn-St Germain Act and certain recent court decisions (53 FR 48915, December 5, 1988). The Board has also scheduled an informal public hearing on this matter for April 7, 1989. The Board has not proposed revising its current rule regarding subsidiaries of national banks in a holding company. A determination to reverse the Board's state bank rule could have an adverse impact on small banks that are subsidiaries of holding companies because they might be required to restructure their nonbanking activities or to take other action. The Board is expected to take further action within the next six months.

3798. REGULATION: Z - TRUTH IN LENDING (DOCKET NUMBER: R-0655)

Legal Authority: 15 USC 1604, as amended, Truth in Lending Act

CFR Citation: 12 CFR 226

Legal Deadline: Other, Statutory.

Board's rules will apply to open-end credit plans entered into five months after promulgation of final regulations.

Abstract: In January 1989, the Board published a proposal to amend Regulation Z to implement provisions of the Home Equity Loan Consumer Protection Act of 1988, which requires creditors to provide consumers with more information for open-end credit plans secured by the consumer's dwelling, and imposes substantive limitations on these plans (54 FR 3063, January 23, 1989). The law superseded the Board's December 1987 proposal to amend Regulation Z to change the disclosure requirements for home equity lines of credit secured by the consumer's principal dwelling (52 FR 48702, December 24, 1987).

Under the new law, creditors would have to provide additional information at the time an application is provided to the consumer, including information about the payments terms, fees imposed under the plans, and, for variable-rate plans, information about the index and a fifteen-year history of changes in the index values. Creditors also would be required to provide consumers with a brochure prepared by the Board (or with one (cont)

Government Levels Affected: State

Additional Information: ABSTRACT CONT: substantially similar) that describes home equity plans. In addition, new duties would be imposed on third parties who provide applications to consumers, and the rules relating to advertisements for home equity plans would be modified. The January 1989 proposal would also amend Regulation Z to implement new substantive limitations imposed by the law on home equity plans.

If the Board adopts the proposal, small institutions engaged in home equity lending could incur additional expenses, including costs to revise and reprint disclosure forms, to acquire and distribute the home equity brochures, and possibly to modify their contracts. They also would need to review and possibly modify their advertisements for home equity plans. Before adopting any final amendments to its rule, the Board would consider appropriate steps to minimize the burdens and costs of compliance.

The Board will review the public comments and take further action within the next three months.

3799. ● REGULATION: Z - TRUTH IN LENDING (DOCKET NUMBER R-0654)

Legal Authority: 15 USC 1604 as amended Truth in Lending Act

CFR Citation: 12 CFR 226

Legal Deadline: Final, Statutory, April 3, 1989.
Implementary rule to be in place 150 days from enactment of the law.

Abstract: In December 1988, the Board proposed for comment revisions to Regulation Z to implement amendments to the Truth in Lending Act that were part of H.R. 515, the Fair Credit and Charge Card Disclosure Act of 1988, enacted on November 3, 1988 (53 FR 51785, December 23, 1988). The statutory amendments require credit and charge card issuers to provide certain credit disclosures in telephone solicitations and in direct mail and other applications and solicitations to open credit and charge card accounts. Card issuers will also be required to give cardholders written notice regarding the renewal of their credit and charge card accounts before a cardholder has to pay a fee to renew the account. In addition, the law requires credit card issuers to provide cardholders with written notice of a change in the entity providing credit insurance on credit card accounts.

Regardless of size, most commercial banks offer credit card plans to consumers. The proposed regulations do not distinguish between large and small creditors. Consequently, creditors of all sizes will incur similar types of costs. However, the magnitude of these expenses will depend upon the level of a (cont)

Additional Information: ABSTRACT CONT: particular creditor's credit card plan operation and the type of marketing employed. With respect to bank cards, the majority of credit card accounts are held by a relatively small number of large card issuers. These institutions also probably account for a substantial proportion of the credit card solicitations. Consequently, large card issuers will probably incur a larger aggregate cost, relative to smaller card issuers, to comply with the new rules, although on a cost-per-solicitation or cost-per-account basis these costs will probably be relatively small.

The Board will review the public comments and take further action within the next two months.

3800. REGULATION: CC - AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (DOCKET NUMBER: R-0639)

Legal Authority: 12 USC 4001 et seq

CFR Citation: 12 CFR 229.36

Legal Deadline: None

Abstract: In June 1988, the Board issued for comment a proposed amendment to Regulation CC that would prohibit banks from issuing teller's checks unless a depositary bank located in the same check processing region as the issuing bank would normally receive credit for the check as early as credit for a check drawn on the issuing bank (53 FR 24093, June 27, 1988). The purpose of the amendment is to address the problems connected with certain delayed disbursement practices.

The rule will affect all banks regardless of size. It is not expected that the proposal will impose significant costs on small banks other than the costs of changing paying banks and purchasing

FRS — Final Rule Stage

new check stock for those banks that do not currently meet the equivalent availability standards.

Since the original proposal, the Board, in response to commenters' concerns, has determined that such an amendment would not be effective April 1, 1989 (54 FR 5495, February 3, 1989). If and when a final rule is adopted, the Board will allow such lead time as it determines to be reasonable for the industry to implement any necessary changes. (cont)

3801. ● REGULATION: CC - AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (DOCKET NUMBER: R-0648)

Legal Authority: 12 USC 4001 et seq

CFR Citation: 12 CFR 229

Legal Deadline: None

Abstract: In November 1988, the Board adopted a rule to amend its Regulation CC to treat "bank payable through checks" as local or nonlocal based on the location of the bank on which they are written rather than the location of the bank through which they are payable (53 FR 44324, November 2, 1988). In conjunction with the final rule, the Board issued proposed amendments to Regulation CC designed to alleviate the operational difficulties and additional risks resulting from the final rule (53 FR 44335, November 2, 1988).

The proposed rule would affect all institutions that issue payable through checks. A number of these institutions would be small banks, generally credit unions.

The Board will review the public comments and is expected to take further action within the next four months.

3802. ● REGULATION: CC - AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (DOCKET NUMBER: R-0649)

Legal Authority: 12 USC 4001 et seq

CFR Citation: 12 CFR 229

Legal Deadline: None

Abstract: The Board's Regulation CC requires banks to make funds available to their customers within specific times, to disclose their fund availability policies to their customers, and to handle returned checks expeditiously. Since the publication of Regulation CC, the Board has received numerous requests from banks and others for clarification of various provisions of the regulation. In November 1988, the Board issued for comment proposed changes to Regulation CC that respond to many of the questions and provide assistance to banks in understanding and complying with the regulation (53 FR 44343, November 2, 1988).

Adoption of the proposed amendments would not result in any significant economic impact on small entities.

The Board will review the public comments and is expected to take further action within the next two months.

3803. FURTHER PROPOSALS TO REDUCE RISKS ON LARGE-DOLLAR WIRE TRANSFER SYSTEMS (DOCKET NUMBER: R-0592)

Legal Authority: 12 USC 221 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In December 1986, the Board requested comment on several proposals that would refine its policy statement on payment system risk (51 FR 45042, December 16, 1986). The proposals included modifying automated clearing house transactions to reduce risks (R-0591) and various proposals to charge a fee for daylight overdrafts as a way of reducing risks associated with them (R-0592). It is not expected that these actions will have a significant economic impact on a substantial number of small entities, because small entities do not usually participate in large-dollar wire transfer systems. In December 1987, following review of public comments, the Board approved changes in the automated clearing house mechanism to reduce risk (52 FR 49086, December 29, 1987). Action on pricing of daylight overdrafts (Docket No. R-0592) is expected by June 1989.

Further, the Board will be conducting a zero-based review of its risk reduction policy during 1989.

3804. REGULATION: H - MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (DOCKET NUMBER: R-0636)

Legal Authority: 12 USC 248; 12 USC 321 to 338; 12 USC 486; 12 USC 1814; 12 USC 3907; 12 USC 3909

CFR Citation: 12 CFR 208.17

Legal Deadline: None

Abstract: In June 1988, the Board issued for comment an amendment to Regulation H designed to facilitate the fullest possible dissemination of publicly available information regarding the condition of State member banks (53 FR 19308, June 3, 1988). The amendment would require such banks to make available upon request their year-end reports of condition or other suitable documents describing their condition.

Under the amendment to Regulation H, state member banks must make available to the public, upon request, one free copy of certain information that is presently prepared by banks. State member banks must also notify the public and shareholders of the availability of the information. Although many commenters to the proposal focused on the cost of such additional regulation, especially to small banks, the Board does not believe that the cost would be substantial. The amendment does not require the banks to prepare any new documents. Notification to the public can be accomplished by means as inexpensive as lobby posters, and notification to shareholders must be in the form of a written announcement that may be included with the (cont)

3805. REGULATION: Y - BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (DOCKET NUMBER: R-0637)

Legal Authority: 12 USC 1843

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: In June 1988, the Board proposed for comment amendments to Regulation Y to implement the limitations on grandfathered nonbank banks and industrial banks set forth in the Competitive Equality Banking Act of 1987 (CEBA) (53 FR 21462, June 1, 1988). The limitations in CEBA on nonbank banks include restrictions on new activities, joint-marketing with affiliates, annual growth, and overdrafts. Only the overdraft restriction applies to industrial banks.

The overdraft restriction requires nonbank banks and industrial banks to keep records of their affiliates' transactions in order to measure overdrafts. Because the overdraft restriction is required by CEBA, small entities cannot be exempted from this recordkeeping requirement.

Following an informal hearing on the public comments, the Board, in September 1988, adopted the amendments with minor changes (53 FR 37733, September 28, 1988).

FEDERAL TRADE COMMISSION (FTC)

FEDERAL TRADE COMMISSION

16 CFR Ch. I

Semiannual Regulatory Agenda

AGENCY: Federal Trade Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The following agenda of Commission proceedings is published in accordance with section 22(d)(1) of the Federal Trade Commission Act, 15 U.S.C. 57b-3(d)(1), and section 610(c) of the Regulatory Flexibility Act, 5 U.S.C. 610(c). Each projected event reflects the FTC staff's assessment of events that it expects will occur in the listed proceedings during the coming year. No Commission determination on the need for or the substance of a trade regulation rule or any other procedural option should be inferred from the projected events included in this agenda.

Several agenda items concern proceedings that may affect a substantial number of small businesses as that term is used in the Regulatory Flexibility Act. Whether any such proceeding will result in a rule which is likely to have a significant economic impact on such entities depends upon final Commission determinations on the need for and the substance of a trade regulation rule.

Except for notice of completed actions, the information in this agenda represents the judgment of Commission staff, based upon information now available. These views should not be regarded as a final staff position, nor should they be attributed to the Commission itself. The Commission will address the issues presented on the rulemaking record in the final consideration of each proceeding.

Agenda items include the projected timing of certain future actions. In most instances the dates of future events are listed by month, not a specific day. Further details may be obtained from the agency contact responsible for a particular proceeding. Discovery of new information, change of circumstances, or changes in the law may alter the information set forth in this agenda.

FOR FURTHER INFORMATION CONTACT: Further details may be obtained from the agency contact responsible for a particular proceeding.

By direction of the Commission.

Donald S. Clark,

Secretary.

3806. MAIL ORDER MERCHANDISE

Legal Authority: 15 USC 41 et seq Federal Trade Commission Act

CFR Citation: 16 CFR 435

Legal Deadline: None

Abstract: The Commission's rule concerning mail order merchandise was promulgated on October 22, 1975. The rule requires mail order sellers to possess a reasonable basis for any claims made concerning shipping dates or, in the absence of any specifically stated date, to ship the ordered merchandise within thirty (30) days of receipt of an order. In the event of delays in shipment, the rule establishes notification procedures whereby buyers have the option either to agree to the delay or to cancel the order and receive a prompt refund. The Commission's rule is designed to address a number of significant consumer problems described on the record of the rulemaking proceeding, including failure to deliver ordered merchandise, unexplained delays in delivery, failure to make prompt (or any) refunds upon cancellation of an order, and inability to obtain responses to inquiries about pending orders. The rule enables consumers to obtain ordered merchandise within a reasonable time period or, if delays occur, to cancel the order and obtain a prompt refund, so that losses due to undelivered merchandise, delays, and inadequate or nonexistent refunds can be avoided. By subjecting sellers (cont)

Additional Information: ABSTRACT CONT: who solicit orders they cannot fill within a reasonable time to the risk of cancellation, the rule may provide competitive benefits, since buyers may shift their business to more efficient merchants. Costs relating to the rule may include the cost of establishing a system for monitoring and recording orders, shipments, delays, cancellations, consents to delays, and refunds; the costs of complying with the rule's notification requirements regarding delays (printing, postage, etc.); the cost of processing refunds; and additional inventory costs. Staff is considering whether to recommend to the Commission that the rule be amended to cover orders placed by telephone or any other means, and whether the rule's definition of "properly completed order" for credit sales should be amended to mean the time the seller receives sufficient information to charge the buyer's account. On October 27, 1988, the Commission published an ANPR inviting public comment on these questions. After analyzing these comments and other information, the staff will recommend that the Commission either publish an NPRM or end the inquiry.

3807. INFORMAL DISPUTE SETTLEMENT PROCEDURES

Legal Authority: 15 USC 2309; 15 USC 2310(a)(2) Magnuson-Moss Warranty--FTC Improvements Act

CFR Citation: 16 CFR 703

Legal Deadline: None

Abstract: The Magnuson-Moss Warranty Act, enacted on January 4, 1975, requires that the Federal Trade Commission promulgate a rule prescribing the minimum requirements for any informal dispute settlement procedure which is incorporated into the terms of a written warranty subject to the Act. Because warrantors are not required to incorporate such procedures into warranties, the rule applies only to warrantors who choose to do so. The present rule sets forth detailed procedural, recordkeeping, and reporting requirements for dispute settlement mechanisms designed to insure their fairness. To assess whether any changes are needed, the Commission conducted a regulatory negotiation process in which an advisory committee was charged to recommend to the Commission revisions to the rule that would facilitate the Congressional (cont)

3808. ● FRANCHISE RULE

Legal Authority: 15 USC 41 et seq., Federal Trade Commission

CFR Citation: 16 CFR 436

Legal Deadline: None

Abstract: On December 21, 1978, the Commission issued a trade regulation rule applicable to franchises and other business opportunity ventures. The franchise rule took effect on October 21, 1979. The rule requires franchisors to give pre-sale disclosures to prospective investors before they pay money or become legally bound to pay. The disclosures provide material information and are designed to assure that potential investors have the information they need to investigate the franchise offer so they can make an informed investment decision. The Commission is considering whether to amend its trade regulation rule concerning franchises and business opportunity ventures. In particular, the Commission is considering whether to amend the rule's earnings claim and preemption provisions.

FEDERAL TRADE COMMISSION (FTC) — Proposed Rule Stage

3809. AMENDMENT TO TRADE REGULATION RULE CONCERNING PRESERVATION OF CONSUMERS CLAIMS AND DEFENSES ("HOLDER-IN-DUE COURSE RULE")

Legal Authority: 15 USC 45 Federal Trade Commission Act; 15 USC 57(a) Federal Trade Commission Act

CFR Citation: 16 CFR 433

Legal Deadline: None

Abstract: The objective of the proposed amendment was to ensure that a purchaser's duty to pay is not separated from the seller's duty to perform when a consumer sale is financed by a third party creditor or purchase money lender. The original rule requires sellers to ensure that credit contracts used in consumer installment sales and purchase money loans contain a provision that makes any holder of the contract subject to all legal claims and defenses related to the sale transaction which the buyer may have against the seller. The proposed amendment would have extended to creditors the duty to ensure that credit contracts contain the required provision. In November, 1988, the Commission decided to end the rulemaking proceeding without issuing an amended rule. Because the rule affects many sales that are financed by closed-end or open-end consumer credit, it may have a significant effect on a substantial number of small entities. The Commission has solicited comments and data on this issue and, if the rule has had such an effect, whether it should be amended to minimize

3810. GAMES OF CHANCE IN THE FOOD RETAILING AND GASOLINE INDUSTRIES RULE

Legal Authority: 15 USC 45 Federal Trade Commission Act; 15 USC 57(a) Federal Trade Commission Act

CFR Citation: 16 CFR 419

Legal Deadline: None

Abstract: The Commission's trade regulation rule concerning games of chance became effective on October 17, 1969. The rule establishes requirements for food and gasoline retailers in conducting and advertising games of chance by requiring disclosure of odds-of-winning and prize information in broadcast and print advertisements, as well as in point of sale information. In January, 1983, the Commission granted a temporary partial exemption to allow supermarkets and gas stations to advertise their games on radio and television without disclosing full information on prizes and odds-of-winning. In addition, the Commission also published an advance notice of proposed rulemaking on whether to make the broadcast exemption permanent. Finally, the Commission has proposed to reduce the recordkeeping requirements of the rule from three years to one year in keeping with the goals of the Paperwork Reduction Act, and requested public comment on other possible areas where amendments to the rule may be appropriate. The rule benefits consumers by allowing contestants to enter games of chance with full knowledge of all material information to enable equal competition for (cont)

3811. ● TRANSISTOR RULE

Legal Authority: 15 USC 41 et seq., Federal Trade Commission Act

CFR Citation: 16 CFR 414

Legal Deadline: None

Abstract: The Transistor Count Rule states that it is an unfair method of competition and an unfair or deceptive act or practice in connection with the sale of radio receivers (including transceivers) to represent that a radio set contains a specified number of transistors when the transistors counted do not function to detect, amplify, or receive radio signals. The rule was adopted May 4, 1968 and became effective on December 10, 1968. The Commission seeks comment on whether or not changes in technology and marketing over the last twenty years have rendered the rule obsolete and therefore no longer in the public interest. The Commission has issued an ANPR asking for comment on the continued viability of the rule and whether it should be repealed.

3812. REVIEW OF THE FUNERAL INDUSTRY PRACTICES RULE

Legal Authority: 15 USC 45; 15 USC 46(g); 15 USC 57(a)

CFR Citation: 16 CFR 453

Legal Deadline: None

Abstract: The funeral industry practices rule, which became effective on April 30, 1984, seeks to increase consumer access to accurate information about prices and legal requirements prior to and at the time of purchase of funeral goods and services. The Rule: (1) requires funeral directors to provide consumers with itemized pre-sale disclosures; (2) prohibits misrepresentation of legal and cemetery requirements and the preservative or protective value of embalming, caskets, and vaults; (3) prohibits funeral directors from requiring a casket for cremations, or any other tie-in arrangements; (4) prohibits funeral directors from charging for goods and services not specifically ordered, such as embalming, unless required by law; and (5) requires funeral directors to give, on request, price information over the telephone. The Rule provides that no later than four years after its effective date, the Commission will begin a rulemaking to determine whether the Rule should be amended or terminated. Recently, the Commission has issued the Notice of Proposed Rulemaking for public comment and held informal public (cont)

3813. RETAIL FOOD STORE ADVERTISING AND MARKETING PRACTICES

Legal Authority: 15 USC 41 et seq Federal Trade Commission Act

CFR Citation: 16 CFR 424

Legal Deadline: None

Abstract: The Commission's Rule on Retail Food Store Advertising and Marketing Practices states that it is a violation of Section 5 of the Federal Trade Commission Act for grocery stores to advertise products at a particular price unless such products are in stock and conspicuously and readily available for sale at the advertised price during the effective period of the advertisement. If a store runs out of advertised products, it is in violation of the rule even if the store noted the limitations on availability in its advertisement and even if the store provides rainchecks or substitute items. The rule is intended to benefit consumers by ensuring that advertised items are available, that advertising-induced purchasing trips are not fruitless, and that store prices accurately reflect the prices appearing in the ads. The rule may cause costs to be incurred in maintaining sufficient inventory to meet anticipated demand, and costs associated with the monitoring of price changes, changing marked prices, training employees to comply with the rule and keeping records to prove compliance. (cont)

Commission Decision to Amend the Rule	04/21/88	
Final Action	04/00/89	

Small Entities Affected: None

Government Levels Affected: None

Additional Information: ABSTRACT CONT: The rule may also discourage the advertising of certain kinds of products, such as perishables or goods that are available to the store only in limited supply. The staff concluded from a careful review of the rule's effects that the costs the rule imposes on consumers in the form of higher grocery prices significantly exceeds its benefits. On April 21, 1988, the Commission decided to modify the rule so that a store could comply by clearly and adequately disclosing in its advertisements that there are limitations on availability, or by offering rainchecks or substitute items if supplies run out. The Commission expects to publish a final rule as amended with a statement of basis and purpose early in 1989.

3814. REVIEW OF THE PREMERGER NOTIFICATION RULES AND REPORT FORM

Significance: Agency Priority

Legal Authority: 15 USC 18a Clayton Act

CFR Citation: 16 CFR 801; 16 CFR 802; 16 CFR 803; 16 CFR 803, (Apendix)

Legal Deadline: None

Abstract: The Premerger Notification Rules and the Antitrust Improvements Act Notification and Report Form were adopted pursuant to Section 7A of the Clayton Act. Section 7A requires firms of a certain size contemplating mergers or acquisitions of a specified size to file notification with the Federal Trade Commission (FTC) and the Department of Justice (DOJ) and to wait a designated period before consummating the transaction. It also requires the FTC, with the concurrence of the Assistant Attorney General for Antitrust, to promulgate rules requiring that notification be in a form and contain information necessary to enable the FTC and DOJ to determine whether the proposed acquisition may, if consummated, violate the antitrust laws. These rules are continually reviewed in order to improve the program's effectiveness and reduce the paperwork burden on the business community. In September 1988, the Commission proposed to amend these rules to exempt the acquisition of small percentages of an issuer's voting securities, and proposed two alternative amendments that would provide other special treatment for acquisitions of small percentages of voting securities. 3815. APPLIANCE LABELING RULE – ENERGY POLICY AND CONSERVATION ACT

Legal Authority: 42 USC 6294 National Energy Conservation Policy Act; PL 94-163 Energy Policy and Conservation Act, Sec 324, 1975

CFR Citation: 16 CFR 305

Legal Deadline: Final, Statutory, July 1, 1989.
See section 2(d)(2)(B) of Pub. L. 100-357, June 28, 1988, 102 Stat. 672.

Abstract: The Energy Policy and Conservation Act (EPCA) required the Commission to consider labeling rules for the disclosure of energy information, based on standard test procedures prescribed by the Department of Energy, for at least 13 categories of major household appliances. The Commission adopted a labeling rule for seven appliance categories: (1) refrigerators and refrigerator- freezers; (2) freezers; (3) dishwashers; (4) clothes washers; (5) water heaters; (6) room air conditioners; and (7) furnaces. The Commission exempted five other categories of appliances. In 1987, the Commission amended the rule to include central air conditioners and heat pumps and to include two new types of furnace under the rule's coverage. The provisions took effect on June 7, 1988. Since the Commission's rule implements the requirements of EPCA, most of the costs imposed on industry members may not be attributable to the rule. The rule applies mainly to manufacturers of household appliances but does impose some burdens on distributors and retailers. Some of those entities may be small businesses under section 610 of the Regulatory Flexibility Act. Therefore, the Commission (cont)

Additional Information: ABSTRACT CONT: has reviewed the rule to determine whether it has had a significant economic effect on a substantial number of small entities. The Commission has terminated that review and has begun another rulemaking to consider several amendments that would make the rule's energy usage disclosure scheme more efficient for consumers and business. The Commission has estimated that the proposals will reduce the paperwork burden of compliance by 5 percent. Recent amendments to EPCA require the Commission to issue a rule prescribing labeling requirements for fluorescent light ballasts (transformers).

Legal Authority: 15 USC 45 Federal Trade Commission Act; 15 USC 57(a) Federal Trade Commission Act

CFR Citation: 16 CFR 456, (Revision)

Legal Deadline: None

Abstract: On March 17, 1989, the Commission promulgated a trade regulation rule that would prohibit certain state restrictions on optometrists' commercial practices. The rule prohibits state restrictions within the following four categories: (1) limitations on the number of branch offices that optometrists may own or operate; (2) prohibitions on the practice of optometry in commercial locations, such as shopping malls; (3) prohibitions on optometrists' use of trade names; and (4) prohibitions on employer-employee or other affiliations between optometrists and persons who are not optometrists. The rule also continues a requirement that optometrists and ophthalmologists release eyeglass lens prescriptions to their patients upon completion of an eye examination.

3817. COOLING-OFF PERIOD FOR DOOR-TO-DOOR SALES

Legal Authority: 15 USC 41 et seq Federal Trade Commission Act

CFR Citation: 16 CFR 429

Legal Deadline: None

Abstract: The rule states that sellers of consumer goods or services with a purchase price of $25.00 or more who sell away from their place of business must furnish to the buyer certain information regarding the buyer's right to cancel sales within three business days and must give the buyer a full refund of any down payment upon the buyer's cancellation. The rule requires a seller to furnish the buyer with a complete receipt or copy of a contract, along with a notice informing the buyer of the right to cancel the transaction, and to furnish the buyer with a completed Notice of Cancellation. The rule is intended to benefit consumers by permitting them to reflect on their purchase and the terms of any contract, to compare the purchase with offerings of other sellers, and to ascertain the accuracy of any representations made. The resulting costs to sellers include the costs associated with cancellation (processing cancelled orders, returning downpayments, retrieving delivered goods, and returning traded-in merchandise) and the additional cost of printing the required cancellation notices. Since the rule affects all door-to-door sellers, it may have a significant economic effect on a (cont)

Additional Information: ABSTRACT CONT: substantial number of small entities. The Commission has completed its review of the Rule in accordance with Section 610 of the Regulatory Flexibility Act. The Commission concluded, based on this review, that there is no reason to believe that the Rule has had a significant impact on a substantial number of small entities. Therefore, the Commission did not make any changes to the Rule. However, for reasons described in another notice published the same day, the Commission proposed certain non-substantive Rule amendments, and proposed exemptions. The Commission considered the comments responding to the NPRM soliciting comments on changes in the Rule's notice requirements and possible exemptions from the Rule, and has taken final action. The Commission issued final, non- substantive amendments to section 429(a) and (b) of the Rule. The amendments permit alternative methods of complying with notice requirements of the Rule. The Commission also granted exemptions from the Rule to sellers of automobiles at public auctions and tent sales, who have at least one permanent place of business, and sellers of arts and crafts at fairs.

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 420 (Sub-No. 16)]

Semiannual Regulatory Agenda

AGENCY: Interstate Commerce Commission.

ACTION: Notice of semiannual regulatory agenda to be part of a Unified Agenda of Federal Regulations.

SUMMARY: Pursuant to OMB Bulletin No. 89-02, issued under section 6(b) of E.O. 12291 to implement the provisions of section 5 of the Executive Order concerning Regulatory Agendas, the Commission is publishing an agenda of: (1) current and projected rulemakings; and (2) existing regulations being reviewed to determine whether to propose modifications through rulemaking. Listed below are the regulatory actions to be developed or reviewed during the next 12 months. Following each rule identified is a brief description of the rule including its purpose and legal basis.

FOR FURTHER INFORMATION CONTACT: A contact person is identified for each of the rules listed below.

SUPPLEMENTARY INFORMATION: A list of proceedings appears below containing information about subject areas in which the Commission is currently conducting rulemaking proceedings or may institute such proceedings in the near future. It also contains information about existing regulations being reviewed to determine whether to propose modifications through rulemaking.

The agenda also identifies regulations likely to have a significant economic impact on a substantial number of "small entities." Accordingly, this information will satisfy the requirements of section 602 of the Regulatory Flexibility Act, 5 U.S.C. 602.

Finally, this agenda will comprise part of a Unified Agenda of Federal Regulations compiled by the Office of Management and Budget which is to be published in a single issue of the **Federal Register** in April 1989. The purpose of the Unified Agenda is to provide the public with more comprehensive documentation of the Federal government's current regulatory plans, and to provide a systematic means of monitoring regulatory activity in each agency.

This notice is issued pursuant to 49 U.S.C. 10321 and 5 U.S.C. 553.

Decided: February 6, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley and Phillips.

Noreta R. McGee,
Secretary.

3822. ● AMENDMENTS TO RAIL CARRIER COST RECOVERY TARIFFS, EX PARTE NO. 290 (SUB-NO. 6)

Legal Authority: 49 USC 10321; 5 USC 553

CFR Citation: 49 CFR 1312

Legal Deadline: None

Abstract: The Commission is considering whether its regulations should be revised by changing the regulations governing the form and volume of supplemental matter to rail carrier cost recovery tariffs filed pursuant to Ex Parte No. 290 (Sub-No. 2), Railroad Cost Recovery Procedures. Present regulations provide that such tariffs be published with expiration dates and they may be maintained without regard to the amount of supplemental matter in effect. Informal criticisms have been received by the Commission which indicate that the tariffs have become extremely cumbersome to follow and apply. In view of these criticisms, the Commission is concerned that the tariffs are not being published in a manner which is consistent with the public interest. Comments dealing with problems encountered by users of the rail carrier cost recovery tariffs are sought as well as suggestions for rule changes.

INTERSTATE COMMERCE COMMISSION (ICC) — **Proposed Rule Stage**

3823. ADOPTION OF UNIFORM RAIL COSTING SYSTEM FOR DETERMINING VARIABLE COST FOR JURISDICTIONAL THRESHOLD AND SURCHARGE PURPOSES (URCS), EX PARTE NO. 431

Significance: Agency Priority

Legal Authority: 49 USC 10705(a); 49 USC 10709

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: Develops new cost methodology applicable to the rail industry as mandated in the 1976 4-R Act and the 1980 Staggers Rail Act.

Timetable:

Action	Date	FR Cite

Decision to hold in abeyance until further notice	11/13/84	49 FR 45080
Draft notice of study being prepared	00/00/00	

Small Entities Affected: Businesses

Government Levels Affected: Undetermined

Additional Information: Ex Parte No. 431 has been held in abeyance pending the development of cost accounting principles by the Railroad Accounting Principles Board. These principles were published on September 1, 1987, and included a recommendation that further research be performed into certain identified subject areas of the Uniform Railroad Costing System before the system is implemented. This is to be done within 18 months of the Board's report.

RIN: 3120–AA63

3824. RAIL GENERAL EXEMPTION AUTHORITY - MISCELLANEOUS MANUFACTURED COMMODITIES, EX PARTE NO. 346 (SUB-NO. 24)

Legal Authority: 49 USC 10505

CFR Citation: 49 CFR 1039

Legal Deadline: None

Abstract: 49 USC 10505 requires that the Commission exempt from regulation the movement by rail of traffic for which it finds continued regulation no longer necessary to serve the Nation's transportation policy objectives and to protect shippers from abuse of market power by the railroads. In examining the transportation characteristics and markets of various commodities moving by rail, there appear to be many products for which sufficient competition exists among transportation alternatives so that regulation may no longer be necessary. Exemption of such commodities should provide increased rate and service flexibility for railroads to meet shippers' needs and to compete more effectively for the subject traffic. Anticipated benefits include lower rates and improved service, at a possible "cost" of increased price instability and competition to alternative transport firms.

3825. PRACTICES OF MOTOR COMMON CARRIERS OF HOUSEHOLD GOODS (REVISION OF OPERATIONAL REGULATIONS), EX PARTE NO. MC-19 (SUB-NO. 36)

Legal Authority: 49 USC 11110

CFR Citation: 49 CFR 1056

Legal Deadline: None

Abstract: This proceeding involves a plenary review of the household goods regulations in which the Commission invites public comment and proposals which would minimize the regulatory burden on movers to the maximum extent consistent with the protection of individual shippers.

3829. ENVIRONMENTAL DOCUMENTATION IN RAIL PROCEEDINGS, EX PARTE NO. 55 (SUB-NO. 22A)

Significance: Agency Priority

Legal Authority: 49 USC 10321; 49 USC 10505; 49 USC 10903 to 10906; 16 USC 1247(d); 42 USC 4332; 5 USC 553; 5 USC 559

CFR Citation: 49 CFR 1105

Legal Deadline: None

Abstract: The Commission is considering whether to modify its procedures to increase certain environmental notice periods and the information included in those notices. The modifications would also require service of environmental notices on designated parties, would substitute a revamped environmental notice for the former report requirement, and would reclassify some categories of actions for which environmental analyses are required.

3830. ● EX PARTE NO. 55 (SUB-NO. 69), RULES GOVERNING APPLICATIONS FOR OPERATING AUTHORITY -- REVISION OF FORM OP-1

Legal Authority: 5 USC 551(a); 5 USC 553; 5 USC 559; 16 USC 1456; 49 USC 10101; 49 USC 10321; 49 USC 10541; 49 USC 10921; 49 USC 10922; 49 USC 10923; 49 USC 10924; 49 USC 10928; 49 USC 10931; 49 USC 11102

CFR Citation: 49 CFR 1003; 49 CFR 1160; 49 CFR 1162; 49 CFR 1168

Legal Deadline: None

Abstract: The Commission proposes to revise significantly the general licensing application form (Form OP-1) and to make corresponding revisions in its regulations governing licensing procedures at 49 CFR 1160, 1162, and 1168 and the list of forms at 49 CFR 1003. The proposed OP-1 replacement form would integrate the information presently required in and supersede: (1) the existing Form OP-1 used by applicants for motor and water carrier, property broker, and household goods freight forwarder authority; and (2) Form OCCA-95 used by applicants for temporary and emergency temporary authority. The proposed form revisions are intended to simplify and unify the temporary and permanent authority licensing processes, minimize the application filing burdens on applicants and, in turn, create a more efficient application process, both for the public and the Commission.

National Credit Union Administration

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

NATIONAL CREDIT UNION ADMINISTRATION (NCUA)

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Ch. VII

Semiannual Agenda of Regulations

AGENCY: National Credit Union Administration ("NCUA").

ACTION: Semiannual agenda of regulations.

SUMMARY: Pursuant to its ongoing policy of reviewing regulations, NCUA is publishing a list of current and projected rulemaking, reviews of existing regulations, and completed actions as of December 31, 1988. NCUA will also include this agenda in the "Unified Agenda of Federal Regulations."

DATE: This information is current as of December 31, 1988.

ADDRESS: National Credit Union Administration, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: For each regulation listed, the person(s) named in the listing, at the above address or listed telephone number.

SUPPLEMENTARY INFORMATION: The purpose of this agenda is to enable credit unions and the public to follow regulatory development and review at NCUA, and to enable interested parties to more effectively participate in that process. The agenda is divided into three parts: (1) Actions completed since the last agenda; (2) actions proposed but not completed; and (3) actions planned but not yet proposed to the NCUA Board. Interpretive Rulings and Policy Statements (IRPS) promulgated by NCUA are also included in the agenda.

The agenda is published pursuant to NCUA Interpretive Ruling and Policy Statement Number 87-2 ("Developing and Reviewing Government Regulations," 52 FR 35231, September 18, 1987). Executive Order No. 12291 does not require independent executive agencies such as NCUA to publish a regulatory agenda, but NCUA has voluntarily decided to do so by including this agenda in the Office of Management and Budget's next publication of its "Unified Agenda of Federal Regulations."

Approved by the NCUA Board on February 8, 1989.

Becky Baker,

Secretary of the Board.

3859. ● FEDERAL CREDIT UNIONS; PAYMENTS ON SHARES BY PUBLIC UNITS AND NONMEMBERS AND REQUIREMENTS FOR INSURANCE

Significance: Agency Priority

Legal Authority: 12 USC 1755 to 1757; 12 USC 1759; 12 USC 1761a to 1761b; 12 USC 1766 to 1767; 12 USC 1782; 12 USC 1784; 12 USC 1787; 12 USC 1789; 12 USC 1781

CFR Citation: 12 CFR 701.32; 12 CFR 741.5

Legal Deadline: None

Abstract: New Section 701.32 requires that FCU's obtain NCUA approval prior to receiving nonmember funds in excess of 20% of total shares. Credit unions exceeding 20% at the time the regulation was adopted must, within 60 days, come into compliance or request NCUA approval. A change to Section 741.5 of the Regulations requires that federally-insured, state chartered credit unions comply with these limitations.

Nuclear Regulatory Commission

Semiannual Regulatory Agenda

VOL 54 ISS 77 AP 24 1989 UMI

NUCLEAR REGULATORY COMMISSION (NRC)

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. I

Regulatory Agenda

AGENCY: Nuclear Regulatory Commission.

ACTION: Semiannual publication of NRC regulatory agenda.

SUMMARY: The Nuclear Regulatory Commission (NRC) is publishing its semiannual Regulatory Agenda in accordance with Pub. L. 96-354, "the Regulatory Flexibility Act," and Executive Order 12291, "Federal Regulations." The agenda is a compilation of all rules on which the NRC has recently completed action or has proposed or is considering action. This issuance updates any action occurring on rules since publication of the last semiannual agenda on October 24, 1988 (53 FR 42842).

ADDRESSES: Comments on any rule in the agenda may be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Comments may also be hand delivered between 7:30 a.m. and 4:15 p.m. Comments received on rules for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the agenda.

The agenda and any comments received on any rule listed in the agenda are available for public inspection and copying at a cost of ten cents per page at the Nuclear Regulatory Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555. Single copies of the NRC quarterly agenda can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082. Customers may call (202) 275-2060 or (202) 275-2171.

FOR FURTHER INFORMATION CONTACT: For further information concerning NRC rulemaking procedures or the status of any rule listed in this agenda, contact Michael Lesar, Acting Chief, Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492-7758. Persons outside the Washington, DC, metropolitan area may call toll-free: (800) 368-5642. For further information on the substantive content of any rule listed in the agenda, contact the individual listed under the heading "Agency Contact" for that rule.

SUPPLEMENTARY INFORMATION: Although publication of the agenda is only required semiannually in April and October, the NRC has chosen to update and publish its agenda each quarter. However, the information contained in this semiannual publication is updated to reflect any action which has occurred on rules since publication of the last NRC semiannual agenda on October 24, 1988 (53 FR 42842).

Within each group, the rules are ordered from the lowest to the highest part within Title 10 of the Code of Federal Regulations (Title 10) and when more than one rule appears under the same part, the rules are arranged within that part according to the date of most recent publication. If a rule contains changes to more than one Title 10 part, the rule is listed under the lowest affected part.

The Information in this agenda has been updated through February 24, 1989. The date under the heading, "Timetable," for the next scheduled action is the date the rule is scheduled to be published in the **Federal Register.** The date is considered tentative and is not binding on the Commission or its staff. This regulatory agenda is intended to provide the public early notice and opportunity to participate in the NRC rulemaking process. However, the NRC may consider or act on any rulemaking even though it is not included in the regulatory agenda.

Rulemakings Approved by the Executive Director for Operations (EDO)

The Executive Director for Operations (EDO) initiated a procedure for the review of the regulations being prepared by staff offices that report to him to ensure that staff resources were being allocated to achieve most effectively NRC's regulatory priorities. This procedure requires EDO approval before staff resources may be expended on the development of any new rulemaking. Furthermore, all existing rules must receive EDO approval prior to the commitment of additional resources.

Rules that have received EDO approval to date are identified by the symbol (+) at the beginning of the title. As additional rules receive EDO approval, they will be identified in subsequent editions of this agenda.

The NRC agenda lists rulemaking actions. Of these, no rulemaking items are considered to be priority or major as defined in section 1(b) of Executive Order 12291.

Four rules potentially will have a "significant economic impact on a substantial number of small entities" as defined in the Regulatory Flexibility Act.

Dated at Bethesda, Maryland, this 24th day of February 1989.

For the Nuclear Regulatory Commission.

David L. Meyer,

Chief, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration.

NUCLEAR REGULATORY COMMISSION (NRC)

Prerule Stage

3860. ● PERSONNEL ACCESS AUTHORIZATION PROGRAM

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050; 10 CFR 073

Legal Deadline: None

Abstract: The Commission has concluded that it is appropriate for each licensee who operates a nuclear power plant to establish an access authorization program to ensure that individuals who require unescorted access to protected areas or vital areas of their facilities are trustworthy, reliable, emotionally stable, and do not pose a threat to commit radiological sabotage. Accordingly, the NRC published a proposed rule on August 1, 1984, which would require an access authorization program at nuclear power plants (42 FR 30726).

An alternative proposal by the Nuclear Utility Management and Resource Committee (NUMARC) was submitted as a public comment on this proposed rule. The alternative proposed a voluntary industry commitment to implement an access authorization program at nuclear power plants based upon industry guidelines. Major provisions of this program include background investigation, psychological evaluation, and behavioral observation.

Timetable:

Action	Date	FR Cite
Proposed Policy Statement Published	03/09/88	53 FR 7534

Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information:

On June 18, 1986, the Commission approved developing a policy statement endorsing industry guidelines as an alternative to the proposed rulemaking. Commitments to adhere to these guidelines would be formalized through amendments to the physical security plans and be subject to inspection and enforcement by NRC.

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is proposing to develop regulations requiring enhanced receipt inspection and testing of products purchased for use in nuclear power plant structures, systems, and components. These regulations are believed to be necessary to provide an acceptable level of assurance that products purchased for use in nuclear power plants will perform as expected to protect the public health and safety. An Advance Notice of Proposed Rulemaking (ANPRM) will be published to solicit public comments on the need for additional regulatory requirements and to obtain an improved understanding of alternatives to regulatory requirements.

NUCLEAR REGULATORY COMMISSION (NRC)

Proposed Rule Stage

3862. COMPREHENSIVE QUALITY ASSURANCE IN MEDICAL USE AND A STANDARD OF CARE

Legal Authority: 42 USC 2111; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 35

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is considering whether to amend its regulations to require a comprehensive quality assurance program for medical licensees using byproduct materials. The purpose of this rulemaking action is to address each source of error that can lead to a misadministration. An advance notice of proposed rulemaking was published to request public comment on the extent to which, in addition to the basic quality assurance steps (being addressed by another rulemaking action, entitled "Basic Quality Assurance in Radiation Therapy"), a more comprehensive quality assurance requirement is needed and invites advice and recommendations on about 20 questions that will have to be addressed in the rulemaking process.

3863. MEDICAL USE OF BYPRODUCT MATERIAL: TRAINING AND EXPERIENCE CRITERIA

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 035

Legal Deadline: None

Abstract: The Commission is considering whether its training and experience criteria for individuals involved in medical use of byproduct material need to be revised. Rulemaking may be needed to reduce the change of misadministrations. The Commission may proceed with rulemaking, assist in the development of national voluntary training standards, or issue a policy statement recommending increased licensee attention to training. If the Commission proceeds with rulemaking, the NRC could publish criteria in its regulations or recognize medical specialty certificates. The NRC is not able to project costs or benefits at this time, and has requested cost/benefit comments in an Advance Notice of Proposed Rulemaking published May 25, 1988. The NRC has hired a contractor to study training, accreditation and certification programs that are now in place. The NRC staff will analyze the study results and the comments received to determine whether regulatory action is necessary.

3864. CRITERIA FOR LICENSING THE CUSTODY AND LONG-TERM CARE OF URANIUM MILL TAILINGS SITES

Legal Authority: 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 40

Legal Deadline: None

Abstract: The proposed rulemaking would amend 10 CFR Part 40 (Domestic Licensing of Source Material), to include a procedure for licensing a custodian for the post-closure, long-term control of uranium mill tailings sites required by the Uranium Mill Tailings Radiation Control Act of 1987 (UMTRCA). This amendment would establish a general license for custody

VOL 54 ISS 77 AP 24 1989 UMI

and long-term care of uranium mill tailings by the Department of Energy, other designated Federal agencies, or States when applicable. The general license would be formulated so that it would become effective for a particular site when (1) NRC concurs in the DOE determination that the site has been properly constructed and (2) a surveillance and maintenance plan that meets the requirements of the general license has been received by NRC. No significant impact to the public or industry is expected as a result of this proposed action.

3865. REGULATION OF URANIUM ENRICHMENT FACILITIES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 76

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is considering whether to amend its regulations to create a new part that would pertain to uranium enrichment facilities. The construction and operation of these facilities are currently licensed under the regulations for other production and utilization facilities (e.g., nuclear power plants) in 10 CFR Part 50. An advance notice of proposed rulemaking requested comments on whether a separate set of regulations for uranium licensing is desirable. Comments have been received are are being reviewed.

3867. NIGHT FIRING QUALIFICATIONS FOR SECURITY GUARDS AT NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 73

Legal Deadline: None

Abstract: The proposed rule would ensure that security force effectiveness at nuclear power plants is not dependent on the time of day. Security guards currently are required to perform night firing for familiarization only. There is no requirement for standards to measure their effectiveness. The proposed rule would change that by requiring that security guards at nuclear power plants qualify for night firing. The only alternative to rulemaking is to retain the current status.

Part 73, Appendix B, Part IV, will be amended to require reactor security guards to qualify annually in an NRC-approved night firing course with their assigned weapons. The proposed amendment will standardize training and qualification in night firing and prepare power reactor guard forces to more effectively respond in the event of an incident occurring in limited lighting conditions. The cost to industry should be relatively modest since licensees already operate daylight firing training and qualification facilities and programs. The costs to NRC will also be minimal because it will only (cont)

3868. ● INDEMNIFICATION OF LICENSEES THAT MANUFACTURE, PRODUCE, POSSESS OR USE RADIOPHARMACEUTICALS OR RADIOISOTOPES FOR MEDICAL PURPOSES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission (NRC) is required to conduct a negotiated rulemaking to determine whether to enter into indemnity agreement with persons licensed by the Commission or by an Agreement State for the manufacture, production, possession, or use of radioisotopes or radiopharmaceutical for medical purposes. The Price Anderson Amendments Act requires the NRC to conduct the negotiated rulemaking proceedings. Upon completion of proceedings, the designated convenor for the proceedings will provide recommendations on whether the NRC should enter into indemnity agreements with radiopharmaceutical licensees. If the convenor recommends that the NRC indemnify any of the licensees, a proposed rule will be drafted to set forth the terms and conditions of indemnification.

3869. ● SEQUESTRATION OF WITNESSES INTERVIEWED UNDER SUBPOENA

Legal Authority: 41 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 019

Legal Deadline: None

Abstract: The proposed rule would give the agency official conducting the investigation (after consultation with the Office of the General Counsel), the authority to exclude counsel when there is a reasonable basis to believe that the attendance of the particular attorney might prejudice, impede, or impair the investigation by reason of that attorney's dual representation of other interests. The proposed rule also provides for the separation of multiple interviewees during the conduct of interviews and defines sequestration. The proposed action is necessary because the NRC has encountered difficulties in conducting investigative interviews of individuals in an atmosphere free of outside influences. The proposed rule is intended to clarify and delineate the rights and responsibilities of the agency, interviewees, and the licensees during the conduct of agency investigations and inspections. The proposed amendments are not expected to have any economic impact on the NRC or its licensees.

3870. BASIC QUALITY ASSURANCE IN RADIATION THERAPY

Legal Authority: 42 USC 2111; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 35

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is proposing to amend its regulations concerning the medical use of byproduct material. The proposed amendments would require its medical licensees that use byproduct material to implement a written basic quality assurance program that will avoid simple human errors and promptly detect and correct any errors that occur. The proposed action is necessary to provide for improved patient safety and serve as a basis for enforcement action in case of a therapy misadministration. The proposed amendment, which is intended to reduce the potential for and severity of therapy misadministrations, would primarily affect hospitals, clinics, and individual physicians.

3871. REVISED RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

Legal Authority: 42 USC 2201; 42 USC 2231; 42 USC 2241; 42 USC 5841; 5 USC 552

CFR Citation: 10 CFR 0; 10 CFR 1; 10 CFR 2; 10 CFR 9; 10 CFR 50

Legal Deadline: None

Abstract: Chairman Zech has requested re-submission of this proposed rule for possible re-consideration by the Nuclear Regulatory Commission. The Commission had deferred further consideration of this proposal which would have revised the Commission's procedural rules governing the conduct of all adjudicatory proceedings, with the exception of export licensing proceedings under 10 CFR Part 110. The proposed rule would shorten and simplify existing Commission procedural rules applicable to domestic licensing proceedings by comprehensively restating the current practice, and revising and reorganizing the statement of those rules to reflect current practice. The changes in this proposed rule would enable the Commission, directly and through its adjudicatory offices, to render decisions in a more timely fashion, eliminate the stylistic complexity of the existing rules, and reduce the burden and expense to the parties participating in agency proceedings.

3872. AVAILABILITY OF OFFICIAL RECORDS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 2

Legal Deadline: None

Abstract: The proposed amendment would conform the NRC's regulations pertaining to the availability of official records to existing case law and agency practice. The amendment would reaffirm that the terms of 10 CFR 2.790(c) provide submitters of information a qualified right to have their information returned upon request. This amendment informs the public of three exceptions to the right to withdraw, pursuant to 10 CFR 2.790(c) of the NRC's regulations, i.e., information submitted in a rulemaking proceeding that subsequently forms the basis for the final rule, information which has been made available to an advisory committee or was received at an advisory committee meeting, and information that is subject to a pending Freedom of Information Act request.

Additionally, the proposed amendment would add a notice statement to 10 CFR Part 2 that submitters of documents and information to the NRC should be careful in submitting copyrighted works. The agency in receiving submittals and making its normal distributions routinely photocopies submittals, makes microfiche of such submittals and insures that these (con't)

Timetable:

Action	Date	FR Cite

RIN: 3150-AC07

3873. REVISION OF DEFINITION OF MEETING

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 9

Legal Deadline: None

Abstract: The proposed rule would return the definition of "meeting" to its pre-1985 wording. The proposal is based on a study of comments submitted on an interim final rule published on May 21, 1985 (50 FR 20889), and the 1987 recommendations and report of the American Bar Association (ABA). Since the pre-1985 wording of the definition of meeting is fully adequate to permit the types of non-Sunshine Act discussions that the NRC believes would be useful, the proposal calls for the NRC to reinstitute its pre-1985 definition of meeting, with the intention of conducting its non-Sunshine Act discussions in accordance with the guidelines recommended by the ABA.

3874. TWENTY-FOUR HOUR NOTIFICATION OF INCIDENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 20

Legal Deadline: None

Abstract: This rulemaking would amend 10 CFR Part 20.403(a) and (b) to clarify the licensees' reporting requirements. While 10 CFR 20.403(a) and (b) are reasonably clear in terms of licensee reporting requirements for events involving "exposures" and "releases" of radioactive materials, these sections are not clear concerning events involving "loss of operation" and "damage to property." "Loss of operation" should be clarified in terms of loss of use of facilities, devices or equipment. "Damage to property" should be clarified to include contamination clean-up if the corrective action is equal to or greater than a certain cost. In addition, the rulemaking should also define "immediate" in actual time, e.g., within 1 hour, for reporting requirements.

This rulemaking action will clarify a current Commission regulation; there is no other appropriate procedure to accommodate the clarification. This rulemaking activity is considered to be a high priority item by NMSS.

Timetable:

Action	Date	FR Cite
NPRM	05/00/89	
Final Action	04/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: The health and safety of the public will be better protected because improved reporting requirements will reduce the potential risk of exposure to radiation from damaged or contaminated material. Clarifying the reporting requirements will simplify regulatory functions and free the staff from unnecessary additional investigation and, at the same time, protect the industry from unnecessary and unexpected fines. The offices of OE, NMSS, and RES are significantly affected by this clarification. ARM and the regions are affected, but to a much lesser degree.

Agency Contact: Joseph J. Mate, Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, Washington, DC 20555, 301 492-3795

3875. ● PALLADIUM-103 FOR THE INTERSTITIAL TREATMENT OF CANCER

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 035

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations concerning the medical use of byproduct material to add Palladium-103 sealed source as seeds to the list of sources permitted for use in cancer treatment under 10 CFR 35.400. Under current NRC regulations. Each potential user would be required to obtain a license amendment before they would be permitted to use Palladium-103 seeds in brachytherapy. The proposed rule, developed in response to a petition for rulemaking (PRM-35-7), would allow the use of Palladium-103 seeds by each potential user, about 700 licensees, without requiring each user to obtain a license amendment.

3876. LICENSEES AND RADIATION SAFETY REQUIREMENTS FOR LARGE IRRADIATORS

Legal Authority: 42 USC 2073; 42 USC 2093; 42 USC 2111; 42 USC 2232; 42 USC 2233; 42 USC 2273; 42 USC 5842

CFR Citation: 10 CFR 036

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is developing regulations to specify radiation safety requirements and license requirements for the use of licensed radioactive materials in large irradiators. Irradiators use gamma radiation to irradiate products to change their characteristics in some way. The requirements would apply to large panoramic irradiators (those in which the radioactive sources and the material being irradiated are in a room that is accessible to personnel while the source is shielded) and certain large self-contained irradiators in which the source always remains under water. The rule would not cover small self-contained irradiators, instrument calibrators, medical uses of sealed sources (such as teletherapy), or non-destructive testing (such as industrial radiography).

The alternative to a regulation is continuing to license irradiators on a case-by-case basis using license conditions. The formalization would make the NRC's requirements better understood and possibly speed the licensing of irradiators. Development of the rule will require 2 staff-years.

3877. SAFETY RELATED AND IMPORTANT TO SAFETY IN 10 CFR PART 50

Legal Authority: 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission proposes to clarify its regulations on the use of the terms "important to safety" and "safety related" by adding definitions of these two terms and of "facility licensing documents" to 10 CFR Part 50 and by discussing how these definitions will be applied in NRC licensing reviews. Significant issues concerning the meaning of these terms as they are used in this part have arisen in Commission licensing proceedings. This proposed rule would define these terms and clarify the nature and extent of their effect on quality assurance requirements, thereby resolving these issues.

Rulemaking was chosen as the method of resolving this issue as a result of the Commission's directive to resolve the issue by rulemaking contained in the Shoreham licensing decision (CLI-84-9, 19 NRC 1323, June 5, 1984).

A position paper requesting approval of the staff proposed definitions and additional guidance from the Commission was signed by the EDO on May 29, 1986. In addition to rulemaking, the position paper discusses the alternative of the Commission (cont)

Timetable:

Action	Date	FR Cite

Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: ABSTRACT CONT: issuing a policy statement concerning the definitions and their usage.

Since the proposed rule is only clarifying existing requirements, there is no impact on the public or the industry as a result of this rulemaking. It is anticipated that the NRC will expend 3.2 to 4.4 staff years in developing the final rule over a two year period. The manpower and time frame will depend on Commission guidance received on

VOL 54 ISS 77 AP 24 1989 UMI

the extent to which 10 CFR usage of the terms is to be consistent, i.e., 10 CFR Part 50 only or all of 10 CFR. The timetable for this rule is on hold based on a decision by the Commission.

Agency Contact: Jerry N. Wilson, Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, Washington, DC 20555, 301 492-3729

RIN: 3150–AB88

3878. ● CODES AND STANDARDS FOR NUCLEAR POWER PLANTS (ASME CODE, SECTION XI, DIVISION 1, SUBSECTION IWE)

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would incorporate by reference Subsection IWE, "Requirements for Class MC Components of Light-Water Cooled Power Plants," of Section XI (Division 1) of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code). Subsection IWE provides the rules and requirements for inservice inspection, repair, and replacement of Class MC pressure retaining components and their integral attachments, and of metallic shell and penetration liners of Class CC pressure retaining components and their integral attachments in light-water cooled power plants.

Incorporation by reference of Subsection IWE will provide systematic examination rules for containment structure for meeting Criterion 53 of the General Design Criteria (Appendix A of 10 CFR Part 50) and Appendix J of 10 CFR Part 50. Age-related degradation of containments has occurred, and additional and potentially more serious degradation mechanisms can be anticipated as nuclear power plants age. (cont)

Timetable:

Action	Date	FR Cite
NPRM	04/00/89	
Final Action	04/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: If the NRC did not take action to endorse the Subsection IWE rules, the NRC position on examination practices for containment structure would have to be established on a case-by-case basis and improved examination practices for steel containment structures might not be implemented. The other alternatives of incorporating these detailed examination requirements into the American National Standard ANSI/ANS 56.8-1981 or into Appendix J are not feasible.

Incorporating by reference the latest edition and addenda of Subsection IWE will save applicants/licensees and the NRC staff both time and effort by providing uniform detailed criteria against which the staff can review any single submission. Adoption of the proposed amendment would permit the use of improved methods for containment inservice inspection.

Agency Contact: Wallace E. Norris, Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, Washington, DC 20555, 301 492-3938

RIN: 3150–AC93

3879. PRESSURIZED THERMAL SHOCK RULE

Legal Authority: 42 USC 2133; 42 USC 2134; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The Pressurized Thermal Shock (PTS) Rule, published July 23, 1985, established a screening criterion, a limit on the degree of radiation embrittlement of PWR reactor vessel beltline materials beyond which operation cannot continue without additional plant-specific analysis. The rule prescribes how to calculate the degree of embrittlement as a function of the copper and nickel contents of the controlling material and the neutron fluence. The proposed amendment revises the calculative procedure to be consistent with that given in Revision 2 of Regulatory Guide 1.99. The guide provides an updated correlation of embrittlement data, which received CRGR approval for publication in final form on December 9, 1987.

The need to amend the PTS rule to be consistent with the guide became apparent when it was found that some medium-copper, high-nickel materials embrittlement is worse now than predicted using the PTS rule. A number of PWR's will reach the screening criterion sooner than previously thought, and three plants will need to make plant-specific analyses (cont)

Timetable:

Action	Date	FR Cite
NPRM	05/00/89	
Final Action	06/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: in the next 10 years. Therefore, a high priority is being given to this effort.

An unacceptable alternative to this amendment from the safety standpoint is to leave the present PTS rule in place. The staff's plant-by-plant analyses found four plants whose reference temperatures are 52 to 68 degrees F higher than previously thought, based on the present rule. This is beyond the uncertainties that were felt to exist when the proposed rule was published. Another unacceptable alternative that has been evaluated is to change the calculative procedure for the reference temperature and also change the screening criterion. Failure probabilities for the most critical accident scenarios in three plants, when recalculated using the new embrittlement estimates, were somewhat lower, but were quite dependent on the plant configuration and the scenario chosen. Furthermore, the screening criterion was based on a variety of considerations besides the probabilistic analysis. Reopening the question of where to set the screening criterion was not considered productive because of plant-to-plant differences.

RIN: 3150–AD01

3880. ● CODES AND STANDARDS FOR NUCLEAR POWER PLANTS (ASME CODE, 1986/1987 ADDENDA)

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would incorporate by reference the 1986 Addenda and 1987 Addenda to the 1986 Edition of Section III, Division 1, and

Section XI, Division 1, of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code). In addition, an editorial revision is proposed that would separate the requirements for inservice testing from those for inservice inspection by placing the requirements for inservice testing in a separate paragraph. The ASME Code provides rules for the construction of light-water-reactor nuclear power plant components in Section III, Division 1, and provides rules for the inservice inspection and inservice testing of those components in Section XI, Division 1.

The proposed rule would update the existing reference to the ASME Code and would thereby permit the use of improved methods for the construction, inservice inspection, and inservice testing of nuclear power plant components. Incorporating by reference the latest addenda of the ASME Code would save applicants applicants/licensees and the NRC staff both time and effort by providing uniform detailed criteria against which the (cont)

Government Levels Affected: Undetermined

Additional Information: staff could review any single submission.

This action will be handled as a routine updating of 10 CFR 50.55a of the NRC regulations. There is no reasonable alternative to rulemaking action. The proposed amendment will be issued for public comment. The task to develop and publish the proposed amendment is scheduled for a period of 7.5 months with an estimated staff effort of 400 p-hrs. This is a priority A rulemaking.

3881. ● MINOR AMENDMENTS TO PHYSICAL PROTECTION REQUIREMENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 070; 10 CFR 072; 10 CFR 073; 10 CFR 075

Legal Deadline: None

Abstract: The Safeguards Interoffice Review Group (SIRG) of the NRC has been conducting a systematic review of the agency's safeguards regulations and guidance documents. This review has identified areas in the regulations that are out of date, susceptible to differing interpretations, or in need of clarification. In addition, the staff has identified other areas in the regulations where minor changes are warranted. In response to these efforts, specific amendments to the regulations are being proposed. The proposed changes would: (1) limit the use of the 100 rems per hour at 3 feet dose exemption to a reduction of no more than one physical protection category and not allow a drop below the lowest category, (2) add definitions for common terms not currently defined by frequent use, (3) delete action dates that no longer apply, (4) correct outdated terms and cross references, (5) clarify wording that is susceptible to differing interpretations, (6) correct typographical errors, and (7) make other minor changes.(cont)

Final Action	04/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: The alternative to rulemaking would be to allow the status quo to continue. Except for the change in the impact of a high radiation field on physical protection requirements, these minor amendments affect the public, industry and the NRC only in so far as they make the regulations easier to understand, implement, and enforce. Limiting the use of the 100 rem per hour at 3 feet dose exemption to a reduction of no more than one physical protection category, and not allowing a drop below the lowest category, could affect two non-power reactor licensees. It is estimated that 0.4 staff-years of NRC effort over 2 years will be required for the rulemaking. This is a low priority rulemaking.

3882. STORAGE OF SPENT NUCLEAR FUEL IN NRC APPROVED CASKS AT CIVILIAN NUCLEAR POWER REACTOR SITES

Legal Authority: 42 USC 10153; 42 USC 10198

CFR Citation: 10 CFR 72; 10 CFR 73; 10 CFR 74; 10 CFR 170

Legal Deadline: None

Abstract: The proposed rule is in response to the Nuclear Waste Policy Act (NWPA) section 218 (a) which states in part, that the Secretary of DOE shall establish a demonstration program, in cooperation with the private sector, for dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the Commission may, by rule, approve for use at sites of civilian nuclear power reactors. The NWPA also requires that the NRC establish procedures for the licensing of any technology approved by the Commission under section 218(a) for use at the site of any civilian nuclear power reactor.

The staff anticipates a significant increase in the demand for use of dry spent fuel storage casks starting in the early 1990s, thus processing of this proposed rule would be timely. NRC resource requirements are anticipated to be about two staff years.

3883. ● NRC ACQUISITION REGULATION (NRCAR)

Legal Authority: 42 USC 2201; 41 USC 401

CFR Citation: 48 CFR 020

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to establish provisions unique to the NRC concerning the acquisition of goods and services. The NRC Acquisition Regulation is necessary to implement and supplement the government-wide Federal Acquisition Regulation. This action is necessary to ensure that the regulations governing the procurement of goods and services within the NRC satisfy the needs of the agency. The NRC Acquisition Regulation implements the Federal Acquisition Regulation within the agency and includes additional policies, procedures, solicitation provisions, or contract clauses needed to meet specific NRC needs.

NUCLEAR REGULATORY COMMISSION (NRC) — Final Rule Stage

3884. RADIOACTIVE WASTE BELOW REGULATORY CONCERN; GENERIC RULEMAKING

Legal Authority: 42 USC 2201

CFR Citation: 10 CFR 2; 10 CFR 20

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) sought comments on a proposal to amend NRC regulations to address disposal of radioactive wastes that contain sufficiently low quantities of radionuclides that their disposal does not need to be regulated as radioactive.

The NRC has already published a policy statement providing guidance for filing petitions for rulemaking to exempt individual waste streams (August 29, 1986; 51 FR 30839). It is believed that generic rulemaking could provide a more efficient and effective means of dealing with disposal of wastes below regulatory concern. Generic rulemaking would supplement the policy statement which was a response to Section 10 of the Low-Level Radioactive Policy Amendments Act of 1985 (Pub. L. 99-240). The public was asked to comment on 14 questions. The ANPRM requested public comment on several alternative approaches that the NRC could take. The evaluation of public comment together with the results from a proposed research contract will help to determine whether and how NRC should proceed on the matter.

3885. LICENSEE ACTION DURING NATIONAL SECURITY EMERGENCY

Legal Authority: 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would allow a licensee during a national security emergency to deviate from a license condition or a technical specification. The Commission previously has granted authority to nuclear power reactor licensees to take reasonable action that departs from a license condition or a technical specification in an emergency when the action is immediately necessary to protect the public health and safety and no action consistent with license conditions and technical specifications that can provide adequate or equivalent protection is immediately apparent. This proposed rule will provide the same flexibility to licensees, but for the purpose of attaining national security objectives during a declared national emergency due to nuclear war or natural disaster.

The proposed rule change does not significantly impact state and local governments, health, safety, and the environment; or costs to licensees.

3886. PROCEDURES INVOLVING THE EQUAL ACCESS TO JUSTICE ACT: IMPLEMENTATION

Legal Authority: 5 USC 504

CFR Citation: 10 CFR 1; 10 CFR 2

Legal Deadline: None

Abstract: The proposed rule would implement the Equal Access to Justice Act (EAJA) by providing for the payment of fees and expenses to certain eligible individuals and businesses that prevail in agency adjudications when the agency's position is determined not to have been substantially justified. This proposed regulation is modeled after rules issued by the Administrative Conference of the United States (ACUS) and have been modified to conform to NRC's established rules of practice. The proposed rule would further the EAJA's intent to develop government-wide, "uniform" agency regulations and would describe NRC procedures and requirements for the filing and disposition of EAJA applications. A draft final rule was sent to the Commission in June 1982, but Commission action was suspended pending a decision by the Comptroller General on the availability of funds to pay awards to intervenor parties. This issue was also the subject of litigation in Business and Professional People for the Public Interest v. NRC, 793 F. 2d 1366 (D.C. Cir. 1986). This litigation is being evaluated to determine what if any changes may be necessary in the proposed rule. (cont)

3887. MODIFICATIONS TO THE NRC HEARING PROCESS (LIMITED INTERROGATORIES AND FACTUAL BASIS FOR CONTENTIONS)

Legal Authority: 42 USC 2239

CFR Citation: 10 CFR 2

Legal Deadline: None

Abstract: The proposed rule would expedite conduct of NRC adjudicatory proceedings by requiring intervenors in formal NRC hearings to set forth the facts on which contentions are based and the sources or documents used to establish those facts and limit the number of interrogatories that a party may file in an NRC proceeding. The proposed rule would expedite the hearing process by, among other things, requiring intervenors to set forth at the outset the facts upon which their contention is based and the supporting documentation to give other parties early notice of intervenor's case so as to afford opportunity for early dismissal of contentions where there is no factual dispute. Expediting the hearing process should ultimately provide cost savings to all participants in the process. The content of this rule is being considered as part of the regulatory reform rulemaking package.

3888. NEPA REVIEW PROCEDURES FOR GEOLOGIC REPOSITORIES FOR HIGH-LEVEL WASTE

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 02; 10 CFR 51; 10 CFR 60

Legal Deadline: None

Abstract: The proposed rule would provide procedures for performing an environmental review of High Level Waste (HLW) geologic repositories. Part 51 contains no provisions for the environmental review of a license application for a HLW repository. The Nuclear Waste Policy Act of 1982 established requirements for environmental reviews which are at variance with the environmental reviews that the NRC performs in licensing other types of nuclear facilities. This issue must be addressed in order to avoid delay in the U.S. HLW Program. The proposed rule would benefit the public, industry, and NRC by clarifying licensing procedures, thus avoiding case determinations and possible litigation during HLW geologic repository licensing. Minor revisions to Part 60 will be necessary to conform to the environmental requirements of the NWPA.

3889. ISSUANCE OR AMENDMENT OF POWER REACTOR LICENSE OR PERMIT FOLLOWING INITIAL DECISION

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 2

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's "immediate effectiveness" regulation that specifies when an initial adjudicatory decision authorizing the issuance or amendment of a license or permit becomes effective. The proposed rule would (1) remove the existing provision governing the effectiveness of initial decisions regarding power reactor construction permits and (2) revise the Commission's existing practice regarding "effectiveness reviews" for full-power operating licenses. The proposed rule also would delete language in the existing regulation emanating from Three Mile Island-related regulatory policies, for which action has now been completed.

The proposed rule supersedes two prior proposed rules entitled "Possible Amendments to 'Immediate Effectiveness' Rules," published May 22, 1980 (45 FR 43279), and "Commission Review Procedures for

VOL. 54 ISS 77 APR 24 1989 UMI

Power Reactor Construction Permits; Immediate Effectiveness Rule," published October 25, 1982 (47 FR 47260).

3890. RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS—PROCEDURAL CHANGES IN HEARING PROCESS

Legal Authority: 42 USC 2201; 42 USC 2231; 42 USC 2241; 42 USC 5841

CFR Citation: 10 CFR 2

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission (NRC) is considering amendments to its rules of practice which address the following aspects of the hearing process: admission of contentions, discovery against NRC staff, use of cross examination plans, timing of motions for summary disposition and limitations on matters and issues that may be included in proposed findings of fact or conclusions of law, or in an appellate brief submitted by a person who does not have the burden of proof or who has only a limited interest in the proceeding. These proposals were initially developed by the Regulatory Reform Task Force and published for public comment, together with a number of other proposals, as suggestions for procedural changes in the licensing of nuclear power plants (49 FR 14698; April 12, 1984). The Commission has decided not to proceed with the April 1984 proposals, except to the extent that they were included in this proposed rule. Therefore, the April 1984 proposals have been deleted from the regulatory agenda.

The NRC is also considering related amendments on the process of intervention that were developed by former Commissioner (cont)

3891. ● RULE ON THE SUBMISSION AND MANAGEMENT OF RECORDS AND DOCUMENTS RELATED TO THE LICENSING OF A GEOLOGIC REPOSITORY FOR THE DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 002; 10 CFR 060

Legal Deadline: None

Abstract: The Nuclear Waste Policy Act (NWPA) provides three years for the NRC to reach a decision on construction authorization for a high-level waste repository. In order for the NRC to be able to make its decision within the allotted time, ready access to all pertinent records must be assured to all parties in the licensing proceeding. The DOE has committed to develop an electronic information management system to be used for the licensing proceeding. The NRC staff intends to use the process of negotiated rulemaking to develop a proposed rule that would revise the Commission's discovery procedure and motion practice in 10 CFR Part 2 for the high-level waste licensing proceeding. This rule would require the DOE license application and all supporting records to be provided in a standardized electronic format. All parties to the licensing proceeding would be required to submit all relevant data to this system. In turn, all parties would have access to the data base.

Resource estimates currently under development.

3892. STANDARDS FOR PROTECTION AGAINST RADIATION

Legal Authority: 42 USC 2073; 42 USC 2093; 42 USC 2095; 42 USC 2111; 42 USC 2133; 42 USC 2134; 42 USC 2201; 42 USC 2273; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 20

Legal Deadline: None

Abstract: Radiation protection philosophy and technology have changed markedly since the present Part 20 was promulgated nearly thirty years ago. Since Part 20 contains the NRC standards for protection against radiation that are used by all licensees and affects exposures of workers and members of the public, it should be the most basic of the NRC regulations. However, because the present Part 20 has become outdated, most radiation protection actions occur through licensing actions independent of Part 20. A complete revision is necessary to provide better assurance of protection against radiation; establish a clear health protection basis for the limits; reflect current information on health risk, dosimetry, and radiation protection practices and experience; provide NRC with a health protection base from which it may consider other regulatory actions taken to protect public health; be consistent with recommendations of world authorities (ICRP); and apply to all licensees in a consistent manner.

Alternatives to the complete revision considered were no action; (cont)

Next Action Undetermined

Small Entities Affected: Businesses, Governmental Jurisdictions, Organizations

Government Levels Affected: Undetermined

Additional Information: ABSTRACT CONT: delay for further guidance, and partial revision of the standards. These were rejected as ignoring scientific advancements, being unresponsive to international and national guidance, and correcting only some of the recognized problems with the present Part 20.

Benefits would include updating the regulations to reflect contemporary scientific knowledge and radiation protection philosophy; implementing regulations which reflect the ICRP risk-based rationale; reducing lifetime doses to individuals receiving the highest exposures; implementing provisions for summation of doses from internal and external exposures; providing clearly identified dose limits for the public; and providing an understandable health-risk base for protection.

Initial estimates of the cost of implementing the revision is about $33 million for all NRC and Agreement State licensees in the initial year and about $8 million in each subsequent year. This cost does not include any savings which might also be realized by the revision.

3893. DISPOSAL OF WASTE OIL BY INCINERATION FROM NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201; 42 USC 2167; 42 USC 2073

CFR Citation: 10 CFR 20

Legal Deadline: None

Abstract: The proposed rule, which is being initiated in partial response to a petition filed by Edison Electric Institute and Utility Nuclear Waste Management Group (PRM-20-15, dated July 31, 1984), would amend NRC regulations to allow onsite incineration of waste oil at nuclear power plants subject to specified conditions. Currently, the only approved disposal method for low-level, radioactively contaminated waste oil from nuclear power plants involves absorption or solidification, transportation to, and burial at a licensed disposal site. There is a clear need to allow, for very low activity level wastes, the use of alternative disposal methods which are more cost effective from a radiological health and safety standpoint and which conserve the limited disposal capacity of low-level waste burial sites.

Increased savings to both the public and the industry could thereby be achieved without imposing additional risk to the public health and safety. There would be an estimated industry-wide economic savings of approximately $3 million to $12 million per year if such a rule were promulgated. (cont)

3894. PROPOSED REVISIONS TO THE CRITERIA AND PROCEDURES FOR THE REPORTING OF DEFECTS AND NONCOMPLIANCE

Legal Authority: 42 USC 2201; 42 USC 2282; 42 USC 5841; 42 USC 5846

CFR Citation: 10 CFR 21; 10 CFR 50

Legal Deadline: None

Abstract: This proposed rule would amend Part 21 and sec. 50.55(e), both of which require the reporting of safety defects by licensees. In addition, Part 21 requires reporting by non-licensees. This proposed amendment was prompted by TMI Action Plan Task II, J.4, and NRC staff experience with Part 21 and section 50.55 (e) reporting. The main objectives of the rulemaking effort are: (1) elimination of duplicate evaluation and reporting of safety defects; (2) consistent threshold for safety defect reporting in Part 21 and section 50.55(e); (3) establishment of consistent and uniform content of reporting under Part 21 and section 50.55 (e) and (4) establishment of consistent time limits for reporting defects.

Approximately 300 reports are submitted to the Commission annually under Part 21. Approximately 900 reports are submitted to the Commission annually under section 50.55 (e). These reports identify both plant-specific and generic safety defects for further NRC regulatory action. Under current rules, these reports have formed the basis for NRC issuance of numerous NRC generic communications. (cont)

Timetable:

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: ABSTRACT CONT:

Alternatives to this rulemaking approach which were considered, varied from establishment of a single rule for all reporting of safety defects and operating reactors events to maintaining status quo for defect reporting. All alternatives were rejected since they would not substantially

BEST COPY AVAILABLE

VOL 54 ISS 77 AP 24 1989 UMI

improve the current safety defect reporting situation.

Current costs of reporting under Part 21 and section 50.55 (e) are estimated at $6.67 million annually for industry and $670,000 annually for NRC evaluations. It is anticipated that the annual industry reporting burden should be reduced by approximately $1.0 million; while NRC burden should remain the same. Additional industry burden, though minimal, is anticipated in the area of reissuing procedures for reporting and record keeping.

3895. FITNESS FOR DUTY PROGRAM

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 26

Legal Deadline: None

Abstract: The proposed rule would create a new part to the Commission's regulations to require licensees authorized to operate nuclear power reactors to implement a fitness for duty program that will provide reasonable assurance that activities associated with nuclear power plant operations are carried out in an environment that is free from the effects of alcohol and drug abuse. The proposed rule provides for basic fitness for duty program elements such as the development of written policy and procedures, provisions for the training of supervisors and employees, standards for drug testing requirements for employee assistance programs, management actions, and appeal procedures.

The proposed rule represents the culmination of several years of effort in developing a fitness for duty program. On August 5, 1982, the Commission published a proposed rule (47 FR 33980). Based on comments received and staff analysis, final rulemaking was deferred and a policy statement was published on August 4, 1986 (51 FR 27921). On December 1, 1987, the Commission was briefed on the experiences gained to date under the policy statement and on the status of implementation. The Commission

RIN: 3150–AC81

3896. EMERGENCY PREPAREDNESS FOR FUEL CYCLE AND OTHER RADIOACTIVE MATERIALS LICENSEES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 30; 10 CFR 40; 10 CFR 70

Legal Deadline: None

Abstract: The proposed rule would require about 30 fuel cycle and other radioactive materials licensees to submit an emergency plan that would, among other actions, require the notification of local authorities in case of an accident and that the licensee recommend protective actions for the public. The proposed rule is intended to further protect the public from accidental exposure to radiation. The affected licensees are those whose possession limits indicate the potential for an accident that could deliver a radiation dose offsite exceeding one rem effective dose equivalent or 5 rems to the thyroid or could cause a soluble uranium inhalation of 2 milligrams (a chemical toxicity hazard).

Currently, the proposed requirements are, for the most part, required by order. However, the Commission decided that a regulation was needed for the long term. The cost of the rule to licensees was estimated to be between $26,000 and $73,000 per year per licensee. The cost to NRC was estimated to be $4,000 per year per licensee. The NRC will expend about 2 staff-years of effort to promulgate the rule.

3898. SAFETY REQUIREMENTS FOR INDUSTRIAL RADIOGRAPHIC EQUIPMENT

Legal Authority: 42 USC 2111; 42 USC 2201; 42 USC 2232; 42 USC 2233

CFR Citation: 10 CFR 34

Legal Deadline: None

Abstract: The proposed rule would amend the present regulations to establish performance standards for industrial radiography exposure devices. Overexposures of radiographers (and occasionally the general public) are more than double that of other radiation workers and have been a concern to the NRC for some time. Approximately 25-35% of the radiography overexposures are associated with equipment malfunction. The issue of safety requirements for these devices is a primary concern since the devices use relatively high intensity, high energy gamma-ray emitting sources with the potential for serious overexposures. Although a consensus standard for radiographic exposure devices was published in 1981 (American National Standard N432), it is not clear that all manufacturers are adopting the standard.

The alternatives considered were to take no action at this time, amend the regulations to require performance standards for radiographic devices plus a requirement for radiographers to wear alarm dosimeters and simultaneously issue a regulatory guide endorsing the consensus standard, supplemented by such other performance standards deemed necessary, and incorporate (cont)

Small Entities Affected: Businesses, Governmental Jurisdictions, Organizations

Government Levels Affected: Undetermined

Additional Information: ABSTRACT CONT: the consensus standard by reference in the regulations supplemented by such other performance standards as deemed necessary, plus a requirement for radiographers to wear alarm dosimeters.

The proposed rule would require licensees to modify radiographic devices to meet the performance standards through design changes and quality control procedures. Costs of incorporating the proposed changes are estimated to be a one-time cost of $1,625 per licensee to purchase alarm dosimeters and $850 annually for replacement of devices and alarm dosimeters, annual calibration of dosimeters, and annual maintenance costs. Determination of the benefits to be derived from the proposed rule are difficult to determine on a monetary basis, but the potential hazards that might be averted include radiation sickness, injury, and even death. NRC resources required for processing this rule to final publication are estimated to be 0.4 person-years.

3899. PRIMARY REACTOR CONTAINMENT LEAKAGE TESTING FOR WATER-COOLED POWER REACTORS

Legal Authority: 42 USC 2133; 42 USC 2134; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would update and revise the 1973 criteria for preoperational and periodic pressure testing for leakage of primary containment boundaries of water-cooled power reactors. Problems have developed in application and interpretation of the existing rule. These result from changes in testing technology, test criteria, and a relevant national standard that needs to be recognized.

The revision is urgently needed to resolve continuing conflicts between licensees and NRC inspectors over interpretations, current regulatory practice that is no longer being reflected accurately by the existing rule, and endorsement in the existing regulation of an obsolete national standard that was replaced in 1981.

The benefits anticipated include elimination of inconsistencies and obsolete requirements, and the addition of greater usefulness and a higher confidence in the leak-tight integrity of containment system boundaries under post-loss-of-coolant accident conditions. The majority of the effort needed by NRC to issue the rule has already been expended. (cont)

3900. EDUCATION AND EXPERIENCE REQUIREMENTS FOR SENIOR REACTOR OPERATORS AND SUPERVISORS AT NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201

CFR Citation: 10 CFR 50; 10 CFR 55

Legal Deadline: None

Abstract: The Commission is considering an amendment to its regulations to require that applicants for a senior operator license of a nuclear power plant hold a bachelor's degree in engineering, engineering technology, or physical science from an accredited institution four years after the effective date of this rule. Other bachelor's degrees from an accredited institution may be accepted on a case-

VOL 54 ISS 77 AP 24 1989 UMI

by-case basis. This contemplated rulemaking action is due to a Commission decision to enhance the levels of engineering and accident management expertise on shift.

The Commission will also issue policy statement concurrently with this rule related to utility implementation of an accredited degree program for reactor operators.

3901. FLOW CONTROL CONDITIONS FOR THE STANDBY LIQUID CONTROL SYSTEM IN BOILING WATER REACTORS

Legal Authority: 42 USC 2136

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would clarify the Commission's regulations pertaining to boiling water reactors (BWR). The current regulations require that all boiling water reactors must have a standby liquid control system (SLCS) with a minimum flow capacity and boron content equivalent in control capacity to 86 gallons per minute (gpm) of 13 weight percent of sodium pentaborate solution. In January 1985, a generic letter was issued to all appropriate licensees that provided clarification of the phrase "equivalent in control capacity" contained in 10 CFR 50.62 (c) (4). This letter provided the basis for the flow and weight percent of sodium pentaborate decahydrate requirements and described how equivalency could be achieved for smaller plants. The NRC staff considers the contents of the generic letter to be technically correct and desires that this position be established in the regulations.

This proposed rule would clarify a Commission regulation; thus no other procedure is appropriate. The technical proposals in the rule were analyzed for safety as part of the original rulemaking procedure, although they were not specifically mentioned. (cont)

3902. ENSURING THE EFFECTIVENESS OF MAINTENANCE PROGRAMS FOR NUCLEAR POWER PLANTS

Legal Authority: 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would provide functional requirements for the maintenance of nuclear power plants and allow industry initiatives to develop the details of maintenance programs to meet such requirements. The proposed rule would apply to all components, systems and structures of nuclear power plants and wold be applicable to existing and future plants. The proposed rule would also require each licensee to develop, implement and maintain a maintenance program, and to formally commit to follow the program.

The scope of maintenance activities addressed in the rule will be within the framework of the Commission's Policy Statement on Maintenance of Nuclear Power Plants which was issued on March 23, 1988 (53 FR 9430).

It is estimated that about 3 staff-years of effort and $600,000 for contract services will be required to process the final rule.

3903. TABLES S-3 AND S-4, ADDITION OF RADON-222 AND TECHNETIUM-99 RADIATION VALUES, AND ADDITION OF APPENDIX B, "TABLE S-3 EXPLANATORY ANALYSIS"

Legal Authority: 42 USC 2011; 42 USC 2201; 42 USC 4321; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 51

Legal Deadline: None

Abstract: The proposed rule provides a narrative explanation of the numerical values established in Table S-3, "Table of Uranium Fuel Cycle Environmental Data," that appears in the Commission's environmental protection regulations. The proposed rule describes the basis for the values contained in Table S-3, the significance of the uranium fuel cycle data in the table, and the conditions governing the use of the table. The proposed rule amends Section 51.52 to modify the enrichment value of U-235 and the maximum level of average fuel irradiation. The narrative explanation also addresses important fuel cycle impacts and the cumulative impacts of the nuclear fuel cycle for the whole nuclear power industry so that it may be possible to consider these impacts generically rather than repeatedly in individual licensing proceedings, thus reducing litigation time and costs for both NRC and applicants.

The proposed revision of 10 CFR 51.51 and the addition of Appendix B was published for public review and comment on March 4, 1981 (46 FR 15154). The final rulemaking was deferred pending the outcome of a suit (Natural Resources Defense Council, et al. v. NRC, No. 74-1486) in the U.S. Circuit) decision of (cont)

Final Action	02/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: April 27, 1982, invalidated the entire Table S-3 rule. The Supreme Court reversed this decision on June 6, 1983. The proposed rule to provide an explanatory analysis for Table S-3 has been revised to reflect new developments during the time the rulemaking was deferred. Final action on the Table S-3 rule was held in abeyance until new values for radon-222 and technetium-99 could be added to the table and covered in the narrative explanation. The rule is being reissued as a proposed rule because the scope has been expanded to include radiation values for radon-222 and technetium-99 and the narrative explanation has been extensively revised from that published on March 4, 1981 (46 FR 15154).

The staff's estimate is that the completion of a final Table S-3 rule covering the new values for radon-222 and technetium-99 and the revised explanatory analysis will be completed in 1989. A Commission paper presenting the final rulemaking plan and schedule was submitted on August 16, 1986 (SECY 86-242). On September 8, 1986, SECY 86-242 was approved by the Commission.

3904. EARLY SITE PERMITS; STANDARD DESIGN CERTIFICATIONS; AND COMBINED LICENSES FOR NUCLEAR POWER REACTORS

Legal Authority: 42 USC 2133; 42 USC 2201; 42 USC 2232; 42 USC 2233; 42 USC 2236; 42 USC 2239; 42 USC 2282; 42 USC 4842; 42 USC 5841; 42 USC 5846

CFR Citation: 10 CFR 52

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is considering adding a new part to its regulations to improve the reactor licensing process. The proposed rule would provide for the issuance of early site permits, standard design certifications, and combine construction permits and conditional operating licenses for nuclear power reactors. The proposed action is intended to achieve the early resolution of licensing issues, thereby enhancing the safety and reliability of nuclear power plants, and reducing the complexity and uncertainty of the licensing process. Early resolution of licensing issues should afford public participation in the licensing process an earlier entry into that process. They are designed to implement as much of the Commission's proposed "Nuclear Power Plant Standardization and Licensing Act of 1987" as is permissible under its existing statutory authority. The proposed legislation is based on an earlier proposal that was developed by the Commission's Regulatory Reform Task Force.

3905. ELIMINATION OF INCONSISTENCIES BETWEEN NRC REGULATIONS AND EPA STANDARDS

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 60

Legal Deadline: None

Abstract: The Nuclear Waste Policy Act of 1982 (NWPA) directs NRC to promulgate criteria for the licensing of high-level waste (HLW) geologic repositories. Section 121(c) of this act states that these criteria must be consistent with standards to be developed by EPA for the disposal of HLW in deep geologic repositories. The proposed rule is needed in order to eliminate several inconsistencies with the EPA standards, thus fulfilling the statutory requirement.

Because the NWPA directs NRC to eliminate inconsistencies between Part 60 and the EPA standard, the alternatives to the proposed action are limited by statute.

The public, industry, and NRC will benefit from eliminating inconsistencies in Federal HLW regulations. NRC resources needed would be several staff years but will not include contract resources.

Because the Federal Court invalidated the EPA standards, action on this rule, which is in response to the EPA standards, is undetermined.

3906. DISPOSAL OF RADIOACTIVE WASTES

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 61

Legal Deadline: None

Abstract: The Commission instructed the staff to analyze the need to revise the definition of high-level radioactive waste (HLW) in Part 60 to conform with the definition in the Nuclear Waste Policy Act (NWPA). An ANPRM was published on February 27, 1987 (52 FR 5992), which recommended a revision based either wholly or partially on concentrations of radionuclides in the waste. After assessing the public comments on the ANPRM, and also taking into account recent information, the staff is now recommending against any revision of the definition of HLW. Instead, amendments to Part 61 are being recommended that would require geologic repository disposal of all above-Class C low-level radioactive

VOL 54 ISS 77 AP 24 1989 UMI

waste (LLW) unless an alternative has been approved by the Commission. This would accomplish the objective of establishing suitable disposal requirements for radioactive waste with a minimal impact on cost burdens.

Alternatives are (1) revise the definition of HLW so that additional above Class C LLW is reclassified as HLW; or (2) proceed to develop a waste classification system like that outlined in the ANPRM.

3907. TRANSPORTATION REGULATIONS: COMPATIBILITY WITH THE INTERNATIONAL ATOMIC ENERGY AGENCY (IAEA)

Legal Authority: 42 USC 2073; 42 USC 2093; 42 USC 2111; 42 USC 2232; 42 USC 2233; 42 USC 2273; 42 USC 5842

CFR Citation: 10 CFR 71

Legal Deadline: None

Abstract: The proposed rule, would in conjunction with a corresponding rule change by the U.S. Department of Transportation, make the United States Federal regulations for the safe transportation of radioactive material consistent with those of the International Atomic Energy Agency (IAEA). The IAEA regulations can be found in IAEA Safety Series No. 6 "Regulations for the Safe Transport of Radioactive Material," 1985 Edition.

Consistency in transportation regulations throughout the world facilitates the free movement of radioactive materials between countries for medical, research, industrial, and nuclear fuel cycle purposes. Consistency of transportation regulations throughout the world also contributes to safety by concentrating the efforts of the world's experts on a single set of safety standards and guidance (those of the IAEA) from which individual countries can develop their domestic regulations. Perhaps as important, the accident experience of every country that bases its domestic regulations on those of the IAEA can be applied by every other country with consistent regulations to improve its safety program. The action will be handled as a routine (cont)

3908. CRITERIA FOR AN EXTRAORDINARY NUCLEAR OCCURRENCE

Legal Authority: 42 USC 2201; 42 USC 2210; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: The final rule will revise the Extraordinary Nuclear Occurrence (ENO) criteria to eliminate the problems that were encountered in the Three Mile Island ENO determination. It is desirable to get revised criteria in place in the event they are needed.

There are no alternatives to this rulemaking, as the current ENO criteria are already embodied in Subpart E of 10 CFR Part 140. The only way to modify these criteria, as this rule seeks to do is through rulemaking.

There is no safety impact on public health or safety. The ENO criteria provide legal waivers of defenses. Industry (insurers and utilities) claims that a reduction in the ENO criteria could cause increases in insurance premiums. The final rule would also be responsive to PRM-140-1.

It is estimated that approximately 1 staff year of NRC time will be required to process the final rule. No contract funding is anticipated.

3909. ● FINANCIAL PROTECTION REQUIREMENTS AND INDEMNITY AGREEMENTS; MISCELLANEOUS AMENDMENTS NECESSITATED BY CHANGES IN THE PRICE-ANDERSON ACT

Legal Authority: 42 USC 2201; 42 USC 2210; 42 USC 2273; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: The proposed rule would implement the statutory requirements of the Price-Anderson Act of 1988. The proposed rule would amend NRC regulations to coincide, as statutorily required, with the increase in the level of the primary layer of insurance provided by private nuclear liability insurance pools. The proposed changes would provide additional insurance to pay public liability claims arising out of a nuclear incident. Because this rule is necessary to implement the recent statutory requirement of the Price Anderson Amendments Act of 1988, there is no suitable alternative to rulemaking for this action.

3910. REASSERTING NRC'S SOLE AUTHORITY FOR APPROVING ONSITE LOW-LEVEL WASTE DISPOSAL IN AGREEMENT STATES

Legal Authority: 42 USC 2201; 42 USC 2021; 42 USC 5841

CFR Citation: 10 CFR 150

Legal Deadline: None

Abstract: This rulemaking would establish NRC's sole authority for approving onsite disposal of low-level waste at all NRC licensed reactors and at Part 70 fuel cycle facilities. There is a need to amend 10 CFR 150.15 to authorize one agency (the NRC) to regulate all onsite disposal of low-level waste in order to provide a more comprehensive regulatory review of all onsite waste management activities and to avoid unnecessary duplication of effort. Uniform review by the NRC will provide for greater assurance that the radioactive material will not present a health hazard at a later date after the site is decommissioned.

3912. EXTENSION OF TIME FOR THE IMPLEMENTATION OF THE DECONTAMINATION PRIORITY AND RELATIONSHIP PROVISIONS OF PROPERTY INSURANCE REQUIREMENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission proposes to amend the implementation schedule or the decontamination priority and trusteeship provisions of its property insurance regulations continued in 10 CFR 50.54(w)(5)(i) to change the effective date from October 4, 1988 to April 1, 1990. This delay in implementation is necessary because the insurers that offer property insurance for power reactors have informed the Commission that they will be unable to include the decontamination priority and trusteeship provisions in their policies within the time currently provided by 10 CFR 50.54(w). Concurrently, the extension of the effective date of the rule will allow the NRC to consider recently submitted petitions for rulemaking that propose changes to improve the efficacy of the NRC's decontamination priority and trust provisions.

3914. ● ACCESS TO SAFEGUARDS INFORMATION

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 073

Legal Deadline: None

Abstract: This final rule would amend the Commission's requirements for access to Safeguards Information to conform with a provision of Pub. L. 99-399, "The Omnibus Diplomatic Security and Anti-Terrorism Act of 1986." The provision of the law requires nuclear power reactor licensees and applicants to conduct Federal Bureau of Investigation criminal history checks of certain individuals with access to information protected as Safeguards Information. This technical amendment cross references 10 CFR 73.21 and 10 CFR 73.57 with respect to individuals authorized access to safeguards information by power reactor applicants and licensees. Since this amendment contains no new requirements and has been developed solely to achieve internal consistency between NRC regulations and Federal law, notice of proposed rulemaking and public procedures thereon are unnecessary under 5 U.S.C. 553.

Legal Deadline: None

Abstract: The final rule revised existing regulations to establish specific licensing requirements for the storage of spent nuclear fuel and high-level radioactive waste in a monitored retrievable storage installation (MRS). The revision will ensure that the Commission has in place the appropriate regulations to fulfill the requirements contained in the Nuclear Waste Policy Act of 1982 concerning the licensing of facilities which could be part of the MRS program. Paragraph (d) of Section 141 of the NWPA requires that any monitored retrievable storage installation pursuant to Section 141 shall be subject to licensing by the Commission. The Commission could await further development of the MRS option before proposing its MRS rules. However, this approach could result in unnecessary delay in reviewing a license application if Congress authorizes construction of an MRS.

There is no appropriate alternative to rulemaking, the vehicle used by NRC to establish its licensing procedures.

NPRM	05/27/86	51 FR 19106
NPRM Comment Period End	08/25/86	51 FR 21560
Final Action	08/19/88	53 FR 3165
Final Action Effective	09/19/88	

Small Entities Affected: None

Government Levels Affected: None

Additional Information:

The basic requirements for storage of spent fuel in an independent spent fuel storage installation currently codified in 10 CFR Part 72 are not being changed, thus no incremental impact on NRC.

NRC — Completed Actions

3917. ACCEPTANCE CRITERIA FOR EMERGENCY CORE COOLING SYSTEM (ECCS) FOR LIGHT WATER NUCLEAR POWER REACTORS

Legal Authority: 42 USC 2132; 42 USC 2133; 42 USC 2134; 42 USC 2201; 42 USC 2232; 42 USC 2233; 42 USC 2236; 42 USC 2239; 42 USC 2282; 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The final rule amends regulations concerning acceptance criteria for emergency core cooling systems (ECCS) by allowing the use of realistic methods to demonstrate that an ECCS would protect the nuclear reactor core during a loss-of-coolant accident.

Use of the realistic evaluation model may result in up to a 5 percent power upgrade for some plants. The present value of energy replacement cost savings resulting from a potential upgrade has been estimated to range between $5 and $127 million, depending on the location and age of a specific plant.

3918. ALTERNATIVE METHODS FOR LEAKAGE RATE TESTING

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission has amended its regulations to clarify a question of interpretation in regard to leakage testing of containments of light-water cooled nuclear power plants. This amendment explicitly permits the continued use of a statistical data analysis technique that the NRC has considered to be an acceptable method of calculating containment leakage rates.

3919. LICENSEE ANNOUNCEMENT OF INSPECTORS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission has amended its regulations to ensure that the presence of NRC inspectors on power reactor sites is not announced to licensee and contractor personnel without the expressed request to do so by the inspector. This change will allow the NRC inspector, who is badged at the facility, to observe ongoing activities as they are being performed without licensee or contractor personnel having advance notice of the inspection.

3920. CRITERIA AND PROCEDURES FOR EMERGENCY ACCESS TO NON-FEDERAL AND REGIONAL LOW-LEVEL WASTE DISPOSAL FACILITIES

Legal Authority: 42 USC 2021

CFR Citation: 10 CFR 62

Legal Deadline: None

Abstract: The final rule established procedures and criteria for fulfilling NRC's responsibilities associated with action on requests by low-level radioactive waste generators, or State officials on behalf of those generators, for emergency access to operating non-Federal or regional low level radioactive waste disposal facilities under Section 6 of the Low-Level Radioactive Waste Policy Amendments Act of 1985 (LLRWPAA). Section 6 of the LLRWPAA authorizes the NRC to grant emergency access to any non-Federal low-level waste disposal facility, if necessary, to eliminate the immediate and serious threat to the public health and safety of the common defense and security, provided the threat cannot be mitigated by any alternative.

3921. ● CENTRALIZATION OF MATERIAL CONTROL AND ACCOUNTING RESPONSIBILITIES FOR NON-REACTOR FACILITIES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 070; 10 CFR 074

Legal Deadline: None

Abstract: The rule amended 10 CFR Parts 70 and 74 to reflect a phased centralization in NRC Headquarters of Regional Material Control and Accounting (MC&A) inspection and 10 CFR 70.32(c) licensing reviews for non-reactor facilities. This centralization was needed because the relatively small annual workload requirements for these functions in a majority of Regions foreclose the possibility of maintaining within each Region the full spectrum of the knowledge, skills and discipline needed for these activities. Centralization in Headquarters will assure the maintenance of a viable and adequate national MC&A inspection program for non-reactor facilities. Nationwide, there are sixteen non-reactor facilities that require MC&A inspections (10 fuel cycle and 6 others). Transfer of MC&A functions from Regions I, III, and V to the Division of Safeguards and Transportation/NMSS is planned to be effective by December 2, 1988. The Region II MC&A program for non-reactor facilities will be phased-out through attrition or over a two-year period, whichever occurs first. Region IV has no affected facilities.

3922. SAFEGUARDS REQUIREMENTS FOR FUEL FACILITIES POSSESSING FORMULA QUANTITIES OF STRATEGIC SPECIAL NUCLEAR MATERIAL

Legal Authority: 42 USC 2073; 42 USC 2167; 41 USC 2201; 42 USC 5841; 42 USC 5844

CFR Citation: 10 CFR 73

Legal Deadline: None

Abstract: In a staff requirements memorandum dated June 8, 1987, the Commission directed the staff to publish a proposed rule within 120 days that would implement improved safeguards requirements based on the findings of a review team that compared DOE and NRC safeguards programs (SECY 87-28; CNSI). Primary focus was in the following areas: (1) security system performance evaluations, (2) night firing qualifications for guards, (3) 100 percent entrance searches, (4) armed guards at material access area control points, (5) two protected area fences, and (6) revision of the design basis threat.

3923. RESTRICTIONS AGAINST OWNERSHIP OF CERTAIN SECURITY INTERESTS BY MEMBERS OF ADVISORY COMMITTEE ON NUCLEAR WASTE; GIFTS, ENTERTAINMENT, AND FAVORS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 0

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission amended its regulations governing the ownership by NRC employees of stocks, bonds, and other security interests in companies that fall within any one of five reactor-related or fuel cycle-licensed categories. The group of affected employees now includes those special Government employees who serve as members of the Advisory Committee on Nuclear Waste. The Commission also amended its regulations on acceptance of gifts, entertainment, and favors to permit acceptance of travel expenses from an otherwise prohibited source when proffered in connection with a job interview and to permit acceptance of food and refreshments at widely-attended events sponsored by certain groups whose membership is composed of prohibited sources.

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission has amended its regulations to indicate that its Public Document Room has moved to a new location in the District of Columbia. The hours remain unchanged: 7:45 a.m. to 4:15 p.m. weekdays. These amendments are being made to inform NRC licensees and members of the public of this relocation. This rule also makes minor changes in NRC organization nomenclature to reflect new internal organizational titles.

3925. REVISION OF FEE SCHEDULES

Legal Authority: 31 USC 9701; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 170; 10 CFR 171

Legal Deadline: None

Abstract: The final rule revised the fees charged for licensing services provided by the NRC and charged to persons who operate nuclear power reactors. The effect of this revision was to (1) remove fee ceilings, increase the amount charged for a license application, and revise the flat fees set out in part 170; (2) revise the hourly rate for NRC professional time spent providing various regulatory services; (3) increase the ceiling on annual charges; (4) add a deadline for filing exemptions to 10 CFR 171.11; and (5) include monies from the Department of Energy High-Level Waste Fund. Because the regulation is necessary to implement the most recent fee legislation enacted by Congress, there is no suitable alternative to rulemaking for these actions. All applicants and licensees that are currently subject to fees collections under the current regulations are affected by the final rule.

3926. RULE ON THE SUBMISSION AND MANAGEMENT OF RECORDS AND DOCUMENTS RELATED TO THE LICENSING OF A GEOLOGIC REPOSITORY FOR THE DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 2; 10 CFR 60

Legal Deadline: None

Abstract: The Nuclear Waste Policy Act (NWPA) provides three years for the NRC to reach a decision on construction authorization for a high level waste repository. In order for the NRC to be able to make its decision within the allotted time, ready access to all pertinent records must be assured to all parties in the licensing proceeding. The DOE has committed to develop an electronic information management system to be used for the licensing proceeding. The NRC staff intends to use the process of negotiated rulemaking to develop a proposed rule that would revise the Commission's discovery procedure and motion practice in 10 CFR Part 2 for the high level waste licensing proceeding. This rule would require the DOE license application and all supporting records to be provided in a standardized electronic format. All parties to the licensing proceeding would be required to submit all relevant data to this system. In turn all parties would have access to the data base.

Resource estimates currently under development.

3928. EMERGENCY PLANNING AND PREPAREDNESS REQUIREMENTS FOR NUCLEAR POWER PLANT FUEL LOADING AND INITIAL LOW-POWER OPERATIONS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission has amended its regulations to establish more clearly what emergency planning and preparedness requirements are needed for fuel loading and low-power operation of nuclear power plants, current rules provide for a finding prior to fuel loading and low-power on the licensee's plans and state of preparedness for dealing with accidents that could affect persons onsite. Current rules also provide that no finding regarding the planning or preparedness of offsite agencies for dealing with

VOL 54 ISS 77 AP 24 1989 UMI

accidents that could affect persons offsite is required at this stage. The Commission is not proposing to change these aspects of the current rules. However, practice under the current rule has been to consider also, as part of review of licensees' plans, certain offsite elements of those plans that seem unnecessary for low-power operation in view of the low degree of risk posed to offsite persons by fuel loading and low-power operation (up to 5 percent of rated power). It is the purpose of this proposed rulemaking to consider whether this practice should be discontinued or modified. Specifically, the (cont)

Final Action	09/23/88	53 FR 36955
Final Action Effective	10/24/88	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: Commission is considering amending Section 50.47(d) to include, as prerequisites for low-power operation, seven standards with offsite aspects that are believed to be appropriate for fuel loading and low-power operation. The capability for prompt notification of the surrounding populace (as distinct from the capacity to keep offsite emergency planning agencies informed promptly of plant accidents) is not included in the rule as a requirement for fuel loading and low-power operations. Nothing in this proposed rule is intended to change the emergency planning standards that must be satisfied before operations are at full power.

RIN: 3150–AC86

3929. FACILITY FORM NUCLEAR LIABILITY INSURANCE POLICY; MISCELLANEOUS AMENDMENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: The NRC has amended its regulations by making several minor changes in the Facility Form nuclear liability insurance policy furnished as evidence of financial protection. The two nuclear insurance pools have submitted endorsements to the Facility Form policy that make available a single insurance policy to cover onsite worker claims. This new Master Worker Policy reflects different rating and underwriting treatment than is utilized in the Facility Form policy. The supplementary insurance provided by the new policy enhances protection to the public since payments under its provisions for routine claims by onsite nuclear workers will not reduce the financial protection for the public under the primary and secondary nuclear liability insurance policies provided as evidence of financial protection under the Price-Anderson Act.

3930. MINOR AMENDMENTS TO PHYSICAL PROTECTION REQUIREMENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 070; 10 CFR 072; 10 CFR 073; 10 CFR 075

Legal Deadline: None

Abstract: The Safeguards Interoffice Review Group (SIRG) of the NRC has been conducting a systematic review of the agency's safeguards regulations and guidance documents. This review has identified areas in the regulations that are out of date, susceptible to differing interpretations, or in need of clarification. In addition, the staff has identified other areas in the regulations where minor changes are warranted. In response to these efforts, specific amendments to the regulations are being proposed. The proposed changes would (1) limit the use of the 100 rems per hour at 3 feet dose exemption to a reduction of no more than one physical protection category and not allow a drop below the lowest category, (2) add definitions for common terms not currently defined by frequent use, (3) delete action dates that no longer apply, (4) correct outdated terms and cross references, (5) clarify wording that is susceptible to differing interpretations, (6) correct typographical errors, and (7) make other minor changes. (cont)

Timetable:

Action	Date	FR Cite
This rule is now being tracked under RIN AD03.	02/13/89	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: The alternative to rulemaking would be to allow the status quo to continue. Except for the change in the impact of a high radiation field on physical protection requirements, these minor amendments affect the public, industry, and the NRC only in so far as they make the regulations easier to understand, implement, and enforce. Limiting the use of the 100 rem per hour at 3 feet dose exemption to a reduction of no more than one physical protection category, and not allowing a drop below the lowest category, could affect two non-power reactor licensees. It is estimated that 0.4 staff-years of NRC effort over 2 years will be required for the rulemaking. This is a low priority rulemaking.

3931. DELETION OF PART 11 REQUIREMENT FOR RENEWAL OF "R" CLEARANCES

Legal Authority: 42 USC 2201(i); 42 USC 5841

CFR Citation: 10 CFR 11

Legal Deadline: None

Abstract: This rule is terminated due to changes and potential changes in the NRC and DOE access authorization program. The current regulations require licensees to renew "R" clearances every 5 years. This level of clearance corresponds to the "L" clearances used by NRC and DOE which do not require renewal. Because of this equivalence, the renewal requirement for the "R" level licensee clearance is deemed unnecessary.

Regulatory Flexibility Agenda and Rules Scheduled for Review

AGENCY: Securities and Exchange Commission.

ACTION: Publication of regulatory flexibility agenda and rules scheduled for review.

SUMMARY: The Securities and Exchange Commission is today publishing an agenda of its open and anticipated rulemaking actions, pursuant to Chapter Six of the Administrative Procedure Act and Office of Management and Budget Bulletin 89-02. The agenda is a general announcement to the public intended to provide advance notice of rulemaking actions which may have a significant economic impact on a substantial number of small entities. The Commission invites questions and public comment on individual agenda entries.

DATE: Public comments are due by June 30, 1989.

ADDRESSES: Persons wishing to submit written views should file three copies with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street, NW., Room 6184, Stop 6-9, Washington, DC 20549. All submissions should refer to File No. S7-7-89, and will be available for public inspection at the Commission's Public Reference Room, Room 1026, at the same address.

FOR FURTHER INFORMATION CONTACT: William J. Atkinson, Office of Economic Analysis, Securities and Exchange Commission, 450 5th Street, NW., Room 9200, Stop 9-1, Washington, DC 20549 (202-272-7100). The names of the person(s) to contact regarding specific entries are identified with each entry.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act ("RFA") (Pub. L. No. 96-354, 94 Stat. 1164 [September 19, 1980]) requires each federal agency during April and October of each year to publish in the **Federal Register** a regulatory flexibility agenda identifying rules which the agency expects to propose or adopt which are likely to have a significant economic impact on a substantial number of small entities (the "significant impact criterion").[1]

The RFA also requires the Commission to publish a plan for the periodic review of all rules issued by the agency which have or will have a significant economic impact on a substantial number of small entities.[2] The Commission published such a plan in 1981.[3] The plan provides for the review of all rules in effect on January 1, 1981 within ten years of that date and for the review of all rules adopted thereafter within ten years of their adoption as final rules. The RFA further requires publication each year of a list of those rules which are to be reviewed during the succeeding twelve months.[4]

The Commission's continuing review of its rules, begun before the effective date of the statute (January 1, 1981), extends beyond the requirements of the RFA. Consequently, some rules listed in this part of the agenda may not be subject to RFA review requirements. The Commission is identifying them here in order to inform the public of its intention to review them. The agenda also identifies the rulemaking actions which have been completed (or withdrawn) since the last RFA release was approved by the Commission.[5]

The statute specifically provides that the agenda does not preclude the Commission from considering or acting on any matter not included, nor is the Commission required to consider or act on any matter which is included.[6] Furthermore, the inclusion of a rule in the Commission's agenda reflects only the staff's preliminary judgment that the rule, if adopted or as it exists, may have a significant economic impact on a substantial number of small entities.[7] This preliminary judgment may be changed upon further analysis.

The Commission's entries to the April 1989 Unified Agenda of Federal Regulations are listed below. The Commission's agenda includes new entries as well as items carried over from the October 1988 publication. New entries are marked with a bullet in front of the Sequence Number. Priority items are identified under the heading Significance.

Copies of this preamble and a list of the entries (which includes next action dates and identifies a staff contact) are available from Commission's Office of Public Affairs (Room 1015). The agenda also is available for inspection and copying in the Public Reference Room (Room 1026) (File S7-7-89), as noted above.

The Commission invites public comment on the individual entries in its regulatory agenda.

Dated: March 6, 1989.

By the Commission.

Jonathan G. Katz,

Secretary.

Securities Markets and Securities Industry Rules

3934. EXEMPTION OF SALES OF CERTAIN INTERESTS AND PARTICIPATIONS ISSUED IN CONNECTION WITH H.R. 10 PLANS FROM SECTION 15(A)

Legal Authority: 15 USC 78c(a)(12); 15 USC 78o; 15 USC 78w; 15 USC 77c(a)(12); 15 USC 77s(a)

CFR Citation: 17 CFR 240. 3a12-10; 17 CFR 230.180

Legal Deadline: None

Abstract: The proposed rule would specify certain conditions under which persons engaged in the sale of interests and participation issued in connection with certain tax-qualified retirement plans ("H.R.10" or "Keogh" plans) would not be required to register as broker-dealers under Section 15(a) of the Securities Exchange Act of 1934. In 1981, the Commission adopted Rule 180 under the Securities Act of 1933 exempting from the registration requirements of that Act interests and participations issued in connection with H.R. 10 plans. The proposed rule provides a parallel exemption from broker-dealer registration for sales of such interests and participations in H.R. 10 plans. As an alternative the staff could consider granting no-action or exemptive requests on a case-by-case basis. However, such procedure would be inefficient and needlessly expensive for both the public and the Commission staff. In addition, the Commission is proposing to amend Rule 180 to clarify that, under paragraph (a)(3)(ii) of that Rule, the employer only needs to obtain investment advice prior to the investment of plan assets. This proposal codifies a previous staff position.

3935. RULE 17AD-8 OF THE SECURITIES EXCHANGE ACT

Legal Authority: 15 USC 17b; 15 USC 78g-1; 15 USC 78w(a)

CFR Citation: 17 CFR 240. 17Ad-8

Legal Deadline: None

Abstract: Rule 17Ad-8 requires a registered clearing agency, at the request of an issuer, to provide the issuer with a "securities position listing." A securities position listing is a list of the clearing agency's participants on whose behalf the clearing agency holds the issuer's securities as well as participants' positions as of a specified date. The Rule further provides that the clearing agency may charge a reasonable fee for providing the list.

3937. FORM S-8 REGISTRATION STATEMENT UNDER THE SECURITIES ACT OF 1933

Legal Authority: 15 USC 77f; 15 USC 77g; 15 USC 77j; 15 USC 77s(a); 15 USC 78l; 15 USC 78m; 15 USC 78n; 15 USC 78w(a)

CFR Citation: 17 CFR 239.16b

Legal Deadline: None

Abstract: The Commission will consider whether to revise the disclosure requirements under the federal securities laws relating to registration under the Securities Act of 1933 of securities to be offered to employees of an issuer pursuant to certain plans. Such registration currently is made on Form S-8 (17 CFR 239.16b). The Commission staff is developing proposals in this area and considering alternative approaches to the problem of reducing burdens while ensuring the availability of sufficient information to employees, particularly where they already have access to much of the required information under ERISA. In the context of this rulemaking, Form S-8 will be fully reviewed for purposes of the Regulatory Flexibility Act.

Abstract: The Commission issued a concept release in February 1985 addressing numerous regulatory issues raised by multinational offerings. At that time, the Commission published for comment two conceptual approaches to facilitating such offerings--a "common prospectus" approach and a "reciprocal" approach. The staff currently is developing a multi-jurisdictional registration system that is based upon the reciprocal approach. The current staff proposal is intended to facilitate multi-jurisdictional and cross-jurisdictional offerings of securities by Canadian issuers. The proposal is intended to form the basis of a system of multi-jurisdictional registration that may eventually be expanded to encompass a number of jurisdictions and a wide variety of transactions.

3953. AMENDMENT TO RULE 180 -- EXEMPTION FROM REGISTRATION OF CERTAIN INTERESTS AND PARTICIPATIONS IN CERTAIN H.R. 10 PLANS

Legal Authority: 15 USC 77c(a)(2); 15 USC 77s(a)

CFR Citation: 17 CFR 230.180

Legal Deadline: None

Abstract: Rule 180 provides an exemption from the registration requirements of the Securities Act for interests and participations issued in connection with certain qualified H.R. 10 plans. In order for interests in funding media issued to plans established by financially inexperienced employers to qualify for the rule's exemption, the rule, as adopted, requires those employers to obtain financial advice from an independent expert prior to adopting the H.R. 10 plan. Among other things, the Commission is considering proposing an amendment to Rule 180 that would codify a present "no-action" position regarding the situation where a financially unsophisticated employer has already established a plan for its employees without obtaining advice from an independent expert, and intends either to change the funding medium or add another funding medium to the choices already available to employees. The issuer of the funding medium in such a case would be in compliance with the rule if the issuer has reasonable grounds to believe and, after having made reasonable inquiry, does believe, that an independent financial expert reviewed the funding medium prior to the investment of the (cont)

3954. MUTUAL FUND GOVERNANCE

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-37

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: On December 10, 1982, the Commission issued an advance concept release (Investment Company Act Release No. 12888, (47 FR 56509)) soliciting public comment on whether the Commission should propose rules or recommend legislation which would

VOL 54 ISS 77 AP 24 1989 UMI

provide for an alternative form of mutual fund governance. Specifically, this release requests comment on whether mutual funds should be exempted from shareholder voting and/or director requirements under the Investment Company Act of 1940 (the "Act") and, if so, whether conditions could be fashioned which would adequately insure against loss of investor protection. Although such changes might be effected through rulemaking, the Commission has indicated that, in its preliminary judgment, changes of this magnitude should be effected through legislative rather than administrative action. Since the costs and benefits of providing for an alternative scheme of mutual fund governance cannot be estimated at the present time, the release solicits specific comment on the costs and benefits which would result from such changes. Extension of comment period until April 18, 1983 was announced in Investment Company Act Release No. 13012 (cont)

3955. RULE 17J-1 UNDER THE INVESTMENT COMPANY ACT OF 1940

Legal Authority: 15 USC 80a-17(j); 15 USC 80a-37(a)

CFR Citation: 17 CFR 270.17j-1

Legal Deadline: None

Abstract: Rule 17j-1 requires every access person of a registered investment company, or of an investment adviser of or principal underwriter for the investment company to report to the investment company certain of his securities transactions. The Commission is considering whether to propose an amendment to this rule which would reduce the reporting requirement for investment company directors who are interested persons with respect to the investment company by reason of their affiliation with a registered broker-dealer. Members of the industry have characterized these reporting requirements as unnecessarily burdensome in some instances. Any such rule amendment would have the effect of lessening the reporting requirements currently imposed by the rule. As a result, the staff believes that the costs, which should be insignificant, of complying with any amendment would be significantly less than the benefits it would provide. The Commission is also considering whether to amend Rule 17 j-1 to define specified acts as fraudulent, deceptive or manipulative or to require certain minimum standards to be set forth on a company's code of ethics.

3956. REVISION OF INVESTMENT COMPANY PROXY RULES

Legal Authority: 15 USC 78n; 15 USC 78w; 15 USC 80a-20; 15 USC 80a-37

CFR Citation: 17 CFR 240.14a-1 to 240.14a-102; 17 CFR 240.14b-1; 17 CFR 240.14c-1 to 240.14c-101; 17 CFR 270.20a-1; 17 CFR 270.20a-2; 17 CFR 270.20a-3

Legal Deadline: None

Abstract: Absent an exception, every solicitation of a proxy, authorization or consent in respect of any security with respect to which a registered investment company is the issuer, is subject to rules adopted pursuant to the Securities Exchange Act of 1934 and the Investment Company Act of 1940 concerning solicitations of proxies. Solicitations to which the rules apply may not commence unless each person solicited is furnished or has previously been furnished with a proxy statement containing specified information prepared in accordance with certain rules and the material has been filed with the Commission. The existing proxy rules were adopted in piecemeal fashion and have been the subject of frequent changes. This has led to certain duplicative and, in certain cases, complex requirements. To the extent that a proxy statement contains repetitive material or is overly complicated and difficult to read, it may not effectively perform its intended function of communicating meaningful information to security holders in order that they may make informed voting decisions. In order to update the proxy regulations and, in doing so, improve the (cont)

Additional Information: ABSTRACT CONT: readability of proxy statements and eliminate unnecessary disclosure costs, the Commission has commenced a comprehensive review of the proxy regulations as they relate to investment companies. There does not currently exist a basis upon which to quantify the reduced costs and burdens of such action on those registrants affected. Since the action will apply to all registered investment companies soliciting proxies, unless the solicitation is excepted, the Action is expected to have a significant impact on a substantial number of small entities. However, the contemplated revisions are still in the developmental stage and have not yet been formally proposed by the Commission. Thus, the extent of the revision actually proposed and the attendant reductions in costs and burdens are as yet largely unknown, but are anticipated to be significant.

3957. AMENDMENTS TO FORM N-2

Legal Authority: 15 USC 80a-8 Investment Company; 15 USC 77g Securities Act; 15 USC 77j Securities Act

CFR Citation: 17 CFR 239.14; 17 CFR 274.11a-1

Legal Deadline: None

Abstract: Form N-2 is the registration statement form under the Investment Company Act of 1940 and the Securities Act of 1933 for closed-end management investment companies other than small business investment companies and companies which issue periodic payment plan certificates or which are sponsors or depositors of companies issuing such certificates. Included within the registration statement are the companies' prospectuses used in offering their securities to the public. The Commission believes a simplified prospectus is necessary because current prospectuses have become too cumbersome for the average investor to understand and because current requirements result in the disclosure of much information that is not necessarily material to an investment decision. For N-2 is the registration form under the Securities Act of 1933 and Investment Company Act of 1940 for closed-end management investment companies other than small business investment companies. The Commission is considering proposing structured as a three-part form, one part of which would be a new Amendments to revise the format of the closed-end fund disclosure documents to provide for a simplified prospectus the (con't)

3958. METHOD FOR COMPLIANCE WITH SECTION 206(3) OF THE INVESTMENT ADVISERS ACT OF 1940 WITH RESPECT TO CERTAIN TRANSACTIONS

Legal Authority: 15 USC 80b-11(a)

CFR Citation: 17 CFR 275.206 (3)-3

Legal Deadline: None

Abstract: Section 206(3) of the Investment Advisers Act of 1940 makes it unlawful for any investment adviser, by use of the mail or any means or instrumentality of interstate commerce, directly or indirectly, knowingly to effect a securities transaction (a) with a client while acting as principal or (b) for a client while acting as broker for a person other than such client, without disclosing in writing to such client before the completion of the transaction the capacity on which he is acting and obtaining the consent of the client to the transaction. The Commission is considering whether to propose a rule that would provide a nonexclusive method for compliance with the provisions of Section 206(3) of the Investment Advisers Act of 1940 in connection with purchases of securities from an underwriting syndicate for an advisory client under specified conditions. Because the proposed rule is still in the developmental stages, its potential effect on small entities and its potential costs and benefits as a whole are unknown at this time.

3971. CUSTODY OF INVESTMENT COMPANY ASSETS WITH REGISTERED FUTURES COMMISSION MERCHANTS

Legal Authority: 15 USC 80a-37

CFR Citation: 17 CFR 270.17f-6

Legal Deadline: None

Abstract: The Division of Investment Management is considering recommending rulemaking to permit registered investment companies to maintain initial margin and excess variation margin in the custody of certain futures commission merchants if appropriate conditions can be developed to ensure the safety and integrity of the assets thus maintained.

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-37; 15 USC 80a-38

CFR Citation: 17 CFR 270.32a-3

Legal Deadline: None

Abstract: The Commission has proposed Rule 32a-3 under the Investment Company Act of 1940, which would provide exemptive relief to certain registered management investment companies from the proviso in section 32(a)(1) of the Act that the independent public accountant be selected at a board of directors meeting held within 30 days before or after the beginning of the fiscal year or before the annual meeting of stockholders in that year. If adopted, the proposed rule would provide such companies, under certain conditions, with expanded time periods in which to select the independent public accountant.

Accounting Rules

3975. PROPOSALS REGARDING INDUSTRY SEGMENT AND OTHER INTERIM FINANCIAL REPORTING MATTERS, MANAGEMENT'S DISCUSSION AND ANALYSIS, AND OFF BALANCE SHEET FINANCING DISCLOSURES

Legal Authority: 15 USC 77f; 15 USC 77g; 15 USC 77h; 15 USC 77j; 15 USC 77s(a); 15 USC 77aa (25) to 77aa(26); 15 USC 78l; 15 USC 78m; 15 USC 78o(d); 15 USC 78w(a); 15 USC 79e(b); 15 USC 79n; 15 USC 79t(a); 15 USC 80a-8; 15 USC 80-29

CFR Citation: 17 CFR 210.5-02; 17 CFR 210.10-01; 17 CFR 210.11-02; 17 CFR 229.303

Legal Deadline: None

Abstract: The Commission proposed amendments to require (1) presentation of certain industry segment information for interim periods; (2) a discussion of reportable segments in management's discussion and analysis; and (3) modifications of other miscellaneous interim reporting requirements. The release also provides advance notice of possible future rulemaking regarding (1) additional segment reporting disclosures and (2) uniform disclosure of off balance sheet financing arrangements. The proposals are designed to enhance analysis of financial information. They may entail some new recordkeeping but any such costs have not been determined. The Commission's interim reporting rules will be reviewed as a part of this action.

3978. ACQUISITIONS OF SUBSTANTIAL AMOUNTS OF SECURITIES AND RELATED ACTIVITIES DURING AND FOLLOWING A TENDER OFFER FOR THOSE SECURITIES

Legal Authority: 15 USC 78c(b); 15 USC 78m(e); 15 USC 78n(d); 15 USC 78w(a); 15 USC 78o(c); 15 USC 78t(b)

CFR Citation: 17 CFR 240.13e-2; 17 CFR 240.14d-11

Legal Deadline: None

Abstract: The Commission proposed Rules 13e-2 and 14d-11 that would require that, subject to certain exceptions, purchases, offers to purchase, arrangements or understandings to purchase and solicitations of offers to sell securities undertaken during and shortly after a tender offer that would increase any person's ownership of the class of securities subject to the tender offer by 10% or more of the class be made in compliance with the statutory provisions and rules applicable to tender offers. The proposed rules would apply to all persons from the formal commencement of a tender offer until 10 business days after the scheduled expiration date. A proposed rule also would subject a bidder to the same requirements from the time it commenced a tender offer by public announcement until it either formally commenced a tender offer by some other means or 30 business days after it made a subsequent public announcement stating that it had determined not to continue with the tender offer.

3982. REGULATION S - RULES GOVERNING OFFERS AND SALES MADE OUTSIDE THE UNITED STATES WITHOUT REGISTRATION UNDER THE SECURITIES ACT OF 1933

Legal Authority: 15 USC 77b; 15 USC 77d; 15 USC 77s

CFR Citation: 17 CFR 230.901-906

Legal Deadline: None

Abstract: The extraterritorial reach of Section 5 of the Securities Act of 1933 has become of critical importance with the development of major markets abroad and the growth of transnational investment. As a result of these developments, the Commission has published for comment proposed Regulation S intended to clarify the extraterritorial application of the registration provisions of the Securities Act of 1933. The Regulation would provide generally that any offer or sale that occurs outside the United States is not subject to Section 5.

3984. EXEMPTION OF CERTAIN FOREIGN BROKERS OR DEALERS

Significance: Agency Priority

Legal Authority: 15 USC 78c; 15 USC 78j; 15 USC 78o; 15 USC 78q; 15 USC 78w; 15 USC 78dd

CFR Citation: 17 CFR 240.15a-6

Legal Deadline: None

Abstract: Proposed Rule 15a-6 is the Commission's response to the cross-border activities of foreign broker-dealers, which may not be aware of or clearly understand U.S. broker-dealer registration requirements. The proposed rule would exempt from these requirements foreign entities that engage in securities transactions with certain non-U.S. persons, or with specified U.S. institutional investors under certain limited conditions. The staff believes that this alternative is superior to relying on the interpretive process, since the internationalization of the world's securities markets has increased greatly the number of requests for interpretive advice received by the staff. The Commission believes that, to the extent that the proposed rule, if adopted, would impose any costs on registered broker-dealer affiliates of eligible foreign broker-dealers or have a competitive effect on other domestic broker-dealers, those costs are not significant and would not impact on a substantial number of small domestic broker-dealers; also, the exemption under the rule would be limited to foreign broker-dealers, which need not be considered under 5 USC 603.

Investment Management Rules

3986. PROPOSED RULE 3A-4 -- INDIVIDUALIZED INVESTMENT MANAGEMENT SERVICES

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-37(a)

CFR Citation: 17 CFR 270.3a-4

Legal Deadline: None

Abstract: In Investment Company Act Release No. 11391 (October 10, 1980) (45 FR 69479) the Commission proposed for public comment Rule 3a-4, which would deem investment management services providing their clients with individualized treatment not to be investment companies for purposes of the Act. The rule provides a "safe harbor" for any investment manager providing its clients with treatment based on the needs and goals of each client. Under such circumstances, regulation of investment management services under the Act appears unnecessary. The proposed rule was intended to clarify the Commission's position on the question of "mini-accounts" by providing a safe harbor for certain investment management services and thereby provide some certainty to the public. The Commission does not expect any final action taken on the proposal to significantly affect the cost of providing investment management services. The public comment letters on the proposal have been reviewed and alternatives for final action are being considered.

3987. PROPOSED RULES 11A-3 AND 11C-1 UNDER THE INVESTMENT COMPANY ACT

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-11(a); 15 USC 80a-37

CFR Citation: 17 CFR 270.11a-3; 17 CFR 270.11c-1

Legal Deadline: None

Abstract: The proposed rules would exempt certain persons from the requirements of Section 11(a) of the Investment Company Act. That section prohibits any registered open-end investment company and its principal underwriter from making an offer to a shareholder to exchange his security for another security on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms have been submitted to and approved by the Commission or comply with rules the Commission may prescribe. Section 11(c) states in part that the terms of any offer of exchange involving the securities of registered unit investment trusts must also be submitted to and approved by the Commission or comply with rules the Commission may prescribe. Proposed rule 11a-3 would permit a mutual fund or its principal underwriter to make certain exchange offers to its own shareholders or to shareholders of another fund in the same family of funds. Proposed rule 11c-1 would permit a unit investment trust or its sponsor to make certain exchange offers to unit holders of the same series or another series of the same trust or to unit holders of another unit investment trust

3988. PROPOSED AMENDMENT TO RULE 17G-1 UNDER THE INVESTMENT COMPANY ACT

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-17(g); 15 USC 80a-37(a)

CFR Citation: 17 CFR 270.17g-1

Legal Deadline: None

Abstract: The Commission is considering whether to adopt an amendment to Rule 17g-1 under the Investment Company Act. The amendment was proposed for public comment in Investment Company Act Release No. 11193 (June 2, 1980) (45 FR 38407). Rule 17g-1 requires every registered investment company to provide and maintain a bond against larceny and embezzlement covering officers and employees of the company. In some circumstances, the officers and employees of a company's depositor, trustee, investment adviser or other

manager and various affiliates of such persons, because they have access to the company's assets, function as officers and employees of the investment company. The proposed amendment to the rule would clarify the scope of the rule by explicitly requiring the bonding of such persons. The principal cost associated with this rule would be the cost of a bond. That cost would vary according to the persons required to be bonded by the rule. In this regard, before adopting any amendment to the rule, the Commission will carefully consider what persons should be bonded to protect investors adequately, weighing the benefits of the protection against the cost of a bond.

3989. SIMPLIFICATION OF REGISTRATION STATEMENTS FILED BY UNIT INVESTMENT TRUSTS

Legal Authority: 15 USC 80a-8; 15 USC 77g; 15 USC 77j

CFR Citation: 17 CFR 239.16; 17 CFR 274.12

Legal Deadline: None

Abstract: On March 9, 1987, the Commission reproposed for public comment Form N-7, a new form for registering unit investment trusts("VITS") and their securities under the Investment Company Act of 1940 and the Securities Act of 1933. Form N-7 was originally proposed by the Commission on May 14, 1985. Adoption of Form N-7 would (i) codify the disclosure requirements for VITS into one form; (ii) codify the disclosure standards that have been developed for VITS; and (iii) shorten and simplify the prospectus used in connection with the sale of units in both the initial offering and in the secondary market maintained by the sponsor. As reproposed, a one-part prospectus originally proposed, but the prospectus would retain a series specific part and a generic part. The requirement for audited financial statements would be eliminated under certain circumstances. The requirement that registrants include certain third party financial statements in the registration statement would be extended to insurers as well as guarantors of portfolio securities of the trust under the reproposal.

3990. REGISTRATION UNDER THE SECURITIES ACT OF 1933 OF AN INDEFINITE NUMBER OF CERTAIN INVESTMENT COMPANY SECURITIES

Legal Authority: 15 USC 80a-37; 15 USC 80a-24

CFR Citation: 17 CFR 270.24f-3

Legal Deadline: None

Abstract: On March 9, 1987, the Commission published for public comment a new rule 24f-3 under the Investment Company Act of 1940 that would simplify filing requirements under section 24(f) of the Investment Company Act by allowing a unit investment trust to register an indefinite number of securities solely for secondary market purposes and to pay no registration fee on secondary market sales. The Commission is considering whether to adopt such amendments.

3991. PROPOSED AMENDMENTS TO RULES 12B-1 AND 17D-3 UNDER THE INVESTMENT COMPANY ACT OF 1940, AND TO ITEM 7 OF FORM N-1A UNDER THE SECURITIES ACT OF 1933

Legal Authority: 15 USC 80a-12(b); 15 USC 80a-17(d); 15 USC 80a-39; 15 USC 77a, et seq.

CFR Citation: 17 CFR 270.12b-1; 17 CFR 270.17d-3; 17 CFR 239.15A

Legal Deadline: None

Abstract: The Commission has proposed for comment amendments to Rule 12b-1 under the Investment Company Act to redefine the Circumstances under which investment companies may finance distribution of fund assets. The Commission has also proposed amendments to Rule 17d-3 to allow affiliated investment companies to jointly finance distribution activities under certain conditions. Finally, the Commission has proposed amendments to Form N-1A which would require an additional disclosure to be made regarding the amount of payments under distribution plans.

3992. DISCLOSURE OF SECURITY RATINGS IN REGISTRATION STATEMENTS OF MONEY MARKET FUNDS

Legal Authority: 15 USC 77(g); 15 USC 77(i); 15 USC 77(s)(a)

CFR Citation: 17 CFR 230.134; 17 CFR 230.436; 17 CFR 230.482

Legal Deadline: None

Abstract: The Commission proposed amendments to Rules 134, 436, and 482 under the Securities Act of 1933 on March 14, 1986. The amendments would, if adopted, permit certain investment companies to use in their statutory and omitting prospectuses security ratings assigned by a nationally recognized statistical rating organization (NRSRO) without first obtaining the NRSRO'S consent to being named pursuant to Section 7 of the Securities Act. The Commission is now considering whether to adopt such amendments.

3993. PROPOSED RULE 6C-10 UNDER THE INVESTMENT COMPANY ACT OF 1940 AND TO ITEM 2 OF FORM N-1A UNDER THE SECURITIES ACT OF 1933

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-22(c); 15 USC 80a-37; 15 USC 80a-39; 15 USC 77a, et. seq.

CFR Citation: 17 CFR 270.6c-10; 17 CFR 239.15A

Legal Deadline: None

Abstract: The Commission has proposed for public comment rule 6c-10 under the Investment Company Act to provide a registered open-end management investment company, other than a registered insurance company separate account, and certain relaxed persons with exemptions from the Act to the extent necessary to permit the fund to impose sales loads on a deferred basis. The Commission has also proposed amendments to Form N-1A, the registration statement for funds to accommodate the deferred sales loads that would be permitted if rule 6c-10 is adopted.

3994. FORMS FOR FILINGS BY ACCOUNTANTS

Legal Authority: 15 USC 80a-17(f); 15 USC 80b-6

CFR Citation: 17 CFR 270.17f-1; 17 CFR 270.17f-2; 17 CFR 275.206(4)-2

Legal Deadline: None

Abstract: The Commission is proposing three new forms to serve as cover sheets to examination certificates filed by accountants in compliance with rules 17f-1(b)(4) and 17f-2(f) under the Investment Company Act of 1940 and rule 206(4)-2(a)(5) under the Investment Advisers Act of 1940. These forms, and related rule amendments, are intended to ensure that examination certificates are properly filed and thus easily accessible. Because the forms are only cover sheets for documents currently required to be filed, there would be no significant cost or burden for compliance.

3995. EXEMPTION FROM REGISTRATION UNDER THE ADVISERS ACT FOR CERTAIN SMALLER INVESTMENT ADVISERS

Legal Authority: 15 USC 80b-6A

CFR Citation: 17 CFR 275.203(b)(1) -1; 17 CFR 275.203(b)(3) -2

Legal Deadline: None

Abstract: The Commission proposed rules that, if adopted would exempt smaller investment advisers from most federal adviser regulation, other than the general antifraud provisions, if the advisers are registered in all states in which they do business. The proposed exemptions should significantly diminish the costs and paperwork associated with dual federal and state regulation of small advisory businesses. The proposed rules would rely on the states to assume responsibility for the detailed regulation that, at the federal level, would no longer be applicable to small advisers exempt under these rules. The proposed rules, which include both an interstate and an intrastate exemption, would determine eligibility for the exemptions by reference to the size of the adviser's business; whether the adviser has custody of client funds or securities; and whether the adviser is registered as an adviser in the state or states in which it does business. The proposed exemptions, together with the amendment of several rules, would eliminate costs of registration and reporting as well as compliance with the brochure rule, the recordkeeping rule, the performance for rule, the cash (con't)

3996. DIVERSIFICATION BY EXEMPT HOLDING COMPANIES

Legal Authority: 15 USC 79c(a)(1); 15 USC 79t(a)

CFR Citation: 17 CFR 250.17; 17 CFR 250.2; 17 CFR 259.402

Legal Deadline: None

Abstract: Proposed Rule 17 clarifies under what conditions diversification into non-utility enterprises would not be deemed detrimental to the public interest or the interest of investors or consumers within the meaning of the "unless and except" clause of S3(a)(1) of the Public Utility Holding Company Act of 1935. The rule would provide two alternative "safe harbors". A companion proposed amendment to rule 2 under the Act would require after three years from its adoption, claims of exemption under rule 2, in order to be effective, would require that the claimant meet one of the safe harbor provisions of rule 17. Also proposed is an amendment to Form U-3A-2, the statement filed annually by holding companies claiming exemptions under rule 2, that would request information necessary to determine whether a rule 2 claim of exemption by an intrastate holding company was meritorious in light of the requirement added to rule 2. These proposals could significantly increase regulatory compliance costs for those intrastate public utility holding companies that have diversified operations, or that intend to do so. The proposals could require such a company to forego acquisition of an unrelated (con't)

Legal Authority: 15 USC 78q

CFR Citation: 17 CFR 249.617

Legal Deadline: None

Abstract: Form X-17A-5 of the Securities Exchange Act of 1934, 15 U.S.C. 78q (paragraph) (a) of Rule 17a-5) is a form on which every broker-dealer registered under Section 15 must file certain specified monthly and quarterly reports. The form, which is required under Rule 17a-5 (17 C.F.R. 240.17a-5), is also known as the Financial and Operational Combined Uniform Single ("FOCUS") Report, and must be filed at the Commission's principal office in Washington, D.C. and at the regional office for the region where the broker-dealer's principal place of business is located. The FOCUS Report was designed to eliminate all of the overlapping regulatory reports required by various self-regulatory groups and the Commission and to reduce reporting burdens as much as possible.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC
WHEN: May 23; at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

ST. LOUIS, MO
WHEN: May 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center, St. Louis: 314-425-4106 Missouri (outside St. Louis): 1-800-392-7711 Kansas: 1-800-432-2934

Title 3—

The President

Proclamation 5957 of April 19, 1989

National Recycling Month, 1989

By the President of the United States of America

A Proclamation

As we approach the last decade of the 20th century, the United States faces a growing problem in the management of solid waste. This Nation currently generates 160 million tons of solid waste per year. While that amount is increasing, the number of available landfills is shrinking dramatically. This situation underscores the importance of recycling.

The benefits of recycling solid waste are substantial. Recycling waste helps to preserve our limited landfill space. Recycling also reduces the need to extract resources from their natural environment and thus helps to prevent the pollution such removal efforts create. It also saves energy and provides a less expensive alternative to landfills and incineration. Finally, communities can use the materials recovered through recycling to generate revenue.

Some cities and States, recognizing the important role recycling can play in waste management, have enacted mandatory recycling laws. Numerous towns and counties across America now boast effective voluntary recycling programs. A well-developed system of recycling facilities has emerged in the United States for scrap metals, paper, and glass. Nonetheless, Americans still do not recycle enough municipal waste. Nearly 80 percent of the municipal solid waste in this country is deposited in landfills, while 10 percent is incinerated. Only 10 percent of our Nation's waste is recycled.

Every American household and community can play a major role in solving the problems associated with solid waste disposal by recycling—either through municipal programs or voluntary drives sponsored by local service organizations. The Environmental Protection Agency has set a national goal of 25 percent waste recycling by 1992. While the ability to meet this goal may vary from town to town, such efforts are useful steps toward eliminating America's solid waste problems.

In recognition of the importance of recycling, the Congress, by House Joint Resolution 102, has designated April 1989 as "National Recycling Month" and has authorized and requested the President to issue a proclamation calling for its appropriate observance.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim April 1989 as National Recycling Month. I urge the people of the United States to observe this month by actively participating in community recycling efforts and teaching their children about the benefits of such efforts. I also encourage community leaders to consider the advantages of a comprehensive recycling program as a means of managing municipal solid waste.

Executive Order 12675 of April 20, 1989

Establishing the National Space Council

By the authority vested in me as President by the Constitution and laws of the United States of America, and in order to provide a coordinated process for developing a national space policy and strategy and for monitoring its implementation, it is hereby ordered as follows:

Section 1. *Establishment and Composition of the National Space Council.*

(a) There is established the National Space Council ("the Council").

(b) The Council shall be composed of the following members:

(1) The Vice President, who shall be Chairman of the Council;

(2) The Secretary of State;

(3) The Secretary of the Treasury;

(4) The Secretary of Defense;

(5) The Secretary of Commerce;

(6) The Secretary of Transportation;

(7) The Director of the Office of Management and Budget;

(8) The Chief of Staff to the President;

(9) The Assistant to the President for National Security Affairs;

(10) The Assistant to the President for Science and Technology;

(11) The Director of Central Intelligence; and

(12) The Administrator of the National Aeronautics and Space Administration.

(c) The Chairman shall, from time to time, invite the following to participate in meetings of the Council:

(1) The Chairman of the Joint Chiefs of Staff; and

(2) The heads of other executive departments and agencies and other senior officials in the Executive Office of the President.

Sec. 2. *Functions of the Council.* (a) The Council shall advise and assist the President on national space policy and strategy, and perform such other duties as the President may from time to time prescribe.

(b) In addition, the Council is directed to:

(1) review United States Government space policy, including long-range goals, and develop a strategy for national space activities;

(2) develop recommendations for the President on space policy and space-related issues;

(3) monitor and coordinate implementation of the objectives of the President's national space policy by executive departments and agencies; and

(4) foster close coordination, cooperation, and technology and information exchange among the civil, national security, and commercial space sectors, and facilitate resolution of differences concerning major space and space-related policy issues.

VOL
54
ISS
78
AP
25
1989
UMI

(c) The creation and operation of the Council shall not interfere with existing lines of authority and responsibilities in the departments and agencies.

Sec. 3. *Responsibilities of the Chairman.* (a) The Chairman shall serve as the President's principal advisor on national space policy and strategy.

(b) The Chairman shall, in consultation with the members of the Council, establish procedures for the Council and establish the agenda for Council activities.

(c) The Chairman shall report to the President on the activities and recommendations of the Council. The Chairman shall advise the Council as appropriate regarding the President's directions with respect to the Council's activities and national space policy generally.

(d) The Chairman shall authorize the establishment of such committees of the Council, including an executive committee, and of such working groups, composed of senior designees of the Council members and of other officials invited to participate in Council meetings, as he deems necessary or appropriate for the efficient conduct of Council functions.

Sec. 4. *National Space Policy Planning Process.* (a) The Council will establish a process for developing and monitoring the implementation of national space policy and strategy.

(b) To implement this process, each agency represented on the Council shall provide such information regarding its current and planned space activities as the Chairman shall request.

(c) The head of each executive department and agency shall ensure that its space-related activities conform to national space policy and strategy.

Sec. 5. *Establishment of Vice President's Space Policy Advisory Board.* (a) The Vice President shall establish, in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App. 2), governing Presidential advisory committees, an advisory committee of private citizens to advise the Vice President on the space policy of the United States ("the Board").

(b) The Board shall be composed and function as follows:

(1) The Board shall be composed of members appointed by the Vice President.

(2) The Vice President shall designate a Chairman from among the members of the Board. The Executive Secretary of the National Space Council shall serve as the Secretary to the Board.

(3) Members of the Board shall serve without any compensation for their work on the Board. However, they shall be entitled to travel expenses, including per diem in lieu of subsistence, as authorized by law, for persons serving intermittently in the Government service (5 U.S.C. 5701–5707), to the extent funds are available for that purpose.

(4) Necessary expenses of the Board shall be paid from funds available for the expenses of the National Space Council.

(5) Notwithstanding the provisions of any other Executive order, the responsibilities of the President under the Federal Advisory Committee Act, as amended, except that of reporting annually to the Congress, which are applicable to the Board established by this order, shall be performed on a reimbursable basis by the Director of the Office of Administration in the Executive Office of the President, in accordance with the guidelines and procedures established by the Administrator of General Services.

Sec. 6. *Microgravity Research Board.* Section 1(c) of Executive Order No. 12660 is amended by deleting "Economic Policy Council" and inserting in lieu thereof "National Space Council."

Sec. 7. *Administrative Provisions.* (a) The Office of Administration in the Executive Office of the President shall provide the Council with such administrative support on a reimbursable basis as may be necessary for the performance of the functions of the Council.

(b) The President shall appoint an Executive Secretary who shall appoint such staff as may be necessary to assist in the performance of the Council's functions.

(c) All Federal departments, agencies, and interagency councils and committees having an impact on space policy shall extend, as appropriate, such cooperation and assistance to the Council as is necessary to carry out its responsibilities under this order.

(d) The head of each agency serving on the Council or represented on any working group or committee of the Council shall provide such administrative support as may be necessary, in accordance with law and subject to the availability of appropriations, to enable the agency head or its representative to carry out his responsibilities.

Sec. 8. *Report.* The Council shall submit an annual report setting forth its assessment of and recommendations for the space policy and strategy of the United States Government.

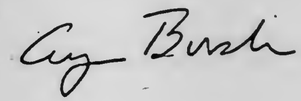
Proclamation 5958 of April 20, 1989

National Organ and Tissue Donor Awareness Week, 1989 and 1990

By the President of the United States of America

A Proclamation

Few advances in medicine inspire more awe than successful organ and tissue transplants. In recent years, we have witnessed the restoration of sight to the blind through new corneas; we have watched cancer patients regain their health through bone marrow transplants; and we have seen gravely ill men and women get another chance at life with a new heart, lung, or kidney. These wonderful success stories would not have been possible without the generosity of those Americans who were willing to donate their organs and tissues to others.



Much has been done in recent years to encourage public support of organ and tissue donation. Through the American Council or Transplantation, regional donor programs, community leadership, and media support, millions of Americans have learned about donation and have signed donor cards. Unfortunately, despite these efforts and the success of transplant programs around the world, many seriously ill persons still await organ transplants. That is why I encourage each and every American to give careful thought to becoming an organ and tissue donor.

I encourage every American to learn the facts about organ and tissue transplants and to discuss any moral or ethical concerns about donation with your family and doctor. Organ and tissue transplants give us cause to reflect upon the precious gift of human life, as well as our responsibility to treat it with care and reverence. Just as we give thanks for the life and health with which God has blessed us, so, too, must we solemnly consider the profound act of sharing life with others through organ and tissue donation.

The Congress, by House Joint Resolution 112, has designated the weeks of April 23 through 29, 1989, and April 23 through 29, 1990, as "National Organ and Tissue Donor Awareness Week" and has authorized and requested the President to issue a proclamation in observance of this occasion.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the weeks of April 23 through 29, 1989, and April 23 through 29, 1990, as National Organ and Tissue Donor Awareness Week. I ask health care professionals, public and private service organizations, and all Americans to join in supporting this humanitarian cause.

IN WITNESS WHEREOF, I have hereunto set my hand this twentieth day of April, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

Proclamation 5959 of April 21, 1989

Law Day, U.S.A., 1989

By the President of the United States of America

A Proclamation

For more than 30 years, our Nation has paused each May 1 to observe Law Day, U.S.A. On this day, we celebrate America's legacy of liberty and self-government, guaranteed under law and preserved with the aid of our legal system.

The American legal system plays a vital role in maintaining the balance between individual freedom and civil order. Our Nation's leaders, past and present, have supplemented our rich common law heritage with statutes, rules, and regulations at every level of government. This body of laws not only provides protection for the freedoms guaranteed by our Constitution, it also provides a framework for peacefully resolving disputes, vindicating the rights of individuals, and punishing criminal conduct.

Our Nation has long been committed to ensuring that this system serves all who seek redress of their grievances. That commitment is reflected in the solemn oath taken by all Federal judges before they assume office: the vow to "administer justice without respect to persons, and do equal right to the poor and to the rich." Under that oath, judges must decide every citizen's claim on its merits, not on the basis of the claimant's status.

Despite its many accomplishments, however, our legal system still exhibits a number of imperfections. There remain members of our society for whom the promise of redress for their grievances has not yet been fully realized. Delay in court proceedings and the cost of pursuing legal remedies make it difficult for many Americans to have their claims adjudicated, regardless of their economic means. Others face large hurdles and tremendous frustration—even if they ultimately obtain vindication—because of the frivolous use of legal processes. These problems are particularly distressing to the poor. Many indigent persons are simply precluded from pursuing legal remedies to their grievances. All too often, this exclusion invites disrespect for our judicial system and subsequently undermines the strength of our democracy.

On this Law Day, which is dedicated to the theme of "Access to Justice," we remind ourselves that it is everyone's responsibility to ensure the effectiveness and accessibility of the American justice system. Our Founders asserted that the second goal of the U.S. Constitution was "to establish justice." Because of the central role of the rule of law in preserving our freedom in this constitutional democracy, all Americans should concern themselves with improving the Nation's justice system. All of us can participate in this process by developing a better understanding of its purpose and operations. We can encourage the organizations to which we belong to initiate educational programs aimed at the general public, and we can give of our own time to help those with valid claims to obtain redress.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, in accordance with Public Law 87–20 of April 7, 1961, do hereby proclaim Monday, May 1, 1989, as Law Day, U.S.A. I urge the people of the United States to mark this occasion by reflecting upon the importance of the justice system to the preservation of our democracy, as well as the importance of access to that system for all who will make responsible use of it. I urge the

VOL

legal profession, schools, libraries, government agencies, the media, clergy, and businesses, as well as civic and voluntary service organizations, to join in efforts to focus public attention on the importance of making access to justice a reality for all persons. I also call upon all public officials to display the flag of the United States on all government buildings on this day.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of April, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

Proclamation 5960 of April 21, 1989

Death of American Servicemen on Board the USS IOWA

By the President of the United States of America

A Proclamation

As a mark of respect for the American servicemen who died as a result of the accident aboard the USS IOWA, which occurred on April 19, 1989, I hereby order, by the authority vested in me as President of the United States of America by section 175 of title 36 of the United States Code, that the flag of the United States shall be flown at half-staff upon all public buildings and grounds, at all military posts and naval stations, and on all naval vessels of the Federal Government in the District of Columbia and throughout the United States and its Territories and Possessions until sunset, Tuesday, April 25, 1989. I also direct that the flag shall be flown at half-staff for the same length of time at all United States embassies, legations, consular offices, and other facilities abroad, including all military facilities and naval vessels and stations.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of April, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

George Bush

Notice of April 21, 1989

Continuation of Nicaraguan Emergency

On May 1, 1985, by Executive Order No. 12513, President Reagan declared a national emergency to deal with the threat to the national security and foreign policy of the United States constituted by the situation in Nicaragua. On April 25, 1988, the President announced the continuation of that emergency beyond May 1, 1988. Because the actions and policies of the Government of Nicaragua continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States, the national emergency declared on May 1, 1985, and subsequently extended, must continue in effect beyond May 1, 1989. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to Nicaragua. This notice shall be published in the **Federal Register** and transmitted to the Congress.

George Bush

April 12, 1989.
THE WHITE HOUSE,

Rules and Regulations

Federal Register
Vol. 54, No. 78
Tuesday, April 25, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

7 CFR Part 1785

Cushion of Credit Account; Computations and Procedures

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule; correction.

SUMMARY: The Rural Electrification Administration is correcting an error in the cushion of credit account computation procedures which appeared in the Federal Register on April 5, 1989 (54 FR 13668).

FOR FURTHER INFORMATION CONTACT: Robert D. Ruddy, Director, Fiscal Accounting Division, Rural Electrification Administration, Washington, DC 20250–1500, telephone number (202) 382–8823.

SUPPLEMENTARY INFORMATION: The borrower's option to make a one time election to have computations regarding its cushion of credit account made as of April 5, 1989, instead of October 2, 1987, as specified in § 1785.70(a), is corrected by specifying the date by which the borrower must exercise this option. Any borrower wishing to elect April 5, 1989, as the computation date must notify REA to that effect within 30 days from the date this notice of correction is published. REA is correcting the last sentence of 7 CFR 1785.70(a) by adding the words "on or before May 25, 1989."

For the convenience of the public, 7 CFR 1785.70(a) as corrected by this notice is reprinted in full below.

§ 1785.70 Application of RETRF cushion of credit payments.

(a) If a maturing installment on an REA note or a note which has been guaranteed by REA is not received by its due date, funds will be withdrawn from the borrower's cushion of credit account and applied as of the installment due date beginning with the oldest of such notes as follows: first, to current interest then due on all notes; second, to the accumulated interest due, if any, on all notes; and third, to the principal then due on all notes. In those instances where a borrower has prior to October 2, 1987, maintained an advance payment account with REA, its cushion of credit account will be applied in accordance with the provisions of this section prior to using any balance remaining in its advance payment account to pay interest and principal installments on notes. Computations required under this section have been made by REA as of October 2, 1987; however, on or before May 25, 1989 any borrower may make a one time irrevocable election to have all such computations made as of April 5, 1989, by filing written notice to that effect with Robert D. Ruddy, Director, Fiscal Accounting Division, Rural Electrification Administration, Washington, DC 20250–1500.

BILLING CODE 3410–15–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 73

Access to Safeguards Information

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations for access to Safeguards Information to be consistent with "The Omnibus Diplomatic Security and Anti-Terrorism Act of 1986," which requires nuclear power reactor applicants and licensees to conduct Federal Bureau of Investigation (FBI) criminal history checks of certain individuals with access to information protected as Safeguards Information. This action is necessary to ensure that all applicable NRC regulations reflect this requirement.

EFFECTIVE DATE: May 25, 1989.

FOR FURTHER INFORMATION CONTACT: M.L. Au, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3749.

SUPPLEMENTARY INFORMATION: Section 606 of Pub. L. 99–399, "The Omnibus Diplomatic Security and Anti-Terrorism Act of 1986," requires nuclear power reactor applicants and licensees to conduct criminal history checks through the use of FBI criminal history data on individuals with access to Safeguards Information. The Act, signed by President Reagan on August 27, 1986, required the NRC to issue regulations to establish conditions for the use and control of the criminal history data received from the FBI. NRC published its implementing regulations March 2, 1987, as a new § 73.57 to 10 CFR Part 73. NRC requirements for the protection of Safeguards Information, 10 CFR 73.21, were published October 22, 1981, prior to enactment of the legislation. This technical amendment conforms 10 CFR 73.21 with the provisions of 10 CFR 73.57 which require certain individuals to undergo FBI criminal history checks prior to gaining access to Safeguards Information. Individuals who are exempted from fingerprinting under 10 CFR 73.57 will continue to be exempt under this rule.

Because this amendment is of a technical nature only, and does not add a new requirement, or revoke any existing regulation, good cause exists for finding that notice of proposed rulemaking and public procedure is unnecessary until Title 5 U.S.C. section 553. Accordingly, the amendment is being published for codification as a final rule.

Environmental Impact: Categorical Exclusion

The NRC has determined that this regulation is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore neither an environmental impact statement nor environmental assessment has been prepared for this regulation.

Paperwork Reduction Act Statement

This final rule does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et

VOL
54
ISS
78
AP
25
1989
UMI

seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150-0002.

Regulatory Analysis

No regulatory analysis has been prepared for this rule because the action represents an administrative cross-referencing between two existing sections in the regulations.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this final rule, and therefore, that a backfit analysis is not required for this final rule, because these amendments are mandated by Pub. L. 99-399.

List of Subjects in 10 CFR Part 73

Hazardous materials-transportation, Incorporation by reference, Nuclear materials, Nuclear power plants and reactors, Penalty, Reporting and recordkeeping requirements, Security measures.

For reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is adopting the following amendment to 10 CFR Part 73.

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIAL

1. The authority citation for Part 73 continues to read as follows:

Authority: Secs. 53, 161, 66 Stat. 930, 948, as amended, sec. 147, 94 Stat. 780 (42 U.S.C. 2073, 2167, 2201); sec. as amended, 204, 88 Stat. 1242, as amended, 1245 (42 U.S.C. 5841, 5844).

Section 73.1 also issued under secs. 135, 141, Pub. L. 97-425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 73.37(f) also issued under sec. 301, Pub. L. 96-295, 94 Stat. 789 (42 U.S.C. 5841 note). Section 73.57 is issued under sec. 606, Pub. L. 99-399, 100 Stat. 876 (42 U.S.C. 2169).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273; §§ 73.21, 73.37(g), and 73.55 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 73.20, 73.24, 73.25, 73.26, 73.27, 73.37, 73.40, 73.45, 73.46, 73.50, 73.55, and 73.57 are issued under sec. 1611, 68 Stat. 949, as amended (42 U.S.C. 2201(i); and §§ 73.20(c)(1), 73.24(b)(1), 73.26 (b)(3), (h)(6), and (k)(4), 73.27 (a) and (b), 73.37(f), 73.40 (b) and (d), 73.46 (g)(6) and (h)(2), 73.50 (g)(2), (3)(iii)(B), and (h), 73.55 (h)(2) and (4)(iii)(B), 73.57, 73.70, 73.71, and 73.72 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 73.21, paragraph (c)(1)(i) is revised to read as follows:

§ 73.21 Requirements for the protection of safeguards information.

* * * * *

(c) * * *

(1) * * *

(i) An employee, agent, or contractor of an applicant, a licensee, the Commission, or the United States Government. However, an individual to be authorized access to Safeguards Information by a nuclear power reactor applicant or licensee must undergo a Federal Bureau of Investigation criminal history check to the extent required by 10 CFR 73.57;

* * * * *

Dated at Rockville, Maryland, this 4th day of April, 1989.

For the Nuclear Regulatory Commission.

Victor Stello, Jr.,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 178

[Docket No. 88F-0333]

Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of di-*tert*-butylphenyl phosphonite condensation product with biphenyl as an antioxidant for 4-methylpentene-1 copolymers used in contact with food. This action is in response to a petition filed by Sandoz AG.

DATES: Effective May 26, 1989, objections by May 25, 1989.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administation, 200 C Street SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of October 25, 1988 (53 FR 43043), FDA announced that a food additive petition (FAP 8B4100) had been filed by Sandoz AG, CH-4402, Basel, Switzerland, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) be amended to include the use of di-*tert*-butylphenyl phosphonite condensation product with biphenyl as an antioxidant for 4-methylpentene-1 copolymers used in contact with food.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that the regulations should be amended in § 178.2010 in the table of paragraph (b) by revising item 1. under the heading "Limitations" for the entry "Di-*tert*-butylphenyl phosphonite condensation product with biphenyl * * *".

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before May 25, 1989, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be present in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 178

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 178 is amended as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

1. The authority citation for 21 CFR 178 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 178.2010 is amended in the table of paragraph (b) by revising item 1. under the heading "Limitations" for the entry "Di-*tert*-butylphenyl phosphonite condensation product with biphenyl * * *" to read as follows:

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

Substances	Limitations
Di-*tert*-butylphenyl phosphonite condensation product with biphenyl * * *.	For use only: 1. At levels not to exceed 0.1 percent by weight of olefin polymers complying with § 177.1520(c) of this chapter, items 1.1, 2.1, 2.2, 3.1, 3.2, or 3.3. * * *

Dated: April 14, 1989.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 89-9844 Filed 4-24-89; 8:45 am]

BILLING CODE 4160-01-M

21 CFR Parts 510 and 522

Animal Drugs, Feeds, and Related Products; Copper Disodium Edetate Injection

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Veterinary Research and Development, Inc., providing for the use of Bovi-Cu (copper disodium edetate) injection in beef cattle and beef calves to prevent copper deficiency alone or in association with molybdenum toxicity.

EFFECTIVE DATE: April 25, 1989.

FOR FURTHER INFORMATION CONTACT: Dianne T. McRae, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: Veterinary Research and Development, Inc., P.O. Box 1299, Truckee, CA 95734, filed NADA 140-904 which provides for the use of Bovi-Cu (copper disodium edetate) injection in beef cattle and beef calves to prevent copper deficiency alone or in association with molybdenum toxicity. The application is approved and the regulations are amended in 21 CFR 510.600(c) and in 21 CFR Part 522 by adding a new § 522.514. The basis for approval is discussed the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 522

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegatd to the Center for Veterinary Medicine, Parts 510 and 522 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR Part 510 continues to read as follows:

Authority: Secs. 512, 701(a) (21 U.S.C. 360b, 371(a)); 21 CFR 5.10 and 5.83.

2. Section 510.600 is amended in the table of paragraph (c)(1) by alphabetically adding an entry for "Veterinary Research and Development, Inc.", and in the table of paragraph (c)(2) by numerically adding and entry for "057428" to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * * * * * *	
Veterinary Research and Development, Inc., P.O. Box 1299, Truckee, CA 95734	057428
* * * * * * *	

(2) * * *

Drug labeler code	Firm name and address
* * * * * * *	
057428	Veterinary Research and Development, Inc., P.O. Box 1299, Truckee, CA 95734

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

3. The authority citation for 21 CFR Part 522 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

4. New § 522.514 is added to Part 522 to read as follows:

VOL 54 ISS 78 AP 25 1989 UMI

§ 522.514 Copper disodium edetate injection.

(a) *Specifications.* Each milliliter of sterile, glycerol-aqueous solution contains 400 milligrams of copper disodium edetate (equivalent to 60 milligrams of copper).

(b) *Sponsor.* See 057428 in § 510.600(c) of this chapter.

(c) *Conditions of Use*—(1) *Amount.* 1 milliliter for calves weighing 300 pounds or less; 2 milliliters for calves weighing over 300 pounds and adult cattle.

(2) *Indications for use.* For beef cattle and beef calves to prevent copper deficiency alone or in association with molybdenum toxicity.

(3) *Limitations.* For subcutaneous use only. Repeat dose after 3 months in young calves and after 6 months in cattle of feeder age or older. Discontinue use 30 days before treated animals are slaughtered for food use.

Dated: April 17, 1989.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

[FR Doc. 89-9843 Filed 4-24-89; 8:45 am]

BILLING CODE 4160-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL-3560-9]

Wisconsin; Schedule of Compliance for Modification of Hazardous Waste Program

AGENCY: Environmental Protection Agency, Region V.

ACTION: Notice of Wisconsin's Compliance Schedule to Adopt Program Modifications.

SUMMARY: On September 22, 1986, U.S. EPA promulgated Amendments to the deadlines for State program modifications and published requirements for States to be placed on a compliance schedule to adopt necessary program modifications, if they cannot meet the prescribed deadlines. U.S. EPA is today publishing a compliance schedule for Wisconsin to modify its program, in accordance with § 271.21(g) to adopt Federal program modifications.

FOR FURTHER INFORMATION CONTACT: Brian Barwick, Wisconsin Regulatory Specialist, Office of RCRA, U.S. EPA, Region V, 230 South Dearborn Street, 5HR-JCK-13, Chicago, Illinois 60604, (312) 886-6085, (FTS: 8-886-6085).

SUPPLEMENTARY INFORMATION:

A. Background

Final authorization to implement the Federal hazardous waste program within the State is granted by U.S. EPA, if the Agency finds that the State program: (1) Is "equivalent" to the Federal program; (2) is "consistent" with the Federal program and other State programs; and (3) provides for adequate enforcement (section 3006(b), 42 U.S.C. 6926(b)). U.S. EPA regulations for final authorization appear at 40 CFR 271.1-271.24. In order to retain authorization, a State must revise its program to adopt new Federal requirements by the cluster deadlines and procedures specified in 40 CFR 271.21. See 51 FR 33712, September 22, 1986, for a complete discussion of these procedures and deadlines.

B. Wisconsin

Wisconsin received final authorization of its hazardous waste program on January 31, 1986 (see 51 FR 3783, January 30, 1986). Today U.S. EPA is publishing a compliance schedule for Wisconsin to complete program revisions for the following Federal program requirements:

(1) Financial Responsibility; Settlement Agreement
(51 FR 16443-16459, May 2, 1986)
(2) Radioactive Mixed Waste
(51 FR 24504-24505, July 3, 1986)
(3) Liability Coverage-Corporate Guarantee
(51 FR 25350-25356, July 11, 1986)
(4) Hazardous Waste Tank Systems
(51 FR 25470-25486, July 14, 1986)
(5) Correction to Listing of Commercial Chemical Products and Appendix VIII Constituents
(51 FR 28296-28310, August 6, 1986)
(6) Correction to the Hazardous Waste Tank Systems Rule
(51 FR 29430-29431, August 15, 1986)
(7) Revised Manual SW-846 Amended Incorporation by Reference
(52 FR 8072-8073, March 16, 1987)
(8) Closure/Post-Closure Care for Interim Status Surface Impoundments
(52 FR 8704-8709, March 19, 1987)
(9) Definition of Solid Waste Technical Corrections
(52 FR 21306-21307, June 5, 1987)
(10) Amendments to Part B Information Requirements for Disposal Facilities
(52 FR 23447-23450, June 22, 1987)

Following is an explanation of why Wisconsin needs additional time to complete these program revisions.

The adoption deadline under 40 CFR 271.21 for Financial Responsibility; Settlement Agreement was July 1, 1987. In the preamble to the Federal rule (51 FR 16443-16459, May 2, 1986) and in other official U.S. EPA guidance, U.S. EPA indicated that certain provisions of this Federal rule were not required to maintain authorization, because those provisions were less stringent than pre-existing Federal rules. States are not required to make program revisions with respect to new Federal requirements which are less stringent than pre-existing Federal rules.

U.S. EPA has now determined that the preamble and the official U.S. EPA guidance mischaracterized certain Federal provisions as less stringent. Many of the Federal provisions that were mischaracterized are in fact more stringent than pre-existing Federal rules and, therefore, are required program revisions for authorization maintenance (see 53 FR 7740-7741, March 10, 1988).

When Wisconsin adopted rules analogous to the Federal rules, the State omitted those Federal provisions which were mischaracterized in the preamble and official U.S. EPA guidance as less stringent provisions. As a result, through no fault of its own, Wisconsin cannot receive authorization for Financial Responsibility—Settlement Agreement until it makes further program revisions in accordance with U.S. EPA's revised guidance. Wisconsin has agreed to make these additional program revisions.

The adoption deadline under 40 CFR 271.21 for the other Federal rules listed above was July 1, 1988. For the most part, State program revisions for these rules have been delayed because the State is currently reorganizing and recodifying its hazardous waste rules. This State effort should greatly enhance the public's ability to comprehend the requirements of Wisconsin's hazardous waste rules. In addition, some Federal rules other than those specified above, will be incorporated into the State rules as a part of this effort. For these reasons, U.S. EPA supports the State's reorganization and recodification effort and, therefore, has granted the State additional time to complete its program revisions.

The State has agreed to complete the needed program revisions according to the following schedule:

(1) Draft State rules, October 1988-March 1989.
(2) Submit draft State rules to U.S. EPA for review, December 1988 through March 1989.
(3) Hold a public hearing on the new State rules, April 15, 1989.
(4) Submit rule adoption request greensheet to appropriate State officials, July 1, 1989.
(5) Submit new State rules to the Wisconsin legislature for approval, August 31, 1989.

(6) New State rules become effective, December 31, 1989.

Wisconsin expects to submit an application to U.S. EPA for authorization of the above-mentioned program revisions by February 28, 1990.

Authority: This notice is issued under the authority of sections 200 (a), 3006, and 7004(b) of the Solid Waste Disposal Act, as amended by the RCRA of 1976, as amended, 42 U.S.C. 6912(a), 6926, and 6974(b).

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560-50-M

40 CFR Part 721

[OPTS-50567B; FRL-3561-1]

Benzenamine, 4-Chloro-2-Methyl-; Benzenamine, 4-Chloro-2-Methyl, Hydrochloride; Benzenamine, 2-Chloro-6-Methyl-; Significant New Use of Chemical Substances; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a typographical error that appeared in a Significant New Use Rule (SNUR) that was published in the Federal Register of March 27, 1989.

EFFECTIVE DATE: This document is effective April 25, 1989.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB-44, 401 M Street SW., Washington, DC 20460, Telephone: (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 27, 1989 (54 FR 12445), EPA issued a SNUR under section 5(a)(2) of the Toxic Substances Control Act which will require persons to notify EPA at least 90 days before commencing the manufacture, import, or processing of benzenamine, 4-chloro-2-methyl-(CAS Number 95-69-2); benzenamine, 4-chloro-2-methyl-, hydrochloride (CAS Number 3165-93-3); or benzenamine, 2-chloro-6-methyl- (CAS Number 87-63-8) for any use. In the codified section of that document, the CAS Number for the chemical substance benzenamine, 2-chloro-6-methyl was incorrectly listed. This document corrects the typographical error that appeared in § 721.462(a)(1).

Dated: April 17, 1989.

Charles L. Elkins,

Director, Office of Toxic Substances.

Therefore, 40 CFR Part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for Part 721 continues to read as follows:

Authority: 15 U.S.C. 2604 and 2607.

§ 721.462 [Amended]

2. In § 721.462(a)(1) by correcting the "CAS Number 87-63-6" to read "CAS Number 87-63-8".

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6724

[AK-932-09-4214-10; AA-6047]

Partial Revocation of Powersite Classification No. 443 for Selection of Land by the State of Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes Powersite Classification No. 443 of February 13, 1958, insofar as it effects approximately 1,800 acres at Caribou Creek. The land is no longer needed for the purpose for which it was withdrawn. This action will open the land for selection by the State of Alaska, if such land is otherwise available. If not selected by the State, the land will be subject to the terms and conditions of Public Land Order Nos. 5180 and 5186, both as amended. By virtue of overlapping withdrawals, the land has been and remains closed to surface entry, nonmetalliferous mining, and mineral leasing, but has been and remains open to metalliferous mining.

EFFECTIVE DATE: April 25, 1989.

FOR FURTHER INFORMATION CONTACT: Sandra C. Thomas, BLM Alaska State Office, 222 West Seventh Street, No. 13, Anchorage, Alaska 99513-7599, 907-271-3342.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and by section 17(d)(1) of the Alaska Native Claims Settlement Act, 85 Stat. 708 and 709; 43 U.S.C. 1616(d)(1), it is ordered as follows:

1. Powersite Classification No. 443 is hereby revoked insofar as it affects the following described land:

Seward Meridian

Located within Tps. 20 and 21 N., R. 10 E., partially surveyed, and more particularly described as:

Beginning at a point on Caribou Creek approximately 4½ miles upstream from highway bridge on Glenn Highway, longitude 147°39'03" W., latitude 61°50'13" N. All lands upstream from this point below the 2,500 foot contour.

The area described contains approximately 1,800 acres.

2. Subject to valid existing rights, the land described above is hereby opened to selection by the State of Alaska under either the Alaska Statehood Act, 72 Stat. 339, *et seq.*; 48 U.S.C. prec. 21, or section 906(b) of the Alaska National Interest Lands Convervation Act, 94 Stat. 2371, 2437-2438; 43 U.S.C. 1635.

3. As provided by section 6(g) of the Alaska Statehood Act, the State of Alaska is provided a preference right of selection for the land described above, for a period of ninety-one (91) days from the date of publication of this order, if the land is otherwise available. Any of the land described herein that is not selected by the State of Alaska will be subject to the terms and conditions of Public Land Order Nos. 5180 and 5186, both as amended, and any other withdrawal of record.

Earl Gjelde,

Under Secretary of the Interior.

April 18, 1989.

43 CFR Public Land Order 6725

[CO-930-09-4214-10; C-39289]

Withdrawal of Public Land for Cheney Reservoir Disposal Site; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 340 acres of public land from surface entry and mining for 5 years as requested by the Department of Energy to preserve and protect the Cheney Reservoir Disposal Site. The lands have been and continue to be open to mineral leasing.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215, 303-236-1768.

VOL 54 ISS 78 AP 25 1989 UMI

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public lands are hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C. Ch. 2), to protect and preserve the Cheney Reservoir Disposal Site;

Ute Principal Meridian

T. 3 S., R. 2 E.,
Sec. 11, E½SE¼SW¼, S½SE¼;
Sec. 12, W½SW¼SW¼;
Sec. 13, W½NW¼SW¼;
Sec. 14, NE¼, E½E½NW¼.

The area described aggregates 340 acres of public land in Mesa County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws. This order does not transfer jurisdiction of this land from Department of the Interior to any other agency of the Federal Government.

3. This withdrawal will expire 5 years from the effective date of this order unless as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

Earl Gjelde,
Under Secretary of the Interior.

[CA-940-09-4214-10; CACA-19057]

Partial Revocation of Executive Order Dated July 2, 1910; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes an Executive order insofar as it affects 45.93 acres of public land withdrawn for Powersite Reserve No. 85. The land is no longer needed for the purpose for which it was withdrawn. This action will open the land to surface entry to permit consummation of a proposed land exchange. The land has been and will remain open to mining and mineral leasing.

EFFECTIVE DATE: May 25, 1989.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, 2800 Cottage Way, Sacramento, California 95825, 916-978-4815.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Executive Order dated July 2, 1910, which withdrew public land for Powersite Reserve No. 85, is hereby revoked insofar as it affects the following described land:

Mount Diablo Meridian

T. 36 N., R. 6 E.,
Sec. 3, lot 3.

The area described contains 45.93 acres in Lassen County.

2. At 10 a.m. on May 25, 1989, the land will be opened to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on May 29, 1989, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The land remains open to the mining and mineral leasing laws.

Modification of Public Land Order No. 5150, as Amended; Classification and Opening of Land, Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order modifies a public land order insofar as it affects 25.86 acres of public land withdrawn for a utility and transportation corridor. The land is located within the community of Wiseman, Alaska. This order also classifies the land as suitable for and opens the land to disposal by sale; however, this order does not otherwise change the provisions or limitations of Public Land Order Nos. 5150 and 5180, as amended, or other withdrawals of record.

EFFECTIVE DATE: May 25, 1989.

FOR FURTHER INFORMATION CONTACT: Sandra C. Thomas, BLM Alaska State Office, 222 West Seventh Avenue, No. 13, Anchorage, Alaska 99513-7599, 907-271-3342.

By virtue of the authority vested in the Secretary of the Interior by section 17(d)(1) and section 22(h)(4) of the Alaska Native Claims Settlement Act, 85 Stat. 708 and 709, and 714; 43 U.S.C. 1616(d)(1) and 1621(h)(4), it is ordered as follows:

1. Public Land Order No. 5150, as amended, which withdrew public land for a utility and transportation corridor, is hereby modified to allow for disposal by sale under section 203 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2750; 43 U.S.C. 1713, insofar as it affects the following described land:

Wiseman, Alaska

U.S. Survey No. 5276, lots 1 to 17, inclusive, and lots 19 to 26, inclusive.

The area described contains 25.86 acres.

2. Subject to valid existing rights, the land described above is hereby classified, pursuant to section 17(d)(1) of the Alaska Native Claims Settlement Act, as suitable for sale under section 203 of the Federal Land Policy and Management Act of 1976.

3. At 10 a.m. on May 25, 1989, the land described above will be opened to disposal by sale under section 203 of the Federal Land Policy and Management Act of 1976.

4. This order does not change any provisions or limitations of Public Land Order Nos. 5150 and 5180, as amended, or any other withdrawals of record except as expressly provided above.

Partial Revocation of Public Land Order No. 725; South Dakota

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes Public Land Order No. 725 insofar as it affects 100 acres of National Forest System land used for the Dark Canyon Administrative Site. The land is no longer needed for an administrative site. This action is needed to permit an exchange. The land will be opened to such forms of disposition as may by law be made of National Forest System land and to mining. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: May 25, 1989.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406-657-6090.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 725 which withdrew National Forest System land for the Forest Service's Dark Canyon Administrative Site is hereby revoked insofar as it affects the following described land:

Black Hills, Meridian

T. 1 N., R. 6 E.,
Sec. 13, NW¼ NE¼, NE¼ NW¼ and E½ NW¼ NW¼.

The area described contains 100 acres in Pennington County.

At 9 a.m. on May 25, 1989, the land shall be opened to such forms of disposition as may by law be made of National Forest System land, including location and entry under the United States mining laws. Appropriation of lands described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Modification of Secretarial Order Dated July 10, 1908, as Amended; Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order modifies Secretarial Order of July 10, 1908, insofar as it affects 6.09 acres of public land withdrawn for use by the United States Forest Service as a part of the Sedona Administrative Site. This 6.09 acres has been identified for disposal by exchange, pursuant to the General Exchange Act of March 20, 1922, as amended and supplemented, and section 206 of the Federal Land Policy and Management Act. The land described below will be opened to disposal by exchange but will remain closed to all other forms of surface entry and mining. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: May 25, 1989.

FOR FURTHER INFORMATION CONTACT: John Mezes, BLM Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, (602) 241-5531.

By virtue of the authority vested in the Secretary of the Interior by section 204(a) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, *it is ordered as follows:*

1. The Secretarial Order dated July 10, 1908, which withdrew public land for the United States Forest Service's Sedona Administrative site is hereby modified to allow for the disposal by exchange pursuant to the General Exchange Act of March 20, 1922, and section 206 of the Federal Land Policy and Management Act, 90 Stat. 2756; 43 U.S.C. 1716. The affected land is described as follows:

Gila and Salt River Meridian

T. 17 N., R. 6 E.,
Sec. 7, NE¼SW¼SW¼SE¼, NW¼SE¼ SW¼SE¼, W½W½NE¼SE¼SW¼ SE¼ NW¼NW¼SE¼SE¼SW¼SE¼, N½NE¼SW¼SE¼SW¼SE¼.

The area described contains 6.09 acres in Coconino County.

2. At 9:00 a.m. on May 25, 1989, the land described in paragraph 1 will be opened to such forms of exchange as may by law be made of National Forest System land, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. The land will remain closed to mining entry. The land has been and will remain open to mineral leasing.

April 18, 1989.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[DA 89-312]

Recognizing Certain Radio Astronomy Observatories in the 1350-1400 MHz Band

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: By this action the Commission is amending § 2.106, 47 CFR Part 2 by adding a new United States footnote to recognize specific radio astronomy observatories in the 1350-1400 MHz band. This footnote will urge Government administrations to exercise caution when making new assignments that may affect astronomy observations.

EFFECTIVE DATE: April 25, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Damon C. Ladson, Frequency Allocations Branch, Office of Engineering and Technology, (202) 653-8106.

SUPPLEMENTARY INFORMATION: This is a summary of the commission's order, DA 89-312, adopted March 3, 1989, and released April 12, 1989.

The full text of the Commission decisions available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street Northwest, Suite 140, Washington, DC 20037.

Summary Of Order

1. The Commission is amending § 2.106, 47 CFR Part 2, by adding a new United States footnote to recognize certain radio astronomy observatories operating in the 1350-1400 MHz band. This band is allocated to the Government radiolocation service on a primary basis and Government fixed and mobile services on a secondary basis. There is no non-Government allocation in this band.

2. The new footnote, US311, will urge Government administrations to exercise caution when making assignments in this band that may affect radio astronomy observatories. The footnote also lists radio astronomy observatories that may be affected. No other non-

VOL 54 ISS 78 AP 25 1989 UMI

Government entities are affected by the new footnote.

Federal Communications Commission.

BILLING CODE 6712-01-M

47 CFR Parts 2 and 15

[GEN Docket No. 87-389, FCC 89-103]

Operation of Radio Frequency Devices Without an Individual License

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document adopts a comprehensive revision of the technical and administrative provisions for the operation of a Part 15, non-licensed radio frequency device. This item standardizes the emission limitations between various devices and establishes a number of general usage frequency bands. These standards are designed to minimize the potential that Part 15 devices will cause interference to the authorized radio services. Further, these standards will permit the manufacture of many new types of devices that can be operated without obtaining a license from the Commission.

EFFECTIVE DATE: June 23, 1989.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: John A. Reed, Technical Standards Branch, Office of Engineering and Technology, (202) 653–7313.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order* in Gen. Docket No. 87–389, FCC 89–103, Adopted March 30, 1989, and Released April 18, 1989.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

The public reporting burden for these collections of information is estimated to vary from 2.5 to 30 hours per response, with an average of 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. Send comments regarding this burden estimate or any other aspect of these collections of information, including suggestions for reducing the burden, to the Federal Communications Commission, Office of Managing Director, Washington, DC 20554, and to the Office of Management and Budget, Paperwork Reduction Project (3060–0329; 3060–0397; 3060–0398), Washington, DC 20503.

Summary of the Report and Order

1. The Commission has permitted the non-licensed operation of certain types of radio frequency (RF) devices, such as receivers and low power transmitters, for approximately 50 years. The regulations governing such devices are set forth in Part 15 of the rules and are designed in such a manner as to reduce the probability of interference being caused to the authorized radio services. The original regulations were based on a general field strength limit. As devices were designed to operate at higher frequencies, this standard was found to be too restrictive. Since that time, the Commission has adopted numerous amendments to the Part 15 rules to enable the operation of specific new types of devices in response to petitions for rule making. This ad hoc approach of adopting device-specific regulations has resulted in a number of inconsistencies and inequities in the technical standards, generally as a result of the timing of the petitions. Because the rules now require compliance with specific definitional and operational restrictions, they no longer provide the flexibility they were originally intended to provide. In addition, the standards need to protect against interference have changed over the years due to improvements in the sensitivity of equipment used in the licensed services, the increased proliferation of licensed and non-licensed operations, and changes in frequency allocations.

2. The Part 15 regulatory plan being adopted in this Report and Order is designed to restore the technical flexibility originally envisioned for the operation of non-licensed devices, enabling manufacturers to market new RF devices without waiting for the conclusion of rule making considering the interference potential of the devices. We expect the new rules to encourage the development of significant numbers of new types of low power RF systems and devices to meet the strong consumer demand for this type of equipment.

3. To the extent possible, we have eliminated all unnecessary and overly restrictive regulations by adopting minimal standards on operational frequencies, bandwidth, modulation techniques and other parameters. We also have carefully considered the concerns of commenting parties who argue that expanded operation of Part 15 devices could lead to increases in the level of background RF "noise" that tends to cause interference to authorized services that depend on reception of very low level signals. In some instances, the decision to permit greater flexibility required a further reduction in the levels of unwanted emissions. In a few instances, we have taken this opportunity to adopt more restrictive standards on the permitted levels of unwanted emissions in order to provide a "cleaner" RF environment. However, we have provided a liberal transition period, permitting the continued manufacture and importation of equipment under the former regulations for five years for most RF devices. Receivers may be manufactured and imported under the former regulations for ten years unless the receiver is associated with a transmitter that could not have been authorized under the former regulations.

4. The following is a brief summary of some of the more substantial changes to the regulations:

—With certain exemptions, radiated field strength limits below 1000 MHz are specified using measurement instrumentation with a CISPR quasi-peak detector; radiated emission limits above 1000 MHz are specified using measurement instrumentation with an average detector; and, in those instances where use of average detectors are permitted, a limit on peak emissions corresponding to 20 dB above the maximum permitted average emission level is specified;

–A power line conducted limit of 250 uV in the frequency range of 450 kHz to 30 MHz, as measured with a 50 ohm/50 uH LISN and a CISPR quasi-peak detector, is adopted for all devices except carrier current systems operating within that frequency band and Class A digital devices;

–Receivers operating within the frequency ranges of 901–935 MHz and 940–960 MHz will be subject to the regulations; further, the frequency range over which emissions from the receivers must be measured is expanded for some devices and reduced for others;

–The emission limits for unintentional radiators, e.g. receivers, are reduced to the emission limits currently applied to Class B computing devices for the frequency range of 30 to 960 MHz and to 500 uV/m at 3 meters for frequencies above 960 MHz;

–New general operation bands are established at 13.553–13.567 MHz, 26.96–27.28 MHz, 40.66–40.70 MHz, 902–928 MHz, 2400–2483.5 MHz, 5725–5875 MHz, and 24.0–24.25 GHz; and,

–The emission limits for intentional radiators, i.e. transmitters, operating under the general provisions are as follows:

Band of operation (MHz)	Emission limit (μV/m)	Measurement distance (meters)
0.009–0.490	2400/F (in kHz)	300
0.490–1.705	24000/F (in kHz)	30
1.705–30	30	30
30–88	100[1]	3
88–216	150[1]	3
216–960	200[1]	3
Above 960	500	3

[1] NOTE: Except for non-residential perimeter protection systems operating in the bands 54–72 MHz or 76–88 MHz, operation under the general limits in the television broadcast bands is not permitted.

5. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, this proceeding will have a significant economic impact on a number of small entities. By providing the regulatory flexibility needed to permit general operation frequency bands, this action is expected to foster an effective competitive marketplace in the area of low power telecommunications, providing small entities, the opportunity to develop systems that were not previously permitted under the regulations. Some standards regarding spurious and other undesired emissions from receivers and certain transmitters are tightened. The manufacturers of certain transmitters also may be impacted by the addition of restricted frequency bands. The rules as herein amended will continue to provide for marketing of radio frequency equipment subject to the Commission's equipment authorization procedures.

6. Accordingly, *it is ordered* That under the authority contained in Sections 4(i), 301, 302, 303(e), 303(f), 303(r), 303(s), 304 and 307 of the Communications Action of 1934, as amended, Parts 2 and 15 of the Commission's Rules and Regulations are amended as set forth below. These rules and regulations are effective June 23, 1989.

List of Subjects

47 CFR Part 2

Communications equipment, Imports; Radio, Reporting and recordkeeping requirements, Television.

47 CFR Part 15

Communications equipment, Computer technology, Labeling, Radio, Reporting and recordkeeping requirements, Security measures, Telephone, Wiretapping, Electronic surveillance

Rule Changes

A. Title 47 of the Code of Federal Regulations, Part 2, is amended as follows:

PART 2—[AMENDED]

1. The authority citation for Part 2 continues to read as follows:

Authority: Sec. 4, 302, 303, and 307 of the Communications Act of 1934, as amended, 47 U.S.C. 154, 302, 303, and 307, unless otherwise noted.

2. Section 2.801 is amended by revising paragraph (b) to read as follows:

§ 2.801 Radiofrequency device defined.

• • • • • •

(b) The incidental, unintentional and intentional radiators defined in Part 15 of this chapter.

• • • • • •

3. Section 2.805 is revised to read as follows:

§ 2.805 Equipment that does not require Commission approval.

In the case of a radiofrequency device that, in accordance with the rules in this chapter, does not have to have a grant of equipment authorization issued by the Commission, e.g., a device subject to verification, but, nevertheless, must comply with specified technical standards prior to use, no person shall sell or lease, or offer for sale or lease (including advertising for sale or lease), or import, ship or distribute for the purposes of selling or leasing or offering for sale or lease, any such

VOL
54
ISS
78
AP
25
1989
UMI

radiofrequency device unless, prior thereto, such device complies with the applicable administrative and technical provisions (including verification of the equipment, where required) specified in the Commission's rules.

4. Section 2.806 is revised in its entirety to read as follows:

§ 2.806 Exemption for a digital device.

(a) Notwithstanding the provisions in § 2.803, the announcement and offer for sale of a digital device, subject to verification under the provisions in Part 15 of this chapter, that is in the conceptual, developmental, design or preproduction stage is permitted prior to verification of compliance *Provided* the prospective buyer is advised in writing at the time of announcement or offer for sale that such equipment is subject to the FCC rules and that such equipment shall comply with the appropriate FCC rules before final delivery to the buyer or to centers of distribution.

(b) Parties responsible for verification of Class A digital devices, as defined in Part 15 of this chapter, shall have the option of ensuring compliance with the applicable technical specifications of this chapter at each end user's location after installation, provided that the purchase or lease agreement includes a proviso that such a determination of compliance be made and is the responsibility of the party responsible for verification of the equipment.

(c) A digital device subject to the provisions of this chapter may be operated prior to a determination of compliance under the following conditions:

(1) Any digital device may be operated for the purpose of compliance testing.

(2) Any digital device may be operated for the purpose of demonstration at a trade show provided there is displayed a conspicuous notice that the device has not been tested for compliance. If a digital device subject to verification is offered for sale or lease at the show, the provisions of § 2.806(a) shall apply. A digital device subject to a grant of equipment authorization from the Commission may not be offered for sale or lease prior to issuance of the grant of authorization by the FCC, but may be advertised or displayed as provided by § 2.803.

(3) Any digital device may be operated at the manufacturer's facilities during developmental, design or preproduction states for evaluation of product performance and determination of customer acceptability.

(4) Where customer acceptability of a Class A digital device cannot be determined at the manufacturer's facilities because of size or unique capability of the device, that device may be operated at the user's site during development, design or preproduction stages for evaluation of product performance and determination of customer acceptability.

(5) For the purpose of paragraphs (c)(3) and (c)(4) of this section, the manufacturer's facilities are considered to include the facilities of the party responsible for compliance with the regulations, the manufacturer, and other entities working under the authorization of the responsible party in connection with the development and manufacture, but not marketing, of the equipment.

§ 2.909 [Redesignated as § 2.911]

5. Section 2.909 is redesignated as § 2.911.

§ 2.910 [Redesignated as § 2.913]

6. Section 2.910 is redesignated as § 2.913.

7. A new § 2.909 is added before the heading "Application Procedures for Equipment Authorizations", to read as follows:

§ 2.909 Responsible party.

The following parties are responsible for the compliance of radiofrequency equipment with the applicable technical standards after a grant of equipment authorization is issued by the Commission or the equipment is verified:

(a) In the case of equipment which requires the issuance by the Commission of a grant of equipment authorization, the party to whom that grant of authorization is issued (the grantee).

(b) In the case of equipment subject to authorization under the verification procedure, the manufacturer or, in the case of imported equipment, the importer.

8. A new § 2.948 is added to read as follows:

§ 2.948 Description of measurement facilities.

(a) Each party making measurements of equipment that is subject to an equipment authorization under Part 15 or Part 18 of this chapter, regardless of whether the measurements are filed with the Commission or kept on file by the party responsible for compliance of equipment marketed within the U.S. or its possessions, shall compile a description of the measurement facilities employed.

(1) If the measured equipment is subject to the verification procedure, the description of the measurement facilities shall be retained by the party responsible for verification of the equipment.

(i) If the equipment is verified through measurements performed by an independent laboratory, it is acceptable for the party responsible for verification of the equipment to rely upon the description of the measurement facilities retained by or placed on file with the Commission by that laboratory. In this situation, the party responsible for verification of the equipment is not required to retain a duplicate copy of the description of the measurement facilities.

(ii) If the equipment is verified based on measurements performed at the installation site of the equipment, no specific site calibration data is required. It is acceptable to retain the description of the measurement facilities at the site at which the measurements were performed.

(2) If the equipment is to be authorized by the Commission under the certification or the notification procedure, the description of the measurement facilities shall be filed with the Commission's Laboratory in Columbia, Maryland. The data describing the measurement facilities need only be filed once but must be updated as changes are made to the measurement facilities or as otherwise described in this Section. At least every three years, the organization responsible for filing the data with the Commission shall certify that the data on file is current.

(b) The description shall contain the following information:

(1) Location of the test site.

(2) Physical description of the test site accompanied by photographs 8" x 10" in size. Smaller photographs may be used if they clearly show the details of the test site and are mounted on full size sheets of paper.

(3) A drawing showing the dimensions of the site, physical layout of all supporting structures, and all structures within 5 times the distance between the measuring antenna and the device being measured.

(4) Description of structures used to support the device being measured and the test instrumentation.

(5) List of measuring equipment used.

(6) Information concerning the calibration of the measuring equipment, i.e., the date the equipment was last calibrated and how often the equipment is calibrated.

(7) If desired, a statement as to whether the test site is available to do measurement services for the public on a fee basis.

(8) A plot of site attenuation data taken pursuant to FCC Bulletin OET 55 using a tuned dipole antenna (this provision does not apply to equipment that is not measured on an open field test site).

(9) A description of the types of equipment intended to be measured or other information regarding the types of measurements that would be performed at the test facility.

(c) The Commission will publish a list of those parties who have filed the information required by this section, provided they indicate that they wish to perform measurement services for the public on a fee basis. However, it should be noted that the Commission does not endorse or approve any facility on this list.

9. Section 2.955 is amended by adding new paragraphs (a)(3) and (a)(4) to read as follows:

§ 2.955 Retention of records.

(a) * * *

(3) A record of the measurements made on an appropriate test site that demonstrates compliance with the applicable regulations. The record shall identify the measurement procedure that was used and shall include all the data required to show compliance with the appropriate regulations.

(4) For equipment subject to the provisions in Part 15 of this chapter, the records shall indicate if the equipment was verified pursuant to the transition provisions contained in § 15.37 of this chapter.

* * * * *

10. Section 2.975 is amended by revising paragraph (a)(5) and by adding new paragraphs (a)(7), (f) and (g) to read as follows:

§ 2.975 Application for notification.

(a) * * *

(5) For devices operated under the provisions of Part 15 of this chapter, photographs showing the general appearance and the controls available to the user. Photographs should be 8 by 10 inches in size. Smaller photographs may be submitted provided they are sharp and clear, show the necessary detail, and are mounted on paper between 8 by 10½ inches and 8½ by 11 inches. Line sketches may be submitted in lieu of photographs provided those sketches are sufficiently detailed to allow identification of the equipment. For devices operated under the provisions of any other part and where it is specifically required under the rule section(s) under which the device is to be operated, photographs of the equipment of sufficient clarity to reveal its external appearances and size, both front and back;

* * * * *

(7) For equipment subject to the provisions of Part 15 of this chapter, the application shall indicate if the equipment is being authorized pursuant to the transition provisions in § 15.37 of this chapter.

* * * * *

(f) For a composite system that incorporates only devices subject to certification, verification and/or notification and that are contained in a single enclosure, a separate application, FCC Form 731, with the appropriate fee shall be submitted for each type of device within the enclosure. At the option of the applicant, a single FCC identifier may be requested for that system. Fees are based on the number of devices and types of authorizations.

(g) The records of measurement data, measurement procedures, photographs, circuit diagrams, etc. for the device to which the application applies shall be retained for two years after the manufacture of said equipment has been permanently discontinued, or until the conclusion of an investigation or proceeding if the holder of the grant of equipment authorization is officially notified that an investigation or any other administrative proceeding involving the equipment has been instituted.

11. Section 2.1033 is amended by revising paragraphs (b) and (c) to read as follows:

§ 2.1033 Application for certification.

* * * * *

(b) The application shall be accompanied by a technical report containing the following information:

(1) The full name and mailing address of the manufacturer of the device and the applicant for certification.

(2) FCC identifier.

(3) A copy of the installation and operating instructions to be furnished the user. A draft copy of the instructions may be submitted if the actual document is not available. The actual document shall be furnished to the FCC when it becomes available.

(4) A brief description of the circuit functions of the device along with a statement describing how the device operates. This statement should contain a description of the ground system and antenna, if any, used with the device.

(5) A block diagram showing the frequency of all oscillators in the device. The signal path and frequency shall be indicated at each block. The tuning range(s) and intermediate frequency(ies) shall be indicated at each block. A schematic diagram also is required for intentional radiators.

(6) A report of measurements of radiated and conducted emissions. This shall identify the test procedure used (e.g., indicate the FCC test procedure used or, if an alternate test procedure was used, a description of the test procedure and the reason it was necessary to use an alternate procedure), the date the measurements were made, the location where the measurements were made, and the device tested (model and serial number, if available). It shall also include a sample calculation showing how the obtained measurements were converted to the levels specified in the applicable rule sections.

(7) A sufficient number of photographs to clearly show the exterior appearance, the construction, the component placement on the chassis, and the chassis assembly. The exterior views shall show the overall appearance, the antenna used with the device (if any), the controls available to the user, and the required identification label in sufficient detail so that the name and FCC identifier can be read. In lieu of a photograph of the label, a sample label (or facsimile thereof) may be submitted together with a sketch showing where this label will be placed on the equipment. Photographs shall be 8 by 10 inches in size. Smaller photographs may be submitted provided they are sharp and clear, show the necessary detail, and are mounted on paper between 8 by 10½ inches and 8½ by 11 inches in size. A sample label or facsimile together with the sketch showing the placement of this label shall be on the same size paper.

(8) If the equipment for which certification is being sought must be tested with peripheral or accessory devices connected or installed, a brief description of those peripherals or accessories. The peripheral or accessory devices shall be unmodified, commercially available equipment.

(9) For equipment subject to the provisions of Part 15 of this chapter, the application shall indicate if the equipment is being authorized pursuant to the transition provisions in § 15.37 of this chapter.

(10) For a device used in decoding the Emergency Broadcast System Attention Signal, as defined in § 73.906 of this chapter, the value of the necessary voltage (RMS) or range of voltages of the attention signal to be applied to the input terminals of the decoder which will cause the desired-response of the device. In the event that input signals other than the attention signal

VOL 54 ISS 78 APR 25 1989 UMI

(excluding signals which in combination form the attention signal), including signals outside this voltage range, will cause false responses by the device, a description of such signals and their input voltage levels that cause such false responses shall be specified in the application and appropriate warnings shall be included in the instructions furnished to the user. The susceptibility of the device to false responses and any lack of reliability in responding to the attention signal at input levels within the rated voltage range may be regarded by the Commission as cause to deny certification.

(c) For a composite system that incorporates only devices subject to certification, verification and/or notification and that are contained in a single enclosure, a separate application, FCC Form 731, shall be submitted with the appropriate fee for each type of device within the enclosure. At the option of the applicant, a single FCC identifier may be requested for that system. Fees are based on the number of devices and types of authorizations.

12. Section 2.1043 is amended by revising paragraphs (a) and (c) and adding a new paragraph (b)(3) to read as follows:

§ 2.1043 Changes in certificated equipment.

(a) Changes to the basic frequency determining and stabilizing circuitry (including clock or data rates), frequency multiplication stages, basic modulator circuit or maximum power or field strength ratings shall not be performed without application for and authorization of a new grant of certification. Variations in electrical or mechanical construction, other than these indicated items, are permitted provided the variations either do not affect the characteristics required to be reported to the Commission or the variations are made in compliance with the other provisions of this section.

(b) * * *

(3) Permissive changes, as detailed above, shall be made only by the holder of the grant of certification. Changes by any party other than the grantee require a new application for and grant of certification.

(c) A grantee desiring to make a change other than a permissive change shall file an application on FCC Form 731 accompanied by the required fees. The grantee shall attach a description of the change(s) to be made and a statement indicating whether the change(s) will be made in all units (including previous production) or will be made only in those units produced after the change is authorized.

* * * * *

13. Section 2.1201 is amended by adding a new paragraph (c) after the Note to read as follows:

§ 2.1201 Purpose.

* * * * *

(c) The provisions of this Subpart shall not apply to musical greeting cards, quartz watches and clocks, modules of quartz watches and clocks, radio frequency devices (including digital devices) whose radio frequency stage has a power consumption not exceeding 6 nW, hand-held calculators and electronic games that do not require connection to the AC power lines, and digital devices in which both the highest frequency generated and the highest frequency used are less than 1.705 MHz and that do not operate from the AC power lines or contain provisions for operation while connected to the AC power lines.

B. Title 47 of the Code of Federal Regulations, Part 15, is amended as follows:

1. Part 15 is revised in its entirety to read as follows:

PART 15—RADIO FREQUENCY DEVICES

Subpart A—General

Sec.
15.1 Scope of this part.
15.3 Definitions.
15.5 General conditions of operation.
15.7 Special temporary authority.
15.9 Prohibition against eavesdropping.
15.11 Cross reference.
15.13 Incidental radiators.
15.15 General technical requirements.
15.17 Susceptibility to interference.
15.19 Labelling requirements.
15.21 Information to user.
15.23 Home-built devices.
15.25 Kits.
15.27 Special accessories.
15.29 Inspection by the Commission.
15.31 Measurement standards.
15.33 Frequency range of radiated measurements.
15.35 Emission limits.
15.37 Transition provisions for compliance with the rules.

Subpart B—Unintentional Radiators

15.101 Equipment authorization of unintentional radiators.
15.103 Exempted devices.
15.105 Information to the user.
15.107 Conducted limits.
15.109 Radiated emission limits.
15.111 Antenna power conduction limits for receivers.
15.113 Power line carrier systems.
15.115 TV interface devices, including cable system terminal devices.
15.117 TV broadcast receivers.

Subpart C—Intentional Radiators

Sec.
15.201 Equipment authorization requirement.
15.203 Antenna requirement.
15.205 Restricted bands of operation.
15.207 Conducted limits.
15.209 Radiated emission limits, general requirements.
15.211 Tunnel radio systems.
15.213 Cable locating equipment.

Radiated Emission Limits, Additional Provisions

15.215 Additional provisions to the general radiated emission limitations.
15.217 Operation in the band 160–190 kHz.
15.219 Operation in the band 510–1705 kHz.
15.221 Operation in the band 525–1705 kHz.
15.223 Operation in the band 1.705–10 MHz.
15.225 Operation within the band 13.553–13.567 MHz.
15.227 Operation within the band 26.96–27.28 MHz.
15.229 Operation within the band 40.66–40.70 MHz.
15.231 Periodic operation in the band 40.66–40.70 MHz and above 70 MHz.
15.233 Operation within the bands 46.60–46.98 MHz and 49.66–50.0 MHz.
15.235 Operation within the band 49.82–49.90 MHz.
15.237 Operation in the bands 72.0–73.0 MHz and 75.4–76.0 MHz.
15.239 Operation in the band 88–108 MHz.
15.241 Operation in the band 174–216 MHz.
15.243 Operation in the band 890–940 MHz.
15.245 Operation within the bands 902–928 MHz, 2435–2465 MHz, 5785–5815 MHz, 10500–10550 MHz, and 24075–24175 MHz.
15.247 Operation within the bands 902–928 MHz, 2400–2483.5 MHz, and 5725–5850 MHz.
15.249 Operation within the bands 902–928 MHz, 2400–2483.5 MHz, 5725–5875 MHz, and 24.0–24.25 GHz.
15.251 Operation within the bands 2.9–3.26 GHz, 3.267–3.332 GHz, 3.339–3.3458 GHz, and 3.358–3.8 GHz.

Authority: Sec. 4, 302, 303, 304, and 307 of the Communications Act of 1934, as amended, 47 U.S.C. 154, 302, 303, 304, and 307.

Subpart A—General

§ 15.1 Scope of this part.

(a) This part sets out the regulations under which an intentional, unintentional, or incidental radiator may be operated without an individual license. It also contains the technical specifications, administrative requirements and other conditions relating to the marketing of Part 15 devices.

(b) The operation of an intentional or unintentional radiator that is not in accordance with the regulations in this part must be licensed pursuant to the provisions of section 301 of the Communications Act of 1934, as amended, unless otherwise exempted from the licensing requirements elsewhere in this chapter.

(c) Unless specifically exempted, the operation or marketing of an intentional or unintentional radiator that is not in compliance with the administrative and technical provisions in this part, including prior Commission authorization or verification, as appropriate, is prohibited under section 302 of the Communications Act of 1934, as amended, and Subpart I of Part 2 of this chapter. The equipment authorization and verification procedures are detailed in Subpart J of Part 2 of this chapter.

§ 15.3 Definitions.

(a) *Auditory assistance device.* An intentional radiator used to provide auditory assistance to a handicapped person or persons. Such a device may be used for auricular training in an education institution, for auditory assistance at places of public gatherings, such as a church, theater, or auditorium, and for auditory assistance to handicapped individuals, only, in other locations.

(b) *Biomedical telemetry device.* An intentional radiator used to transmit measurements of either human or animal biomedical phenomena to a receiver.

(c) *Cable input selector switch.* A transfer switch that is intended as a means to alternate between the reception of broadcast signals via connection to an antenna and the reception of cable television service.

(d) *Cable locating equipment.* An intentional radiator used intermittently by trained operators to locate buried cables, lines, pipes, and similar structures or elements. Operation entails coupling a radio frequency signal onto the cable, pipes, etc. and using a receiver to detect the location of that structure or element.

(e) *Cable system terminal device (CSTD).* A TV interface device that serves, as its primary function, to connect a cable system operated under Part 76 of this chapter to a TV broadcast receiver or other subscriber premise equipment. Any device which functions as a CSTD in one of its operating modes must comply with the technical requirements for such devices when operating in that mode.

(f) *Carrier current system.* A system that transmits radio frequency energy by conduction over the electric power lines. A carrier current system can be designed such that the signals are received by conduction directly from connection to the electric power lines (unintentional radiator) or the signals are received over-the-air due to radiation of the radio frequency signals from the electric power lines (intentional radiator).

(g) *CB receiver.* Any receiver that operates in the Personal Radio Services on frequencies allocated for Citizens Band (CB) Radio Service stations, as well as any receiver provided with a separate band specifically designed to receive the transmissions of CB stations in the Personal Radio Services. This includes the following: (1) A CB receiver sold as a separate unit of equipment; (2) the receiver section of a CB transceiver; (3) a converter to be used with any receiver for the purpose of receiving CB transmissions; and, (4) a multiband receiver that includes a band labelled "CB" or "11-meter" in which such band can be separately selected, except that an Amateur Radio Service receiver that was manufactured prior to January 1, 1960, and which includes an 11-meter band shall not be considered to be a CB receiver.

(h) *Class A digital device.* A digital device that is marketed for use in a commercial, industrial or business environment, exclusive of a device which is marketed for use by the general public or is intended to be used in the home.

(i) *Class B digital device.* A digital device that is marketed for use in a residential environment notwithstanding use in commercial, business and industrial environments. Examples of such devices include, but are not limited to, personal computers, calculators, and similar electronic devices that are marketed for use by the general public.

Note: The responsible party may also qualify a device intended to be marketed in a commercial, business or industrial environment as a Class B device, and in fact is encouraged to do so, provided the device complies with the technical specifications for a Class B digital device. In the event that a particular type of device has been found to repeatedly cause harmful interference to radio communications, the Commission may classify such a digital device as a Class B digital device, regardless of its intended use.

(j) *Cordless telephone system.* A system consisting of two transceivers, one a base station that connects to the public switched telephone network and the other a mobile handset unit that communicates directly with the base station. Transmissions from the mobile unit are received by the base station and then placed on the public switched telephone network. Information received from the switched telephone network is transmitted by the base station to the mobile unit.

Note: The Domestic Public Cellular Radio Telecommunications Service is considered to be part of the switched telephone network. In addition, intercom and paging operations are permitted provided these are not intended to be the primary modes of operation.

(k) *Digital device.* (Previously defined as a computing device). An unintentional radiator (device or system) that generates and uses timing signals or pulses at a rate in excess of 9,000 pulses (cycles) per second and uses digital techniques; inclusive of telephone equipment that uses digital techniques or any device or system that generates and uses radio frequency energy for the purpose of performing data processing functions, such as electronic computations, operations, transformations, recording, filing, sorting, storage, retrieval, or transfer. A radio frequency device that is specifically subject to an emanation requirement in any other FCC Rule part or an intentional radiator subject to Subpart C of this part that contains a digital device is not subject to the standards for digital devices, provided the digital device is used only to enable operation of the radio frequency device and the digital device does not control additional functions or capabilities.

Note: Computer terminals and peripherals that are intended to be connected to a computer are digital devices.

(l) *Field disturbance sensor.* A device that establishes a radio frequency field in its vicinity and detects changes in that field resulting from the movement of persons or objects within its range.

(m) *Harmful interference.* Any emission, radiation or induction that endangers the functioning of a radio navigation service or of other safety services or seriously degrades, obstructs or repeatedly interrupts a radiocommunications service operating in accordance with this chapter.

(n) *Incidental radiator.* A device that generates radio frequency energy during the course of its operation although the device is not intentionally designed to generate or emit radio frequency energy. Examples of incidental radiators are dc motors, mechanical light switches, etc.

(o) *Intentional radiator.* A device that intentionally generates and emits radio frequency energy by radiation or induction.

(p) *Kit.* Any number of electronic parts, usually provided with a schematic diagram or printed circuit board, which, when assembled in accordance with instructions, results in a device subject to the regulations in this part, even if additional parts of any type are required to complete assembly.

(q) *Perimeter protection system.* A field disturbance sensor that employs leaky cables as the radiating source. These cables are installed in a manner

VOL 54 ISS 78 APR 25 1989 UMI

that allows the system to detect movement within the protected area.

(r) *Peripheral device.* An input/output unit of a system that feeds data into and/or receives data from the central processing unit of a digital device. Peripherals to a digital device include any device that is connected external to the digital device, any device internal to the digital device that connects the digital device to an external device by wire or cable, and any circuit board or card designed for interchangeable mounting, internally or externally, that increases the operating or processing speed of a digital device, e.g., "turbo cards" and "enhancement boards". Examples of peripheral devices include terminals, printers, external floppy disk drives and other data storage devices, video monitors, keyboards, control cards, interface boards, external memory expansion cards and other input/output devices that may or may not contain digital circuitry. However, an internal device that contains the central processing unit of a digital device is not a peripheral even though such a device may connect to an external keyboard or other components.

(s) *Personal computer.* An electronic computer that is marketed for use in the home, notwithstanding business applications. Such computers are considered Class B digital devices. Computers which use a standard TV receiver as a display device or meet all of the following conditions are considered examples of personal computers:

(1) Marketed through a retail outlet or direct mail order catalog.

(2) Notices of sale or advertisements are distributed or directed to the general public or hobbyist users rather than restricted to commercial users.

(3) Operates on a battery or 120 volt electrical supply.

If the responsible party can demonstrate that because of price or performance the computer is not suitable for residential or hobbyist use, it may request that the computer be considered to fall outside of the scope of this definition for personal computers.

(t) *Power line carrier systems.* An unintentional radiator employed as a carrier current system used by an electric power utility entity on transmission lines for protective relaying, telemetry, etc. for general supervision of the power system. The system operates by the transmission of radio frequency energy by conduction over the electric power transmission lines of the system. The system does not include those electric lines which connect the distribution substation to the customer or house wiring.

(u) *Radio frequency (RF) energy.* Electromagnetic energy at any frequency in the radio spectrum between 9 kHz and 3,000,000 MHz.

(v) *Scanning receiver.* For the purpose of this part, this is a receiver that automatically switches among four or more frequencies in the range of 30 to 960 MHz and which is capable of stopping at and receiving a radio signal detected on a frequency. Receivers designed solely for the reception of the broadcast signals under Part 73 of this chapter or for operation as part of a licensed station are not included in this definition.

(w) *Television (TV) broadcast receiver.* A device designed to receive television pictures that are broadcast simultaneously with sound on the television channels authorized under Part 73 of this chapter.

(x) *Transfer switch.* A device used to alternate between the reception of over-the-air radio frequency signals via connection to an antenna and the reception of radio frequency signals received by any other method, such as from a TV interface device.

(y) *TV interface device.* An unintentional radiator that produces or translates in frequency a radio frequency carrier modulated by a video signal derived from an external or internal signal source, and which feeds the modulated radio frequency energy by conduction to the antenna terminals or other non-baseband input connections of a television broadcast receiver. A TV interface device may include a stand-alone RF modulator, or a composite device consisting of an RF modulator, video source and other components devices. Examples of TV interface devices are video cassette recorders and terminal devices attached to a cable system or used with a Master Antenna (including those used for central distribution video devices in apartment or office buildings).

(z) *Unintentional radiator.* A device that intentionally generates radio frequency energy for use within the device, or that sends radio frequency signals by conduction to associated equipment via connecting wiring, but which is not intended to emit RF energy by radiation or induction.

§ 15.5 General conditions of operation.

(a) Persons operating intentional or unintentional radiators shall not be deemed to have any vested or recognizable right to continued use of any given frequency by virtue of prior registration or certification of equipment, or, for power line carrier systems, on the basis of prior notification of use pursuant to § 90.63(g) of this chapter.

(b) Operation of an intentional, unintentional, or incidental radiator is subject to the conditions that no harmful interference is caused and that interference must be accepted that may be caused by the operation of an authorized radio station, by another intentional or unintentional radiator, by industrial, scientific and medical (ISM) equipment, or by an incidental radiator.

(c) The operator of a radio frequency device shall be required to cease operating the device upon notification by a Commission representative that the device is causing harmful interference. Operation shall not resume until the condition causing the harmful interference has been corrected.

(d) Intentional radiators that produce Class B emissions (damped wave) are prohibited.

§ 15.7 Special temporary authority.

(a) The Commission will, in exceptional situations, consider an individual application for a special temporary authorization to operate an incidental, intentional or unintentional radiation device not conforming to the provisions of this part, where it can be shown that the proposed operation would be in the public interest, that it is for a unique type of station or for a type of operation which is incapable of being established as a regular service, and that the proposed operation can not feasibly be conducted under this part.

(b) No authorization is required in order to perform testing of equipment for determining compliance with these regulations. Except as provided in Subpart I of Part 2 of this chapter, this provision does not permit the providing of equipment to potential users in order to determine customer acceptance of the product or marketing strategy, nor does this provision permit any type of operation other than a determination of compliance with the regulations. During this testing, the provisions of §§ 15.5 and 15.205 apply.

§ 15.9 Prohibition against eavesdropping.

Except for the operations of law enforcement officers conducted under lawful authority, no person shall use, either directly or indirectly, a device operated pursuant to the provisions of this part for the purpose of overhearing or recording the private conversations of others unless such use is authorized by all of the parties engaging in the conversation.

§ 15.11 Cross reference.

The provisions of Subparts A, H, I, J and K of Part 2 apply to intentional and unintentional radiators, in addition to the provisions of this part. Also, a cable system terminal device and a cable input selector switch shall be subject to the relevant provisions of Part 76 of this chapter.

§ 15.13 Incidental radiators.

Manufacturers of these devices shall employ good engineering practices to minimize the risk of harmful interference.

§ 15.15 General technical requirements.

(a) An intentional or unintentional radiator shall be constructed in accordance with good engineering design and manufacturing practice. Emanations from the device shall be suppressed as much as practicable, but in no case shall the emanations exceed the levels specified in these rules.

(b) An intentional or unintentional radiator must be constructed such that the adjustments of any control that is readily accessible by or intended to be accessible to the user will not cause operation of the device in violation of the regulations.

(c) Parties responsible for equipment compliance should note that the limits specified in this part will not prevent harmful interference under all circumstances. Since the operators of Part 15 devices are required to cease operation should harmful interference occur to authorized users of the radio frequency spectrum, the parties responsible for equipment compliance are encouraged to employ the minimum field strength necessary for communications, to provide greater attenuation of unwanted emissions than required by these regulations, and to advise the user as to how to resolve harmful interference problems (for example, see § 15.105(b)).

§ 15.17 Susceptibility to interference.

(a) Parties responsible for equipment compliance are advised to consider the proximity and the high power of non-Government licensed radio stations, such as broadcast, amateur and land mobile stations, and of U.S. Government radio stations when choosing operating frequencies during the design of their equipment so as to reduce the susceptibility for receiving harmful interference. Information on non-Government use of the spectrum can be obtained by consulting the Table of Frequency Allocations in § 2.106 of this chapter.

(b) Information on U.S. Government operations can be obtained by contacting: Director, Spectrum Plans and Policy, National Telecommunications and Information Administration, Department of Commerce, Room 4096, Washington, DC 20230.

§ 15.19 Labelling requirements.

(a) In addition to the requirements in Part 2 of this chapter, a device subject to certification, notification, or verification shall be labelled as follows:

(1) Receivers associated with the operation of a licensed radio service, e.g., FM broadcast under Part 73 of this chapter, land mobile operation under Part 90, etc., shall bear the following statement in a conspicuous location on the device:

This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

(2) A stand-alone cable input selector switch, shall bear the following statement in a conspicuous location on the device:

This device is verified to comply with Part 15 of the FCC Rules for use with cable television service.

(3) All other devices shall bear the following statement in a conspicuous location on the device:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

(b) Where a device is constructed in two or more sections connected by wires and marketed together, the statement specified in this section is required to be affixed only to the main control unit.

(c) When the device is so small or for such use that it is not practicable to place the statement specified in this section on it, the information required by these paragraphs shall be placed in a prominent location in the instruction manual or pamphlet supplied to the user or, alternatively, shall be placed on the container in which the device is marketed. However, the FCC identifier or the unique identifier, as appropriate, must be displayed on the device.

§ 15.21 Information to user.

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.23 Home-built devices.

(a) Equipment authorization is not required for devices that are not marketed, are not constructed from a kit, and are built in quantities of five or less for personal use.

(b) It is recognized that the individual builder of home-built equipment may not possess the means to perform the measurements for determining compliance with the regulations. In this case, the builder is expected to employ good engineering practices to meet the specified technical standards to the greatest extent practicable. The provisions of § 15.5 apply to this equipment.

§ 15.25 Kits.

A TV interface device, including a cable system terminal device, which is marketed as a kit shall comply with the following requirements:

(a) All parts necessary for the assembled device to comply with the technical requirements of this part must be supplied with the kit. No mechanism for adjustment that can cause operation in violation of the requirements of this part shall be made accessible to the builder.

(b) At least two units of the kit shall be assembled in exact accordance with the instructions supplied with the product to be marketed. If all components required to fully complete the kit (other than those specified in paragraph (a) of this section which are needed for compliance with the technical provisions and must be included with the kit) are not normally furnished with the kit, assembly shall be made using the recommended components. The assembled units shall be certified or notified, as appropriate, pursuant to the requirements of this part.

(1) The measurement data required for a TV interface device subject to certification shall be obtained for each of the two units and submitted with an application for certification pursuant to Subpart J of Part 2 of this chapter.

(2) The measurement data required for a TV interface device subject to notification shall be obtained for the units tested and retained on file pursuant to the provisions of Subpart J of Part 2 of this chapter.

(c) A copy of the exact instructions that will be provided for assembly of the device shall be submitted with an application for certification or notification. Those parts which are not normally furnished shall be detailed in the application for equipment authorization.

VOL 54 ISS 78 AP 25 1989 UMI

(d) In lieu of the label required by § 15.19, the following label, along with the label bearing the FCC identifier and other information specified in §§ 2.925 and 2.926, shall be included in the kit with instructions to the builder that it shall be attached to the completed kit:

(Name of Grantee)

(FCC Identifier)

This device can be expected to comply with Part 15 of the FCC Rules provided it is assembled in exact accordance with the instructions provided with this kit. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

(e) For the purpose of this section, circuit boards used as repair parts for the replacement of electrically identical defective circuit boards are not considered to be kits.

§ 15.27 Special accessories.

(a) Equipment marketed to a consumer must be capable of complying with the necessary regulations in the configuration in which the equipment is marketed. Where special accessories, such as shielded cables and/or special connectors, are required to enable an unintentional or intentional radiator to comply with the emission limits in this part, the equipment must be marketed with, i.e., shipped and sold with, those special accessories. However, in lieu of shipping or packaging the special accessories with the unintentional or intentional radiator, the responsible party may employ other methods of ensuring that the special accessories are provided to the consumer, without additional charge, at the time of purchase. Information detailing any alternative method used to supply the special accessories shall be included in the application for a grant of equipment authorization or retained in the verification records, as appropriate. The party responsible for the equipment, as detailed in § 2.909 of this chapter, shall ensure that these special accessories are provided with the equipment. The instruction manual for such devices shall include appropriate instructions on the first page of the text concerned with the installation of the device that these special accessories must be used with the device. It is the responsibility of the user to use the needed special accessories supplied with the equipment.

(b) If a device requiring special accessories is installed by or under the supervision of the party marketing the device, it is the responsibility of that party to install the equipment using the special accessories. For equipment requiring professional installation, it is not necessary for the responsible party to market the special accessories with the equipment. However, the need to use the special accessories must be detailed in the instruction manual, and it is the responsibility of the installer to provide and to install the required accessories.

(c) Accessory items that can be readily obtained from multiple retail outlets are not considered to be special accessories and are not required to be marketed with the equipment. The manual included with the equipment must specify what additional components or accessories are required to be used in order to ensure compliance with this part, and it is the responsibility of the user to provide and use those components and accessories.

(d) The resulting system, including any accessories or components marketed with the equipment, must comply with the regulations.

§ 15.29 Inspection by the Commission.

(a) Any equipment or device subject to the provisions of this part, together with any certificate, notice of registration or any technical data required to be kept on file by the operator, supplier or party responsible for compliance of the device shall be made available for inspection by a Commission representative upon reasonable request.

(b) The owner or operator of a radio frequency device subject to this part shall promptly furnish to the Commission or its representative such information as may be requested concerning the operation of the radio frequency device.

(c) The party responsible for the compliance of any device subject to this part shall promptly furnish to the Commission or its representatives such information as may be requested concerning the operation of the device, including a copy of any measurements made for obtaining an equipment authorization or demonstrating compliance with the regulations.

(d) The Commission, from time to time, may request the party responsible for compliance, including an importer, to submit to the FCC Laboratory in Columbia, Maryland, various equipment to determine that the equipment continues to comply with the applicable standards. Shipping costs to the Commission's Laboratory and return shall be borne by the responsible party. Testing by the Commission will be performed using the measurement procedure(s) that was in effect at the time the equipment was authorized or verified.

§ 15.31 Measurement standards.

(a) The following measurement procedures are used by the Commission to determine compliance with the technical requirements. Copies of these procedures are available from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161 or from the Commission's current duplicating contractor whose name and address are available from the Commission's Consumer Assistance Office.

(1) FCC/OET MP–1: FCC Methods of Measurements for Determining Compliance of Radio Control and Security Alarm Devices and Associated Receivers.

(2) FCC/OET MP–2: Measurement of UHF Noise Figures of TV Receivers.

(3) FCC/OET MP–3: FCC Methods of Measurements of Output Signal Level, Output Terminal Conducted Spurious Emissions, Transfer Switch Characteristics, and Radio Noise Emissions from TV Interface Devices.

(4) FCC/OET MP–4: FCC Procedure for Measuring RF Emissions from Computing Devices.

(5) FCC/OET MP–9: FCC Procedure for Measuring Cable Television Switch Isolation.

(b) All parties making compliance measurements on equipment subject to the requirements of this part are urged to use these measurement procedures. Any party using other procedures should ensure that such other procedures can be relied on to produce measurement results compatible with the FCC measurement procedures. The description of the measurement procedure used in testing the equipment for compliance and a list of the test equipment actually employed shall be made part of an application for certification or included with the data required to be retained by the party responsible for devices subject to notification or verification.

(c) For swept frequency equipment, measurements shall be made with the frequency sweep stopped at those frequencies chosen for the measurements to be reported.

(d) Field strength measurements shall be made, to the extent possible, on an open field site. Test sites other than open field sites may be employed if they are properly calibrated so that the measurement results correspond to what would be obtained from an open field site. In the case of equipment for which measurements can be performed only at the installation site, such as perimeter protection systems, carrier current

systems, and systems employing a "leaky" coaxial cable as an antenna, measurements for verification or for obtaining a grant of equipment authorizaton shall be performed at a minimum of three installations that can be demonstrated to be representative of typical installation sites.

(e) For intentional radiators, measurements of the variation of the input power or the radiated signal level of the fundamental frequency component of the emission, as appropriate, shall be performed with the supply voltage varied between 85% and 115% of the nominal rated supply voltage. For battery operated equipment, the equipment tests shall be performed using a new battery.

(f) To the extent practicable, the device under test shall be measured at the distance specified in the appropriate rule section. The distance specified corresponds to the horizontal distance between the measurement antenna and the closest point of the equipment under test, support equipment or interconnecting cables as determined by the boundary defined by an imaginary straight line periphery describing a simple geometric configuration enclosing the system containing the equipment under test. The equipment under test, support equipment and any interconnecting cables shall be included within this boundary.

(1) At frequencies equal to or above 30 MHz, measurements may be performed at a distance closer than that specified provided this does not result in measurements taken in the near field. When performing measurements at a closer distance than specified, the results shall be extrapolated to the specified distance using an inverse linear distance extrapolation factor (20 dB/decade). Measurement at a distance greater than specified is not permitted unless the responsible party can demonstrate the measurements at the specified distance are impractical because of the size of the equipment, the location of the equipment, or other factors, or unless the responsible party can demonstrate that such a measurement would take place in the near field, as could occur when performing measurements on some large digital devices and perimeter protection systems. Measurements shall not be performed at a distance greater than 30 meters unless it can be demonstrated that measurement at a distance of 30 meters or less is impracticable and, further, that the signal level needed to be determined at the distance employed can be detected by the measuring equipment. When performing measurements at a distance greater than that specified, the results shall be interpolated to the specified distance using an inverse linear distance interpolation factor (20 dB/decade).

(2) At frequencies below 30 MHz, measurements may be performed at a distance closer than that specified in the regulations; however, an attempt should be made to avoid making measurements in the near field. Pending the development of an appropriate measurement procedure for measurements performed below 30 MHz, when performing measurements at a closer distance than specified, the results shall be extrapolated to the specified distance by either making measurements at a minimum of two distances on at least one radial to determine the proper extrapolation factor or by using the square of an inverse linear distance extrapolation factor (40 dB/decade).

(3) The applicant for a grant of certification shall specify the interpolation or extrapolation method used in the application filed with the Commission. For equipment subject to notification or verification, this information shall be retained with the measurement data.

(4) When measurement distances of 30 meters or less are specified in the regulations, the Commission will test the equipment at the distance specified unless measurement at that distance results in measurements being performed in the near field. When measurement distances of greater than 30 meters are specified in the regulations, the Commission will test the equipment at a closer distance, usually 30 meters, extrapolating the measured field strength to the specified distance using the methods shown in this section.

(5) Measurements shall be performed at a sufficient number of radials around the equipment under test to determine the radial at which the field strength values of the radiated emissions are maximized. The maximum field strength at the frequency being measured shall be reported in an application for certification.

(g) Equipment under test shall be adjusted, using those controls that are readily accessible to or are intended to be accessible to the consumer, in such a manner as to maximize the level of the emissions. For those devices to which wire leads may be attached by the consumer, tests shall be performed with wire leads attached. The wire leads shall be of the length to be used with the equipment if that length is known. Otherwise, wire leads one meter in length shall be attached to the equipment. Longer wire leads may be employed if necessary to interconnect to associated peripherals.

(h) For a composite system that incorporates devices contained either in a single enclosure or in separate enclosures connected by wire or cable, testing for compliance with the standards in this Part shall be performed with all of the devices in the system functioning. If an intentional radiator incorporates more than one antenna or other radiating source and these radiating sources are designed to emit at the same time, measurements of conducted and radiated emissions shall be performed with all radiating sources that are to be employed emitting.

(i) If the device under test provides for the connection of external accessories, including external electrical input signals, the device shall be tested with the accessories attached. The device under test shall be fully exercised with these external accessories. The emission tests shall be performed with the device and accessories configured in a manner that tends to produce maximized emissions within the range of variations that can be expected under normal operating conditions. In the case of multiple accessory external ports, an external accessory shall be connected to one of each type of port. Only one test using peripherals or external accessories that are representative of the devices that will be employed with the equipment under test is required. All possible equipment combinations do not need to be tested. The accessories or peripherals connected to the device being tested shall be unmodified, commercially available equipment.

(j) If the equipment under test consists of a central control unit and an external or internal accessory(ies) (peripheral) and the party verifying the equipment or applying for a grant of equipment authorization manufactures or assembles the central control unit and at least one of the accessory devices that can be used with that control unit, testing of the control unit and/or the accessory(ies) must be performed using the devices manufactured or assembled by that party, in addition to any other needed devices which the party does not manufacture or assemble. If the party verifying the equipment or applying for a grant of equipment authorization does not manufacture or assemble the central control unit and at least one of the accessory devices that can be used with that control unit or the party can demonstrate that the central

UMI

control unit or accessory(ies) normally would be marketed or used with equipment from a different entity, testing of the central control unit and/or the accessory(ies) must be performed using the specific combination of equipment which is intended to be marketed or used together. Only one test using peripherals or accessories that are representatve of the devices that will be employed with the equipment under test is required. All possible equipment combinations are not required to be tested. The accessories or peripherals connected to the device being tested shall be unmodified, commercially available equipment.

(k) A composite system is a system that incorporates different devices contained either in a single enclosure or in separate enclosures connected by wire or cable. If the individual devices in a composite system are subject to different technical standards, each such device must comply with its specific standards. In no event may the measured emissions of the composite system exceed the highest level permitted for an individual component. For digital devices which consist of a combination of Class A and Class B devices, the total combination of which results in a Class A digital device, it is only necessary to demonstrate that the equipment combination complies with the limits for a Class A device. This equipment combination may not be employed for obtaining a grant of equipment authorization or verifying a Class B digital device. However, if the digital device combination consists of a Class B central control unit, e.g., a personal computer, and a Class A internal peripheral(s), it must be demonstrated that the Class B central control unit continues to comply with the limits for a Class B digital device with the Class A internal peripheral(s) installed but not active.

(l) Measurements of radio frequency emissions conducted to the public utility power lines shall be performed using a 50 ohm/50 uH line-impedance stabilization network (LISN).

Note: Receivers tested under the transition provisions contained in § 15.37 may be tested with a 50 ohm/5 μH LISN.

(m) Measurements on intentional radiators or receivers, other than TV broadcast receivers, shall be performed and, if required, reported for each band in which the device can be operated with the device operating at the number of frequencies in each band specified in the following table:

Frequency range over which device operates	Number of frequencies	Location in the range of operation
1 MHz or less	1	Middle.
1 to 10 MHz	2	1 near top and 1 near bottom.
More than 10 MHz	3	1 near top, 1 near middle and 1 near bottom.

(n) Measurements on TV broadcast receivers shall be performed with the receiver tuned to each VHF frequency and also shall include the following oscillator frequencies: 520, 550, 600, 650, 700, 750, 800, 850, 900 and 931 MHz. If measurements cannot be made on one or more of the latter UHF frequencies because of the presence of signals from licensed radio stations or for other reasons to be detailed in the measurement report, measurements shall be made with the receiver oscillator at a nearby frequency. If the receiver is not capable of receiving channels above 806 MHz, the measurements employing the oscillator frequencies 900 and 931 MHz may be omitted.

(o) The amplitude of spurious emissions from intentional radiators and emissions from unintentional radiators which are attenuated more than 20 dB below the permissible value need not be reported unless specifically required elsewhere in this part.

§ 15.33 Frequency range of radiated measurements.

(a) For an intentional radiator, the spectrum shall be investigated from the lowest radio frequency signal generated in the device, without going below 9 kHz, up to at least the tenth harmonic of the highest fundamental frequency or to 40 GHz, whichever is lower. If the intentional radiator contains a digital device, regardless of whether this digital device controls the functions of the intentional radiator or the digital device is used for additional control or function purposes other than to enable the operation of the intentional radiator, the frequency range shall be investigated up to the higher of the tenth harmonic of the highest fundamental frequency designed to be emitted by the intentional radiator or the upper frequency of the measurement range applicable to the digital device, as shown in paragraph (b)(1) of this section.

(b) For unintentional radiators:

(1) Except as otherwise indicated in paragraphs (b)(2) or (b)(3) of this section, for an unintentional radiator, including a digital device, the spectrum shall be investigated from the lowest radio frequency signal generated or used in the device, without going below the lowest frequency for which a radiated emission limit is specified, up to the frequency shown in the following table:

Highest frequency generated or used in the device or on which the device operates or tunes (MHz)	Upper frequency of measurement range (MHz)
Below 1.705	30.
1.705–108	1000.
108–500	2000.
500–1000	5000.
Above 1000	5th harmonic of the highest frequency or 40 GHz, whichever is lower.

(2) A unintentional radiator, excluding a digital device, in which the highest frequency generated in the device, the highest frequency used in the device and the highest frequency on which the device operates or tunes are less than 30 MHz and which, in accordance with § 15.109, is required to comply with standards on the level of radiated emissions within the frequency range 9 kHz to 30 MHz, such as a CB receiver or a device designed to conduct its radio frequency emissions via connecting wires or cables, e.g., a carrier current system not intended to radiate, shall be investigated from the lowest radio frequency generated or used in the device, without going below 9 kHz (25 MHz for CB receivers), up to the frequency shown in the following table. If the unintentional radiator contains a digital device, the upper frequency to be investigated shall be that shown in the table below or in the table in paragraph (b)(1) of this section, as based on both the highest frequency generated and the highest frequency used in the digital device, whichever range is higher.

Highest frequency generated or used in the device or on which the device operates or tunes (MHz)	Upper frequency of measurement range (MHz)
Below 1.705	30
1.705–10	400
10–30	500

(3) Except for a CB receiver, a receiver employing superheterodyne techniques shall be investigated from 30 MHz up to at least the second harmonic of the highest local oscillator frequency generated in the device. If such receiver is controlled by a digital device, the frequency range shall be investigated up to the higher of the second harmonic of the highest local oscillator frequency

generated in the device or the upper frequency of the measurement range specified for the digital device in paragraph (b)(1) of this section.

(c) The above specified frequency ranges of measurements apply to the measurement of radiated emissions and, in the case of receivers, the measurement to demonstrate compliance with the antenna conduction limits specified in § 15.111. The frequency range of measurements for AC power line conducted limits is specified in §§ 15.107 and 15.207 and applies to all equipment subject to those regulations. In some cases, depending on the frequency(ies) generated and used by the equipment, only signals conducted onto the AC power lines are required to be measured.

(d) Particular attention should be paid to harmonics and subharmonics of the fundamental frequency as well as to those frequencies removed from the fundamental by multiples of the oscillator frequency. Radiation at the frequencies of multiplier states should also be checked.

§ 15.35 Emission limits.

The conducted and radiated emission limits shown in this part are based on the following, unless otherwise specified elsewhere in this part:

(a) On any frequency or frequencies below or equal to 1000 MHz, the limits shown are based on measuring equipment employing a CISPR quasi-peak detector function and related measurement bandwidths, unless otherwise specified. The specifications for the measuring instrument using the CISPR quasi-peak detector can be found in Publication 16 of the International Special Committee on Radio Interference (CISPR) of the International Electrotechnical Commission. As an alternative to CISPR quasi-peak measurements, the responsible party, at its option, may demonstrate compliance with the emission limits using measuring equipment employing a peak detector function, properly adjusted for such factors as pulse desensitization, as long as the same bandwidths as indicated for CISPR quasi-peak measurements are employed.

Note: For pulse modulated devices with a pulse-repetition frequency of 20 Hz or less and for which CISPR quasi-peak measurements are specified, compliance with the regulations shall be demonstrated using measuring equipment employing a peak detector function, properly adjusted for such factors as pulse desensitization, using the same measurement bandwidths that are indicated for CISPR quasi-peak measurements.

(b) On any frequency or frequencies above 1000 MHz, the radiated limits shown are based on the use of measurement instrumentation employing an average detector function. When average radiated emission measurements are specified in the regulations, including emission measurements below 1000 MHz, there is also a limit on the radio frequency emissions, as measured using instrumentation with a peak detector function, corresponding to 20 dB above the maximum permitted average limit for the frequency being investigated. Measurements of AC power line conducted emissions are performed using a CISPR quasi-peak detector, even for devices for which average radiated emission measurements are specified.

(c) When the radiated emission limits are expressed in terms of the average value of the emission, and pulsed operation is employed, the measured field strength shall be determined by averaging over one complete pulse train, including blanking intervals, as long as the pulse train does not exceed 0.1 seconds. As an alternative (provided the transmitter operates for longer than 0.1 seconds) or in those cases where the pulse train exceeds 0.1 seconds, the measured field strength shall be determined from the average absolute voltage during a 0.1 second interval during which the field strength is at its maximum value. The exact method of calculating the average field strength shall be submitted with any application for certification or shall be retained in the measurement data file for equipment subject to notification or verification.

§ 15.37 Transition provisions for compliance with the rules.

Equipment may be authorized, manufactured and imported under the rules in effect prior to June 26, 1989 in accordance with the following schedules:

(a) *For all intentional and unintentional radiators, except for receivers.* Radio frequency equipment verified by the responsible party or for which an application for a grant of equipment authorization is submitted to the Commission on or after June 23, 1992 shall comply with the regulations specified in this part. Radio frequency equipment that is manufactured or imported on or after June 23, 1994, shall comply with the regulations specified in this part.

(b) *For receivers.* Receivers subject to the regulations in this Part that are manufactured or imported on or after June 23, 1999 shall comply with the regulations specified in this part. However, if a receiver is associated with a transmitter that could not have been authorized under the regulations in effect prior to June 26, 1989, e.g., a transmitter operating under the provisions of §§ 15.209 or 15.249 (below 960 MHz), the transition provisions in this section do not apply. Such receivers must comply with the regulations in this part.

(c) There are no restrictions on the operation or marketing of equipment complying with the regulations in effect prior to June 26, 1989.

Subpart B—Unintentional Radiators

§ 15.101 Equipment authorization of unintentional radiators.

(a) Except as otherwise exempted in §§ 15.23, 15.103, and 15.113, unintentional radiators shall be authorized by the Commission or verified prior to the initiation of marketing, as follows:

Type of device	Equipment authorization required [1]
TV broadcast receiver	Verification.
FM broadcast receiver	Do.
CB receiver	Certification.
Superregenerative receiver	Do.
Scanning receiver	Do.
All other receivers subject to Part 15.	Notification.
TV interface device	Certification.
Cable system terminal device	Notification.
Stand-alone cable input selector switch.	Verification.
Class B personal computers & peripherals.	Certification.
Other Class B digital devices & peripherals.	Verification.
Class A digital devices & peripherals.	Do.
External switching power supplies.	Do.
All other devices	Do.

[1] See additional provisions in this section and in § 15.103 of this part.

(b) Only those receivers that operate (tune) within the frequency range of 30–960 MHz and CB receivers are subject to the authorizations shown in paragraph (a) of this section. However, receivers indicated as being subject to notification that are contained within a transceiver, the transmitter portion of which is subject to type acceptance, certification or notification, shall be authorized under the verification procedure. Receivers operating above 960 MHz or below 30 MHz, except for CB receivers, are exempt from complying with the technical provisions of this part but are subject to § 15.5.

(c) Personal computer mother boards (the circuit board performing the central processing) that are marketed assembled with an enclosure and a

VOL 54 ISS 78 AP 25 1989 UMI

power supply must be certificated with that enclosure and power supply.

(d) Peripheral devices, as defined in § 15.3(r), shall be certified or verified, as appropriate, prior to marketing. However, if a peripheral always will be marketed with a specific personal computer, it is not necessary to obtain a separate grant of certification for that peripheral, provided the specific combination of personal computer and peripheral has received a grant of certification.

(e) Subassemblies to digital devices are not subject to the technical standards in this part unless they are marketed as part of a system in which case the resulting system must comply with the applicable regulations. Subassemblies include: Those devices that are enclosed solely within the enclosure housing the digital device and are not included in the definition of peripherals in § 15.3(r), such as internal disc drives and memory expansion units; digital devices marketed to another manufacturer to be incorporated into a final product; circuit boards containing the central processing unit that are marketed without an enclosure or power supply; and, switching power supplies that are separately marketed and are solely for use internal to a digital device.

(f) The procedures for obtaining a grant of certification or notification and for verification are contained in Subpart J of Part 2 of this chapter.

§ 15.103 Exempted devices.

The following devices are subject only to the general conditions of operation in §§ 15.5 and 15.29 and are exempt from the specific technical standards and other requirements contained in this part. The operator of the exempted device shall be required to stop operating the device upon a finding by the Commission or its representative that the device is causing harmful interference. Operation shall not resume until the condition causing the harmful interference has been corrected. Although not mandatory, it is strongly recommended that the manufacturer of an exempted device endeavor to have the device meet the specific technical standards in this part.

(a) A digital device utilized exclusively in any transportation vehicle including motor vehicles and aircraft.

(b) A digital device used exclusively as an electronic control or power system utilized by a public utility or in an industrial plant. The term public utility includes equipment only to the extent that it is in a dedicated building or large room owned or leased by the utility and does not extend to equipment installed in a subscriber's facility.

(c) A digital device used exclusively as industrial, commercial, or medical test equipment.

(d) A digital device utilized exclusively in an appliance, e.g., microwave oven, dishwasher, clothes dryer, air conditioner (central or window), etc.

(e) Specialized medical digital devices (generally used at the direction of or under the supervision of a licensed health care practitioner) whether used in a patient's home or a health care facility. Non-specialized medical devices, i.e., devices marketed through retail channels for use by the general public, are not exempted. This exemption also does not apply to digital devices used for record keeping or any purpose not directly connected with medical treatment.

(f) Digital devices that have a power consumption not exceeding 6 nW.

(g) Joystick controllers or similar devices, such as a mouse, used with digital devices but which contain only non-digital circuitry or a simple circuit to convert the signal to the format required (e.g., an integrated circuit for analog to digital conversion) are viewed as passive add-on devices, not themselves directly subject to the technical standards or the equipment authorization requirements.

(h) Digital devices in which both the highest frequency generated and the highest frequency used are less than 1.705 MHz and which do not operate from the AC power lines or contain provisions for operation while connected to the AC power lines. Digital devices that include, or make provision for the use of, battery eliminators, AC adaptors or battery chargers which permit operation while charging or that connect to the AC power lines indirectly, obtaining their power through another device which is connected to the AC power lines, do not fall under this exemption.

(i) Responsible parties should note that equipment containing more than one device is not exempt from the technical standards in this part unless all of the devices in the equipment meet the criteria for exemption. If only one of the included devices qualifies for exemption, the remainder of the equipment must comply with any applicable regulations. If a device performs more than one function and all of those functions do not meet the criteria for exemption, the device does not qualify for inclusion under the exemptions.

§ 15.105 Information to the user.

(a) For a Class A digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

(b) For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

(c) The provisions of paragraphs (a) and (b) of this section do not apply to digital devices exempted from the technical standards under the provisions of § 15.103.

(d) For systems incorporating several digital devices, the statement shown in paragraph (a) or (b) of this section needs to be contained only in the instruction manual for the main control unit.

§ 15.107 Conducted limits.

(a) Except for Class A digital devices, for equipment that is designed to be connected to the public utility (AC) power line, the radio frequency voltage that is conducted back onto the AC power line on any frequency or frequencies within the band 450 kHz to 30 MHz shall not exceed 250 microvolts. Compliance with this provision shall be based on the measurement of the radio frequency voltage between each power line and ground at the power terminals.

(b) For a Class A digital device that is designed to be connected to the public utility (AC) power line, the radio frequency voltage that is conducted back onto the AC power line on any frequency or frequencies within the band 450 kHz to 30 MHz shall not exceed the limits in the following table. Compliance with this provision shall be based on the measurement of the radio frequency voltage between each power line and ground at the power terminals. The lower limit applies at the band edges.

Frequency of emission (MHz)	Conducted limit (microvolts)
0.45 to 1.705	1000
1.705 to 30.0	3000

(c) For carrier current systems used as unintentional radiators whose emissions are contained within the frequency range 450 kHz to 30 MHz, the provisions of this section shall not apply. Such systems are subject to radiated emission limits as provided in § 15.109(e).

(d) Measurements to demonstrate compliance with the conducted limits are not required for devices which only employ battery power for operation and which do not operate from the AC power lines or contain provisions for operation while connected to the AC power lines. Devices that include, or make provision for, the use of battery chargers which permit operating while charging, AC adaptors or battery eliminators or that connect to the AC power lines indirectly, obtaining their power through another device which is connected to the AC power lines, shall be tested to demonstrate compliance with the conducted limits.

§ 15.109 Radiated emission limits.

(a) Except for Class A digital devices, the field strength of radiated emissions from unintentional radiators at a distance of 3 meters shall not exceed the following values:

Frequency of emission (MHz)	Field strength (microvolts/meter)
30–88	100
88–216	150
216–960	200
Above 960	500

(b) The field strength of radiated emissions from a Class A digital device, as determined at a distance of 10 meters, shall not exceed the following:

Frequency of emission (MHz)	Field strength (microvolts/meter)
30–88	90
88–216	150
216–960	210
Above 960	300

(c) In the emission tables above, the tighter limit applies at the band edges. Sections 15.33 and 15.35 which specify the frequency range over which radiated emissions are to be measured and the detector functions and other measurement standards apply.

(d) For CB receivers, the field strength of radiated emissions within the frequency range of 25–30 MHz shall not exceed 40 microvolts/meter at a distance of 3 meters. The field strength of radiated emissions above 30 MHz from such devices shall comply with the limits in paragraph (a) of this section.

(e) Carrier current systems used as unintentional radiators or other unintentional radiators that are designed to conduct their radio frequency emissions via connecting wires or cables and that operate in the frequency range of 9 kHz to 30 MHz, including devices that deliver the radio frequency energy to transducers, such as ultrasonic devices not covered under Part 18 of this chapter, shall comply with the radiated emission limits for intentional radiators provided in § 15.209 for the frequency range of 9 kHz to 30 MHz. At frequencies above 30 MHz, the provisions of paragraph (a) of this section apply.

(f) For a receiver which employs terminals for the connection of an external receiving antenna, the receiver shall be tested to demonstrate compliance with the provisions of this section with an antenna connected to the antenna terminals unless the antenna conducted power is measured as specified in § 15.111(a). If a permanently attached receiving antenna is used, the receiver shall be tested to demonstrate compliance with the provisions of this section.

§ 15.111 Antenna power conduction limits for receivers.

(a) In addition to the radiated emission limits, receivers that operate (tune) in the frequency range 30 to 960 MHz and CB receivers that provide terminals for the connection of an external receiving antenna may be tested to demonstrate compliance with the provisions of § 15.109 with the antenna terminals shielded and terminated with a resistive termination equal to the impedance specified for the antenna, provided these receivers also comply with the following: With the receiver antenna terminal connected to a resistive termination equal to the impedance specified or employed for the antenna, the power at the antenna terminal at any frequency within the range of measurements specified in § 15.33 shall not exceed 2.0 nanowatts.

(b) CB receivers and receivers that operate (tune) in the frequency range 30 to 960 MHz that are provided only with a permanently attached antenna shall comply with the radiated emission limitations in this part, as measured with the antenna attached.

§ 15.113 Power line carrier systems.

Power line carrier systems, as defined in § 15.3(t), are subject only to the following requirements:

(a) A power utility operating a power line carrier system shall submit the details of all existing systems plus any proposed new systems or changes to existing systems to an industry-operated entity as set forth in § 90.63(g) of this chapter. No notification to the FCC is required.

(b) The operating parameters of a power line carrier system (particularly the frequency) shall be selected to achieve the highest practical degree of compatibility with authorized or licensed users of the radio spectrum. The signals from this operation shall be contained within the frequency band 9 kHz to 490 kHz. A power line carrier system shall operate on an unprotected, non-interference basis in accordance with § 15.5 of this part. If harmful interference occurs, the electric power utility shall discontinue use or adjust its power line carrier operation, as required, to remedy the interference. Particular attention should be paid to the possibility of interference to Loran C operations at 100 kHz.

(c) Power line carrier system apparatus shall be operated with the minimum power possible to accomplish the desired purpose. No equipment authorization is required.

(d) The best engineering principles shall be used in the generation of radio

VOL 54 ISS 78 AP 25 1989 UMI

frequency currents by power line carrier systems to guard against harmful interference to authorized radio users, particularly on the fundamental and harmonic frequencies.

(e) Power line carrier system apparatus shall conform to such engineering standards as may be promulgated by the Commission. In addition, such systems should adhere to industry approved standards designed to enhance the use of power line carrier systems.

(f) These provisions for power line carrier systems apply only to systems operated by a power utility for general supervision of the power system and do not permit operation on electric lines which connect the distribution substation to the customer or house wiring.

§ 15.115 TV interface devices, including cable system terminal devices.

(a) Measurements of the radiated emissions of a TV interface device shall be conducted with the output terminal(s) of the device terminated by a resistance equal to the rated output impedance. The emanations of a TV interface device incorporating an intentional radiator shall not exceed the limits in § 15.109 or Subpart C of this part, whichever is higher for each frequency. Where it is possible to determine which portion of the device is contributing a particular radio frequency emission, the emissions from the TV interface device portion shall comply with the emission limits in § 15.109, and the emissions from the intentional radiator shall comply with Subpart C of this part.

(b) Output signal limits:

(1) At any RF output terminal, the maximum measured RMS voltage, in microvolts, corresponding to the peak envelope power of the modulated signal during maximum amplitude peaks across a resistance (R in ohms) matching the rated output impedance of the TV interface device, shall not exceed the following:

(i) For a cable system terminal device or a TV interface device used with a master antenna, 692.8 times the square root of (R) for the video signal and 155 times the square root of (R) for the audio signal.

(ii) For all other TV interface devices, 346.4 times the square root of (R) for the video signal and 77.5 times the square root of (R) for the audio signal.

(2) At any RF output terminal, the maximum measured RMS voltage, in microvolts, corresponding to the peak envelope power of the modulated signal during maximum amplitude peaks across a resistance (R in ohms) matching the rated output impedance of the TV interface device, of any emission appearing on frequencies removed by more than 4.6 MHz below or 7.4 MHz above the video carrier frequency on which the TV interface device is operated shall not exceed the following:

(i) For a cable system terminal device or a TV interface device used with a master antenna, 692.8 times the square root of (R).

(ii) For all other TV interface devices, 10.95 times the square root of (R).

(3) The term "master antenna" used in this paragraph refers to TV interface devices employed for central distribution within large buildings such as apartments, hospitals, office buildings, etc.

(c) A TV interface device shall be equipped with a transfer switch for connecting the antenna terminals of a receiver selectively either to the receiving antenna or to the radio frequency output of the TV interface device, subject to the following:

(1) When measured in any of its set positions, transfer switches shall comply with the following requirements:

(i) For a cable system terminal device or a TV interface device equipped for use with a cable system or a master antenna, as defined in paragraph (b)(3) of this section, the isolation between the antenna and cable input terminals shall be at least 80 dB from 54 to 216 MHz and at least 60 dB from 216 to 550 MHz. The 80 dB limit applies at 216 MHz. In the case of a transfer switch requiring a power source, the required isolation shall be maintained in the event the device is not connected to a power source or power is interrupted.

(ii) For all other TV interface devices, the maximum voltage, corresponding to the peak envelope power of the modulated video signal during maximum amplitude peaks, in microvolts, appearing at the receiving antenna input terminals when terminated with a resistance (R in ohms) matching the rated impedance of the antenna input of the switch, shall not exceed 0.346 times the square root of (R).

(iii) Measurement to determine compliance with the transfer switch limits shall be made using a connecting cable, where required, between the TV interface device and the transfer switch of the type and length:

(A) Provided with the TV interface device,

(B) Recommended in the instruction manual, or

(C) Normally employed by the consumer.

(2) A TV interface device shall be designed and constructed, to the extent practicable, so as to preclude the possibility that the consumer may inadvertently attach the output of the device to the receiving antenna, if any, without first going through the transfer switch.

(3) A transfer switch is not required for a TV interface device that, when connected, results in the user no longer having any need to receive standard over-the-air broadcast signals via a separate antenna. A transfer switch is not required to be marketed with a cable system terminal device unless that device provides for the connection of an external antenna. A transfer switch is not required for a device that is intended to be used as an accessory to an authorized TV interface device.

(4) An actual transfer switch is not required for a TV interface device, including a cable system terminal device, that has an antenna input terminal(s); provided, the circuitry following the antenna input terminal(s) has sufficient bandwidth to allow the reception of all TV broadcast channels authorized under Part 73 of this chapter and: For a cable system terminal device that can alternate between the reception of cable television service and an antenna, compliance with the isolation requirement specified in paragraph (c)(1)(i) of this section can be demonstrated; and, for all other TV interface devices, the maximum voltage appearing at the antenna terminal(s) does not exceed the limit in paragraph (c)(1)(ii) of this section.

(5) If a transfer switch is not required, the following label shall be used in addition to the label shown in § 15.19(a):

This device is intended to be attached to a receiver that is not used to receive over-the-air broadcast signals. Connection of this device in any other fashion may cause harmful interference to radio communications and is in violation of the FCC Rules, Part 15.

(d) A TV interface device, including a cable system terminal device, shall incorporate circuitry to automatically prevent emanations from the device from exceeding the technical specifications in this part. These circuits shall be adequate to accomplish their functions when the TV interface device is presented, if applicable, with video input signal levels in the range of one to five volts; this requirement is not applicable to a TV interface device that uses a built-in signal source and has no provisions for the connection of an external signal source. For devices that contain provisions for an external signal source but do not contain provisions for the input of an external baseband signal, e.g., some cable system terminal devices, compliance with the provisions of this paragraph shall be demonstrated with a radio frequency input signal of 0 to 25 dBmV.

(e) For cable system terminal devices and TV interface devices used with a master antenna, as defined in paragraph (b)(3) of this section, the holder of the grant of authorization shall specify in the instruction manual or pamphlet, if a manual is not provided, the types of wires or coaxial cables necessary to ensure that the unit complies with the requirements of this part. The holder of the grant of authorization must comply with the provisions of § 15.27. For all other TV interface devices, the wires or coaxial cables used to couple the output signals to the TV receiver shall be provided by the responsible party.

(f) A TV interface device which is submitted to the Commission as a composite device in a single enclosure containing a RF modulator, video source and other component devices shall be submitted on a single application (FCC Form 731) and shall be authorized as a single device.

(g) An external device or accessory that is intended to be attached to a TV interface device shall comply with the technical and administrative requirements set out in the rules under which it operates. For example, a personal computer must be certificated to show compliance with the regulations for digital devices.

§ 15.117 TV broadcast receivers.

(a) All TV broadcast receivers shipped in interstate commerce or imported from any foreign country into the United States, for sale or resale to the public, shall comply with the provisions of this section. The reference in this section to TV broadcast receivers also includes devices, such as TV interface devices, that incorporate the tuner portion of a TV broadcast receiver and that are equipped with an antenna or antenna terminals that can be used for the off-the-air reception of TV broadcast signals, as authorized under Part 73 of this chapter.

(b) TV broadcast receivers shall be capable of adequately receiving all channels allocated by the Commission to the television broadcast service.

(c) On a given receiver, use of the UHF and VHF tuning systems shall provide approximately the same degree of tuning accuracy with approximately the same expenditure of time and effort: *Provided, however,* That this requirement will be considered to be met if the need for routine fine tuning is eliminated on UHF channels.

(1) *Basic tuning mechanism.* If a TV broadcast receiver is equipped to provide for repeated access to VHF television channels at discrete tuning positions, that receiver shall be equipped to provide for repeated access to a minimum of six UHF television channels at discrete tuning positions. Unless a discrete tuning position is provided for each channel allocated to UHF television, each position shall be readily adjustable to a particular UHF channel by the user without the use of tools. If 12 or fewer discrete tuning positions are provided, each position shall be adjustable to receive any channel allocated to UHF television.

Note: The combination of detented rotary switch and pushbutton controls is acceptable, provided UHF channels, after their initial selection, can be accurately tuned with an expenditure of time and effort approximately the same as that used in accurately tuning VHF channels. A UHF tuning system comprising five pushbuttons and a separate manual tuning knob is considered to provide repeated access to six channels at discrete tuning positions. A one-knob (VHF/UHF) tuning system providing repeated access to 11 or more discrete tuning positions is also acceptable, provided each of the tuning positions is readily adjustable, without the use of tools, to receive any UHF channel.

(2) *Tuning controls and channel readout.* UHF tuning controls and channel readout on a given receiver shall be comparable in size, location, accessibility and legibility to VHF controls and readout on that receiver.

Note: Differences between UHF and VHF channel readout that follow directly from the larger number of UHF television channels available are acceptable if it is clear that a good faith effort to comply with the provisions of this section has been made.

(d) If equipment and controls that tend to simplify, expedite or perfect the reception of television signals (e.g., AFC, visual aids, remote control, or signal seeking capability referred to generally as tuning aids) are incorporated into the VHF portion of a TV broadcast receiver, tuning aids of the same type and comparable capability and quality shall be provided for the UHF portion of that receiver.

(e) If a television receiver has an antenna affixed to the VHF antenna terminals, it must have an antenna designed for and capable of receiving all UHF television channels affixed to the UHF antenna terminals. If a VHF antenna is provided with but not affixed to a receiver, a UHF antenna shall be provided with the receiver.

(f) The picture sensitivity of a TV broadcast receiver averaged for all channels between 14 and 69 inclusive shall not be more than 8dB larger than the peak picture sensitivity of that receiver averaged for all channels between 2 and 13 inclusive.

(g) The noise figure for any television channel 14 to 69 inclusive shall not exceed 14 dB. A TV receiver model is considered to comply with this noise figure if the maximum noise figure for channels 14–69 inclusive of 97.5% of all receivers within that model does not exceed 14 dB.

(1) The responsible party shall measure the noise figure of a number of UHF channels of the test sample to give reasonable assurance that the UHF noise figure for each channel complies with the above limit.

(2) The responsible party shall insert in his files a statement explaining the basis on which it will rely to ensure that at least 97.5% of all production units of the test sample that are manufactured have a noise figure of no greater than 14 dB.

(3) Within one year after a specific TV receiver model has been verified for compliance, the responsible party shall file a report with the Commission giving the actual UHF noise figure performance of units of that model actually measured during that year. The report, as an alternative, may be filed by the party responsible for the marketing of that model TV broadcast receiver within this country.

(4) In the case of a TV tuner built-in as part of a video tape recorder that usea a power splitter between the antenna terminals of the video tape recorder and the input terminals of the TV tuner or a TV broadcast receiver that uses a power splitter between the antenna terminals of two or more UHF tuners contained within that receiver, 4 dB may be subtracted from the noise figure measured at the antenna terminals of the video tape recorder or TV broadcast receiver for determining compliance of the UHF tuner(s) with the 14 dB noise figure limit.

(h) For a TV broadcast receiver equipped with a cable input selector switch, the selector switch shall provide in any of its set positions isolation between the antenna and cable input terminals of at least 80 dB from 54 to 216 MHz, and of at least 60 dB from 216 to 550 MHz. At MHz, the 80 dB isolation standard applies. In the case of a selector switch requiring a power source, the required isolation shall be maintained in the event the device is not connected to a power source or power is interrupted. A physical cable input selector switch is not required for a TV broadcast receiver that can alternate between the reception of cable television service and an antenna, provided compliance with the isolation requirement specified in this paragraph can be demonstrated and the circuitry

VOL 54 ISS 78 APR 25 1989 UMI

following the antenna input terminal(s) has sufficient bandwidth to allow the reception of all TV broadcast channels authorized under this chapter.

Subpart C—Intentional Radiators

§ 15.201 Equipment authorization requirement.

(a) Intentional radiators operated as carrier current systems and devices operated under the provisions of §§ 15.211, 15.213 and 15.221 shall be verified pursuant to the procedures in Subpart J of Part 2 of this chapter prior to marketing.

(b) Except as otherwise exempted in paragraph (c) of this section and in § 15.23 of this part, all intentional radiators operating under the provisions of this part shall be certificated by the Commission pursuant to the procedures in Subpart J of Part 2 of this chapter prior to marketing.

(c) For devices such as perimeter protection systems which, in accordance with § 15.31(d), are required to be measured at the installation site, each application for certification must be accompanied by a statement indicating that the system has been tested at three installations and found to comply at each installation. Until such time as certification is granted, a given installation of a system that was measured for the submission for certification will be considered to be in compliance with the provisions of this chapter, including the marketing regulations in Subpart I of Part 2 of this chapter, if tests at that installation show the system to be in compliance with the relevant technical requirements. Similarly, where measurements must be performed on site for equipment subject to verification, a given installation that has been verified to demonstrate compliance with the applicable standards will be considered to be in compliance with the provisions of this chapter, including the marketing regulations in Subpart I of Part 2 of this chapter.

(d) For perimeter protection systems operating in the frequency bands allocated to television broadcast stations operating under Part 73 of this chapter, the holder of the grant of certification must test each installation prior to initiation of normal operation to verify compliance with the technical standards and must maintain a list of all installations and records of measurements. For perimeter protection systems operating outside of the frequency bands allocated to television broadcast stations, upon receipt of a grant of certification, further testing of the same or similar type of system or installation is not required.

§ 15.203 Antenna requirement.

An intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator shall be considered sufficient to comply with the provisions of this section. The manufacturer may design the unit so that a broken antenna can be replaced by the user, but the use of a standard antenna jack or electrical connector is prohibited. This requirement does not apply to carrier current devices or to devices operated under the provisions of § 15.211, 15.213, 15.217, 15.219, 15.221, or 15.247. Further, this requirement does not apply to intentional radiators that must be professionally installed, such as perimeter protection systems and some field disturbance sensors, or to other intentional radiators which, in accordance with § 15.31(d), must be measured at the installation site. However, the installer shall be responsible for ensuring that the proper antenna is employed so that the limits in this part are not exceeded.

§ 15.205 Restricted bands of operation.

(A) Except as shown in paragraph (d) of this section, only spurious emissions are permitted in any of the frequency bands listed below:

MHz	MHz	MHz	GHz
0.090–0.110	162.0125–167.17	2310–2390	9.3–9.5.
0.49–0.51	167.72–173.2	2436.5–2500	10.6–12.7.
2.1735–2.1905	240–285	2655–2900	13.25–13.4.
8.362–8.366	322–335.4	3260–3267	14.47–14.5
13.36–13.41	399.9–410	3332–3339	15.35–16.2.
25.5–25.67	608–614	3345.8–3358	17.7–21.4.
37.5–38.25	960–1240	3600–4400	22.01–23.12.
73–75.4	1300–1427	4500–5250	23.6–24.0.
108–121.94	1435–1626.5	5350–5460	31.2–31.8.
123–138	1660–1710	7250–7750	36.43–36.5.
149.9–150.05	1718.8–1722.2	8025–8500	Above 38.6.
156.7–156.9	2200–2300	9000–9200	

(b) Except as provided in paragraph (d) of this section, the field strength of emissions appearing within these frequency bands shall not exceed the limits shown in § 15.209. At frequencies equal to or less than 1000 MHz, compliance with the limits in § 15.209 shall be demonstrated using measurement instrumentation employing a CISPR quasi-peak detector. Above 1000 MHz, compliance with the emission limits in § 15.209 shall be demonstrated based on the average value of the measured emissions. The provisions in § 15.35 apply to these measurements.

(c) Except as provided in paragraph (d) of this section, regardless of the field strength limits specified elsewhere in this subpart, the provisions of this section apply to emissions from any intentional radiator.

(d) The following devices are exempt from the requirements of this section:

(1) Swept frequency field disturbance sensors operating between 1.705 and 37 MHz provided their emissions only sweep through the bands listed in paragraph (a) of this section, the sweep is never stopped with the fundamental emission within the bands listed in paragraph (a) of this section, and the fundamental emission is outside of the bands listed in paragraph (a) of this section more than 99% of the time the device is actively transmitting, without compensation for duty cycle.

(2) Transmitters used to detect buried electronic markers at 101.4 kHz which are employed by telephone companies.

(3) Cable locating equipment operated pursuant to § 15.213.

§ 15.207 Conducted limits.

(a) For an intentional radiator which is designed to be connected to the public utility (AC) power line, the radio frequency voltage that is conducted

back onto the AC power line on any frequency or frequencies within the band 450 kHz to 30 MHz shall not exceed 250 microvolts. Compliance with this provision shall be based on the measurement of the radio frequency voltage between each power line and ground at the power terminals.

(b) The limit in paragraph (a) of this section shall not apply to intentional radiators operated as carrier current systems in the frequency range of 450 kHz to 30 mHz. Such systems are subject to radiated emission limits as provided in §§ 15.205 and 15.209.

(c) Measurements to demonstrate compliance with the conducted limits are not required for devices which only employ battery power for operation and which do not operate from the AC power lines or contain provisions for operation while connected to the AC power lines. Devices that include, or make provision for, the use of battery chargers which permit operating while charging, AC adaptors or battery eliminators or that connect to the AC power lines indirectly, obtaining their power through another device which is connected to the AC power lines, shall be tested to demonstrate compliance with the conducted limits.

§ 15.209 Radiated emission limits, general requirements.

(a) Except as provided elsewhere in this Subpart, the emissions from an intentional radiator shall not exceed the field strength levels specified in the following table:

Frequency (MHz)	Field strength (microvolts/meter)	Measurement distance (meters)
0.009–0.490	2400/F(kHz)	300
0.490–1.705	24000/F(kHz)	30
1.705–30.0	30	30
30–88	[1] 100	3
88–216	[1] 150	3
216–96	[1] 200	3
Above 960	500	3

[1] Except as provided in paragraph (g), fundamental emissions from intentional radiators operating under this Section shall not be located in the frequency bands 54–72 MHz, 76–88 MHz, 174–216 MHz or 470–806 MHz.

(b) In the emission table above, the tighter limit applies at the band edges.

(c) The level of any unwanted emissions from an intentional radiator operating under these general provisions shall not exceed the level of the fundamental emission. For intentional radiators which operate under the provisions of other sections within this part and which are required to reduce their unwanted emissions to the limits specified in this table, the limits in this table are based on the frequency of the unwanted emission and not the fundamental frequency. However, the level of any unwanted emissions shall not exceed the level of the fundamental frequency.

(d) The emission limits shown in the above table are based on measurements employing a CISPR quasi-peak detector except for the frequency bands 9–90 kHz, 110–490 kHz and above 1000 MHz. Radiated emission limits in these three bands are based on measurements employing an average detector.

(e) The provisions in §§ 15.31, 15.33, and 15.35 for measuring emissions at distances other than the distances specified in the above table, determining the frequency range over which radiated emissions are to be measured, and limiting peak emissions apply to all devices operated under this part.

(f) In accordance with § 15.33(a), in some cases the emissions from an intentional radiator must be measured to beyond the tenth harmonic of the highest fundamental frequency designed to be emitted by the intentional radiator because of the incorporation of a digital device. If measurements above the tenth harmonic are so required, the radiated emissions above the tenth harmonic shall comply with the general radiated emission limits applicable to the incorporated digital device, as shown in § 15.109 and as based on the frequency of the emission being measured, or, except for emissions contained in the restricted frequency bands shown in § 15.205, the limit on spurious emissions specified for the intentional radiator, whichever is the higher limit. Emissions which must be measured above the tenth harmonic of the highest fundamental frequency designed to be emitted by the intentional radiator and which fall within the restricted bands shall comply with the general radiated emission limits in § 15.109 that are applicable to the incorporated digital device.

(g) Perimeter protection systems operating under the provisions of this Section in the frequency bands allocated to TV broadcast stations, as shown in Part 73 of this chapter, shall contain their fundamental emissions within the frequency bands 54–72 MHz and 76–88 MHz. Further, the use of such perimeter protection systems is limited to industrial, business and commercial applications.

§ 15.211 Tunnel radio systems.

An intentional radiator utilized as part of a tunnel radio system may operate on any frequency provided it meets all of the following conditions:

(a) Operation of a tunnel radio system (intentional radiator and all connecting wires) shall be contained solely within a tunnel, mine or other structure that provides attenuation to the radiated signal due to the presence of naturally surrounding earth and/or water.

(b) Any intentional or unintentional radiator external to the tunnel, mine or other structure, as described in paragraph (a) of this section, shall be subject to the other applicable regulations contained within this part.

(c) The total electromagnetic field from a tunnel radio system on any frequency or frequencies appearing outside of the tunnel, mine or other structure described in paragraph (a) of this section, shall not exceed the limits shown in § 15.209 when measured at the specified distance from the surrounding structure, including openings. Particular attention shall be paid to the emissions from any opening in the structure to the outside environment. When measurements are made from the openings, the distances shown in § 15.209 refer to the distance from the plane of reference which fits the entire perimeter of each above ground opening.

(d) The conducted limits in § 15.207 apply to the radiofrequency voltage on the public utility power lines outside of the tunnel.

§ 15.213 Cable locating equipment.

An intentional radiator used as cable locating equipment, as defined in § 15.3(d), may be operated on any frequency within the band 9–490 kHz, subject to the following limits: Within the frequency band 9 kHz, up to, but not including, 45 kHz, the peak output power from the cable locating equipment shall not exceed 10 watts; and, within the frequency band 45 kHz to 490 kHz, the peak output power from the cable locating equipment shall not exceed one watt. If provisions are made for connection of the cable locating equipment to the AC power lines, the conducted limits in § 15.207 also apply to this equipment.

Radiated Emission Limits, Additional Provisions

§ 15.215 Additional provisions to the general radiated emission limitations.

(a) The regulations in §§ 15.217 through 15.251 provide alternatives to the general radiated emission limits for intentional radiators operating in specified frequency bands. Unless otherwise stated, there are no restrictions as to the types of operation permitted under these sections.

(b) In most cases, unwanted emissions outside of the frequency bands shown in these alternative provisions must be attenuated to the emission limits shown

VOL 54 ISS 78 APR 25 1989 UMI

in § 15.209. In no case shall the level of the unwanted emissions from an intentional radiator operating under these additional provisions exceed the field strength of the fundamental emission.

(c) For those bands of frequencies where alternative radiated emission limitations apply and for which a frequency stability is not specified, it is recommended that the fundamental frequency be kept within at least the central 80% of the permitted band in order to minimize the possibility of out-of-band operation.

(d) Where the following sections specify limits on the bandwidth of the emissions, the bandwidth limits include the effects of frequency sweeping, frequency hopping, and other modulation techniques which may be employed.

§ 15.217 Operation in the band 160–190 kHz.

(a) The total input power to the final radio frequency stage (exclusive of filament or heater power) shall not exceed one watt.

(b) The total length of the transmission line, antenna, and ground lead (if used) shall not exceed 15 meters.

(c) All emissions below 160 kHz or above 190 kHz shall be attenuated at least 20 dB below the level of the unmodulated carrier. Determination of compliance with the 20 dB attenuation specification may be based on measurements at the intentional radiator's antenna output terminal unless the intentional radiator uses a permanently attached antenna, in which case compliance shall be demonstrated by measuring the radiated emissions.

§ 15.219 Operation in the band 510–1705 kHz.

(a) The total input power to the final radio frequency stage (exclusive of filament or heater power) shall not exceed 100 milliwatts.

(b) The total length of the transmission line, antenna and ground lead (if used) shall not exceed 3 meters.

(c) All emissions below 510 kHz or above 1705 kHz shall be attenuated at least 20 dB below the level of the unmodulated carrier. Determination of compliance with the 20 dB attenuation specification may be based on measurements at the intentional radiator's antenna output terminal unless the intentional radiator uses a permanently attached antenna, in which case compliance shall be deomonstrated by measuring the radiated emissions.

§ 15.221 Operation in the band 525–1705 kHz.

(a) The provisions of this section are restricted to the operation of an AM broadcast station on a college or university campus or on the campus of any other educational institution. Operation is restricted to the ground of the campus. For the band 535–1705 kHz, the frequency of operation shall be chosen such that operation is not within the protected field strength contours of licensed AM stations.

(b) On the campus, the field strength of emissions appearing outside of this frequency band shall not exceed the general radiated emission limits shown in § 15.209 as measured from the radiating source. There is no limit on the field strength of emissions appearing within this frequency band, except that the provisions of § 15.5 continue to apply.

(c) At the perimeter of the campus, the field strength of any emissions, including those within the frequency band 525–1705 kHz, shall not exceed the general radiated emission limits in § 15.209.

(d) The conducted limits specified in § 15.207 apply to the radio frequency voltatge on the public utility power lines outside of the campus. Due to the large number of radio frequency devices which may be used on the campus, contributing to the conducted emissions, as an alternative to measuring conducted emissions on the AC power lines outside of the campus, it is acceptable to demonstrate compliance with this provision by measuring each individual intentional radiator employed in the system at the point where it connects to the AC power lines. As provided in § 15.207(b), if only a carrier current system is employed, the AC power line conducted limits do not apply. However, the radiated emission limits provided in this section apply to carrier current systems.

(e) A grant of equipment authorization is not required for a campus radio system. In lieu thereof, a campus radio system shall be verified for compliance with the regulations in accordance with Subpart J of Part 2 of this chapter. This data shall be kept on file at the location of the studio, office or control room associated with the transmitting equipment. In some cases, this may correspond to the location of the transmitting equipment.

§ 15.223 Operation in the band 1.705–10 MHz.

(a) The field strength of any emission within the band 1.705–10.0 MHz shall not exceed 100 microvolts/meter at a distance of 30 meters. However, if the bandwidth of the emission is less than 10% of the center frequency, the field strength shall not exceed 15 microvolts/meter or (the bandwidth of the device in kHz) divided by (the center frequency of the device in MHz) microvolts/meter at a distance of 30 meters, whichever is the higher level. For the purposes of this section, bandwidth is determined at the points 6 dB down from the modulated carrier. The emission limits in this paragraph are based on measurement instrumentation employing an average detector. The provisions in § 15.35(b) for limiting peak emissions apply.

(b) The field strength of emissions outside of the band 1.705–10.0 MHz shall not exceed the general radiated emission limits in § 15.209.

§ 15.225 Operation within the band 13.553–13.567 MHz.

(a) The field strength of any emissions within this band shall not exceed 10,000 microvolts/meter at 30 meters.

(b) The field strength of any emissions appearing outside of this band shall not exceed the general radiated emission limits shown in § 15.209.

(c) The frequency tolerance of the carrier signal shall be maintained within ±0.01% of the operating frequency over a temperature variation of −20 degrees to +50 degrees C at normal supply voltage, and for a variation in the primary supply voltage from 85% to 115% of the rated supply voltage at a temperature of 20 degrees C. For battery operated equipment, the equipment tests shall be performed using a new battery.

§ 15.227 Operation within the band 26.96–27.28 MHz.

(a) The field strength of any emission within this band shall not exceed 10,000 microvolts/meter at 3 meters. The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

(b) The field strength of any emissions which appear outside of this band shall not exceed the general radiated emission limits in § 15.209.

§ 15.229 Operation within the band 40.66–40.70 MHz.

(a) Unless operating pursuant to the provisions in § 15.231, the field strength of any emissions within this band shall not exceed 1,000 microvolts/meter at 3 meters.

(b) The field strength of any emissions appearing outside of this band shall not exceed the general radiated emission limits in § 15.209.

(c) The frequency tolerance of the carrier signal shall be maintained within ±0.01% of the operating frequency over a temperature variation of −20 degrees to +50 degrees C at normal supply voltage, and for a variation in the primary supply voltage from 85% to 115% of the rated supply voltage at a temperature of 20 degrees C. For battery operated equipment, the equipment tests shall be performed using a new battery.

§ 15.231 Periodic operation in the band 40.66–40.70 MHz and above 70 MHz.

(a) The provisions of this section are restricted to periodic operation within the band 40.66–40.70 MHz and above 70 MHz. Except as shown in paragraph (e) of this section, the intentional radiator is restricted to the transmission of a control signal such as those used with alarm systems, door openers, remote switches, etc. Radio control of toys is not permitted. Continuous transmissions, such as voice or video, and data transmissions are not permitted. The prohibition against data transmissions does not preclude the use of recognition codes. Those codes are used to identify the sensor that is activated or to identify the particular component as being part of the system. The following conditions shall be met to comply with the provisions for this periodic operation:

(1) A manually operated transmitter shall employ a switch that will automatically deactivate the transmitter within not more than 5 seconds of being released.

(2) A transmitter activated automatically shall cease transmission within 5 seconds after activation.

(3) Periodic transmissions at regular predetermined intervals are not permitted. However, polling or supervision transmissions to determine system integrity of transmitters used in security or safety applications are allowed if the periodic rate of transmission does not exceed one transmission of not more than one second duration per hour for each transmitter.

(4) Intentional radiators which are employed for radio control purposes during emergencies involving fire, security, and safety of life, when activated to signal an alarm, may operate during the pendency of the alarm condition

(b) In addition to the provisions of § 15.205, the field strength of emissions from intentional radiators operated under this section shall not exceed the following:

Fundamental frequency (MHz)	Field strength of fundamental (microvolts/meter)	Field strength of spurious emissions (microvolts/meter)
40.66–40.70	2,250	225
70–130	1,250	125
130–174	[1] 1,250 to 3,750	[1] 125 to 375
174–260	3,750	375
260–470	[1] 3,750 to 12,500	[1] 375 to 1,250
Above 470	12,500	1,250

[1] Linear interpolations.

(1) The above field strength limits are specified at a distance of 3 meters. The tighter limits apply at the band edges.

(2) Intentional radiators operating under the provisions of this Section shall demonstrate compliance with the limits on the field strength of emissions, as shown in the above table, based on the average value of the measured emissions. As an alternative, compliance with the limits in the above table may be based on the use of measurement instrumentation with a CISPR quasi-peak detector. The specific method of measurement employed shall be specified in the application for equipment authorization. If average emission measurements are employed, the provisions in § 15.35 for averaging pulsed emissions and for limiting peak emissions apply. Further, compliance with the provisions of § 15.205 shall be demonstrated using measurement instrumentation with a CISPR quasi-peak detector.

(3) The limits on the field strength of the spurious emissions in the above table are based on the fundamental frequency of the intentional radiator. Spurious emissions shall be attenuated to the average limits shown in this table or to the general limits shown in § 15.209, as measured with a CISPR quasi-peak detector, whichever limit permits a higher field strength.

(c) The bandwidth of the emission shall be no wider than 0.25% of the center frequency for devices operating above 70 MHz and below 900 MHz. For devices operating above 900 MHz, the emission shall be no wider than 0.5% of the center frequency. Bandwidth is determined at the points 20 dB down from the modulated carrier.

(d) For devices operating within the frequency band 40.66–40.70 MHz, the bandwidth of the emission shall be confined within the band edges and the frequency tolerance of the carrier shall be ± 0.01%. This frequency tolerance shall be maintained for a temperature variation of −20 degrees to +50 degrees C at normal supply voltage, and for a variation in the primary supply voltage from 85% to 115% of the rated supply voltage at a temperature of 20 degrees C. For battery operated equipment, the equipment tests shall be performed using a new battery.

(e) Intentional radiators may operate at a periodic rate exceeding that specified in paragraph (a) of this section and may be employed for any type of operation, including operation prohibited in paragraph (a) of this section, provided the intentional radiator complies with the provisions of paragraphs (b) through (d) of this section, except the field strength table in paragraph (b) of this section is replaced by the following:

Fundamental frequency (MHz)	Field strength of fundamental (microvolts/meter)	Field strength of spurious emission (microvolts/meter)
40.66–40.70	1,000	100
70–130	500	50
130–174	500 to 1,500 [1]	50 to 150 [1]
174–260	1,500	150
260–470	1,500 to 5,000 [1]	150 to 500 [1]
Above 470	5,000	500

[1] Linear interpolations.

In addition, devices operated under the provisions of this paragraph shall be provided with a means for automatically limiting operation so that the duration of each transmission shall not be greater than one second and the silent period between transmissions shall be at least 30 times the duration of the transmission but in no case less than 10 seconds.

§ 15.233 Operation within the bands 46.60–46.98 MHz and 49.66–50.0 MHz.

(a) The provisions shown in this section are restricted to cordless telephones.

(b) An intentional radiator used as part of a cordless telephone system shall operate on one or more of the following frequency pairs:

Channel	Base transmitter (MHz)	Handset transmitter (MHz)
1	46.610	49.670
2	46.630	49.845
3	46.670	49.860
4	46.710	49.770
5	46.730	49.875
6	46.770	49.830
7	46.830	49.890
8	46.870	49.930
9	46.930	49.990
10	46.970	49.970

(c) The field strength of the fundamental emission shall not exceed 10,000 microvolts/meter at 3 meters. The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The

VOL 54 ISS 78 AP 25 1989 UMI

provisions in § 15.35 for limiting peak emissions apply.

(d) The fundamental emission shall be confined with a 20 kHz band centered on the actual carrier frequency. Modulation products outside of this 20 kHz band shall be attenuated at least 26 dB below the level of the unmodulated carrier or to the general limits in § 15.209, whichever permits the higher emission levels. Emissions on any frequency more than 20 kHz removed from the center frequency shall consist solely of unwanted emissions and shall not exceed the general radiated emission limits in § 15.209.

(e) All emissions exceeding 20 microvolts/meter at 3 meters are to be reported in the application for certification. Tests to determine compliance with this requirement shall be performed using an appropriate input signal as prescribed in § 2.989 of this chapter.

(f) If the device provides for the connection of external accessories, including external electrical input signals, the device must be tested with the accessories attached. The emission tests shall be performed with the device and accessories configured in a manner which tends to produce the maximum level of emissions within the range of variations that can be expected under normal operating conditions.

(g) The frequency tolerance of the carrier signal shall be maintained within ±0.01% of the operating frequency. The tolerance shall be maintained for a temperature variation of −20 degrees C to +50 degrees C at normal supply voltage, and for variation in the primary voltage from 85% to 115% of the rated supply voltage at a temperature of 20 degrees C. For battery operated equipment, the equipment tests shall be performed using a new battery.

(h) For equipment authorization, a single application form, FCC Form 731, may be filed for a cordless telephone system, provided the application clearly identifies and provides data for all parts of the system to show compliance with the applicable technical requirements. When a single application form is submitted, both the base station and the portable handset must carry the same FCC identifier. The application shall include a fee for certification of each type of transmitter and notification or certification, if appropriate, for each type of receiver included in the system.

(i) A cordless telephone which is intended to be connected to the public telephone network shall also comply with the applicable regulations in Part 68 of this chapter. A separate application for registration under Part 68 is required.

(j) The label required under Subpart A shall also contain the following statement: "Privacy of communications may not be ensured when using this phone."

(k) The box or other package in which the individual cordless telephone is to be marketed shall carry a statement in a prominent location, visible to the buyer before purchase, which reads as follows:

Notice: The base units of some cordless telephones may respond to other nearby units or to radio noise resulting in telephone calls being dialed through this unit without your knowledge and possibly calls being misbilled. In order to protect against such occurrences, this cordless telephone is provided with the following features: (to be completed by the responsible party).

An application for certification of a cordless telephone shall specify the complete text of the statement that will be carried on the package and indicate where, specifically, it will be located on the carton.

§ 15.235 Operation within the band 49.82–49.90 MHz.

(a) The field strength of any emission within this band shall not exceed 10,000 microvolts/meter at 3 meters. The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

(b) The field strength of any emissions appearing between the band edges and up to 10 kHz above and below the band edges shall be attenuated at least 26 dB below the level of the unmodulated carrier or to the general limits in § 15.209, whichever permits the higher emission levels. The field strength of any emissions removed by more than 10 kHz from the band edges shall not exceed the general radiated emission limits in § 15.209. All signals exceeding 20 microvolts/meter at 3 meters shall be reported in the application for certification.

(c) For a home-built intentional radiator, as defined in § 15.23(a), operating within the band 49.82–49.90 MHz, the following standards may be employed:

(1) The RF carrier and modulation products shall be maintained within the band 49.82–49.90 MHz.

(2) The total input power to the device measured at the battery or the power line terminals shall not exceed 100 milliwatts under any condition of modulation.

(3) The antenna shall be a single element, one meter or less in length, permanently mounted on the enclosure containing the device.

(4) Emissions outside of this band shall be attenuated at least 20 dB below the level of the unmodulated carrier.

(5) The regulations contained in § 15.23 of this part apply to intentional radiators constructed under the provisions of this paragraph.

(d) Cordless telephones are not permitted to operate under the provisions of this section.

§ 15.237 Operation in the bands 72.0–73.0 MHz and 75.4–76.0 MHz.

(a) The intentional radiator shall be restricted to use as an auditory assistance device.

(b) Emissions from the intentional radiator shall be confined within a band 200 kHz wide centered on the operating frequency. The 200 kHz band shall lie wholly within the above specified frequency ranges.

(c) The field strength of any emissions within the permitted 200 kHz band shall not exceed 80 millivolts/meter at 3 meters. The field strength of any emissions radiated on any frequency outside of the specified 200 kHz band shall not exceed 1500 microvolts/meter at 3 meters. The emission limits in this paragraph are based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

§ 15.239 Operation in the band 88–108 MHz.

(a) Emissions from the intentional radiator shall be confined within a band 200 kHz wide centered on the operating frequency. The 200 kHz band shall lie wholly within the frequency range of 88–108 MHz.

(b) The field strength of any emissions within the permitted 200 kHz band shall not exceed 250 microvolts/meter at 3 meters. The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

(c) The field strength of any emissions radiated on any frequency outside of the specified 200 kHz band shall not exceed the general radiated emission limits in § 15.209.

(d) A custom built telemetry intentional radiator operating in the frequency band of 88–208 MHz and used for experimentation by an educational institute need not be certified provided the device complies with the standards in this Part and the educational institution notifies the Engineer in Charge of the local FCC office, in writing, in advance of operation, providing the following information:

(1) The dates and places where the device will be operated;

(2) The purpose for which the device will be used;

(3) A description of the device, including the operating frequency, RF power output, and antenna; and,

(4) A statement that the device complies with the technical provisions of this part.

§ 15.241 Operation in the band 174–216 MHz.

(a) Operation under the provisions of this section is restricted to biomedical telemetry devices.

(b) Emissions from the device shall be confined within a 200 kHz band which shall lie wholly within the frequency range of 174–216 MHz.

(c) The field strength of any emissions radiated within the specified 200 kHz band shall not exceed 1500 microvolts/meter at 3 meters. The field strength of emissions radiated on any frequency outside of the specified 200 kHz band shall not exceed 150 microvolts/meter at 3 meters. The emission limits in this paragraph are based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

§ 15.243 Operation in the band 890–940 MHz.

(a) Operation under the provisions of this section is restricted to devices that use radio frequency energy to measure the characteristics of a material. Devices operated pursuant to the provisions of this section shall not be used for voice communications or the transmission of any other type of message.

(b) The field strength of any emissions radiated within the specified frequency band shall not exceed 500 microvolts/meter at 30 meters. The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

(c) The field strength of emissions radiated on any frequency outside of the specified band shall not exceed the general radiated emission limits in § 15.209.

(d) The device shall be self-contained with no external or readily accessible controls which may be adjusted to permit operation in a manner inconsistent with the provisions in this section. Any antenna that may be used with the device shall be permanently attached thereto and shall not be readily modifiable by the user.

§ 15.245 Operation within the bands 902–928 MHz, 2435–2465 MHz, 5785–5815 MHz, 10500–10550 MHz, and 24075–24175 MHz.

(a) Operation under the provisions of this section is limited to intentional radiators used as field disturbance sensors, excluding perimeter protection systems.

(b) The field strength of emissions from intentional radiators operated within these frequency bands shall comply with the following:

Fundamental frequency (MHz)	Field strength of fundamental (millivolts/meter)	Field strength of harmonics (millivolts/meter)
902–928	500	1.6
2435–2465	500	1.6
5785–5815	500	1.6
10500–10550	2500	25.0
24075–24175	2500	25.0

(1) Field strength limits are specified at a distance of 3 meters.

(2) Emissions radiated outside of the specified frequency bands, except for harmonics, shall be attenuated by at least 50 dB below the level of the fundamental or to the general radiated emission limits in § 15.209, whichever is the lesser attenuation.

(3) The emission limits shown in the above table are based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

§ 15.247 Operation within the bands 902–928 MHz, 2400–2483.5 MHz, and 5725–5850 MHz.

(a) Operation under the provisions of this section is limited to frequency hopping and direct sequence spread spectrum intentional radiators that comply with the following provisions:

(1) For frequency hopping systems, at least 75 hopping frequencies, separated by at least 25 kHz, shall be used. The average time of occupancy on any frequency shall not be greater than 0.4 seconds within a 30 second period. The maximum bandwidth of the hopping channel is 25 kHz.

(2) For direct sequence systems, the minimum 6 dB bandwidth shall be at least 500 kHz.

(b) The maximum peak output power of the intentional radiator shall not exceed one watt.

(c) Radio frequency output power outside these frequency bands over any 100 kHz bandwidth shall be at least 20 dB below that in any 100 kHz bandwidth within the band that contains the highest level of the desired power.

Note: Spread spectrum systems are sharing these bands on a noninterference basis with systems supporting critical Government requirements that have been allocated the usage of these bands, secondary only to ISM equipment operated under the provisions of Part 18 of this chapter. Many of these Government systems are airborne radiolocation systems that emit a high EIRP which can cause interference to other users. Also, investigations of the effect of spread spectrum interference to U. S. Government operations in the 902–928 MHz band may require a future decrease in the power limits allowed for spread spectrum operation.

§ 15.249 Operation within the bands 902–928 MHz, 2400–2483.5 MHz, 5725–5875 MHZ, and 24.0–24.25 GHz

(a) The field strength of emissions from intentional radiators operated within these frequency bands shall comply with the following:

Fundamental frequency	Field strength of fundamental (millivolts/meter)	Field strength of harmonics (microvolts/meter)
902–928 MHz	50	500
2400–2483.5 MHz	50	500
5725–5875 MHz	50	500
24.0–24.25 GHz	250	2500

(b) Field strength limits are specified at a distance of 3 meters.

(c) Emissions radiated outside of the specified frequency bands, except for harmonics, shall be attenuated by at least 50 dB below the level of the fundamental or to the general radiated emission limits in § 15.209, whichever is the lesser attenuation.

(d) As shown in § 15.35(b), for frequencies above 1000 MHz, the above field strength limits are based on average limits. However, the peak field strength of any emission shall not exceed the maximum permitted average limits specified above by more than 20 dB under any condition of modulation.

§ 15.251 Operation within the bands 2.9–3.26 GHz, 3.267–3.332 GHz, 3.339–3.3458 GHz, and 3.358–3.6 GHz.

(a) Operation under the provisions of this section is limited to automatic vehicle identification systems (AVIS) which use swept frequency techniques for the purpose of automatically identifying transportation vehicles.

(b) The field strength anywhere within the frequency range swept by the signal shall not exceed 3000 microvolts/meter/MHz at 3 meters in any direction. Further, an AVIS, when in its operating position, shall not produce a field strength greater than 400 microvolts/meter/MHz at 3 meters in any direction within ± 10 degrees of the horizontal

VOL 54 ISS 78 AP 25 1989 UMI

plane. In addition to the provisions of § 15.205, the field strength of radiated emissions outside the frequency range swept by the signal shall be limited to a maximum of 100 microvolts/meter/MHz at 3 meters, measured from 30 MHz to 20 GHz for the complete system. The emission limits in this paragraph are based on measurement instrumentation employing an average detector. The provisions in § 15.35 for limiting peak emissions apply.

(c) The minimum sweep repetition rate of the signal shall not be lower than 4000 sweeps per second, and the maximum sweep repetition rate of the signal shall not exceed 50,000 sweeps per second.

(d) An AVIS shall employ a horn antenna or other comparable directional antenna for signal emission.

(e) Provision shall be made so that signal emission from the AVIS shall occur only when the vehicle to be identified is within the radiated field of the system.

(f) In addition to the labelling requirements in § 15.19(a), the label attached to the AVIS transmitter shall contain a third statement regarding operational conditions, as follows:

" " " and, (3) during this device (the antenna) may not be pointed within ± " " degrees of the horizontal plane.

The double asterisks in condition three (" ") shall be replaced by the responsible party with the angular pointing restriction necessary to meet the horizontal emission limit specified in paragraph (b) of this section.

(g) In addition to the information required in Subpart J of Part 2, the application for certification shall contain:

(1) Measurements of field strength per MHz along with the intermediate frequency of the spectrum analyzer or equivalent measuring receiver;

(2) The angular separation between the direction at which maximum field strength occurs and the direction at which the field strength is reduced to 400 microvolts/meter/MHz at 3 meters;

(3) A photograph of the spectrum analyzer display showing the entire swept frequency signal and a calibrated scale for the vertical and horizontal axes; the spectrum analyzer settings that were used shall be labelled on the photograph; and,

(4) The results of the frequency search for spurious and sideband emissions from 30 MHz to 20 GHz, exclusive of the swept frequency band, with the measuring instrument as close as possible to the unit under test.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 88-465; RM-6393]

Radio Broadcasting Services; Sitka, AK

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 276C2 to Sitka, Alaska, as that community's first local commercial FM service, in response to a petition for rule making filed on behalf of Alaska Broadcast Communications, Inc. Coordinates used for Channel 276C2 at Sitka are 57-03-00 and 135-20-00. With this action, the proceeding is terminated.

DATES: Effective June 5, 1989; the window period for filing applications on Channel 276C2 at Sitka, Alaska, will open on June 6, 1989, and close on June 9, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530. Questions related to the window application filing process should be addressed to the Audio Services Division, FM Branch, Mass Media Bureau, (202) 632-0394.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 88-465, adopted March 28, 1989, and released April 19, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

[MM Docket No. 88-184; RM-6116]

Radio Broadcasting Services, Ridgecrest, CA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 224B1 for Channel 224A at Ridgecrest, California, and modifies the Class A license of Bel Air Broadcasting Corporation for Station KZIQ-FM, as requested, to specify operation on the higher class channel, thereby providing that community with its first wide coverage area FM service. Coordinates at the petitioner's perferred site for Channel 224B1 at Ridgecrest are 35-28-39 and 117-41-57. With this action, the proceeding is terminated.

EFFECTIVE DATE: June 5, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

Radio Broadcasting Services; Alma and Dublin, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of State Broadcasting Company, Inc., substitutes Channel 240C2 for Channel 240A at Dublin, Georgia, and modifies its license for Station WQZY(FM) to specify operation on the higher powered channel. In addition, the Commission substitutes Channel 282A for Channel 240A at Alma, Georgia, and modifies the license of Queen City Broadcasting System, Inc. for Station WKXH-FM accordingly. Both channels can be allotted in compliance with the Commission's minimum distance separation requirements and can be used at their respective station's present transmitter sites. The coordinates for Channel 240C2 at Dublin are North Latitude 32-33-51 and West Longitude 82-52-18. The coordinates for Channel 282A at Alma are North Latitude 31-36-26 and West Longitude 82-32-46. With this action, this proceeding is terminated.

EFFECTIVE DATE: June 2, 1989.

BILLING CODE 6712-01-M

DEPARTMENT OF ENERGY

Office of the Secretary

48 CFR Parts 951 and 952

Acquisition Regulations; Government Travel Discounts to Cost Reimbursement

AGENCY: Department of Energy (DOE).

ACTION: Final rule.

SUMMARY: This rule amends the Department of Energy Acquisition Regulation (DEAR) to implement General Service Administration (GSA) Bulletin Federal Property Management Regulations (FPMR) A-95, Availability of Government Travel Discounts to Cost Reimbursement Type Contractors, dated August 19, 1988. (The proposed rule referenced FPMR A-90 which was superseded by A-95.) The GSA bulletin requests agencies to make information available to contracting officers and, where appropriate, to cost-reimbursable contractors (CRCs) regarding the use of discount air fares through specified airlines, reduced hotel/motel rates and reduced car rental rates. This rulemaking affects three parts of the DEAR: an addition to 48 CFR Part 951, Use of Government Sources by Contractors, which outlines the travel discount air fares program being made available to employees of CRCs; 48 CFR Part 952, Solicitation provisions and Contract Clauses, which sets forth the provision to be included in solicitations and the clause to be included in eligible contracts and contract modifications to effect availability of the travel discounts; and 48 CFR Part 970, DOE Management and Operating (M&O) Contracts, which references the two preceding regulations as they apply to M&O contracts.

EFFECTIVE DATE: April 25, 1989.

FOR FURTHER INFORMATION CONTACT:

Gwen Cowan, Business and Financial Policy Division (MA-422), Office of the Deputy Assistant Secretary for Procurement and Assistance Management, Washington, DC 20585, (202) 586-8159

Prentis Cook, Office of the Assistant General Counsel for Procurement and Finance (GC-34), Washington, DC 20585, (202) 586-1526

SUPPLEMENTARY INFORMATION:

I. Background
II. Procedural Requirements
A. Review Under Executive Order 12291
B. Review Under the Regulatory Flexibility Act
C. Paperwork Reduction Act
D. National Environmental Policy Act
E. Review Under Executive Order 12612
F. Public Hearing
III. Public Comments
IV. Other Changes

I. Background

Under section 644 of the DOE Organization Act, Pub. L. 95-91 (42 U.S.C. 7254), the Secretary of Energy is authorized to prescribe such procedural rules and regulations as may be deemed necessary or appropriate to accomplish the functions vested in that position. Accordingly, the DEAR was promulgated with an effective date of April 1, 1984 (49 FR 11992, March 28, 1984), 48 CFR Chapter 9.

The purpose of this rulemaking is to revise the DEAR, as necessary, to implement GSA Bulletin FPMR A-95, Availability of Government Travel Discounts to Cost Reimbursement Type Contractor, dated August 19, 1988. The bulletin, which superseded A-90, announced the conditions of availability of the GSA contract airline discount fares, reduced hotel/motel rates and car rental rates to CRCs. Regulations governing the use of contract airlines are contained in FPMR Temporary Regulation A-30, dated October 1, 1986, as amended by Supplements 1-3, which provides that CRCs working for the Government may use the same discounted contract air fares available to Federal employees while traveling of Government business, provided the contract airline agrees to the arrangement and the destination(s) are included in the city-pairs contracts negotiated by GSA with the airline(s). The regulation also provides that eligible CRC employees, with a proper identification letter from the authorizing agencies, may use a Government Transportation Request (GTR), Standard Form 1169, cash or a personal credit card, depending upon the requirements of the airline, to obtain discount air fares.

Identification of the participating contract airlines and airline city-pairs schedules are contained in the Federal Travel Director (FTD) (ISSN: 0278-0941), published monthly by GSA. The FTD also contains the names of participating car rental agencies and hotel/motels. Copies are available through the U.S. Government Printing Office, Superintendent of Documents, Washington, DC 20402, telephone (202) 783-3238.

DEAR Part 951, Use of Government Sources by Contractors, is amended by the addition of DEAR 951.70, entitled "Contractor Employee Travel Discounts," which describes the scope, policy, and responsibilities for administering the travel discount program.

DEAR Part 952, Solicitation Provisions and Contract Clauses, is amended by the addition of DEAR 952.251-70, entitled "Contractor Employee Travel Discounts," which provides the authorizing solicitation provision and contract and contract modification clause for cost-reimbursable contracts.

DEAR Part 970, DOE Management and Operating (M&O) Contracts, is amended by the addition of DEAR 970.5204-53, Contractor Employee Travel Discounts, which provides that the solicitation provisions and contract clauses at DEAR 952.251.70 are to be incorporated in DOE M&O contracts.

II. Procedural Requirements

A. Review Under Executive Order 12291

This Executive order, entitled "Federal Regulations," requires that certain regulations be reviewed by the Office of Management and Budget (OMB) prior to their promulgation. OMB Bulletin 85-7 exempts all but certain types of procurement regulations from such review. This proposed rule does not involve any of the topics requiring prior review under the bulletin and is, accordingly, exempt from such review.

B. Review Under the Regulotory Flexibility Act

This proposed rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96-354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. This rule will have no impact on interest rates, tax policies or liabilities; the costs of goods or services or other direct economic factors. It will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96-511) does not apply because this final rule does not impose additional reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq. Responsibility for recordkeeping and paperwork burden associated with collecting GTR information rests directly with GSA. GTR reporting is required by FPMR 101-41.2 and is submitted directly from the using agency/agent to GSA.

D. National Environmental Policy Act

DOE has concluded that promulgation of this rule would not represent a major Federal action having a significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432, *et seq.*, 1976), or the Council on Environmental Quality Regulations (40 CFR Part 1020), and therefore does not require an environmental impact statement or an environmental assessment pursuant to NEPA.

E. Review Under Executive Order 12612

The Department has concluded that this proposed rule does not involve issues which are expected to have a substantial direct effect on traditional state functions or their institutional interest and thus the "federalism" assessment requirements of Executive Order 12612 (52 FR 41685, October 30, 1987) do not apply.

F. Public Hearing

DOE has concluded that this rule does not involve a substantial issue of fact or law and that it should not have a substantial impact on the nation's economy or large numbers of individuals or businesses. Therefore, pursuant to Pub. L. 95-91, the DOE Organization Act, the DOE did not hold a public hearing on this rule.

III. Public Comments

This final rule is based on the Notice of Proposed Rulemaking (NOPR), which DOE published in the **Federal Register** on December 29, 1986 (51 FR 46884), wherein public comments were invited. Public comments were received from three universities. The public comments and DOE's responses and actions taken in response thereto are summarized in the paragraphs that follow:

Comment: Three commenters stated that many airlines, hotels/motels, and/or car rental companies do not offer Government discounts to CRCs, or that discount service is not acceptable because of poor schedules or unreliable service.

Response: The intent of this rule is to ensure that CRCs are aware of and use the Government discount program within the confines of availability and

meeting contract objectives. If a needed travel service is not available to a CRC employee or does not reasonably meet the needs of the traveler in fulfilling contract objectives, then there is not requirement to use Government sources. As to the matter of service, GSA and Military Traffic Management Command (MTMC) have included minimum requirements in their contracts for travel services. The FTD contains information on whom to notify if these minimum acceptable levels of service are not provided.

Comment: Three commenters stated that they are sometimes able to obtain discounts on travel services which are greater than those offered in the Government discount program.

Response: CRCs are not mandatory users of the Government discount program and DOE did not intend to make them so. To clarify the language of the rule in this regard, DOE has deleted the phrase "To the maximum extent practicable * * *" from Subpart 952.251–70 and inserted the wording "* * * when use of these discounts would result in lower overall trip costs and the discounted services are reasonably available. * * *"

Comment: One commenter objected to the final sentence of Subpart 952.251–70, paragraph (d)(1), which required CRCs to obtain the lowest available airfare.

Response: It was not the intent of DOE to require contractors to check on each and every trip with all air carriers serving a particular city-pair and document that the air carrier used offered the absolutely lowest available fare. DOE desires that its CRCs become aware of the availability of Government travel discounts and institute a system which provides reasonable assurance that the contractor is taking full advantage of these discounts when doing so will reduce overall travel costs. In some cases, it is recognized that subjective decisions must be made in determining whether a Government discount air carrier can adequately meet the travel requirements of the contractor; this kind of business judgment falls within the Federal Acquisition Regulation (FAR) definition of reasonableness of costs. To avoid any misinterpretation, the final sentence of paragraph (d)(i) of Subpart 952.251–70 of the NOPR has been deleted.

Comment: Three commenters objected to the requirement of the NOPR that CRCS make use of Government discounts whenever available and suggested either dropping the NOPR entirely or altering the requirements of the proposed contract clause.

Response: DOE recognizes the benefits of contractors having flexibility in performing the travel requirements of their contracts and does not desire to unnecessarily reduce this flexibility. However, at the same time, DOE wishes to assure that contract travel costs are kept as low as reasonably possible. DOE believes it to be completely appropriate to require contractors to obtain the lowest cost travel services which are reasonably available and fulfill the contractor's requirements. DOE has revised the wording of Subpart 952.251–70 to clarify that use of Government discount travel services is not mandatory for CRCs, but that Government discounts shall be used when less costly and reasonably available.

Comment: One commenter stated that the proposed rule should be in the FAR and appply to all Government agencies.

Response: In response to such concerns, DOE delayed publication of this final rule while participating in the development of similar coverage to be issued in FAR. It is now DOE's understanding that the FAR Councils have decided that FAR coverage on this subject will not be issued. Therefore, the DEAR coverage is now being published.

Comment: One commenter stated that requesting GTRs for each trip under a contract would delay contractor employees and suggested that blanket GTRs be issued for the entire contract period.

Response: GTRs are controlled documents which, in some cases, obligate the Government to make payments to air carriers. GSA policy does not allow the issuance of blanket GTRs for periods longer than one month. Accordingly, for the limited cases in which GTRs are the only accepted method of payment, it will be necessary for CRCs to obtain either individual trip or one-month blanket GTRs from the cognizant DOE contracting officer. Currently, only two air carriers insist upon GTRs for payment of CRC airfares; GTRs are required to obtain Government discounts for hotels/motels or car rentals.

Comment: One commenter expressed concern that CRC identification letters could be abused by CRC employees to obtain Government discounts for personal travel.

Response: The recommended format of the CRC identification letter contained in the NOPR has been modified by adding the phrase "* * * for contract related travel * * *" to the authorization to obtain discounts. DOE relies upon the integrity of its contractors to use Government discounts only as intended and authorized.

IV. Other Changes

In addition to modifications to the NOPR which were made as a result of public comments, DOE has made minor revisions to the NOPR to reflect changes in the publication of GSA Bulletin FPMR A–95, the FTD, and in the procedures for obtaining services. Also, minor editorial changes were made as required.

List of Subjects in 48 CFR Parts 951, 952, and 970

Government procurement.

For the reasons set out in the preamble, Chapter 9 of Title 48 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, DC, on April 14, 1989.

Berton J. Roth,

Deputy Assistant Secretary for Procurement and Assistance Management.

1. The authority citation for Parts 951, 952 and 970 continues to read as follows:

Authority: Section 161 of the Atomic Energy Act of 1954 (42 U.S.C. 2201), and section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254).

PART 951—USE OF GOVERNMENT SOURCES BY CONTRACTORS

2. Subpart 951.70, Contractor employee travel discounts, is added as follows:

Subpart 951.70—Contractor Employee Travel Discounts

951.7000 Scope of subpart.
951.7001 General policy.
951.7002 Responsibilities.

Subpart 951.70—Contractor Employee Travel Discounts

951.7000 Scope of subpart.

The General Services Administration (GSA) and, in some cases, the Department of Defense (DOD) Military Traffic Management Command negotiate agreements with commercial organizations to provide certain discounts to contractors performing travel under Government cost-reimbursable contracts. In the case of discount air fares and hotel/motel room rates, the GSA has established agreements with certain airlines and thousands of hotels/motels to extend discounts which were previously only available to Federal employees on official travel status. DOD has negotiated agreements with car rental companies for special rates with unlimited mileage which were also to be used by only Federal employees on official Government business. GSA Bulletin Federal Property Management Regulations (FPMRs) A–95, dated August 19, 1988, makes these three travel discounts available to Government cost-reimbursable contractors at the option of the vendor.

951.7001 General policy.

Contracting officers will encourage DOE cost-reimbursable contractors (CRCs) to use Government travel discounts to the maximum extent practicable in accordance with contractual terms and conditions. Vendors providing the service may require that Government contractor employees furnish a letter of identification signed by the authorizing contracting officer. Contracting officers shall provide CRCs with a "Standard Letter of Identification" when appropriate to do so. An example of a "Standard Letter of Identification" is included as an attachment to GSA Bulletin A–95 and at 952.251–70(e).

(a) FPMR Temporary Regulation A–30 governs the use of contract airlines and provides that CRCs working for the Government are authorized, but not required, to obtain the same contract fares offered to Federal employees if the contract air carrier has agreed to such an arrangement. FPMR Temporary Regulation A–30 further provides that CRCs may obtain contract fares by use of a Government Transportation Request, Standard Form 1169, cash or personal credit card. The Federal Travel Directory (FTD) (ISSN: 0278–0941), published monthly by GSA, identifies air carriers that have agreed to permit CRCs to purchase contract fares when traveling on official Government business.

(b) The Hotel/Motel Discount Section of the FTD lists all participating lodging locations with which GSA has negotiated rates for use by Federal travelers. The directory lists rates and facilities, and identifies those which also offer their Federal discount rates to Government contractors. Hotels/motels participating in travel discounts may, at their option, extend the reduced rates to not only CRCs but to employees of firms working under any type of Government contract. Hotels/motels usually require identification signed by the contracting officer (see above).

(c) Participating car rental firms offering discounted rates to Federal travelers, including those offering discount rates to Government contractor employees, are published in the "Rental Car Information" section of the FTD. Car rental firms which extend the discounted rates to CRCs are identified and should be used as the first source of supply for contractor car rental needs. GSA Bulletin FPMR G–173 and supplement 1 thereto provide guidelines and overall procedures to be used in obtaining discount car rental rates. CRCs should check with the individual car rental firms for details and identification requirements. Accepted methods of payment include cash and personal credit cards.

951.7002 Responsibilities.

Contracting officers will include in all cost-reimbursable solicitations and resulting contracts, or contract modifications, the provision or clause, as applicable, at 952.251–70 when significant costs involving travel by air carrier, ground transportation by rental car and lodging at a hotel or motel will be required in connection with the performance of the contract. Contracting officers may furnish Government contractors with the identification letter for presentation to contract airline, hotel/motel or car rental firm (see 951.7001 above), depending upon the requirements of the vendor.

PART 952—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Section 952.251–70, Contractor employee travel discounts, is added as follows:

952.251–70 Contractor employee travel discounts.

As prescribed in Subpart 951.70, the following provision/clause will be included in all cost-reimbursable solicitations and resulting contracts, or contract modifications, as applicable. Consistent with contract-authorized travel requirements, contractor employees shall make use of the travel discounts offered to Federal travelers, through use of contracted airlines discount air fares, hotels and motels lodging rates and car rental companies, when use of such discounts would result in lower overall trip costs and the discounted services are reasonably available to contractor employees performing official Government contract business. Vendors providing these services may require that the contractor employee traveling on Government business be furnished with a letter of identification signed by the authorized contracting officer.

(a) *Contracted airlines.* Airlines participating in travel discounts are listed in the Federal Travel Directory (FTD), published monthly by the General Services Administration (GSA). Regulations governing the use of contracted airlines are contained in the Federal Property Management Regulation (FPMR), Temporary Regulation A–30. Temporary Regulation A–30 stipulates that cost-reimbursable contractor employees may obtain discount air fares by use of a Government Transportation Request (GTR), Standard Form 1169, cash or personal credit cards. When the GTR is used, contracting officers may issue a blanket GTR for a period of not less than two weeks nor more than one month. In unusual circumstances, such as prolonged or international travel, the contracting officer may extend the period for which a blanket GTR is effective to a maximum of three months. Contractors will ensure that their employees traveling under GTR's provide the GTR number to the contracted airlines for entry on individual tickets and on month-end billings to the contractor.

(b) *Hotels/motels.* Participating hotels and motels which extend discounts are listed in the FTD, which shows rates, facilities, and identifies by code those which offer reduced rates to cost-reimbursable contractor employees while traveling on official contract business.

(c) *Car rentals.* The Military Traffic Management Command (MTMC) Department of Defense, negotiates rate agreements with car rental companies for special flat rates and unlimited mileage. Participating car rental companies which offer these terms on to cost-reimbursable contractor employees while traveling on official contract business are listed in the FTD.

(d) *Procedures for obtaining service.* (1) Identification and method of payment requirements for participating Federal contracted airlines are listed in the FTR. Travel discount air fares may be ordered by the issuance of a GTR either directly to the contractor, or to a Scheduled Airline Travel Office (SATO) or Federal Travel Management Center (FTMC), provided the letter of identification signed by the cognizant contracting officer accompanies the order. In appropriate instances, such as geographical proximity, contractors may obtain discount air fares through a DOE office or a cooperating local travel agency when neither a SATO or FTMC is available. Some airlines allow the purchase of discounted air fares with cash or credit card. (2) In the case of hotel and motel accommodations, reservations may be made by the contractor employee directly with the hotel or motel but the employee must display, on arrival, the letter of identification and any other identification required by the hotel or motel proprietorship. (3) For car rentals, generally the same procedures as in (d)(2) above will be followed in

VOL 54 ISS 78 AP 25 1989 UMI

arranging reservations and obtaining discounts.

(e) *Standard letter of identification.* Contractors shall prepare for the authorizing contracting officer a letter of identification based on the following format:

Format for Government Contractors to Qualify for Travel Discounts (To be typed on agency official letterhead)

To: (*Source of ticketing, accommodations or rental*)

Subject: Official Travel of Government Contractor

(*Full name of traveler*), bearer of this letter, is an employee of (*company name*) which is under contract to this agency under the Government contract (*contract number*). During the period of the contract (*give dates*), the employee is eligible and authorized to use available discount rates for contract-related travel in accordance with your contract and/or agreement with the Federal Government.

(*Signature, title and telephone number of the contracting officer*)

PART 970—DOE MANAGEMENT AND OPERATING CONTRACTS

4. Section 970.5204–53 is added as follows:

970.5204–53 Contractor employee travel discounts.

Insert the contract clause at 952.251–70 when the circumstances described in 951.7002 apply.

[FR Doc. 89–9909 Filed 4–24–89; 8:45 am]

BILLING CODE 6450–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 216

[Docket No. 80732–9079]

Taking and Importing of Marine Mammals Incidental to Commercial Fishing Operations

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) is issuing this rule to establish the basic living accommodations acceptable for observers placed by the Federal Government on U.S. tuna vessels and further to establish the minimum adjustments in living arrangements that will be required to accommodate a female observer on a vessel with an all male crew. NOAA has determined that it is necessary to implement minimal standards to address problems that have arisen in the past relating to accommodations for male observers and to avoid problems that may arise with the placement of female observers on tuna boats with all-male crews.

EFFECTIVE DATE: This rule is effective on June 9, 1989, until superseded or rescinded.

ADDRESS: E.C. Fullerton, Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

FOR FURTHER INFORMATION CONTACT: E.C. Fullerton, Regional Director, NMFS, Telephone: 213/514–6196.

SUPPLEMENTARY INFORMATION:

Background

Biological technicians are placed under the authority of the Federal Government to serve as "tuna/porpoise observers" aboard privately-owned, U.S.-flag tuna purse seine vessels which fish in the eastern tropical Pacific Ocean under the Marine Mammal Protection Act (MMPA) General Permit issued to the American Tunaboat Association. Fishing trips for these vessels usually range between 500 and 3,000 miles from San Diego and are at sea for 45 to 120 days with few or no port stops. These observers are college graduates with majors in biology and an emphasis in marine science or fisheries. They are trained to record data on marine mammal safety gear, marine mammals observed in the wild, fishing operations involving marine mammals, and the dissection of marine mammals that are killed incidentally during fishing.

Since 1976 more than 400 persons have been hired as observers and trained and placed on approximately 1,000 purse seine fishing trips. In August 1986, NOAA decided not to continue seeking waivers from the Office of Personnel Management which allowed the hiring of only males for the positions of observers. This decision was prompted by a complaint alleging sex discrimination by the National Marine Fisheries Service (NOAA Fisheries) Tuna/Porpoise program for not hiring females and a subsequent recommendation from the NOAA Office of Civil Rights to hire and place female observers. From the beginning of the observer program in the mid-1970s, only men had been hired and placed as observers. The basis for his limited hiring policy stemmed from the nature of the observer's living and work environment, including the fact that all vessels had all-male crews. These conditions persist but NOAA believes that, with reasonable adjustments by tuna vessels, women can be placed as observers without violating the personal privacy of either the crew members or the observer.

NOAA Fisheries attempted to place qualified and trained female observers aboard tuna vessels starting in January 1987. Two women successfully completed trips collecting the data necessary for the marine mammals program. After these two placements, preliminary injunctions issued by the United States District Court in San Diego enjoined NOAA from placing other female observers. That injunction was later lifted by the Ninth Circuit Court of Appeals, but the litigation is still underway in the District Court. NOAA has not attempted to place female observers pending completion of this rule. A hearing on the merits of the case has not been scheduled yet.

Comments on the Proposed Rule and Responses

NOAA Fisheries published a proposed rule for observer accommodations on August 19, 1988 (53 FR 31725) for public comment. Comments were received from the American Tunaboat Association and the attorneys representing vessel owners and crew members who are plaintiffs in the litigation to prevent placement of female observers. Also during this period, NOAA has gathered more information on the experience in other programs that place observers aboard foreign and U.S.-flag fishing vessels. This new information further supports the position of the Government relative to the placement of female observers. The comments received are summarized below.

Comment 1: The presence of a female observer on board violates NOAA's own regulations which prohibit the observer from interfering with the fishing operation.

Response: The regulation in question establishes limits on the role of an observer aboard a vessel. For example, an observer is not authorized to halt or in any way direct fishing operations to ensure compliance with marine mammal protection regulations. The assertion that the mere presence of a female observer during the fishing operation has a substantially greater influence over the conduct of that operation than would the presence of a male observer is not supported by the experience in other fisheries and the experience gained from the use of the two female observers who did complete fishing trips aboard U.S. tuna purse seine vessels.

Comment 2: Requiring an officer of the vessel to surrender his cabin to an observer would jeopardize that officer's ability to discipline the crew members.

would be demeaning to the officer who earned the right to a cabin through years of service, and would violate collective bargaining agreements between the vessel owners and the labor union representing the vessel crew.

Response: The rule does not require that the vessel captain's cabin be considered for either sharing or for assignment to an observer. Below the level of the captain, the Government's responsibility to provide equal employment opportunity for women outweighs the speculative damage to an officer's prestige and authority related to sharing or surrendering his cabin. Regarding the concern raised about violating a collective bargaining agreement, such an agreement cannot take precedence over the right to equal employment opportunity for tuna boat observers. No comments of any kind were received from the union regarding the collective bargaining agreement or the proposed regulations.

Comment 3: The vessel owners cannot insure against their liability stemming from intentional torts, including sexual harassment, over which they have little, if any, control.

Response: To the extent that owners are liable for intentional torts of any nature by crew members, owners would likely have the same liability for actions taken by a crew member against a female observer. To our knowledge, insurance against such a risk is not available. However, owners are not insured against intentional torts by a crew member involving a male observer. To date that issue has not been raised by an observer nor have any claims been filed by an observer against a vessel owner for intentional torts. To improve understanding of what constitutes harassment, and sexual harassment particularly, this final rule includes a definition of harassment, including sexual harassment, which was not in the proposed rule but is based upon the regulations in 50 CFR 611.2 and 611.7 governing the treatment of Government authorized observers on foreign-flag fishing vessels.

Comment 4: Under the criteria for granting an exemption from carrying a female observer in the proposed rule, no vessels in the current certificated fishing fleet would qualify for such a waiver. All vessels in the fleet have at least one private or semi-private cabin in addition to the captain's cabin.

Response: The exemption criteria are based upon the concept of providing an exemption in a situation where the obligation to carry a female observer could not be met without unreasonable, financially burdensome modifications to the existing living accommodations aboard a vessel. The criteria were not intended to provide waivers to a predetermined percentage of the certificated fleet, as this comment seems to anticipate.

Comment 5: Establishing a schedule for sharing toilet and shower facilities between the crew and a female observer is impractical given the erratic and unpredictable schedule of activity on the vessel which is driven by timing of the fishing operation.

Response: Having a female observer time-share the only toilet and shower facility aboard a vessel available for crew members on a vessel with an all-male crew is not the preferred arrangement from the Government's standpoint, as well. This situation could be made to work, if it did exist, with but minor inconvenience to the crew, with the establishment of reasonable time-sharing procedures as provided for in these regulations. However, there are in most, if not all vessels, additional toilet and shower facilities (other than the captain's facilities), separate from the crew's larger group facilities, that can be provided for the female observer's exclusive use or for time-sharing with one or two officers. Vessels that have private or semi-private cabins with their own adjoining toilet and shower facilities would not need to establish a time-sharing schedule because that facility could be assigned to the exclusive use of the female observer. If a time-sharing schedule were the choice of the vessel in this situation, it would only have to involve the observer and one other person, a very minor inconvenience if an inconvenience at all.

Comment 6: Several comments revolved around concerns for the disruption of crew members' family lives and the potential for a breakdown of crew discipline due to the presence of a female aboard the vessel.

Response: These same concerns have accompanied nearly every argument against the introduction of women into a previously all-male work environment. Experience in other cases indicates that their significance is reduced after women become an established part of the program. Female observers are now employed in other fisheries around the nation. NOAA Fisheries has gathered information on the use of female observers in programs of the State of Alaska and NOAA Fisheries on both the West and East Coasts. In some of these fisheries, the observer's assignment aboard the fishing vessel is as lengthy as the tuna fishing trips. In each of the domestic programs, problems arising from the presence of a female observer have not been reported. A few incidents against female observers aboard foreign fishing vessels in the course of this nation-wide program which has been in place for over ten years have occurred and resulted in legal actions. These few incidents, however, are not a legitimate basis for denying equal employment opportunities.

Comment 7: An environmental impact statement (EIS) should have been prepared for this rule.

Response: NOAA Fisheries prepared an environmental assessment (EA), as required by the National Environmental Policy Act (NEPA) and its implementing regulations. That assessment led the Assistant Administrator to determine that his action would not result in a significant impact on the human environment, except the social impacts. Regulations implementing NEPA do not require preparation of an EIS when the impacts to the human environment are limited to economic and social impacts. Therefore, NOAA has determined that preparation of an EIS is not required and would not add substantial new information to the decision process.

Changes From the Proposed Rule

The only substantive change to the proposed rule that is included in this final rule adds a definition of harassment and sexual harassment to 50 CFR 216.24(f)(5). This definition is drawn from the Federal regulations governing the treatment of U.S. observers on foreign-flag fishing vessels and is added to remove any uncertainty on the part of vessel owners and crews as to what constitutes harassment of an observer.

Description of the Provisions of the Final Rule

In order to ensure that Government observers aboard U.S.-flag tuna vessels are provided suitable living accommodations that will not hinder them in their performance of official duties nor unduly disrupt vessel operations, NOAA amends 50 CFR 216.24(f) to set minimum standards for such accommodations. The amended regulation requires that all observers must be provided sleeping, toilet and eating accommodations at least equivalent to a full crew member. A mattress or futon on the floor or a cot is not an acceptable replacement for a regular bunk. Meals and other galley privileges must be the same for the observer as for other crew members.

NOAA believes that it is reasonable to require standard crew member accommodations for observers because the program has been requiring that these vessels carry observers on a sample of their fishing trips since 1976.

BEST COPY AVAILABLE

VOL 54 ISS 78 AP 25 1989 UMI

Further, the schedule for placing observers is announced well in advance of the actual trip and, under the current 100 percent coverage (required by the 1988 amendments to the MMPA), a vessel owner knows that an observer will be placed on each trip of his vessel. Finally, NOAA reimburses the vessel owner for the costs of providing the observer with living accommodations and food during the trip. For these reasons, the vessel owner is expected to plan for adequate space and provisions for the assigned observer.

For female observers, additional adjustments to toilet and sleeping accommodations are required under this regulation. Female observers on a vessel with an all-male crew must be provided a bunk either in a single-person cabin or in a two-person cabin shared with a licensed officer of the vessel if reasonable privacy can be ensured by installing a curtain or other temporary room divider. If the cabin assigned to the female observer does not have attached toilet and shower facilities that can be provided for the exclusive use of the observer, then a schedule for time-sharing toilet and shower facilities must be established before the placement meeting and approved by NOAA Fisheries and must be adhered to during the entire trip. In the event there are one or more female crew members, the female observer may be provided a bunk in a cabin shared solely with female crew members, and provided toilet and shower facilities shared solely with these female crew members.

This regulation also provides vessel owners with an all-male crew a procedure for seeking an exemption from carrying female observers, under explicit criteria. The Southwest Regional Director of NOAA Fisheries may grant an exemption from the requirement to carry female observers if the vessel owner demonstrates the following:

1. The vessel will have an all-male crew; and
2. The vessel has fewer than two private (single-person) and semi-private (two-person) cabins in total, excluding the captain's cabin; and
3. A curtain or other temporary room divider cannot be installed in any of the private or semi-private cabins (excluding the captain's cabin) to provide reasonable privacy; and
4. There are no other areas (excluding the captain's cabin) that can be converted to a sleeping room without either significant expense or significant sacrifice to the crew's quarters.

Under these criteria, a vessel with two or more private or semi-private cabins, in addition to the captain's cabin, cannot qualify for an exemption and must carry an assigned observer regardless of gender. The exclusion criteria do provide that the vessel certificate of inclusion holder can qualify for the exemption without having to provide the captain's cabin for the observer.

Application for an exemption must be made by the vessel certificate of inclusion holder (or the owner in the case of a new applicant for a vessel certificate of inclusion) in writing to the Southwest Regional Director when applying for the vessel certificate of inclusion. An accurate diagram of the vessel's living areas, and other areas possibly suitable for sleeping, is required to be provided. Additional documents, such as conversion cost estimates, and an inspection of the vessel may be required to substantiate that the vessel does meet the criteria for granting an exemption. An exemption once granted is valid for the calendar year which coincides with the period that the certificate of inclusion is valid. Exemptions must be renewed annually to remain valid. The vessel certificate of inclusion holder is responsible for reporting to the Regional Director any modifications to the vessel which may affect the continued eligibility for an exemption. Upon reasonable notice NOAA Fisheries may inspect a vessel holding an exemption to determine whether the criteria for an exemption are still satisfied. The Regional Director will revoke an exemption if the exemption criteria are no longer met.

Classification

NOAA Fisheries prepared an environmental assessment as a part of developing this rule and determined that there will be no significant impact on the environment as a result of this rule. A copy of the EA is available on request (see **ADDRESS**).

The Under Secretary for Oceans and Atmosphere has determined that this rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. The present action will not have a cumulative effect on the economy of $100 million or more, nor will it result in a major increase in costs to consumers, industries, government agencies, or geographical regions. No significant adverse effects on competition, employment, investments, productivity, innovation, or competitiveness of U.S.-based enterprises are anticipated.

The General Counsel of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small businesses. There are currently 29 tuna purse seine vessels that would be subject to this rule and the individual business' cost to comply with the propose requirements would be minimal. For the most part, the cost would involve placement of a temporary room divider or, at most, the installation of one additional bunk on some vessels. Therefore, a regulatory flexibility analysis was not prepared.

This rule contains a collection of information requirement subject to the Paperwork Reduction Act (PRA). Information will be required to be submitted by vessel certificate of inclusion holders who choose to apply for an exemption that would allow them to carry only male observers. The information collection in this rule has been approved by the Office of Management and Budget under section 3504(h) of the PRA and assigned control number 0648-0208.

Public reporting burden for this collection of information is estimated to average two hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Based on comments from industry representatives responding to the publication of the proposed rule, we expect that two or fewer vessel certificate of inclusion holders will submit information required to obtain a waiver from carrying female observers. Therefore, the total information collection burden is expected to be four hours per year or less. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Southwest Regional Director, NOAA Fisheries, 300 South Ferry Street, Terminal Island, CA 90731; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612. This rule does not directly affect the coastal zone of any state with an approved coastal zone management plan.

List of Subjects in 50 CFR Part 216

Administrative practice and procedure, Imports, Marine mammals, Penalties, Reporting and recordkeeping requirements, Transportation.

Date: April 18, 1989.

James W. Brennan,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Part 216 is amended as follows:

PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

1. The authority citation for 50 CFR Part 216 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.*

2. Section 216.3 is amended by adding, in alphabetical order, a new definition for "sexual harassment" to read as follows:

§ 216.3 [Amended]

* * * * *

"Sexual harassment" means any unwelcome sexual advance, request for sexual favors, or other verbal and physical conduct of a sexual nature which has the purpose or effect of substantially interfering with an individual's work performance or creating an intimidating, hostile, or offensive working environment.

* * * * *

3. Section 216.24 is amended by revising paragraph (f)(5) and adding new paragraphs (f)(6) and (f)(7) to read as follows:

§ 216.24 Taking and related acts incidental to commercial fishing operations.

* * * * *

(f) * * *

(5) It is unlawful for any person to forcibly assault, impede, intimidate, interfere with, or to influence or attempt to influence an observer, or to harass (including sexual harassment) an observer by conduct which has the purpose or effect of unreasonably interfering with the observer's work performance, or which creates an intimidating, hostile, or offensive environment. In determining whether conduct constitutes harassment, the totality of the circumstances, including the nature of the conduct and the context in which it occurred, will be considered. The determination of the legality of a particular action will be made from the facts on a case-by-case basis.

(6)(i) All observers must be provided sleeping, toilet and eating accommodations at least equal to that provided to a full crew member. A mattress or futon on the floor or a cot is not acceptable in place of a regular bunk. Meal and other galley privileges must be the same for the observer as for other crew members.

(ii) Female observers on a vessel with an all-male crew must be accommodated either in a single-person cabin or, if reasonable privacy can be ensured by installing a curtain or other temporary divider, in a two-person cabin shared with a licensed officer of the vessel. If the cabin assigned to a female observer does not have its own toilet and shower facilities that can be provided for the exclusive use of the observer, then a schedule for time-sharing common facilities must be established before the placement meeting and approved by NMFS and must be followed during the entire trip.

(iii) In the event there are one or more female crew members, the female observer may be provided a bunk in a cabin shared solely with female crew members, and provided toilet and shower facilities shared solely with these female crew members.

(7)(i) A vessel certificate of inclusion holder (or vessel owner in the case of a new application) may seek an exemption from carrying a female observer on a vessel by applying to the Southwest Regional Director when applying for the vessel certificate of inclusion until July 10, 1989 and establishing the following:

(A) The vessel will have an all-male crew;

(B) The vessel has fewer than two private (one-person) and semi-private (two-person) cabins in total (excluding the captain's cabin);

(C) A temporary divider like a curtain cannot be installed in the private or semi-private cabin (excluding the captain's cabin) to provide reasonable privacy; and

(D) There are no other areas (excluding the captain's cabin) that can be converted to a sleeping room without either significant expense or significant sacrifice to the crew's quarters.

(ii) The exclusion criteria in paragraph (f)(7)(i) of this section can be met without having to provide the captain's cabin for the observer. The application for an exemption must also include an accurate diagram of the vessel's living areas, and other areas possibly suitable for sleeping. Additional documentation to support the application may also be required, as may an inspection of the vessel. The exemption, once granted, is valid for the same calendar year as the vessel certificate of inclusion, and the exemption must be renewed annually to remain valid. The vessel certificate of inclusion holder is responsible for reporting to the Regional Director any changes aboard the vessel within 15 days of the change which might affect the continued eligibility for an exemption. The Southwest Regional Director will revoke an exemption if the criteria for an exemption are no longer met.

Proposed Rules

Federal Register
Vol. 54, No. 78
Tuesday, April 25, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 949

[Docket No. FV-AO-88-2; AMS-88-034]

Irish Potatoes Grown in the High Plains Area of Texas and New Mexico; Secretary's Decision and Referendum Order on Proposed Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule and referendum order.

SUMMARY: This decision proposes the issuance of a marketing agreement and order regulating the handling of Irish potatoes grown in the High Plains area of Texas and New Mexico, and directs that a referendum be conducted to determine if potato producers favor the proposed order. The order would authorize regulations to establish grade, size, quality, maturity, pack and container for potatoes grown in 21 designated counties in Texas and 10 designated counties in New Mexico. In addition, the order would authorize production and marketing research and market development projects for High Plains potatoes. The program would be administered by a committee of six producers, four handlers and a public member, and would be financed by assessments levied on potato handlers. The primary objective of the program would be to improve the quality of potatoes shipped to fresh markets. This should reduce marketing losses, improve quality for consumers, and result in improved returns to growers.

DATES: The referendum shall be conducted from May 1 through May 12, 1989. The representative period for the purpose of the referendum herein ordered is January 1, 1988 to December 31, 1988.

FOR FURTHER INFORMATION CONTACT: Belinda G. Garza, Marketing Specialist, McAllen Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, 1313 East Hackberry, McAllen, TX 78501, telephone (512) 682-2833; or Robert F. Matthews, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone (202) 447-2431.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued March 30, 1988 and published in the **Federal Register** on April 4, 1988 (53 FR 10887); and Recommended Decision and Opportunity to File Written Exceptions issued January 25, 1989 and published in the **Federal Register** on January 31, 1989 (54 FR 4805).

Preliminary Statement

This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code, and therefore is excluded from the requirements of Executive Order 12291.

This decision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended, (7 U.SC. 601 *et seq.*), hereinafter referred to as the "Act", and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The proposed marketing agreement and order were formulated on the record of a public hearing held at Hereford, Texas on April 19, 1988. Notice of the hearing was published in the April 4, 1988, issues of the **Federal Register**. The notice set forth a proposed order submitted by the Texas-New Mexico Potato Steering Committee on behalf of potato producers and handlers in the proposed production area. The order would authorize regulations to establish grade, size, quality, maturity, pack and container requirements for potatoes produced in the proposed production area. In addition, production and marketing research and market development projects would be authorized.

Upon the basis of evidence introduced at the hearing and the record thereof, the Administrator of the Agricultural Marketing Service (AMS) on January 25, 1989, filed with the Hearing Clerk, U.S. Department of Agriculture, a Recommended Decision providing opportunity to file written exceptions thereto by March 2, 1989. One exception was received from Jim Cramer, a potato shipper in Muleshoe, Texas. This exception to the Recommended Decision is discussed and ruled upon in this document.

Small Business Consideration

In accordance with the provisions of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities. Small agricultural producers have been defined by the Small Business Administration (SBA) (13 CFR 121.2) as those having average annual gross revenues for the last three years of less than $500,000. Small agricultural service firms, which would include handlers under this proposed order, are defined as those with gross annual revenues of less than $3.5 million.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders and rules issued thereunder are unique in that they are brought about through group action of essentially small entities for their own benefit. Thus, both the RFA and the Act have small entity orientation and compatibility.

There are approximately 30 handlers of potatoes in the High Plans area, who handled 2,848,000 hundredweight of potatoes for fresh market in 1988 with an estimated crop value of about $26.3 million. While there is a variance in size of individual handler operations, most, if not all, of the handlers that would be regulated under this proposed order would qualify as small firms under SBA's definition. In addition, there are about 110 potato growers in the High Plains area, the majority of which could be classified as small businesses.

While the proposed order would likely impose regulations on handlers, the burden of these regulatory requirements should not be significant compared to the benefits which should accrue to such businesses. The expected impact on persons acting in a handling capacity who could be classified as small businesses was discussed in detail in the Recommended Decision. In summary, the proposed order should be operated in as efficient and economical

a manner as will tend to effectuate the declared policy of the Act. In this way all entities, small and large, would be subject to minimal regulatory requirements under the proposed order. In addition, the proposed order contains the authority to exempt from regulation special purpose shipments, as well as minimum quantities, and the order should be operated in a way that would incorporate sound business practices and efficiencies which would minimize the burden on all regulated business entities.

Regulations promulgated under the proposed order could be expected to remove from fresh market channels less desirable grades and sizes of potatoes and divert them to other outlets, such as livestock feed. An extensive cattle-feeding industry exists within the proposed production area which could serve as an outlet for culls, or low grade potatoes. Moreover, as the lower grades and smaller sizes are removed from fresh market channels, prices to growers for the resulting higher quality supplies should increase, reflecting consumer preference for this level of quality. This should outweigh any loss to growers for cull potatoes, since such quality even on the fresh market historically returns little or nothing to the producer.

Although a somewhat larger proportion of a producer's potatoes may be marketed in secondary outlets at a lower price, the greater part of production, which includes the higher or fresh market grades, should yield a greater return. Thus, the proposed order could be expected to have a positive impact on grower returns.

The impact of the proposed order upon handlers is also expected to be positive. Most handlers perform their services for an established fee based on the quantity of potatoes handled for a producer. It is anticipated that most potatoes shipped to fresh market would be required to meet certain quality and size requirements. It is also expected that an expansion of existing markets and the development of new ones would result from the increase in quality.

Further, the burden placed on handlers by the proposed order with respect to reporting and recordkeeping requirements should be negligible. Most of the information that would be reported to the committee is already compiled by handlers for other uses and is readily available.

Reporting and recordkeeping requirements issued under comparable potato marketing order programs impose an average annual burden on each regulated handler of about four hours. It is reasonable to expect that a comparable burden may be imposed under this proposed order on the estimated 30 handlers of High Plains potatoes.

The Act requires that prior to the issuance of a marketing order, a referendum be conducted of affected producers to determine whether they favor issuance of the order. In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the ballot material that will be used in the referendum herein ordered has been submitted to and approved by the Office of Management and Budget (OMB) and has been assigned OMB No. 0581-0159. It has been estimated that it will take an average of 10 minutes for each of the approximately 110 High Plains potato growers to participate in the voluntary referendum balloting. Additionally, it has been estimated that it will take about 10 minutes for each of the 30 handlers to complete the marketing agreement. The reporting and recordkeeping requirements to be imposed under the proposed order, would likewise be submitted to OMB and would not become effective prior to OMB approval.

In determining that the proposed order would not have a significant economic impact on a substantial number of small entities, all of the issues discussed above were considered. The proposed order provisions have been carefully reviewed and every effort has been made to eliminate any unnecessary costs or requirements. Although the order may impose some additional costs and requirements on handlers, it is anticipated that the programs under the proposed order would help to increase demand for potatoes grown in the High Plains area. Therefore, any additional costs should be offset by the benefits derived from expanded markets and sales benefiting handlers and producers alike.

Accordingly, it is determined that the proposed marketing order would not have a significant impact on small handlers or producers.

Moreover, potatoes grown in more than one State would be regulated under the proposed order in order to effectuate the declared purposes of the Act. Thus, any marketing orders, or their equivalent, authorized under respective State statutes could not achieve the same results as an alternative to a Federal marketing order. In accordance with the principle and purpose of Executive Order 12612, consideration has been given as to whether the proposed order would have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

It has been determined that this proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Findings and Conclusions

The findings and conclusions included in the discussion of the material issues and the rulings and general findings of the Recommended Decision set forth in the January 31, 1989, issue of the **Federal Register** (54 FR 4805) are hereby approved and adopted subject to the following modifications and corrections.

Based on the exception filed by Mr. Cramer, the findings and conclusions in material issue number 5(b) of the Recommended Decision concerning committee nomination are amended by adding the following paragraph after the 34th paragraph of material issue 5(b) to read as follows:

The exception received from Mr. Jim Cramer, a shipper from Muleshoe, Texas, opposed the 11-member committee to recommend regulations. However, record evidence shows a committee is necessary to administer the provisions of the order. Moreover, the proposed order includes provisions for the establishment and membership on the committee, procedures for nominating committee persons so that all producers and handlers will have representation, and provisions for terms of office, selection of committee members and the powers and duties of the committee. Accordingly, the committee should provide for reasonable judgment and deliberation with respect to recommendations made to the Secretary and in discharge of other committee duties. Therefore, this point of his exception is found to be without merit and is hereby denied.

Based upon the exception filed by Mr. Cramer, the findings and conclusions of material issue 5(e) of the Recommended Decision are hereby amended by adding the following paragraph after the 27th paragraph of material issue 5(e) as follows:

In his exception Mr. Cramer stated that requiring potatoes to be inspected would not guarantee quality, nor would the use of the U.S. standards as inspection criteria. Mr. Cramer also stated that the crop generally lacks full maturity because of early harvest, and that establishing maturity requirements would delay harvest. Such a delay would move the harvest and shipping period closer to that of competing producing areas and would thus put downward pressure on growers' prices.

VOL 54 ISS 78 AP 25 1989 UMI

The proposed order would authorize the committee to recommend to the Secretary a handling regulation that could require that shipments meet specified grade, size, quality, pack and container requirements. Such a regulation therefore would provide a minimum quality for the commodity shipped from the proposed production area and would serve as a basis to increase the quality of High Plains potato shipments to the benefit of growers and handlers and would be in the public interest. The proposed order could be expected to improve grower returns and expand existing markets and develop new ones. These requirements, when implemented, would provide a means of carrying out the declared policy of the Act.

Therefore, for the above reasons the exceptions concerning quality and maturity are deemed without merit and are denied.

Based upon the exception filed by Mr. Cramer, the findings and conclusions in material issue 5(f) of the Recommended Decision concerning mandatory inspection and certification are amended by adding the following paragraphs after the second paragraph of material issue 5(f) to read as follows:

In his exception, Mr. Cramer stated that the results of inspections performed at the terminal market sometimes were different from those made at shipping point resulting in a "down graded" product. No corroborative evidence was presented to confirm this statement. However, since potatoes are a perishable commodity, particularly so when less than fully mature as is typical of High Plains shipments, some deterioration may occur in transit. Nevertheless, the results of inspection of potatoes grown in the production area at shipping point would keep buyers, sellers and other interested persons informed as to the quality of the load at shipping point and as a result they would have a better indication of quality at destination. The inspection and certification of shipments are, according to record evidence, necessary. Further, they provide the most practicable way to assure that the handling of potatoes complies with the regulations that may be issued pursuant to the proposed order.

Mr. Cramer also stated that he believed not all inspectors were sufficiently well qualified. In actuality, all inspectors of the Federal and Federal-State Inspection Service are fully trained and well qualified in their positions before they are assigned to grade a commodity.

Mr. Cramer, in his exception, posed the question whether all handlers in the State of Texas would be subject to inspection requirements adopted under the order. The only handlers of whom such inspection requirements would be required would be those subject to the proposed order and its implementing regulations. The production area would be limited to 31 designated counties in the panhandle of Texas and eastern New Mexico as the High Plains. This area has been determined to constitute the smallest regional production area that is practicable and consistent with carrying out the declared policy of the Act. All industry members and interested persons in the proposed production area have had the opportunity to participate in developing the proposed order. This included a public hearing in Hereford, Texas, on April 19, 1988. Testimony at that hearing and the decision resulting from it indicate that the potato industry in the proposed production area would benefit from a locally administered regulatory program.

For the reasons stated above, the comments with respect to material issue 5(f) are hereby denied.

Rulings on Exceptions

In arriving at the findings and conclusions and the regulatory provision of this decision, the exceptions to the Recommended Decision were carefully considered in conjunction with the record evidence. To the extent that the findings and conclusions and the regulatory provisions of this decision are at variance with the exceptions, such exceptions are hereby denied for the reasons previously stated in this decision.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents entitled, respectively, "Order Regulating the Handling of Irish Potatoes Grown in the High Plains Area of Texas and New Mexico" and "Marketing Agreement Regulating the Handling of Irish Potatoes Grown in the High Plains Area of Texas and New Mexico". These documents have been decided upon as the detailed and appropriate means of effectuating the foregoing findings and conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement, be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical to those contained in the order as hereby proposed by the annexed order which is published with this decision.

Referendum Order

It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 *et seq.*) to determine whether the issuance of the annexed order regulating the handling of Irish potatoes grown in the High Plains area of Texas and New Mexico is approved or favored by producers, as defined under the terms of the proposed order, who during the representative period were engaged in the production of Irish potatoes in the aforesaid production area.

The representative period for the conduct of such referendum is hereby determined to be January 1, 1988 to December 31, 1988.

The agents of the Secretary to conduct such referendum are hereby designated to be Belinda G. Garza, Fruit and Vegetable Division, Agricultural Marketing Service, USDA, 1313 E. Hackberry, McAllen, Texas 78501, telephone (512) 682–2833; and Robert F. Matthews, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 447–2431.

List of Subjects in 7 CFR Part 949

Marketing agreements and orders, Potatoes, Texas, New Mexico.

Dated: April 19, 1989.

Kenneth A. Gilles,

Assistant Secretary for Marketing and Inspection Services.

Order Regulating the Handling of Irish Potatoes Grown in the High Plains Area of Texas and New Mexico [1]

Findings and Determinations Upon the Basis of the Hearing Record

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and order regulating the handling of Irish potatoes grown in the High Plains area of Texas and New Mexico.

Upon the basis of the record it is found that:

(1) The proposed marketing agreement and order and all of the terms and conditions thereof will tend to effectuate the declared policy of the Act;

(2) The proposed marketing agreement and order regulate the handling of Irish potatoes grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the proposed marketing agreement and order upon which a hearing has been held;

(3) The proposed marketing agreement and order are limited in their application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the Act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the Act;

(4) There are no differences in the production and marketing Irish potatoes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of Irish potatoes grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs or affects such commerce.

Order Relative to Handling

It is therefore ordered, That on and after the effective date thereof, all handling of Irish potatoes grown in the production area shall be in conformity to, and in compliance with, the terms and conditions of the said marketing agreement and order as follows:

The provisions of the proposed marketing agreement and order contained in the Recommended Decision issued by the Administrator on January 25, 1989 and published in the **Federal Register** on January 31, 1989 (54 FR 4805) shall be and are the terms and provisions of this order and are set forth in full herein. Those sections identified with an asterisk (*) apply only to the proposed marketing agreement and not to the proposed marketing order.

It is proposed that Title 7, Chapter IX be amended by adding Part 949 to read as follows:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

PART 949—IRISH POTATOES GROWN IN THE HIGH PLAINS AREA OF TEXAS AND NEW MEXICO

Authority: Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Definitions

§ 949.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department of Agriculture who has been delegated, or who may hereafter be delegated the authority to act for the Secretary.

§ 949.2 Act.

"Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601 *et seq.*).

§ 949.3 Person.

"Person" means an individual, partnership, corporation, association, or any other business unit.

§ 949.4 Production area.

"Production area" means the counties of: Bailey, Briscoe, Castro, Cochran, Dallam, Donley, Deaf Smith, Floyd, Gaines, Hale, Hall, Hartley, Hockley, Lamb, Lubbock, Motley, Oldham, Parmer, Swisher, Terry, and Yoakum located in the State of Texas, and the countries of Chaves, Curry, De Baca, Eddy, Guadalupe, Lea, Roosevelt, Torrance, Union, and Quay located in the State of New Mexico.

§ 949.5 Potatoes.

"Potatoes" means and includes all varieties of *Solanum tuberosum*, commonly known as Irish potatoes, grown in the production area.

§ 949.6 Seed potatoes.

"Seed potatoes" or "seed" means any potatoes which have been certified by the official seed certification agency of the States of Texas or New Mexico, or other seed certification agencies recognized by the Secretary, and which bear the official tags, seals, or other appropriate identification indicating such certification.

§ 949.7 Handler.

"Handler" is synonymous with "shipper" and means any person, except a common or contract carrier of potatoes owned by another person, who handles potatoes or causes potatoes to be handled.

§ 949.8 Handle or ship.

"Handle" or "ship" means to grade, package, sell, transport, or in any other way to place potatoes grown in the production area, or cause such potatoes to be placed, in the current of commerce within the production area or between the production area and any point

VOL 54 ISS 78 APR 25 1989 UMI

outside thereof. Such term shall not include the transportation, sale, or delivery within the production area of field-run potatoes to storage or to a person for the purpose of having such potatoes prepared for market.

§ 949.9 Producer.

"Producer" is synonymous with "growers" means any person engaged in a proprietary capacity in the production of potatoes for market.

§ 949.10 Fiscal period.

"Fiscal period" means the 12-month period beginning on June 1 and ending May 31 of the following year, or such other period that may be recommended by the committee and approved by the Secretary.

§ 949.11 Committee.

"Committee" means the administrative committee known as Texas-New Mexico Potato Committee established pursuant to § 949.20.

§ 949.12 Grade, size and maturity.

"Grade" means any of the officially established grades of potatoes, "Size" means any of the officially established sizes of potatoes , and "Maturity" means any of the stages of development or condition of the outer skin (epidermis) of potatoes, as defined in the United States Standards for Potatoes issued by the United States Department of Agriculture (§ § 51.1540 to 51.1556, inclusive of this title), including amendments, modifications, or variations thereof, or, such other grades, sizes, and maturities as may be recommended by the committee and approved by the Secretary.

§ 949.13 Varieties.

"Varieties" means all classifications or subdivisions of Irish potatoes according to those definitive characteristics now or hereafter recognized by the United States Department of Agriculture.

§ 949.14 Pack.

"Pack" means a quantity of potatoes in any type of container, which falls within specific weight limits, numerical limits, grade limits, size limits, or any combination of these recommended by the committee and approved by the Secretary.

§ 949.15 Container.

"Container" means a sack, bag, crate, box, basket, barrel, or bulk load or any other receptacle used in the packaging, transportation, sale or other handling of potatoes.

§ 949.17 District.

"District" means each of the geographic divisions of the production area initially established pursuant to § 949.23 or as reestablished pursuant to § 949.24.

§ 949.18 Export.

"Export" means the shipment of potatoes to any destination which is not within the 50 States, or the District of Columbia, of the United States.

Committee

§ 949.20 Establishment and membership.

(a) There is hereby established a committee, consisting of 11 members, to administer the terms and provision of this part. Six members shall be producers, four members shall be handlers, and one shall be a public member. Each committee member shall have an alternate who shall have the same qualifications as the member.

(b) Each member, other than the public member, shall be an individual who is, prior to selection and during such term of office a resident of the production area, and a producer or handler, or an officer or employee of a producer or handler.

(c) Four members shall be producers from District 1 and two members shall be producers from District 2. Three members shall be handlers from District 1 and one member shall be a handler from District 2. Any person who operates in more than one district or is engaged in both producing and handling potatoes shall elect one classification, and one district from which to be represented on the committee.

(d) The public member shall be a resident of the production area and be neither a producer nor a handler and shall have no direct financial interest in the commercial production, financing, buying, packing or marketing of potatoes, except as a consumer, nor shall such person be a director, officer or employee of any firm so engaged.

§ 949.21 Alternates.

An alternate member of the committee shall act in the place and stead of the member for whom such person is an alternate, during such member's absence or when designated to do so by such member. In the event both a member of the committee and that member's alternate are unable to attend a committee meeting, the member, the alternate, or the committee, in that order, may designate another alternate from the same district and the same classification (handler or producer) to serve in such member's stead. In the event of the death, removal, resignation, or disqualification of a member, that member's respective alternate shall serve until a successor of such member is selected and has qualified. The Committee may request the attendance of alternates at any or all meetings, notwithstanding the expected or actual presence of the respective members.

§ 949.22 Term of office.

(a) Except as otherwise provided in paragraph (b) of this section, the term of office of committee members and their respective alternates shall be for three years and shall begin as of January 1 and end the last day of December or for such other three-year period as the committee may recommend and the Secretary approve. Members and alternates shall serve in such capacity for the portion of the term of office for which they are selected, and until their respective successors are selected. No member or alternate may serve more than two consecutive terms on the committee unless specifically exempted from this requirement by the Secretary.

(b) The term of office of the initial members and alternates shall begin as soon as possible after the effective date of this subpart. As determined by the Secretary, approximately one-third of the initial committee members and alternates shall serve for a one-year term and approximately one-third of the initial committee members and alternates shall serve for a two-year term. The remainder of the initial committee members and alternates shall serve for a three-year term. Those members serving initial terms of one year or less may serve two additional, consecutive three-year terms.

§ 949.23 Districts.

To determine a basis for selecting committee members, the following districts of the production area are hereby initially established:

(a) District 1: All production area counties located within the State of Texas;

(b) District 2: All production area counties located within the State of New Mexico.

§ 949.24 Redistricting and reapportionment.

At least every five years the committee shall review the geographic distribution of potato production in the production area and, if warranted, recommend to the Secretary the reapportionment of members among districts, and the reestablishment of districts within the production area. In recommending any such changes, the Committee shall give consideration to:

(a) Shifts in potato acreage within the districts and within the production area during recent years;

(b) The importance of new production in its relation to existing districts;

(c) The equitable relationship of committee membership and districts; and

(d) Other relevant factors. No change in districting or in apportionment of members within districts may become effective less than 30 days prior to the date on which terms of office begin each year and no recommendations for such redistricting or reapportionment may be made less than 6 months prior to such date.

§ 949.25 Nominations.

(a) *Initial members.* The nomination process for the initial committee shall be conducted by the Secretary. The nominations for each of the 6 initial producer and 4 initial handler members of the committee, together with the nominations for the initial alternate members for each position, shall be made as soon as practicable after the effective date of this subpart. The nominee for the initial public member shall be submitted to the Secretary not later than 90 days after the first meeting of the committee.

(b) *Successor members.* (1) The committee shall hold or cause to be held not later than October 1 of each year, or such other date as may be specified by the Secretary, a meeting or meetings of producers and handlers in each district for the purpose of designating at least one nominee for each position as member and for each position as alternate member of the committee. In the alternative, the committee may conduct nominations by mail in a manner recommended by the committee and approved by the Secretary.

(2) The names of nominees shall be submitted to the Secretary at such time and in such manner and form as may be prescribed;

(3) Only producers may participate in designating producer nominees and only handlers may participate in designating handler nominees to the committee;

(4) Only producers and handlers who are present at such nomination meetings, or represented at such meetings by a duly authorized employee, may participate in the nomination and election of nominees for members and their alternates.

(5) Any person who operates in more than on district or is engaged in both producing and handling potatoes shall elect the classification, and the district in which to participate in designating nominees.

(6) Regardless of the number of districts in which a person produces or handles potatoes, such persons are entitled to cast only one vote for each position to be filled in the district and classification in which the person is eligible and elects to vote in designating nominees for committee members and alternates. Such vote would be cast on behalf of the voter, the voter's agents, subsidiaries, affiliates, and representatives.

(c) The public member shall be nominated by the members of the committee. The committee may establish procedures for receiving names of persons to be considered for nomination as the public member. The name of the person nominated as the public member shall be submitted by the incumbent committee to the Secretary by November 1, or such other date recommended by the committee and approved by the Secretary, of the year the term expires together with information deemed pertinent by the committee or as requested by the Secretary.

§ 949.26 Selection.

Committee members and alternates shall be selected by the Secretary on the basis of representation provided for in § 949.20 or as modified pursuant to § 949.24.

§ 949.27 Failure to nominate.

If nominations are not made within the time and manner prescribed in § 949.25, the Secretary may, without regard to nominations, select the members and alternates on the basis of the representation provided for in § 949.20 or as modified pursuant to § 949.24.

§ 949.28 Acceptance.

Any person prior to selection as a member or alternate member of the committee shall qualify by filing with the Secretary a written acceptance within the time period specified by the Secretary of the person's willingness to serve.

§ 949.29 Vacancies.

To fill any vacancy caused by the death, removal, resignation, or disqualification of a member or alternate, a successor for the unexpired term may be selected by the Secretary from nominations made pursuant to § 949.25, from previously unselected nominees on the current noninee list, or from other eligible persons.

§ 949.30 Expenses.

Members and alternates, when serving as members of the committee, shall serve without compensation but shall be reimbursed for such expenses authorized by the committee and necessarily incurred by them in attending committee meetings and in the performance of their duties under this part: Provided, that the committee at its discretion may request the attendance of one or more alternates at an or all meetings notwithstanding the expected, or actual, presence of the respective members and may pay expenses as aforesaid.

§ 949.31 Procedure.

(a) A majority of all members of the committee shall be necessary to constitute a quorum or to pass any motion or approve any committee action.

(b) The committee may provide for the members thereof, including the alternate members when acting as members, to vote by mail, telegraph, telephone, or other means of communication, provided that any such vote cast orally shall be confirmed promptly in writing. If any assembled meeting is held all votes shall be cast in person.

§ 949.32 Powers.

The committee shall have the following powers:

(a) To administer the provisions of this subpart as specified herein;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violation of the provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 949.33 Duties.

The committee shall have, among others, the following duties:

(a) As soon as practicable after the beginning of each term of office, to meet and organize, to select a chairman and such other officers as may be necessary, to select subcommittees, to adopt such rules, regulations, and bylaws for the conduct of its business as it deems necessary, and to recommend nominees for the public member and alternate;

(b) To act as intermediary between the Secretary and any producer or handler;

(c) To furnish to the Secretary such available information as may be requested;

(d) To appoint such employees, agents, and representatives as it may deem necessary, to determine the compensation and define the duties of each such person, and to protect the handling of committee funds.

1989
UMI

(e) To investigate from time to time and to assemble data on the growing, harvesting, shipping, and marketing conditions with respect to potatoes;

(f) To recommend research and development projects to the Secretary in accordance with this part;

(g) To notify handlers of each meeting of the committee to consider recommendations for regulations and of all regulatory actions taken, and to provide such notification to producers through appropriate news releases or such other means as may be available to the committee;

(h) To give the Secretary the same notice of meetings of the committee and its subcommittee(s) as is given to its members;

(i) To prepare a marketing policy;

(j) To keep minutes, books, and records which clearly reflect all of the acts and transactions of the committee. Such minutes, books, and records shall be subject to examination at any time by the Secretary or the Secretary's authorized agent or representative. Minutes of each committee meeting shall be reported promptly to the Secretary;

(k) Prior to the beginning of each fiscal period, to submit to the Secretary a budget of projected income and expenses for such fiscal period, together with a report thereon;

(l) To prepare periodic statements of the financial operations of the committee and to make copies of each such statement available to producers and handlers for examination at the office of the committee;

(m) To prepare and submit to the Secretary, an annual report, and make a copy available to each producer and grower who requests it. This annual report shall contain at least:

(1) A complete review of the regulatory operations during the fiscal period;

(2) An appraisal of the effect of such regulatory operations upon the potato industry; and

(3) Any recommendations for changes in the program.

(n) To cause the books of the committee to be audited by a certified public accountant at least once each fiscal period and at such other times as the committee may deem necessary or as the Secretary may request. The report of such audit shall show the receipt and expenditure of funds collected pursuant to this part. Two copies of such report shall be furnished to the Secretary. A copy of each such report shall be made available at the principal office of the committee for inspection by producers and handlers; however, confidential information shall be removed from the report; and

(o) To consult, cooperate, and exchange information with other marketing order committees and other individuals or agencies in connection with all proper activities and objectives under this part.

Expenses and Assessments

§ 949.40 Expenses.

The committee is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred during each fiscal period for its maintenance and functioning, and for purposes determined to be appropriate for administration of this part. Handlers shall share expenses upon the basis of a fiscal period. Each handler's share of such expenses shall be proportionate to the ratio between the total quantity of potatoes handled by such handler as the first handler thereof during a fiscal period and the total quantity of potatoes handled by all handlers as first handlers thereof during such fiscal period.

§ 949.41 Budget.

Sixty days prior to the beginning of each fiscal period, or at such other time as may be specified by the Secretary, the committee shall prepare an estimated budget of income and expenditures necessary for its administration of this part. The committee may recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures. The committee shall submit such budget to the Secretary with an accompanying report showing the basis for its calculations. An amended budget may be submitted as provided in § 949.42(c).

§ 949.42 Assessments.

(a) The funds to cover the committee's expenses shall be acquired by the levying of assessments upon handlers as provided in this subpart or from voluntary contributions for projects pursuant to § 949.48. Each person who first handles potatoes under this part shall pay assessments to the committee which assessments shall be in payment of such handler's pro rata share of the committee's expenses.

(b) Assessments shall be levied upon handlers at rates established by the Secretary. Such rates may be established upon the basis of the committee's budget, recommendations, and other available information. Such rates may be applied to specified containers used in the production area.

(c) At any time during, or subsequent to, a given fiscal period the committee may recommend the approval of an amended budget and an increase in the rate of assessment. Upon the basis of such recommendations, or other available information, the Secretary may approve an amended budget and increase the established rate of assessment.

(d) The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(e) The committee may impose a late payment charge or an interest charge on any handler who fails to pay any assessment in a timely manner. Such time and the rates shall be recommended by the committee and approved by the Secretary.

(f) In order to provide funds for the administration of this part before sufficient operating income is available from assessments, the committee may accept advance assessments and may also borrow money for such purpose. Advance assessments received from a handler shall be credited toward assessments levied against that handler during the fiscal year.

§ 949.43 Accounting.

(a) If, at the end of a fiscal period, the assessments collected are in excess of expenses incurred, such excess shall be accounted for in accordance with one of the following:

(1) If such excess is not retained in a reserve, as provided in paragraph (a)(2) of this section, it shall be refunded proportionately to the persons from whom it was collected.

(2) The committee, with the approval of the Secretary, may carry over such excess into subsequent fiscal periods as a reserve: *Provided*, That the reserves are less than approximately two fiscal period's expenses. Such reserve funds may be used to:

(i) Defray expenses, during any fiscal period, prior to the time assessment income is sufficient to cover such expenses;

(ii) Cover deficits incurred during any fiscal period when assessment income is less than expenses;

(iii) Defray expenses incurred during any period when any provisions of this part are suspended or are inoperative;

(iv) Cover necessary expenses of liquidation in the event of termination of this part.

Upon such termination, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate. To the extent practical, such funds shall be returned pro rata to the persons from whom such funds were collected.

(b) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified herein. The Secretary may at any time require the committee and its members to account for all receipts and disbursements.

(c) Upon the removal or expiration of the term of office of any member of the committee, such member shall account for all receipts and disbursements and deliver all property and funds in such member's possession to the committee, and shall execute such assignments and other instruments as may be necessary or appropriate to vest in the committee full title to all of the property, funds, and claims vested in such member pursuant to this part.

(d) The committee may make recommendations to the Secretary for one or more of the members thereof, or any other person, to act as a trustee for holding records, funds, or any other committee property during periods of suspension of this subpart, or during any period or periods when regulations are not in effect and, upon determining such action is appropriate, the Secretary may direct that such person or persons shall act as trustee or trustees for such committee.

Research and Development.

§ 949.48 Research and development.

The committee, with the approval of the Secretary, may establish or provide for the establishment of production research, marketing research, and development projects, not including paid advertising, design to assist, improve, or promote the marketing, distribution, consumption, or efficient production of potatoes. The expense of such projects shall be paid from funds collected pursuant to § 949.42.

Regulation

§ 949.50 Marketing policy.

Prior to beginning of each fiscal year, the committee shall submit to the Secretary a report setting forth its marketing policy for the ensuing season. Additional reports shall be submitted if it is deemed advisable by the committee to adopt a new marketing policy because of changes in the demand or supply situation with respect to potatoes. The committee shall publicly announce the submission of each such marketing policy report and copies thereof shall be available at the committee's office for inspection by any producer or any handler. In determining each such marketing policy the committee shall give due consideration to the following:

(a) Supply of potatoes by grade, size, quality, and maturity in the production area;

(b) Estimates of supplies of potatoes in the production area and in competing areas;

(c) Estimates of supplies of other competing commodities;

(d) Market prices by grades, sizes, containers, and packs;

(e) Anticipated marketing problems;

(f) Level and trend of consumer income; and

(g) Other relevant factors.

§ 949.51 Recommendations for regulations.

(a) Whenever the committee's marketing policy considerations deem it advisable to regulate the handling of any variety or varieties of potatoes in a manner provided in §§ 949.53, 949.54, or 949.55 it shall recommend to the Secretary grade, size, quality, maturity, or pack regulation, or any combination thereof, or amendment thereto, or modification, suspension, or termination thereof.

(b) In arriving at its recommendations for regulation pursuant to paragraph (a) of this section, the committee shall give consideration to current information with respect to the factors affecting the supply and demand for potatoes during the period or periods when it is proposed that such regulations should be effective. With each such recommendation for regulation, the committee shall submit to the Secretary the data and information on which such recommendation is predicated and such other available information as the Secretary may request.

§ 949.53 Issuance of regulations.

(a) The Secretary shall issue regulations on the handling of potatoes whenever the Secretary finds from recommendations and information submitted by the committee, or from other available information, that such regulation would tend to effectuate the declared policy of the act. Such regulations may:

(1) Limit the handling of particular grades, sizes, qualities, maturities, or packs of any or all varieties of potatoes, or any combination of the foregoing during any period.

(2) Limit the handling of particular grades, sizes, qualities, maturities or packs of potatoes differently, for different varieties, for different containers, for different packs, for different purposes under § 949.55, or for any combination of the foregoing, during any period.

(3) Fix the size, capacity, weight, dimensions, pack or marking of the container or containers which may be used in the packaging or handling of potatoes, or both.

(4) Establish in terms of grades, sizes, or both, minimum standards of quality and maturity during any period when season average prices are expected to exceed the parity level.

(b) The Secretary shall notify the committee of each regulation issued pursuant to this section. The committee shall give reasonable notice thereof to handlers.

(c) Nothing in this subpart shall authorize any regulation eliminating shipment of potatoes in bulk.

§ 949.54 Modification, suspension, or termination of regulations.

(a) In the event the committee at any time finds that, by reason of changed conditions, any regulations issued pursuant to § 949.53 should be modified, suspended, or terminated, it shall so recommend to the Secretary.

(b) Whenever the Secretary finds, from the recommendations and information submitted by the committee or from other available information, that a regulation should be modified, suspended, or terminated with respect to any or all shipments in order to effectuate the declared policy of the act, the Secretary shall modify, suspend, or terminate such regulation. If the Secretary finds that a regulation obstructs or does not tend to effectuate the declared policy of the act, the Secretary shall suspend or terminate such regulation. On the same basis and in like manner the Secretary may terminate any such modification or suspension.

§ 949.55 Handling for special purposes.

(a) Upon the basis of recommendations and information submitted by the committee, or other available information, the Secretary, may modify, suspend, or terminate requirements in effect pursuant to § 919.42 or §§ 949.51 to 949.53 inclusive, or § 949.60 or any combination thereof, to facilitate handling of potatoes for:

(1) Relief or charity;

(2) Livestock feed;

(3) Export;

(4) Seed;

(5) Potatoes, other than certified seed, sold to a producer exclusively for planting within specific geographic limits;

(6) Other purposes recommended by the committee and approved by the Secretary.

VOL. 54 ISS 78 AP 25 1989 UMI

(b) The committee, with the approval of the Secretary, shall prescribe rules and regulations to prevent potatoes handled pursuant to this section from entering trade channels other than those authorized by regulations and by such rules as may be necessary and incidental thereto.

Inspection

§ 949.60 Inspection and certification.

(a) During any period in which the handling of potatoes is regulated pursuant to §§ 949.53 through 949.55, inclusive, no handler shall handle potatoes unless such potatoes are inspected by an authorized representative of the Federal or a Federal-State Inspection Service and are covered by a valid inspection certificate, except when relieved of such requirements by §§ 949.54, 949.55, or 949.60(b).

(b) The committee may, with the approval of the Secretary, issue rules requiring inspection on regraded, resorted or repacked lots, or providing for special inspection requirements or relief therefrom. Such rules may provide distinctions, insofar as practical, between handling at shipping point and handling in receiving markets within the production area.

(c) Upon recommendation of the committee and approval by the Secretary, any or all potatoes so inspected and certified shall be identified by appropriate seals, stamps, or tags to be affixed to the container by the handler under the direction and supervision of a Federal or Federal-State Inspector or the committee. Master containers may bear the identification instead of the individual containers within said master container.

(d) Insofar as the requirements of this section are concerned, the length of time for which an inspection certificate is valid may be established by the committee with the approval of the Secretary.

(e) When potatoes are inspected in accordance with the requirements of this section, a copy of each inspection certificate issued shall be made available to the committee by the inspection service.

(f) The committee may recommend and the Secretary may require that no handler shall transport or cause the transportation of potatoes by motor vehicle or by other means unless such shipment is accompanied by a copy of the inspection certificate issued thereon, or other evidence of inspection acceptable to the Secretary such as a Positive Lot Identification stamp, to indicate that such inspection has been performed. Such certificate or document shall be surrendered to such authority as may be designated.

Reports and Recordkeeping

§ 949.80 Reports and recordkeeping.

Upon request of the committee, made with the approval of the Secretary, each handler shall furnish to the committee, in such manner and form and at such time as it may prescribe, such reports and other information as may be necessary for the committee to perform its duties under this part.

(a) Such reports may include, but are not necessarily limited to, the following:

(1) The quantities of potatoes received by variety by a handler during any or all periods of a season;

(2) The quantities disposed of by the handler, segregated as to quantities subject to regulation, and where necessary, segregated as to types of outlets and special or modified regulations applicable to alternative outlets, and including quantities not subject to regulation;

(3) The date of each such disposition and the identification of the carrier transporting such potatoes;

(4) Information essential to identification of any or all specific quantities, lots, and disposition or potatoes handled under §§ 949.53 to 949.55, inclusive, which may include identification of inspection certificates, exemption certificates, certificates of privilege, or other appropriate identification, including the destination of each special shipment, where necessary.

(b) All such reports shall be held under appropriate protective classification and custody by the committee, or duly appointed employees thereof, so that the information contained therein which may adversely affect the competitive position of any handler in relation to other handlers will not be disclosed. Compilations of general reports from data submitted by handlers is authorized, subject to the prohibition of disclosure of an individual handler identity or operations.

(c) Each handler shall maintain for at least 2 succeeding years such records and documents on potatoes received by such handler as may be necessary to verify reports submitted to the committee pursuant to this section.

(d) For the purpose of assuring compliance with recordkeeping requirements and verifying reports of handlers, the Secretary and the committee, through their duly authorized employees or agents, shall have access to any premises where applicable records are located, and where potatoes are handled, and at any time during reasonable business hours shall be permitted to inspect such handler's premises and any potatoes held by such handler and examine any and all records of such persons with respect to matters within the purview of this part.

Compliance

§ 949.81 Compliance.

No person shall handle potatoes except in conformity with the provisions of this subpart and the regulations issued thereunder.

Miscellaneous Provisions

§ 949.82 Right of the Secretary.

The members of the committee (including successors and alternates) and any agent or employee appointed or employed by the committee shall be subject to removal or suspension by the Secretary at any time. Each and every order, regulation, decision, determination or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the committee shall be deemed null and void, except as to acts done in reliance thereon or in compliance therewith prior to such disapproval by the Secretary.

§ 949.84 Termination or suspension.

(a) The Secretary may terminate or suspend the operation of any or all of the provisions of this part whenever the Secretary finds that such provisions do not tend to effectuate the declared policy of the Act.

(b) Producer referendum.

(1) The Secretary shall terminate in accordance with section 8(c)(16)B of the Act, the provisions of this part at the end of any fiscal period whenever the Secretary finds that such termination is favored by a majority of producers, who during a representative period, as determined by the Secretary have been engaged in the production of potatoes for market: *Provided,* That such majority has, during such representative period, produced for market more than fifty percent of the volume of such potatoes produced for market: *Provided further,* That termination shall be announced before the beginning of the ensuing fiscal period.

(2) The Secretary shall conduct a referendum every sixth fiscal year with the first such referendum to be conducted within 6 years from the effective date of this section, to ascertain whether continuance of this subpart is favored by producers. The Secretary may terminate the provisions of this part at the end of any fiscal year in which the Secretary has found that continuance of this subpart is not favored by producers who, during a representative period determined by the Secretary, have been engaged in the production for market of potatoes in the production area. Such termination of the part shall be announced on or before the end of the fiscal year.

(c) The provisions of this part shall in any event terminate whenever the provisions of the Act authorizing them cease to be in effect.

§ 949.85 Proceedings after termination.

(a) Upon the termination of the provisions of this part the then functioning members of the committee shall continue as joint trustees for the purpose of liquidating the affairs of the committee of all funds and property then in the possession of or under control of the committee, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustee.

(b) The said trustees shall continue in such capacity until discharged by the Secretary; shall from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of said committee and of the trustees, to such person as the Secretary may direct; and shall upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in said committee or the trustees pursuant to this part.

(c) Any person to whom funds, property, or claims have been transferred or delivered by the committee or its members pursuant to this section shall be subject to the same obligations imposed upon the members of the committees and upon the said trustees.

§ 949.86 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart or the issuance of any amendments to either thereof, shall not affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart; or release or extinguish any violation of this subpart or of any regulations issued under this subpart; or affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violations.

§ 949.87 Duration of immunities.

The benefits, privileges and immunities conferred upon any person by virtue of this part shall cease upon the termination of this part, except with respect to acts done under and during the existence of this part.

§ 949.88 Agents.

The Secretary may, by designation in writing, name any person, including any officer or employee of the United States, or name any agency in the United States Department of Agriculture, to act as the Secretary's agent or representative in connection with any of the provisions of this part.

§ 949.89 Derogation.

Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the Act or otherwise, or in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 949.90 Personal liability.

No member or alternate of the committee or any employee or agent thereof, shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, agent, or employee, except for acts of dishonesty, willfull misconduct or gross negligence.

§ 949.91 Separability.

If any provision of this part is declared invalid or the applicability thereof to any person, circumstances or thing is held invalid, the validity of the remainder of this subpart, or the applicability thereof to any other person, circumstances or thing shall not be affected thereby.

§ 949.92 Amendments.

Amendments to this subpart may be proposed from time to time by the committee or by the Secretary.

Marketing Agreement

*** § 949.97 Counterparts.**

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

*** § 949.98 Additional parties.**

After the effective date thereof, any handler may become a party to this agreement if a counterpart is executed by such handler and delivered to the Secretary. This agreement shall take effect as to such new contracting part at the time such counterpart is delivered to the Secretary, and the benefits, privileges and immunities conferred by this agreement shall then be effective as to such new contracting party.

*** § 949.99 Order with marketing agreement.**

Each signatory hereby requests the Secretary to issue, pursuant to the act, an order providing for regulating the handling of potatoes in the same manner as is provided for in the agreement.

[FR Doc. 89-9890 Filed 4-20-89; 3:43 pm]

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1933 and 1944

Self-Help Technical Assistance Grants

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to revise and redesignate its regulation for Self-Help Housing Technical Assistance Grants. This action is necessary to comply with OMB circulars and Departmental regulations. The intended effect is to encourage more communities to participate in the program by permitting an organization with fewer employees to participate. It also permits the use of a predevelopment agreement to test the feasibility of the program in a community before making a major commitment of resources. It requires that organizations have a local membership base, and increases the amount of family labor in the building of homes. It references or directly quotes, Departmental regulations that significantly affect participating grantees.

DATE: Comments must be received on or before June 26, 1989.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250. All written

VOL 54 ISS 78 AP 25 1989 UMI

comments will be available for public inspection during regular work hours at the above address. The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Submit any comment to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Farmers Home Administration, Washington, DC 22053.

FOR FURTHER INFORMATION CONTACT: Cliff Herron, Senior Loan Officer, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5346, South Agriculture Building, Washington, DC 20250, Telephone 202-382-1484.

SUPPLEMENTARY INFORMATION: This action was reviewed under USDA procedures established on Departmental Regulation 1512-1 which implements Executive Order 12291, and has been determined to be nonmajor, because the annual effect on the economy is less than $100 million. There is no major increase in cost or prices for consumers, individual industries, Federal, State, or local competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This program/activity is listed in the Catalog of Federal Domestic Assistance under number 10.420. This program/activity is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See 7 CFR 3015, Subpart V (48 FR 291115, June 24, 1983) and FmHA Instruction 1940-J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (Available in any FmHA Office).

This proposed rule replaces proposed rule, "Self-Help Technical Assistance Grants," which was published in the **Federal Register** on pages 6532-6549 on February 13, 1989. The proposed rule published on Feruary 13, 1989, is withdrawn because it was an earlier version that the Office of Management and Budget reviewed and required several significant modifications. It was inadvertently published without those modifications.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-190, an Environmental Impact Statement is not required.

In compliance with the Regulatory Flexibility Act (Pub. L. 96-354), the Administrator of the Farmers Home Administration, has determined that this action will not have a significant economic impact on a substantial number of small entities because fewer than 100 rural communities will be affected annually.

The proposed changes to the regulation decrease the role and involvement of the National Office by placing more decision making authority at the state and district level. The proposal also requires a greater level of involvement by the communities being served than previously required. It further directs the program to assist those most in need of houses, who generally are families below 50 percent of area median income, living in substandard housing and/or otherwise lack the skills to be good homeowners. It requires a greater amount of family participation in the construction of their own homes. It is anticipated that this change will increase the amount of borrower labor by more than 30 percent over what was previously required.

It changes the method used for accounting for borrower labor. The current regulation accounts for borrower labor by the number of hours contributed. The new method accounts for labor by the number of tasks performed. This method permits the use of modern construction techniques whereas the current regulation discourages their use because it could reduce the number of hours contributed.

It restricts the families who can participate in this program only to those who are approved for a section 502 loan. Previously, they could obtain other assistance as well; however, virtually everyone participating in this program in the past has done so by obtaining a section 502 loan. Therefore, it was decided to drop the reference to other sources of credit.

It gives the State Director more flexibility in directing the program to communities that may best benefit. The current method of determining the success of the program is based on the amount of saving as the difference between the cost of a contract built house and the cost of a self-help built house. This method has many flaws. It is difficult to establish the benchmark value, thereby, permitting generous funding of grantees in high cost areas and inadequate funding in low cost areas. As proposed, the State Director has greater flexibility in the use of the program and in determining the value to be placed on the self-help effort. The State Director can negotiate with the grantee on the method, amount of borrower contribution, and level of grant funding which will permit the program to be useful in rehabilitation and repair of dwellings.

The proposed regulation strengthens the supervision of the grantee by requiring the grantee to report quarterly on progress and for FmHA to determine whether their quarterly progress is on schedule. It requires FmHA to put delinquent grantees on notice and to offer them assistance so they will be successful. If after a 90 day period, the grantee is still unsuccessful, they will be terminated. This proposed change should assist more grantees to be successful.

Subpart I—Self-Help Technical Assistance Grants

1944.401 Objective.

This subpart sets forth the policies and procedures and delegates authority for providing Technical Assistance (TA) funds to eligible applicants to finance programs of technical and supervisory assistance for self-help housing as authorized under section 523 of the Housing Act of 1949. This financial assistance may pay part or all of the cost of developing, administering, or coordinating programs of technical and supervisory assistance to aid needy very low- and low-income families in carrying out self-help housing efforts in rural areas. The primary purpose is to fund organizations that are willing to locate and work with families that otherwise do not qualify as homeowners. Generally these are families below 50 percent of median incomes, living in substandard housing, and/or lacking the skills to be good homeowners. Grantees will comply with the nondiscrimination regulation Subparf E of Part 1901 of this chapter which states that no person in the United States shall, on the grounds of race, color, national origin, sex, religion, marital status, mental or physical handicap, or age be excluded from participating in, be denied the benefits of, or be subject to discrimination in connection with the use of grant funds.

§ 1944.402 Grant purposes.

FmHA may contract or make a grant to an organization to:

(a) Give technical and supervisory assistance to eligible very low- and low-income families as defined in Exhibit C of Subpart A of this part, in carrying out self-help housing efforts.

(b) Assist other organizations to provide technical and supervisory assistance to eligible families.

(c) Develop a final application, recruit families and related activities necessary to participate under paragraph (a) of this section.

§ 1944.403 Definitions.

(a) *Agreement.* The Self-Help Technical Assistance Agreement which is a document signed by Farmers Home Administration (FmHA) and the grantee which sets forth the terms and conditions under which TA funds will be made available. (Exhibit A of this subpart).

(b) *Agreement period (or grant period).* The period of time for which an agreement is in force.

(c) *Date of completion.* The date when all work under a grant is completed or the date in the TA grant agreement, or any supplement or amendment to it, when Federal assistance ends.

(d) *Disallowed costs.* Those charges to a grant which FmHA determines cannot be authorized.

(e) *Equivalent units.* Equivalent units represent the "theoretical number of units" arrived at by adding the equivalent percentage of completion figure for each family in the self-help program (pre-construction and actual construction) together at any given date during program operations. The sum of the percentage of completion figures for all participant families represent the total number of "theoretical units" completed at any point in time. Equivalent units are useful in measuring progress during the period of the grant and are not a measurement of actual accomplishments.

(f) *Equivalent value of modest housing.* The equivalent value of modest housing is the typical cost of recently constructed (within the last 12 months) FmHA financed homes in the area plus the actual or projected cost of the site and site development. If no construction has taken place during the last twelve months, the value will be established by use of the Marshall and Swift cost handbook or a similar type of handbook. This value is established by FmHA.

(g) *Mutual self-help.* The construction method by whcih participating families organized in groups of 4 to 10 families utilize their own labor to reduce the construction cost of their homes. Participating families complete construction work on their homes by an exchange of labor with one another. The mutual self-help method must be used for new construction unless an exception is obtained from the National Office under § 1944.427 of this subpart.

(h) *Organization.*

(1) A State, political subdivision, or public nonprofit corporation (including Indian Tribes or Tribal corporations); or

(2) A private nonprofit corporation that is owned and controlled by private persons or interests and is organized and operated for purposes other than making gains or profits for the corporation and is legally precluded from distributing any gains or profits to its members.

(i) *Paticipating family.* Individuals and/or their families who agree to build homes by the mutual self-help method. Participants are families with low incomes who qualify for and will receive interest credits. Participating families must have the ability to furnish their share of the required labor input regardless of the age or sex of the head of household. The participating family must be approved for a section 502 RH Loan before the start of construction, have sufficient time available to assist in building their own homes, and show a desire to work with other families. Each family in the group must contribute labor on each other's homes to accomplish the mandatory tasks plus at least 20 percent of the other tasks values listed in Exhibit C–2 of this subpart.

(j) *Self-Help.* The construction method by which an individual family utilize their labor to reduce the construction cost of their home without an exchange of labor between participating families. Unless otherwise authorized by the District Director, this method is only funded for repair and rehabilitation type construction.

(k) *Sponsor.* An existing entity that is willing and able to assist an applicant, with or without charge, in applying for a grant and in carrying out responsibilities under the agreement. Examples of sponsors are local rural electric cooperatives, institutions of higher education, community action agencies and other self-help grantees. Also, when available, regional technical and management assistance contractors may

VOL
54
ISS
78
AP
25
1989
UMI

qualify to serve as a sponsor at no charge.

(l) *Termination of a grant.* The cancellation of Federal assistance, in whole or in part, at any time before the date of completion.

(m) *Technical assistance.* The organizing and supervising of groups of families in the construction of their own homes including:

(1) Recruiting families who are interested in sharing labor in the construction of each other's homes and assisting such families in obtaining housing loans.

(2) Conducting meetings of the families to explain the self-help program and subjects related to home ownership, such as loan payments, taxes, insurance, maintenance, and upkeep of the property.

(3) Helping families in planning and developing activities that lead to the acquisition and development of suitable building sites.

(4) Assisting families in selecting or developing house plans for homes which will meet their needs and which they can afford.

(5) Assisting families in obtaining cost estimates for construction materials and any contracting that may be required.

(6) Providing assistance in the preparation of loan applications.

(7) Providing construction supervision and training for families while they construct their homes.

(8) Providing financial supervision to individual families with section 502 Rural Housing (RH) loans which will minimize the time and effort required by FmHA in processing borrower expenditures for materials and contract services.

(9) Assisting families in solving other housing problems.

§ 1944.404 Eligibility.

To receive a grant, the applicant must:

(a) Be an organization as defined in § 1944.403(h) of this subpart.

(b) Have the financial, legal, administrative, and actual capacity to assume and carry out the responsibilities imposed by the Agreement. To meet the requirement of actual capacity it must either:

(1) Have necessary background and experience with proven ability to perform responsibly in the field of mutual self-help or other business management or administrative ventures which of mutual self-help; or

(2) Be sponsored by an organization with background, experience, ability, which agrees in writing to help the applicant to carry out its responsibilities.

(c) Legally obligate itself to administer TA funds, provide adequate accounting of the expenditure of such funds, and comply with the Agreement and FmHA regulations.

(d) If the organization is a private nonprofit corporation, meet the following conditions:

(1) Be a corporation organized for the primary purpose of assisting very low- and low-income families to obtain adequate housing.

(2) Have a local membership base of at least 30 people.

(3) Adopt, if it is being newly organized, Articles of Incorporation and Bylaws, which include the purposes and powers of an eligible applicant under this subpart.

(4) Have a Board of Directors which consist of not less than five but generally not more than nine members.

(5) If currently engaged or plan to become engaged in activities other than the operation of the TA grant, provide documentation as to the percentage of salaries, cost of space, phones, etc., that will be charged to each activity.

§ 1944.405 Authorized use of grant funds.

(a) Payment of salaries of personnel as authorized in the Agreement.

(b) Payment of necessary and reasonable office expenses such as office rental, office utilities, and office equipment rental. The purchase of office equipment is permissible when the grantee determines it to be more economical than renting.

(c) Purchase of office supplies such as paper, pens, pencils, and trade magazines.

(d) Payment of necessary administrative costs including but not limited to items such as Worker's Compensation, liability insurance, audit reports, travel and training, and employer's share of social security and health benefits.

(e) Purchase, lease, or maintenance of power or specialty tools such as a power saw, electric drill, sabre saw, ladders, and scaffolds, which are needed by the participating families. The participating families, however, are expected to provide their own hand tools such as hammers and handsaws.

(f) Funding a tax deferred pension plan for permanent employees. The organization's contribution, in any year, may not exceed 5 percent of the employee's salary or $2,000, whichever is less.

(g) Payment of reasonable fees for training of grantee personnel including board members. This may include the cost of travel and per diem to attend in or out-of-State training as authorized by the board of directors and, when necessary, for the employee to do the current job.

(h) Payment of services rendered by a sponsor or other organization after the grant is closed and when it is determined the sponsor can provide the necessary services which will result in an overall reduction in the cost of assistance. Typically, this will be limited to new grantees and an existing grantee for the period of time that its size or activity does not justify a full staff. A full staff is a full or part-time director, project worker, secretary-bookkeeper, and a construction supervisor.

(i) Payment of certain consulting and legal costs required in the administration of the grant if such service is not available without cost. This does not include legal expenses for claims against the Federal Government. (Legal costs that may be incurred by the organization for the benefit of the participating families may be paid with prior approval of the State Director).

(j) Payments of the cost of an accountant to set up an accounting system and perform audits that may be required.

(k) Payments of reasonable expenses of board members for attending regular or special board meetings.

§ 1944.406 Prohibited use of grant funds.

(a) Hiring personnel specifically for the purpose of performing any of the construction work for participating families in the self-help projects.

(b) Buying real estate or building materials or other property of any kind for participating families.

(c) Paying any debts, expenses, or costs which should be the responsibility of the participating families in the self-help projects.

(d) Paying for training of an employee which is beyond what is necessary for the employee to perform his or her current job or that would give him or her an advantage for future advancement.

(e) Paying costs (including salaries) that are not directly related to helping very low- and low-income families obtain housing consistent with the objectives of this program.

§ 1944.407 Limitations.

The amount of the TA grant depends on the experience and capability of the applicant and must be justified based on the number of families to be assisted. As a guide, the maximum grant amounts for any grant period will be limited to:

(a) An average TA cost per unit of no more than 12 percent of the cost of equivalent value of modest homes built in the area. (Upon request, the County Supervisor will provide the grantee the average cost of modest homes for the area); or

(b) An average TA cost per unit that does not exceed the difference between the equivalent value of modest homes in the area and the average mortgage of the participating families plus $1,000; or

(c) A TA cost that does not exceed an amount established by the State Director. The State Director may authorize a greater TA cost than paragraph (a) or (b) of this section when needed to accomplish a particular objective, such as requiring the grantee to serve very low-income families, remote areas, or similar situations; or

(d) A negotiated amount for repair and rehabilitation type proposals.

§ 1944.408 [Reserved]

§ 1944.409 Executive Order 12372.

The Self-Help Program is subject to the provision of Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under Subpart J of Part 1940 of this chapter, "Intergovernmental Review of Farmers Home Administration Program Activities," (available in any FmHA office), new applicants for the Self-Help Program must submit their Statement of Activities to the State single point of contact prior to submitting their preapplication to FmHA. The name of the point of contact is available from the FmHA State Office.

§ 1944.410 Processing preapplications, applications, and completing grant dockets.

(a) *Form SF-424, "Application for Federal Assistance."* Form SF-424 in an original and one copy must be submitted by the applicant to the District Director. It will be used to establish communication between the applicant and FmHA, determine the applicant's eligibility, determine how well the project can compete with similar applications from other organizations and eliminate any proposals which have little or no chance for Federal funding before applicants incur significant expenditures for preparing an application. In addition, the following information will be attached to and become a part of the preapplication:

(1) Complete information about the applicant's previous experience and capacity to carry out the objective of the agreement.

(2) If the applicant is already formed, a copy of or an accurate reference to the specific provisions of State law under which the applicant is organized; a certified copy of the applicant's Articles of Incorporation and Bylaws or other evidence of corporate existence; certificate of incorporation for other than public bodies; evidence of good standing from the State when the corporation has been in existence 1 year or more; the names and addresses of the applicant's members, directors, and officers; and, if another organization is a member of the applicant-organization, its name, address, and principal business. If the applicant is not already formed, attach copies of the proposed organizational documents as outlined in § 1944.404(d)(3) of this subpart.

(3) A current (less than 6 months) dated and signed financial statement showing the amounts and specific nature of assets and liabilities together with information on the repayment schedule and status of any debt owed by the applicant. If the applicant is being sponsored by another organization, the same type of financial statement also must be provided by the applicant's sponsor.

(4) A narrative statement which includes information about the amount of the grant funds being requested, area(s) to be served, need for self-help housing in the area(s), the number of self-help units proposed to be buit, rehabilitated or repaired during the agreement period, housing conditions of low-income families in the area and reasons why families need self-help assistance. Evidence should be provided that the communities support the activity and that there are low-income families willing to contribute their labor in order to obtain adequate housing. The pre-application may contain information such as census materials, local planning studies, surveys, or other readily available information which indicates a need in the area for housing of the type and cost to be provided by the proposed self-help TA program.

(5) A plan of how the organization proposes to reach very low-income families living in houses that are deteriorated, dilapidated, overcrowded, and/or lack plumbing facilities.

(6) A proposed budget which will be prepared on SF-4244 "Budget Information—Non-Construction Programs" will be completed to address applicable assurances as outlined in § 3015.205 of 7 CFR Part 3015. State and local Government will include an assurance that the grantee shall comply with all applicable Federal statutes and regulations in effect with respect to the periods for which it receives grant funding. The State and Local governments shall also comply with 7 CFR 3016.

(7) A preliminary survey as to the availability of lots and projected cost of the sites.

(8) A list of other activities the applicant is engaged in and expects to continue and a statement as to other sources of funding and whether it will have sufficient funds to asssure continued operation of the other activities for at least the period of the agreement.

(9) Whether assistance under paragraph (d) of this section is requested and a brief narrative identifying the need, amount of funds needed, and projected time period.

(b) *Preapplication review.* (1) The District Director, within 30 days of receipt of the preapplication, Form SF-424 and all other required information and material will complete a thorough review for completeness, accuracy, and conformance to program policy and regulations. Incomplete preapplications will be returned to the applicant for completion. The applicant should be given the name of the regional technical assistance contractor. The County Supervisor in the prospective county will be contracted as to the need for the program in the proposed area and if the necessary resources are available to the grantee. This will include a discussion of the number of 502 and 504 units that will need to be committed to the grantee and the potential work impact on the office during the grant period. If it is determined that the county office lacks the resources (either personnel or funds) to process all loan requests in a timely manner, the District Director must communicate this need to the State Director along with a recommended solution. (Lack of resources at the county level are not grounds to deny a request). After the District Director has determined that the preapplication is complete and accurate, the District Director will assemble the material in an applicant case file and forward it to the State Director. The case file, as a minimum, must contain the following:

(i) Form SF-424, "Application for Federal Assistance",

(ii) Original and one copy of Form FmHA 1940-20, "Request for Environmental Information," and

(iii) Eligibility recommendations.

(2) The State Director may, if needed, submit the organizational documents with any comments or questions to OGC for a preliminary opinion as to whether the applicant is or will be a legal organization of the type required by these regulations and for advice on any other aspects of the preapplication.

(3) The State Director, if unable to determine eligibility or qualifications with the advice of the OGC, may submit the preapplication to the National Office for review. The preapplication will contain all memoranda from OGC giving the results of its review. The State

VOL 54 ISS 78 AP 25 1989 UMI

Director will identify in the transmittal memorandum to the National Office the specific problem and will recommend possible solutions and any information about the applicant which would be helpful to the National Office in reaching a decision.

(4) After an eligibility determination has been made—which should be completed within 30 days unless OGC is involved—the State Director will:

(i) If the applicant is eligible, contact the National Office as to the availability of funds or submit the proposal to the National Office for authorization if the requested amount exceeds the State Director's approving authority. If funds are available, the final review officer, either the State Director or the Assistant Administrator, Housing will issue a letter of conditions that the applicant must meet and direct the District Director to issue Form AD–622, "Notice of Preapplication Review Action."

(ii) If the applicant is determined not eligible, the State Director will direct the District Director to issue Form AD–622, "Notice of Preapplication Review Action."

(c) *Form AD–622, "Notice of Preapplication Review Action."* (1) If the applicant is eligible and after the State Director has returned the preapplication information and the executed original Form FmHA 1940–20 to the District Office, the District Director will, within 5 days, prepare and issue Form AD–622, "Notice of Preapplication Review Action." The original Form AD–622 will be signed and delivered to the applicant along with the letter of conditions, a copy to the applicant's case file, a copy to the County Supervisor, and a copy to the State Director.

(2) If the applicant is not eligible and after the State Director has returned the preapplication information, the District Director will within 5 days notify the applicant on Form AD–622. The notification will inform the applicant that an appeal of the decision may be made to the National Appeals Staff under Subpart B of Part 1900 of this chapter.

(3) If the applicant is eligible and no funds are available, the State Director will return the preapplication information to the District Director who will, within 5 days, notify the applicant on Form AD–622. The notification will explain the facts concerning the lack of funding and that FmHA will notify them when funding will be available. This is not an appealable decision.

(d) *Self-help technical assistance grant Predevelopment agreement.* If the grantee requested predevelopment assistance and the State Director determines that the applicant lacks the financial resources to meet the conditions of grant approval, a grant of up to $10,000 and for up to six months will be made in order for the applicant to provide what is required by paragraph (e) of this section. This is a one time grant and is available only after the letter of conditions has been issued. Denial of this assistance is an appealable decision under Subpart B of Part 1900 of this chapter.

(e) *Form SF–424, "Application for Federal Assistance."* The applicant will submit Form SF–424 in an original and one copy to the District Director. The application should provide a detailed proposal of its goals including:

(1) Names, addresses, number in household, and total annual household income of families who have been contacted by the applicant and are interested in participating in a self-help housing project. Community organizations including minority organizations may be used as a source of names of people interested in self-help housing.

(2) Proof that the first group of prospective participating self-help families have qualified for financial assistance from FmHA.

(3) Evidence that lots are optioned by the prospective participating self-help families for the first group. Evidence that lots are available for the remaining groups.

(4) Detailed cost estimates of houses to be built by the mutual self-help method. Plans and specifications should be submitted with the cost estimates.

(5) Proposed staffing need, including qualifications, experience, proposed hiring schedule, and availability of any prospective employees.

(6) Name, address, and official position of the applicant's representative or representatives authorized to act for the applicant and work with FmHA.

(7) Budget information including a detailed budget for the Agreement period based upon the needs outlined in the proposal. Standard Form 424A will be completed to furnish the budget information.

(8) Indirect or direct cost policy and proposed indirect cost rate developed in accordance with 7 CFR Part 3015, Uniform Federal Assistance Regulations, and 7 CFR Part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments.

(9) Personnel procedures and practices that will be established or are in existence. Forms to be used should be submitted with the application.

(10) A proposed monthly activities schedule showing the proposed dates for starting and completing the recruitment, loan processing and construction phases for each group of participant families.

§ 1944.411 Conditions for approving a grant.

A grant may be approved for an eligible applicant when the conditions in the letter of conditions are met and the following conditions are present:

(a) The applicant has or can hire, or contract directly or indirectly with, qualified people to carry out its responsibilities in administering the grant.

(b) The applicant has met all of the conditions listed in § 1944.410(e) of this subpart.

(c) The grantee furnishes a signed statement that it complies with the requirements of the Departmental regulations found at 7 CFR Part 3015, Uniform Federal Assistance Regulations, and 7 CFR Part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments.

(d) A resolution has been adopted by the board of directors which authorizes the appropriate officer to execute Exhibit A, "Self-Help Technical Assistance Grant Agreement," and Form FmHA 400–1, "Equal Opportunity Agreement."

(e) The grantee has fidelity bonding as covered in 7 CFR 3015 if a nonprofit organization, or, if a State and Local Government, to the extent required in 7 CFR 3016.

(f) The grantee has agreed by completing SF 424A, Assurances that it will establish a recordkeeping system that is certifiable by a certified public accountant that it adequately meets the Agreement.

(g) The grantee has established an interest bearing checking account on which at least two bonded officials will sign all checks issued and understands that interest earned in excess of $100 annually must be submitted to FmHA quarterly. (The use of minority depository institutions is encouraged.)

(h) The grantee has developed an agreement to be executed by the grantee and the self-help participants which clearly sets forth what is expected of each and has incorporated Exhibit C–2, "Breakdown of Construction Development," as a part of it which clearly shows what work is expected of the participating family.

§ 1944.412 Docket preparation.

When the application and all items required for the complete docket have been received, the District Director will thoroughly examine it to insure the application has been properly and accurately prepared and that it includes the required dates and signatures. The docket items will be assembled and distributed by the District Director in the following order:

Form No.	Name of form or document	Total No. of copies	Signed by applicant	Number for agreement docket	Copy for applicant
SF–424	Application for Federal Assistance	3	1	1–O&1–C	1–C
AD–622	Notice of Preapplication Review Action.	2		1–C	1–O
FmHA 1940–1	Request for Obligation of Funds	4	2	3–O&2–C	1–C
FmHA 400–4	Assurance Agreement	2	1	1–O	1–C
	Certified Copy Authorizing Resolution	1	1	1–O	
	Self-Help Technical Assistance Grant Agreement (Exhibit A).	2	1	1–O	1–C
	Any Personnel Forms to be used	2		1–O	1–C

O=Original.
C=Copy.

§ 1944.413 Grant approval.

(a) *Approval of grant.* Within 30 days of the grantee meeting the conditions of § 1944.411 of this subpart, the approving official will:

(1) Execute and distribute Form FmHA 1940–1 in accordance with the Forms Manual Insert (FMI).

(2) Prepare and distribute Form FmHA 071–1, "Project Information Card," in accordance with FmHA Instruction 2015–C (available in any FmHA State Office.)

(3) After the Finance Office acknowledges that funds are obligated, request an initial advance of funds on Form FmHA 440–57, "Acknowledgment of Obligated Funds/Check Request," in accordance with the FMI. The amount of this request should cover the applicant's needs for the remainder of the month in which the grant is closed plus the next month. Subsequent advances will cover only a one month period.

(b) *Cancellation of an approved grant.* An approved grant may be canceled before closing if the applicant is no longer eligible, the proposal is no longer feasible, or the applicant requests cancellation. Cancellation will be accomplished as follows:

(1) The District Director will prepare Form FmHA 1940–10, "Cancellation of U.S. Treasury Check and/or Obligation," according to the (FMI) and send it to the State Director with the reasons for cancellation. If the State Director approves the request, Form FmHA 1940–10 will be returned to the District Office for processing in accordance with the FMI.

(2) The District Director will notify the applicant of the cancellation and the right to appeal under Subpart B of Part 1900 of this chapter. If the applicant requested the cancellation, no appeal rights are provided, but the applicant will still be notified of the cancellation.

(c) *Disapprovol of grant.* If a grant is disapproved after the docket has been developed, the approving official will state the reason on the original Form FmHA 1940–1, or in a memorandum to the District Director. The District Director will notify the applicant in writing of the disapproval and the reason for disapproval. Also, the notification will inform the applicant of its appeal rights under Subpart B of Part 1900 of this chapter.

§ 1944.414 [Reserved]

§ 1944.415 Grant approval and other approving authorities.

(a) The State Director is authorized to approve or disapprove TA grants under this subpart. For a grant in excess of $300,000, or in the case of a grant amendment when the amount of the grant plus any unexpended funds from a previous grant will exceed $400,000, prior written consent of the National Office is required. In such cases, the docket along with the State Director's recommendations must be submitted to the National Office for review.

(b) The State Director may approve a grant not to exceed $10,000 to an eligible organization under § 1944.410(d) of this subpart. This grant must be limited to 6 months and funds must be used for the development of the final application, family recruitment, and related activities.

(c) The authority to contract for services is limited to the Administrator of FmHA.

(d) Monthly expenditures of the grantee will normally be approved by the District Director unless:

(1) The grantee operates in only one county, in which case the authority may be delegated to the County Supervisor.

(2) The grantee operates in more than one FmHA District, in which case the State Director will designate the approving official.

(3) The grantee operates in more than one State Director's jurisdiction, in which case the Administrator will designate the approving official.

(4) The expenditure is under contract authority, in which case the Contracting Official Representative will approve the monthly expenditure.

§ 1944.416 Grant closing.

The grant is closed on the date the Agreement is executed as defined in § 1944.403(a) by the applicant and the government. Funds may not be advanced prior to the signing of the Agreement. The District Director or Assistant District Director are authorized to execute the Agreement for the Farmers Home Administration. Person(s) authorized by resolution may sign for the applicant.

1944.417 Servicing actions after grant closing

FmHA has a responsibility to help the grantee be successful and help the grantee avoid cases of fraud and abuse. Servicing actions also include correlating activities between the grantee and FmHA to the benefit of the participating families. The amount of servicing actions needed will vary in accordance with the experience of the grantee, but as a minimum the following actions are required:

(a) Monthly, the grantee will provide the District Director with a request for additional funds on Form SF–270, "Request for Advance or Reimbursement." This request need only show the amount of funds used during the previous month, amount of unspent funds, projected need for the next 30 days, and written justification if the request exceeds the projected need for the next 30 days. This request must be in the District Director's office fifteen days prior to the beginning of the month. Upon receipt of the grantee's request, the District Director will:

(1) If the request appears to be in order, process Form FmHA 440–57 so that delivery of the check will be possible on the first of the next month.

VOL
54
ISS
78
AP
25
1989
UMI

(2) If the request does not appear to be in order, immediately contact the grantee to resolve the problem. After the contact:

(i) If the explanation is acceptable, process Form FmHA 440–57 so delivery may be possible by the first of the next month, or

(ii) If the explanation is not acceptable, request the amount of funds that appear reasonable for the next 30 days on Form FmHA 440–57. The unapproved funds request will be held in abeyance until further explanation is received and then either disapproved or added to the next month's request.

(b) Quarterly, the grantee will submit Exhibit C of this subpart (Evaluation Report of Self-Help Technical Assistance Grants) in an original and three copies to the County Supervisor on or before January 15, April 15, July 15 and October 15 which will verify its progress toward meeting the objectives stated in the Agreement and the application. The County Supervisor will immediately complete the County Office Review part and forward the report to the District Office. After Exhibit C is received in the District Office a meeting should be scheduled between the grantee, District Director, and the County Supervisor since this is an opportune time for both the grantee and FmHA to review progress to date and make necessary adjustments for the future. This meeting is required if the grantee was previously identified as a problem grantee or will be identified as a problem grantee at this time. Regardless of whether a meeting will be held, the following will be done:

(1) Exhibit C and other information will be evaluated to determine progress made to date. The District Director will comment on Exhibit C as to whether the grantee is ahead or behind schedule in each of the following areas:

(i) *Assisting the projected number of families.*

(ii) *Serving very low-income applicants.* Is the grantee reaching a minimum of 40 percent very low-income families with each group?

(iii) *Equivalent units (EUs).* Is the number of EUs completed representative of lapse in time of the grant? For example, if 25 percent of the grant period has elapsed, are 25 percent of the number of EUs completed?

(iv) *Labor contributions by the family.* Are the families working together and are they completing the labor tasks as established on Exhibit C–2?

(v) *Use of grant funds.* Are grant costs within the limits defined in § 1944.407 of this subpart?

(2) The District Director will submit Exhibit C to the State Director who will evaluate the quarterly report along with the District Director's comments. If the State Director determines the grantee is progressing satisfactorily, the State Director will sign and forward Exhibit C to the National Office. However, if the State Director determines the grantee is not performing as expected, the State Director will notify the grantee that they have been classified a "High Risk" grantee. The notice will specify the deficiencies and inform the grantee of proposed remedies for noncompliance. If the grantee is a nonprofit organization Subpart N, Grant and Subgrant Closeout, Suspension and Termination, of 7 CFR 3015 will apply and for State and Local Governments, §§ 3016.43 and 3016.44 of Subpart C, Post-Award Requirements, of 7 CFR 3016 will apply. The State Director will have to have the written authorization of the National Office prior to implementing any closeout, suspension and termination actions due to noncompliance. The notice will advise the grantee the FmHA is available to assist and provide the name and address of an organization that is under contract with FmHA to assist them. The State Director will forward a copy of Exhibit C, District Directors comments, and the reasons for classifying them as "High Risk" to the National Office, Single Family Housing, Special Programs Branch. When the period of time provided for corrective action has expired, an assessment will be made of the progress by the grantee toward correcting the situation. If the State Director determines:

(i) The situation has been corrected or reasonable progress has been made toward correcting the situation, the "High Risk" status will be lifted and the grantee so notified.

(ii) The situation has not been corrected but it is correctable if additional time is granted, an extension will be issued.

(iii) The situation has not been corrected and it is unlikely to be corrected if given additional time, the grant will be terminated under § 1944.426(b)(1) of this subpart.

§ 1944.418 [Reserved]

§ 1944.419 Final grantee evaluation.

Between the 18th and 24th month of the grant period, an evaluation of the grantee will be conducted by FmHA. The State Director may use FmHA employees or an organization under contract to FmHA to provide the evaluation. The evaluation is to determine how successful the grantee was in meeting goals and objectives as defined in the agreement, application, this regulation, and any amendments.

(a) This is a quantitative evaluation of the grantee to determine if it met its goals in:

(1) Assisting the projected number of families in obtaining adequate housing.

(2) Meeting the goal of assisting very low-income families.

(3) Meeting the family labor requirement in § 1944.411(h) and Exhibit C–2 of this subpart.

(4) Keeping costs within the guide set in § 1944.407, and

(5) Meeting other objectives in the Agreement.

(b) The evaluation is a narrative addressed to the State Director with a copy to the National Office, Single Family Housing Processing Division. It will be in 3 parts, namely; findings, recommendations, and an overall rating. The rating will be either unacceptable, acceptable, or outstanding, as follows:

(1) Outstanding if the grantee met or exceeded all of the goals in paragraph (a) of this section.

(2) Acceptable if the grantee met or exceeded all of the goals as defined in paragraph (a) except two, or

(3) Unacceptable if the grantee failed to obtain an acceptable rating.

(c) After the State Director has reviewed the evaluation, a copy will be mailed to the grantee. The grantee may request a review of the evaluation with the District Director. This review is for clarification of the material and to dispute the findings if they are known to be wrong. The rating is not open for discussion except to the extent it can be proven that the findings do not support the rating. If this is the case, the District Director will file an amendment to the State Director.

§ 1944.420 Extension or revision of the grant agreement.

The State Director may authorize the District Director to execute on behalf of the Government Exhibit D of this subpart, "Amendment to Self-Help Technical Assistance Grant Agreement," at any time during the grant period provided:

(a) The extension period is for no more than one year from the final date of the existing Agreement,

(b) The need for the extension is clearly justified,

(c) If additional funds are needed, a revised budget is submitted with complete justification, and

(d) The grantee is within the guidelines in § 1944.407 of this subpart or the State Director determines that the best interest of the government will be served by the extension.

§ 1944.421 Refunding of an existing grantee.

Grantees wishing to continue with self-help efforts after the end of the current grant plus any extensions should file Form SF–424, "Application For Federal Assistance," in accordance with § 1944.410(e). It is recommended that it be filed at least 6 months before the end of the current grant period. Funds from the existing grant may be used to meet the conditions of a new grant provided the area to be served is the same geographic area, as defined in the current grant. In addition to meeting the conditions of an applicant as defined in § 1944.411 of this subpart, the grantee must also have received or will receive an acceptable rating on its current grant unless an exception is granted by the State Director. The State Director may grant an exception to the rating if it is determined that the reasons causing the previous unacceptable rating have been removed or will be removed with the approval of this grant.

§ 1944.422 Audit and other report requirements.

The grantee must submit an audit to the appropriate FmHA District Office annually (or biannually if a State or local government with authority to do a less frequent audit requests it) and within 90 days of the end of the grant period or termination of the grant. The audit, conducted by the grantee's auditors, is to be performed in accordance with Generally Accepted Government Auditing Standards (GAGAS), using the publication, "Standards for Audit of Governmental Organizations, Programs, Activities and Functions," developed by the Comptroller General of the United States in 1981, and any subsequent revisions. In addition, the audits are also to be performed in accordance with 7 CFR Part 3015, Uniform Federal Assistance Regulations and 7 CFR Part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments and FmHA requirements as specified in this subpart.

(a) *Nonprofit organizations and others.* These organizations are to be audited in accordance with FmHA requirements, and 7 CFR Part 3015, Uniform Federal Assistance Regulations. These requirements also apply to public hospitals, public colleges, and universities if they are excluded from the audit requirements of paragraph (b) of this section.

(1) An audit conducted by the grantee's auditor shall be supplied to the FmHA District Director as soon as possible but in no case later than ninety (90) days following the period covered by the grant agreement.

(2) Auditors shall promptly notify USDA OIG Regional Inspector General and the FmHA District Office, in writing, of any, indication of fraud, abuse, or illegal acts in grantees use of grant funds or in the handling of borrowers accounts.

(3) Nonprofit organizations that receive less than $25,000 a year in Federal financial assistance need not be audited.

(b) *State and local governments and Indian tribes.* These organizations are to be audited in accordance with this subpart and 7 CFR Part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments of the audits being forwarded by the grantee to the FmHA District Director and the appropriate Federal cognizant agency. "Cognizant agency" means the Federal agency assigned by OMB Circular A–128. Within the Department of Agriculture (USDA), the OIG shall fulfill cognizant agency responsibilities. Smaller grantees not assigned a cognizant agency by OMB should contract the Federal agency that provided the most funds. When USDA is designated as the cognizant agency or when it has been determined by the borrower that FmHA provided the major portion of Federal financial assistance, the State Director will contact the appropriate USDA OIG Regional Inspector General. FmHA and the borrower shall coordinate all proposed audit plans with the appropriate USDA OIG.

(1) State and local governments and Indian tribes that receive $25,000 or more a year in Federal financial assistance shall have an audit made in accordance with 7 CFR Part 3016.

(2) State and local and Indian tribes that receive less than $25,000 a year in Federal financial assistance shall be exempt from 7 CFR Part 3016.

(3) Public hospitals and public colleges and universities may be excluded by the State Director from OMB Circular A–128 audit requirements. If such entities are excluded, audits shall be made in accordance with paragraph (a) of this section.

§ 1944.423 Loan packaging and 502 RH application submittal.

A grantee is required to assist 502 RH applicants in submitting their application for a rural housing loan. Loan packaging will be performed in accordance with Exhibit A of Subpart A of Part 1944 of this chapter, therefore, it is important that the grantee be trained at an early date in the packaging of rural housing loans. Typically this training should take place before the first applications are submitted to the County Office and before the grant is closed. A grantee should become very knowledgeable of FmHA's eligibility requirements but must understand that only FmHA can approve or deny an applicant assistance. A grantee should never place itself in a position where it appears to disagree with the eligibility decision of FmHA. However, the grantee may ask for clarification that may be helpful in working with future applicants. Grant funds may not be used to pay any expense in connection with an appeal that the applicant may file or pursue.

§ 1944.424 Dwelling construction and standards.

All construction will be performed in accordance with Subpart A of Part 1924 of this chapter. The planned work must meet the building requirements of Subpart A of Part 1944 of this chapter and meet the building codes as defined Subpart A of Part 1944 of this chapter and in any local codes. Building sites must conform to the requirements of Subpart C of Part 1924 of this chapter.

§ 1944.425 Handling and accounting for borrower loan funds.

Grantees will be required to administer borrower loan funds during the construction phases. The extent of their involvement will depend on the experience of the grantee and the amount of authority delegated to them by the District Director in accordance with § 1924.6(c) of Subpart A of Part 1924 of this chapter.

§ 1944.426 Grant closeout.

(a) *Grant purposes completed.* Promptly after the date of completion, grant closeout actions will be taken to allow the orderly discontinuance of grantee activity.

(1) The grantee will immediately refund to FmHA any balance of grant funds advanced that are not committed for the payment of authorized expenses as prescribed in § 1951.58(j) of FmHA Instruction 1951–B (available in any FmHA Office).

(2) The grantee will furnish Form SF–269A (Financial Status Report) to FmHA within 90 days after the date of completion of the grant. All other financial, performance, and other reports required as a condition of the grant also will be completed.

(3) After the grant closeout, FmHA retains the right to recover any disallowed costs which are discovered as a result of the final audit. Subpart M

VOL
54
ISS
78
AP
25
1989
UMI

of Part 1951 of this chapter will be used by FmHA to recover any unauthorized expenditures.

(4) The grantee will provide FmHA an audit conforming to those requirements established in this part, including audits of self-help borrower accounts.

(5) Upon request from the recipient, any allowable reimbursable cost not covered by previous payments shall be promptly paid by FmHA.

(b) *Grant purposes not completed.*

(1) *Notification of terminotion.* The State director will promptly notify the grantee and the National Office in writing of the termination action including the specific reasons for the decision and the effective date of the termination. The notification to the grantee will specify that if the grantee believes the reason for the proposed termination can be resolved, the grantee should, within 15 calendar days of the date of this notification, contact the State Director in writing requesting a meeting for further consideration. The meeting will be an informal proceeding at which the grantee will be given the opportunity to provide whatever additional information it believes should be considered in reaching a decision concerning the case. The grantee may have an attorney or any other person present at the meeting if desired. Within 7 calendar days of the meeting, the State Director will determine what action to take.

(i) If the State Director determines that termination is not necessary, the grantee will be informed by letter along with the District Director.

(ii) If the State Director determines that termination of the grant is appropriate, he/she will promptly inform the grantee by the use of Exhibit B–3 of Subpart B of Part 1900 of this chapter.

(2) *National Office review.* (i) Upon receipt of a request from a grantee that the decision of the State Director be reconsidered, the National Office will make a preliminary decision concerning the continued funding of the grantee during the appeal period. Written notification of the decision will be given to the State Director and grantee.

(ii) The National Office will then obtain a comprehensive report on the matter from the State Office. This information will be considered together with any additional information that may be provided by the grantee.

(c) *Grant Suspension.* When the grantee has failed to comply with the terms of the agreement, the District Director will promptly report the facts to the State Director. The State Director will consider termination or suspension of the grant. When the State Director determines that the grantee has a reasonable potential to correct deficiencies the grant may be suspended. The State Director will request written authorization from the National Office to suspend a grantee. The suspension will adhere to 7 CFR Part 3015, Uniform Federal Assistance Regulations and 7 CFR Part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments.

The grantee will be notified of the grant suspension in writing by the State Director. The State Director will also promptly inform the grantee of its rights to appeal the decision by use of Exhibit B–3 of Subpart B of Part 1900 of this chapter.

(d) *Grant Termination.* The State director may terminate the grant agreement whenever FmHA determines that the grantee has failed to comply with terms of the Agreement. The reasons for termination may include, but are not limited to, such problems as listed in paragraph (e)(3)(i) of the "Self-Help Technical Assistance Grant Agreement" (Exhibit A). The State Director may also withhold further disbursement of grant funds and prohibit the grantee from incurring additional obligations of grant funds with written approval of the National Office. FmHA will allow all necessary and proper costs which grantee could not reasonably avoid.

(1) *Termination for cause.* The grant agreement may be terminated in whole, or in part, at any time before date of completion, whenever FmHA determines that the grantee has failed to comply with terms of the Agreement. The State Director will notify the grantee in writing giving the reasons for the action and inform the grantee of its rights of appeal by use of Exhibit B–3 of Subpart B of Part 1900 of this chapter.

(2) *Termination for convenience.* FmHA or the grantee may terminate the grant in whole, or in part, when both parties agree that the continuation of the grant would not produce beneficial results. The two parties will agree in writing to the termination conditions including the effective date. No notice of rights of appeal will be issued by FmHA.

§ 1944.427 Grantee self-evaluation.

Annually or more often, the board of directors will evaluate their own self-help program. Exhibit F to this part is provided for that purpose. It is also recommended that they review their personnel policy, any audits that may have been conducted and other reports to determine if they need to make adjustments in order to prevent fraud and abuse and meet the goals in the current grant agreement.

§§ 1944.428–1944.450 [Reserved]

Exhibit A.—Self-Help Technical Assistance Grant Agreement

This Grant Agreement dated _____, 19____

is between_____

a nonprofit corporation ("Grantee"), organized and operating under_____

_____

(authorizing State statute)

and the United States of America acting through the Farmers Home Administration, Department of Agriculture ("FmHA").

In consideration of financial assistance in the amount of $_____ (called "Grant Funds") to be made available by FmHA to Grantee under section 523(b)(1)(A) of the Housing Act of 1949 to be used in (specify area to be served) _____ for the purpose of providing a program of technical and supervisory assistance which will aid low-income families in carrying out mutual self-help housing efforts, Grantee will provide such a program in accordance with the terms of this Agreement and FmHA regulations.

Definitions

"Date of Completion" means the date when all work under a grant is completed or the date in the TA Grant Agreement, or any supplement or amendment thereto, on which Federal assistance ends.

"Disallowed costs" are those charges to a grant which the FmHA determines cannot be authorized.

"Grant Closeout" is the process by which the grant operation is concluded at the expiration of the grant period or following a decision to terminate the grant.

"Termination" of a grant means the cancellation of Federal assistance, in whole or in part, under a grant at any time prior to the date of completion.

Terms of Agreement

(a) This Agreement shall terminate _____ years from this date unless extended or sooner terminated under paragraphs (e) and (f) of this Agreement.

(b) Grantee shall carry out the self-help housing activity described in the application docket which is attached to and made a part of this Agreement. Grantee will be bound by the conditions set forth in the docket, 7 CFR Part 1944, Subpart I, and the further conditions set forth in this Agreement. If any of the conditions in the docket are inconsistent with those in the Agreement or Subpart I of Part 1944, the latter will govern. A waiver of any condition must be in writing and must be signed by an authorized representative of FmHA.

(c) Grantee shall use grant funds only for the purposes and activities specified in FmHA regulations and in the application docket approved by FmHA including the approved budget. Any uses not provided for in the approved budget must be approved in writing by FmHA in advance.

(d) If Grantee is a private nonprofit corporation, expenses charged for travel or per diem will not exceed the rates paid FmHA employees for similar expenses. If Grantee is a public body, the rates will be those that are allowable under the customary practice in the government of which Grantee is a part; if none are customary, the FmHA rates will be the maximum allowed.

(e) Grant closeout and termination procedures will be as follows:

(1) Promptly after the date of completion or a decision to terminate a grant, grant closeout actions are to be taken to allow the orderly discontinuation of Grantee activity.

(i) Grantee shall immediately refund to FmHA any uncommitted balance of grant funds.

(ii) Grantee will furnish to FmHA within 90 days after the date of completion of the grant a "Financial Status Report," Form SF–269 A. All financial, performance, and other reports required as a condition of the grant will also be completed.

(iii) Grantee shall account for any property acquired with technical assistance (TA) grant funds, or otherwise received from FmHA.

(iv) After the grant closeout, FmHA retains the right to recover any disallowed costs which may be discovered as a result of any audit.

(2) When there is reasonable evidence that Grantee has failed to comply with the terms of this Agreement, the State Director may determine Grantee as "high risk". "High risk" Grantee will be supervised to the extent necessary to protect the government's interest and to help Grantee overcome the deficiencies.

(3) Grant termination will be based on the following:

(i) *Termination for cause.* This grant may be terminated in whole, or in part, 90 days after a Grantee has been classified as "high risk" if the State Director determines that Grantee has failed to correct previous deficiencies and is unlikely to correct such items if additional time is allowed. The reasons for termination may include, but are not limited to, such problems as:

(A) Actual TA costs significantly exceeding the amount stipulated in the proposal.

(B) The number of homes being built is significantly less than proposed construction or is not on schedule.

(C) The cost of housing not being appropriate for the self-help program.

(D) Failure of Grantee to only use grant funds for authorized purposes.

(E) Failure of Grantee to submit adequate and timely reports of its operation.

(F) Failure of Grantee to require families to work together in groups by the mutual self-help method in the case of new construction.

(G) Serious or repetitive violation of any of the provisions of any laws administered by FmHA or any regulation issued thereunder.

(H) Violation of any nondiscrimination or equal opportunity requirement administered by FmHA in connection with any FmHA programs.

(I) Failure to establish an accounting system acceptable to FmHA.

(J) Failure to serve very low-income families.

(K) Failure to recruit families from substandard housing.

(ii) *Termination for convenience.* FmHA or Grantee may terminate the grant in whole, or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in case of partial termination, the portion to be terminated.

(4) To terminate a grant for cause, FmHA shall promptly notify Grantee in writing of the determination and the reasons for and the effective date of the whole or partial termination. Grantee will be advised of its appeal rights under 7 CFR Part 1900, Subpart B.

(f) An extension of this grant agreement may be approved by FmHA provided in its opinion, the extension is justified and there is a likelihood that the grantee can accomplish the goals set out and approved in the application docket during the period of the extension.

(g) Grant funds may not be used to pay obligations incurred before the date of this Agreement. Grantee will not obligate grant funds after the grant termination or completion date.

(h) As requested and in the manner specified by FmHA, the grantee must make quarterly reports, Exhibit C of this subpart (on 1/15, 4/15, 7/15 and 10/15 of each year,) and a financial status report at the end of the grant period, and permit on-site inspections of program progress by FmHA representatives. FmHA may require progress reports more frequently if it deems necessary. The Grantee must also comply with the audit requirements found in § 1944.422 of Subpart I of 7 CFR Part 1944, if applicable. Grantee will maintain records and accounts, including property, personnel and financial records, to assure a proper accounting of all grant funds. These records will be made available to FmHA for auditing purposes and will be retained by grantee for three years after the termination or completion of this grant.

(i) Title to personal property acquired with grant funds shall vest in the grantee, subject to the following: Grantee shall not sell, assign, lease, encumber, or otherwise dispose of such property or any interest in the property without the written consent of FmHA during the grant period. At FmHA's option if the grant is completed, terminated, or cancelled for any reason, Grantee may keep such personal property provided the State Director determines it is still needed to enable Grantee to continue a self-help housing program. Grantee may transfer all such personal property to another grantee approved by FmHA, convey the property manner approved by the State Director.

(j) Results of the program assisted by grant funds may be published by Grantee without prior review by FmHA, provided that such publications acknowledge the support provided by funds pursuant to the provisions of Title V of the Housing Act of 1949, 42 U.S.C. 1471, *et seq.*, and that five copies of each such publication are furnished to the local representative of FmHA.

(k) Grantee certifies that no person or organization has been employeed or retained to solicit or secure this grant for a commission, percentage, brokerage, or contingent fee.

(l) Grantee will comply with 7 CFR Part 1901, Subpart E which states that no person in the United States shall, on the grounds of race, religion, color, age, sex, marital status, national origin, or mental or physical handicap, be excluded from participating in, be denied the benefit of, or be subject to discrimination in connection with the use of grant funds.

(m) In all hiring or employment made possible by or resulting from this grant, grantee: (1) Will not discriminate against any employee or applicant for employment because of race, religion, color, sex, marital status, national origin, age, or mental or physical handicap, and (2) will take affirmative action to insure that applicants are employed, and that employees are treated during employment without regard to their race, religion, color, sex, marital status, national origin, or mental or physical handicap. This requirement shall apply to, but not be limited to, the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. In the event Grantee signs a contract which would be covered by any Executive Order, law, or regulation prohibiting discrimination, Grantee shall include in the contract the "Equal Employment Clause" as specified by FmHA.

(n) It is understood and agreed by Grantee that any assistance granted under this Agreement will be administered subject to the limitations of Title V of the Housing Act of 1949 as amended, 42 U.S.C. 1471 *et seq.*, and related regulations, and that rights granted to FmHA in this Agreement or elsewhere may be exercised by it in its sole discretion to carry out the purposes of the assistance, and protect FmHA's financial interest.

(o) Grantee will maintain a code or standards of conduct which will govern the performance of its officers, employees, or agents. Grantee's officers, employees, or agents will neither solicit nor accept gratuities, favors, or anything of monetary value from suppliers, contractors, or others doing business with the grantee. To the extent permissible by State or local law, rules, or regulations such standards will provide for penalties, sanctions, or other disciplinary actions to be taken for violations of such standards.

(p) Grantee shall not hire or permit to be hired any person in a staff position or as a participant if that person or a member of that person's immediate household is employed in an administrative capacity by the organizaiton, unless waived by the State Director. (For the purpose of this section, the term "household" means all persons sharing the same dwelling, whether related or not).

VOL 54 ISS 78 APR 25 1989 UMI

(q) Grantee's board members or employees shall not directly or indirectly participate, for financial gain, in any transactions involving the organization or the participating families. This includes activities such as selling real estate, building material, supplies, and services.

(r) Grantee will retain all financial records, supporting documents, statistical records, and other records pertinent to this agreement for 3 years.

Farmers Home Administration

Exhibit B.—Mutual Self-Help Housing Guidelines

Table of Contents

Introduction
Leadership and Supervision
Organization and Agreements
Preconstruction Meetings
Construction
Membership Agreement (Exhibit B–1)

Introduction

How to give low-income rural people an opportunity to have a decent home of their own is a major challenge in rural America. To help such persons have an adequate home at a cost they can afford, the Farmers Home Administration (FmHA) makes Rural Housing (RH) loans to individual persons to enable them to participate in a mutual self-help housing project. This program is designed to help families, that otherwise do not qualify as homeowners, work together to build modest homes of their own.

Eligible applicants may obtain rural housing loans to buy materials, pay for labor and contract costs required for work on their own homes, and if necessary, buy a building site. Families helping each other will provide most of the construction labor. The exchange of labor, without a cash cost to the families, is the key to the mutual self-help housing program. There also may be a savings in the cost of materials purchased. This use of family labor for cash can reduce the cost of homes enough to bring the price of a modest home within reach of very low-income rural families.

Leadership and Supervision

The grantee will provide the leadership and supervision of the families. FmHA will determine who is eligible to participate and receive a Rural Housing loan.

Rural housing loans will be made by FmHA to those who participate in a self-help housing group and who:

1. Meet the low or very low-income requirements in Exhibit C to (available in any FmHA office) Subpart A of part 1944 of this chapter.
2. Are creditworthy by FmHA standards and can comply with all other eligibility requirements for rural housing loans.
3. Desire to build a home of their own that is modest in design, structurally sound, and low in cost.

The following basic conditions are essential to the success of a self-help housing venture and must be provided by the grantee:

1. A sincere spirit of cooperation on the part of all participants.
2. Competent leadership and technical supervision.
3. A complete understanding of the responsibilities involved in Mutual Self-Help.
4. Adequate supervision of participants at times convenient for the families to do the work.
5. Development of sufficient skills among the members of the group to do the basic construction tasks as outlined in Exhibit C–2 of this subpart.
6. Four to 10 families who can and are willing to work together satisfactorily.

Organization and Agreements

An understanding must be reached on important items such as when the individuals in the group will be available to work, the amount of work to be performed, the number to be involved in the various work groups and the amount of time each will spend working on the homes. The group will develop a written agreement which is binding upon all members signing it. Exhibit B–1, Membership Agreement, is a suggested form of such an agreement. All participating members will sign the Membership Agreement and each applicant will be given a copy. If a document is used which is different than Exhibit B–1, it must be reviewed and approved by FmHA for legal adequacy and compliance with applicable State laws and FmHA regulations.

Preconstruction Meetings

The successful conduct of a mutual self-help housing program requires a series of meetings with those participating. These meetings are to discuss the planning, construction, and maintenance of a home, the responsibilities of home ownership, and the requirements for a FmHA rural housing loan. These meetings also familiarize the applicants with the self-help approach, develop mutual confidences among participants and develop the interest of community leaders in the project.

The actual number of meetings held will depend on the rate at which the group progresses toward reaching a full understanding of the responsibilities involved. Experience indicates that from 8 to 10 meetings are needed. Local people should be used to discuss appropriate subjects in the meetings. This will help in making the local community aware of the self-help program, and also help obtain local acceptance and support for the project list of subjects to be discussed.

The first meeting should be explanatory in nature. The grantee should discuss the basic principles involved in mutal self-help housing, together with a brief explanation of the purposes and limitations of and the requirements for rural housing loans including loan payments, taxes, insurance, and maintenance. The members of the group should be considering a name for the organization and the persons best suited for the various positions in order that the officers and committees can be selected at the next meeting.

At the second meeting, an association should be formed and the officers and committees selected. They might include the following:

1. President
2. Vice-President
3. Secretary-Treasurer
4. Labor Manager
5. Purchasing Committee
6. Program Committee

Additional meetings are essential, but the order in which the subjects are presented or the number of subjects included in any meeting may vary. The following topics are suggested for a series of meetings.

1. *Site Planning and Building Codes.* An architect, code official, or a good builder could be invited to discuss factors in selecting house size, safety, and health code requirements.
2. *Plans and Specifications.* The group will probably have questions and need individual help in making decisions concerning plans and specifications for their homes. The construction supervisor should help each applicant develop suitable plans that will meet the household's individual need and the requirement of § 1944.16 of Subpart A of 7 CFR Part 1944.
3. *Cost of Materials.* The purchasing committee will review prices of materials and contract work. At one of the last meetings to be held before the construction starts, the purchasing committee should report on its recommendations for buying materials and awarding contracts.
4. *Taxes.* A discussion of the method of tax appraising could be given by the local tax assessor including an estimate of expected taxes on the proposed houses.
5. *Insurance.* A local insurance agent may be asked to speak on types of insurance policies available such as fire and extended coverage, household policies, and liability insurance.
6. *Mortage Requirements.* The grantee should discuss the FmHA mortgage and related requirements. A local attorney might be asked to discuss other legal aspects of the program.
7. *Maintenance Costs.* The construction supervisor should discuss the importance of proper maintenance for a home. They should emphasize how money spent for maintenance improves appearance, helps maintain value and saves money in the long run.
8. *Money Management.* The grantee discuss the necessity of following the basic principles of money management such as keeping records, following a budget, and not overspending on non-essentials.
9. *Labor Sharing Arrangement.* The group needs to reach an understanding as to how the members will share labor, how records will be kept of time worked, how to make sure that labor will be exchanged on a basis that is fair to all members and how to evidence and record these decisions.
10. *Use of Tools.* One or more of the meetings should include demonstrations and training by the construction supervisor of the safe and proper use of tools. Special attention should be given to the use of basic tools such as level, square, rule, saw, and any power tools that might be used in the construction.
11. *Construction and Work Procedures.* The authority and duties of the construction supervisor will be discussed in detail. The procedures for actual construction will be discussed including labor sharing, work teams, order of development, function of committees, time reporting for work completed and future hours available.
12. *Ground Breaking Plans.* The final preconstruction meeting should be more of a social get-together than a business meeting. This is also the logical time to plan a ground breaking ceremony for the day the loans are closed.

Construction

The basic work is performed, largely on a labor exchange basis, by the participating families under the guidance of the construction supervisor.

The group may, depending on the skills of the individuals, plan to do as much of the work as possible such as installing kitchen cabinets and equipment, excavating for basements, and dry-wall finishing. Highly skilled or specialized jobs will be contracted when such services are not available in the group.

Work should start on all houses and each stage of construction be finished on all before starting the next stage of construction on any house, to the extent with good construction practices, except as provided in paragraph 3, Labor Exchange Agreement of the Membership Agreement (Exhibit B–1).

To effect savings, materials for all the houses may be purchased from the one or several suppliers who offer the lowest prices. Also, all contracts for members of the group may be awarded to the same contractors. To illustrate, the plumbing contractor offering the lowest price ordinarily should perform the plumbing for all of the dwellings.

Each borrower will pay the material supplier for materials used, and the contractor for work done, on his/her own home. All deliveries of materials will be itemized separately for each home. The grantee, after considering the suggestions of the purchasing committee, will recommend the suppliers from whom materials will be purchased and the contractors to whom the contracts will be awarded.

The construction supervisor will divide the group into work teams. Work teams should be organized on the basis of skills, compatability, and availability. For example, one team could lay out and pour footings and another team cold lay bricks. The third team could begin framing as soon as the foundation is ready.

A firm understanding will be reached that no changes in construction from the approved plans and specifications may be made without furnishing the County Supervisor with full cost figures and obtaining approval in advance. If any change results in a need for additional funds, they must be furnished by the borrower before approval. All homes should be finished at or about the same time and none should be occupied prior to completion of them all.

The Association should have brief meetings, at least once a week, to:

1. Report on performance and hours of work performed.
2. Settle any disagreements.
3. Plan work schedule and purchases for the coming week.

Exhibit B–1.—Association Membership Agreement

Association Membership Agreement

I/We understand that by signing this agreement I/we will become members in the _____ Association when we receive adequate credit to finance the home we intend to build. We have read the agreement or have had it read to us and agree to comply with all its provisions.

Purpose

The purpose of this association is to provide a way whereby each member can help his/herself and every other member to build his/her house.

Membership

Membership will be limited to those persons who:

1. Do not own an adequate home;
2. Are willing to work with the other members of the Association in building their homes;
3. Have a commitment to obtain financing for the cash cost of their home; and
4. Sign the Membership Agreement.

Applicants and co-applicants must both sign the Membership Agreement. As used in the agreement the term "Applicant" means both applicant or co-applicant when both sign the agreement, or the person signing when only one signs.

Voting Rights

Each household has one vote in the election of officers and all other matters involving a decision by the membership.

Officers

The officers of the Association will be a President, Vice-President and a Secretary-Treasurer. Each will be elected, at a meeting, by a majority vote and will continue to hold office unless the officer resigns, dies, is incapacitated, or is removed by vote of two-thirds of all the members at a called meeting for the purpose of considering such removal. The duties of the officers will be as follows:

The President will:

1. Call membership meetings and officers' meetings;
2. Preside over all meetings;
3. Work closely with the construction supervisor; and
4. See that committees and members carry out their responsibilities in connection with mutual self-help projects.

The Vice-President will:

1. Act for the President in the President's absence, and
2. Be chairman of the Program Committee.

The Secretary-Treasurer will:

1. Keep the minutes of each meeting.
2. Handle Correspondence of the Association.
3. Collect and handle, through a checking account in the Association's name, funds the organization may need. These may include items such as stationery, stamps, and record book.
4. Maintain other records of the Association at the direction of the President.

Appointed Committees and Positions

The Officers by majority vote will appoint the following from the membership:

1. A Labor Manager will assist the construction supervisor in keeping records of the tasks completed by each member and notify the construction supervisor as to the availability of members for work on the housing.
2. A Purchasing Committee of three members who will review prices and cost estimates obtained by the grantee for the houses to be built and recommend contractors and suppliers to be used by the members.
3. Two of the three members of the Program Committee. The third member will be the Vice-President, who will be chair-person. This committee will plan meetings and assist in obtaining outside speakers.

Meetings

Meetings of officers and meetings of members will be held as often as necessary to successfully complete the mutual self-help housing. Meetings may be called by the President when considered advisable and will be called by the President at the written request of not less than _____ member, at the request of the grantee or the Farmers Home Administration. Each officer or member will be notified at least three days before the meeting as to the time, date and place of each meeting by mail, telephone or by announcement at the preceding meeting.

Labor Exchange Agreement

Each member agrees to perform the task for the construction of houses of the other members of this Association in return for labor from other members in the actual construction of their house. The construction tasks to be performed are identified on a copy of Exhibit C–2 of this subpart and are part of this agreement.

The number of tasks performed by each member or by any other person for any applicant credit will be verified by the grantee. If any member because of death, illness, or injury is unable to make its full labor contribution personally or from other sources as required, that member may be excused to that extent from performing its labor agreement, if approved by a majority of the membership, and all the other members will assist such a member in completing its house and will contribute the additional amount of labor for all the houses which otherwise the stricken member would have furnished.

We agree to exchange labor on the following basis:

1. Equal time will be allowed for labor performed by members in the actual

VOL 54 ISS 78 APR 25 1989 UMI

construction of the homes regardless of the type of work involved.

2. Time allowances for labor performed by persons other than members, will be determined by the grantee with the approval of the grantee.

3. A member may not work alone on the member's own house unless the job can be done alone and the consent of the construction supervisor has been obtained. However, the grantee may authorize persons to work on their own house when only interior painting, landscaping and general cleanup remain to be done.

4. The task performed will be reported by each worker to the construction supervisor each day. The construction supervisor will verify in a worksheet and credit the percent of task completed to that member's account.

General Agreement

We agree that:

1. The Association, by majority vote, will determine the supplier of materials and contractors for any skilled work. However, each member shall pay the cost of materials and contractor in connection with its own home.

2. The Association will collect cost of operation of the Association from members, not to exceed $_____ from each member.

3. The Association will act for the group in other matters related to the project when authorized by a majority of the members.

4. Property insurance will be obtained by the members as required by the Farmers Home Administration. Members also will obtain worker's compensation insurance as required by State law and public liability insurance against claims of others.

Dissolution

After a determination is made by the officers that the last house is completed and that all obligations of the Association are paid, upon majority vote of the members and with the consent of the Farmers Home Administration the Association will terminate.

Amendments

Amendments to this agreement may be made by a majority vote of the members, at a meeting called for the announced purpose of considering amendments, to take effect upon approval by the Farmers Home Administration District Director; but no amendments may decrease the rights or increase the liability of any member without such member's consent.

Membership Termination

We understand that this membership may be terminated under the following conditions:

1. Failure to provide the required labor to perform the identified task.

2. Failure to comply with the terms of this agreement.

3. Failure to cooperate fully with other members of the association in the mutual self-help housing program.

4. Voluntary withdrawal from association.

Cause for termination may be recommended by:

1. The majority of the association members, or

2. The grantee.

However, a final termination must be in writing from the FmHA supervising official and will provide for an appeal pursuant to 7 CFR Part 1900, Subpart B. Upon the conclusion of the termination action FmHA may take action to liquidate the account.

Exhibit C.—Evaluation Report of Self-Help Technical Assistance (TA) Grants

Evaluation for Quarter Ending: (1), 19____

1. a. Name of Grantee: (2)
   b. Address: (3)
   c. Area the Grant serves: (4)
2. a. Date of Agreement: (5) Time Extended (6)
3. a. Equivalent unit increase during quarter:
(7) _____
First Month
(8) _____
Second Month
(9) _____
Third Month
   b. Cumulative total number of Equivalent Units since beginning of Grant:
(10) _____
Total to Date
4. a. Method of Construction:
Stick built ____%, Manufactured ____%, Combined ____%
   b. Number of bedrooms per house built this Grant period:
____ 2 BR, ____ 3 BR, ____
   c. Household size this Quarter:
1 person ____, 2 persons ____, 3 persons ____
4 persons ____, 5 persons ____
   d. Number of houses under construction this Grant period but started during previous Grant period: ____
5. a. Number of houses proposed under this Grant: (11)
   b. Number of houses completed under this Grant: (12)
   c. Number of houses currently under construction: (13)
   d. Number of families in preconstruction: (14)
   e. Number of Construction Supervisors: (15)
   f. Number of TA employees: (16)
6. a. Average time needed to construct a single house: (17)
   b. Number of months between submission of Self-Help borrower's docket and approval/rejection: (18)
   c. Number of percentage of loan docket rejections during reporting period:
____ (19)
7. a. Did any of the following adversely affect the Grantee's ability to accomplish program objectives?

	Yes	No
TA Staff Turnover	____	____
FmHA Staff Turnover	____	____
Bad Weather	____	____
Loan Processing Delays	____	____
Site Acquisition and Development	____	____
Unavailable Loan/ Grant Funds	____	____
Lack of Participants	____	____
Communication between FmHA/ Grantee	____	____

8. Attach information concerning number of families contacted, number who have indicated a willingness to be a participating family, number of mutual self-help groups organized, progress on any construction started, and any problems relating to the operation of this grant.

I certify that the statements made above are true to the best of my knowledge and belief.

Exhibit C–1.—Instructions for Preparation of Evaluation Report of Self-Help Technical Assistance Grants

Exhibit C will be used by all Technical Assistance grantees obtaining self-help technical assistance grants. This attachment provides the grantee and FmHA a uniform method of reporting the performance progress of self-help projects. The TA Grantee will prepare an original and 4 copies of the attachment. The TA Grantee will sign the original and 3 copies and forward it to the local FmHA County Office. The TA Grantee will keep the unsigned copy for its records.

The evaluation report will be completed in accordance with the following:

1. Enter the date the quarter ends either March 31, June 30, September 30, or December 31 and the year.

2. Enter the full name of the TA Grantee organization.

3. Enter the complete mailing address of the TA grantee organization.

4. Enter the area served by the Grant.

5. Enter the date of the initial self-help technical assistance grant agreement.

6. Enter the time of any extension self-help technical assistance grant agreement(s).

7. Insert the number of EU's completed the first month of the quarter using steps 1, 2, and 3 of this Exhibit.

8. Insert the number of EU's completed the second month of the quarter by using steps 1, 2, and 3 of this Exhibit.

9. Insert the number of EU's completed the third month of the quarter by using steps 1, 2, and 3 of Exhibit.

10. Add items (14), (15), and (16) to the total from the previous quarterly report to obtain the cumulative total number of EU's. This total is the cumulative total number of EU's for the project.

11. Enter the number of house planned in the TA Grantee proposal(s).

12. Enter the number of houses completed and occupied since the beginning of the grant.

13. Enter the number of houses that are under construction at the end of this quarter.

14. Enter the number of families in the preconstruction phase.

15. Enter the total number of construction supervisor(s) paid with TA grant funds.

16. Enter the number of employees paid with TA grant funds including those listed in item 28.

17 Insert the average elapsed time needed per house from excavation to final inspection by FmHA to complete construction of a house. If no self-help homes have been completed by this grantee, use other projects or your best estimate as a guide.

18. Enter the number of months it takes on average to approve or reject a borrowers docket once it's submitted.

19. Enter number and percent of docket submitted and rejected this quarter.

20. Enter date of Exhibit submittal.

21. Insert title of the grantee or their authorized representative.

22. Signature of grantee or his/her authorized representative.

23. County Supervisor must answer questions concerning market value and loan amount and also should insert comments concerning progress of constuction, success of the project and any problems that the organization may have.

24. Insert date of County Supervisor's review.

25. Signature of County Supervisor.

26. Distict Director representative should insert his/her comments concerning items listed in § 1944.417(b)(1) of 1944–I.

27. Insert date of District Director review.

28. Signature of Distict Director or representative.

29. Insert State Office review.

30. Insert date of State Office review.

31. Signature of State Office representative.

Exhibit C–2.—Breakdown of Construction Development for Determining Percentage Construction Completed

	With slab on grade (percent)	With crawl space (percent)	With basement (percent)	Selected self-help tasks (X)
1. Excavation	3	5	6	
2. Footing, foundations, columns	8	8	11

Exhibit C–3.—Pre-Construction and Construction Phase Breakdown

I. General

This Exhibit will be used by FmHA and the grantee in determining grantee performance as required in § 1944.417(b) of this subpart.

II. Determining Technicol Assistance Cost Per Unit

A. Equivalent units are used to measure progress at any time during the period of the grant. It is necessary because self-help grantees have several groups of families in various stages of progress during the period of the grant. The following formula has been developed to provide a more accurate method of determining progress.

Formula		
Phase breakdown	Value of each phase (percent)	Cumulative (percent)
Pre-Construction:		
Phase I	10	10
Phase II	10	10
Construction:		
Phase III	80	21–100

B. Using the *Description of Phase Breakdown* as a guide, the project staff selects the total percentage pertinent to the stage and self-help group is in and multiplies that percentage by the number of families (units) in the group. The result is the *equivalent number of units completed.* No credit may be given for Phase I, if the application is rejected. When this computation has been completed for each group that falls within Phase I–III, the total number of equivalent units is divided into the total grant funds *expended* to that date. The result is the TA cost per unit at that stage of the program's progress.

C. The definition of pre-construction and construction phases described are follows:

Pre-Construction

Phase I: Hold community meetings; conduct interviews; obtain house plans; prepare cost estimates; begin search for land; submit family applications to the Farmers, Home Administration (FmHA); FmHA runs credit check; applications. FmHA either approves or rejects.

Phase II: Organize an association of Section 502 RH eligible families; association conducts weekly meetings at which required FmHA forms are discussed and completed; house plans and land sites are selected; outside speakers explain and discuss taxes, insurance, how to keep a checking account, how interest is computed, home maintenance, decorating, and landscaping; etc.; completed loan dockets for each family are submited to FmHA. Family loan dockets are reviewed and recommendations made as to the loan amounts requested; the FmHA County Supervisor reviews family loan dockets; preliminary title search of each proposed building site is begun; requests loan check from Finance Office; when check arrives, final title search is made, loan closed, checking accounts opened, and construction begun.

Construction

The grantee will utilize Exhibit C–2 which outlines 27 construction tasks to determine the percentages of completed construction activities.

D. The computation of equivalent units and TA costs will be computed as follows:

Exhibit C will be used for recording the following information and construction in this example which starts January 1.

Step 1

Both the grantee and FmHA review the FmHA loan application records to determine the percentage of completion for each family in the preconstruction phase of the program. These are Phases I–III. Total these percentages to find the number of "Equivalent Units" (EU's) completed at that date during preconstruction. For example, if there are eight families in Group #2 and all have completed the 20 percent phase of preconstruction, then there would be 1.6 EU's in the pre-construction phase of the program as of that date. Each phase must be completed before it is considered in the calculation.

Step 2

Refer to the records of construction progress for families in the construction Phase III. As of that date, the director totals the percentage of completion figures for each family as followings:

Askew	.45
Whited	.40
Martinez	.40
Conzalez	.38
Sherry	.34
Duran	.33
Johnson	.13
Harvey	.31
	2.92 EU's

Total production in the construction phase is therefore 2.92 EI's as of that date.

Step 3

Add the pre-construction and construction subtotals together:

Pre-construction	1.60
Construction	2.92
Total EU's	4.52

This provides the total EU's of production during the first two months of operation. Steps 1, 2, and 3 will be used to complete Items 16, 17 and 18 of Exhibit C of this Subpart. (Evaluation Report of Self-Help Technical Assistance.)

III. Preparation

Compile Exhibit C of this Subpart in an original and four copies. The exhibit will be signed by the TA Grantee. Submit the original and three copies of the exhibit quarterly to FmHA County Office on or before January 15, April 15, July 15, and October 15, of each year for the quarters ending March 31, June 30, September 30, and December 31 of each year. The District Director will keep the original and forward two copies to the State Office. The State Office will forward one copy to the National Office. The State Office will prepare information concerning TA grants closed within 30 days of the end of a quarter on the next quarterly report.

Exhibit D—Amendment to Self-Help Technical Assistance Grant Agreement

This Agreement dated _____ 19 ____ between _____ a nonprofit corporation ("Grantee"), organized and operating under _____ (authorizing State Statute) and the United States of America acting through the Farmers Home Administration, Department of Agriculture ("FmHA"), amends the "Self-Help Technical Assistance Grant Agreement" between the parties dated _____ 19 ____, ("Agreement").

The Agreement is amended by providing additional financial assistance in the amount of _____ to be made available by FmHA to Grantee pursuant to section 523 of Title V of the Housing Act of 1949 for the purpose of assisting in providing a program of technical and supervisory assistance which will aid low-income families in carrying out mutual self-help housing efforts; or

The Agreement is amended by changing the completion date specified in convenant 1 from _____ to _____ and by making the following attachments to this amendment: (List and identify proposal and any other documents pertinent to the grant.)

Exhibit F.—Guidance For Recipients of Self-Help Technical Assistance Grants (Section 523 of Housing Act of 1949)

7 CFR Part 1944, Subpart I provides the specific details of this grant program. The following is a list of some functions of the grant recipients taken from this subpart. With the list are questions we request be answered by the recipients to reduce the potential for fraud, waste, unauthorized used or mismanagement of these grant funds. We suggest the Board of Directors answer these questions every six months by conducting their own review. Paid staff should not be permitted to complete this evalution.

A. Family Labor Contribution:

1. Does your organization maintain a list of each family and a running total of hours worked (when and on what activity)? Yes No
2. Are there records of discussions with participating families counselling them when the family contribution is falling behind? Yes No
3. Are there obstacles which prevent the family from performing the required tasks? Yes No

B. Use Use of Grant Funds:

1. Were grant funds used to pay salaries or other expenses of personnel not directly associated with this grant? Yes No
2. Were grant funds used to pay for construction work for participating families? Yes No
3. Were all purchases or rentals (item and cost) of office equipment authorized? Yes No
4. Are all office expenses authorized by Subpart I of Part 1944 of 7 CFR? Yes No
5. Was a record of long distance telephone calls maintained and was that log and telephone checked? Yes No
6. Was all travel and mileage incurred for official business properly authorized in advance? Yes No
7. Were mileage and per diem rates within authorized levels? Yes No
8. Were participating families charged for use of these tools, Yes No
9. Were grant funds expended to train grant personnel? Yes No
10. Was training appropriate for the individual trainee? Yes No
11. Were any technical or consultant services obtained for participating families? Yes No
12. Were the provided technical or consultant services appropriate in type and cost? Yes No

C. Financial Responsibilities:

1. Does each invoice paid by the grant recipient match the purchase order? Yes No
2. Does each invoice paid by the borrower and FmHA match the purchase order? Yes No
3. Were purchases made from the appropriate vendors? Yes No
4. Are the invoices and itemized statements totalled for materials purchased for individual families? Yes No
5. Is there a record of deposits and withdrawals to account for all loan funds? Yes No
6. Are checks from grant funds signed by the Board Treasurer and executive Director? Yes No
7. Are grant funds deposited in an interest bearing account? Yes No
8. Are checks from loan funds prepared by the grant recipient for the borrower's and FmHA's signature? Yes No
9. Are checks from loan funds accompanied by accurate invoices? Yes No
10. Are any borrower loan funds including interest, deposited in grantee accounts? Yes No
11. Are checks from loan funds submitted to FmHA more often than once every 30 days? Yes No
12. Is the reconciliation of bank statements for both grant and loan funds completed on a monthly basis? Yes No
13. If the person who issues the checks also reconciles them, does the Executive Director review this activity? Yes No
14. Are materials purchased in bulk approved by the Executive Director? Yes No
15. Was the amount of materials determined by both the Executive Director and Construction staff? Yes No
16. Were any participating families consulted about the purchase of materials? Yes No
17. Were savings accompliished by the bulk purchase method? Yes No
18. Did the Executive Director review the purchase order and the ultimate use of the materials? Yes No
19. Are materials covered by insurance when stored by grantee? Yes No

D. Reporting:

1. Are "Requests for Advance or Reimbursement" made once monthly to the FmHA District Office? Yes No
2. Has the grant recipient engaged a Certified Public Accountant (CPA) or CPA firm to review their operations on a regular basis: (Annually is preferable but every two years and at the end of the grant period are requirements)? Yes No
3. Are the quarterly evaluation reports submitted on time to the District Supervisor? Yes No

What, if any, problems exist that need to be corrected for effective management of the grant project?
Date _____

_____
President, Board of Directors
(Period covered by report _____)

Exhibit G.—Site Option Loan to Technical Assistance Grantees

I. Objectives

The objective of a Site Option (SO) loan under Section 523(b)(1)(B) of Title V of the Housing Act of 1949 is to enable Technical Assistance (TA) grantees to establish revolving fund accounts to obtain options on land needed to make sites available to families that will build their own homes by the self-help method. An SO loan will be considered only when sites cannot be made available by other means including a regular Rural Housing Site (RHS) loan.

II. Eligibility Requirements

To be eligible for an SO loan, the applicant must be a TA grantee that is currently operating in a satisfactory manner under a TA grant agreement. If the SO loan applicant has applied for TA funds but is not already a TA grantee and its appears that the TA grant will be made, the SO loan may be approved but not closed until the TA Grant is closed.

III. Loan Purposes

Loans may be made only as necessary to enable eligible applicants to establish revolving accounts with which to obtain options on land that will be needed as building sites by self-help families participating in the TA self-help housing program. Loans will not be made to pay the full purchase price of land but only for the minimum amounts necessary to obtain an option from the seller. The option should be for as long as necessary but in no case should the option be for less than 90 days.

IV. Limitotions

(A) If the amount of an SO loan will exceed $10,000, the prior consent of the National Office shall be obtained before approval.

(B) The amount of the SO loan should not exceed 15 percent of the purchase price of the land expected to be under option at any one time, unless a higher percent is authorized by the State Director when other land is not available or the particular area requires more down payment than elsewhere or similar circumstances exist.

(C) Form FmHA 440–34, "Option to Purchase Real Property," will be used without modification in all cases for obtaining options under this subpart.

(D) The limitations of § 1822.266(b)(1) and (2) of Subpart F of Part 1822 of this chapter (FmHA Instruction 444.8, paragraph VI B(1) and (2)) concerning land purchase will apply to options purchased under this subpart.

V. Rates and Terms

(A) *Interest.* Loans will be made at an interest rate of 3 percent.

(B) *Repayment period.* Each SO loan will be repaid in one installment which will include the entire principal balance and accrued interest. The maximum repayment period for each SO loan will be the applicant's remaining TA grant funding period.

(1) A shorter repayment period will be established if SO funds will not be needed for the entire TA grant funding period.

(2) If a regular RHS loan is to be processed, the SO loan should be scheduled for repayment when RHS loan funds will be available to purchase the land and repay the amount of SO funds advanced on the option, unless SO loan funds will still be needed to purchase other options. Under no circumstances, however, will the repayment period exceed the applicant's remaining TA grant funding period.

VI. Processing Application

(A) *Form of application:* The application for assistance will be in the form of a letter to the Farmers Home Administration (FmHA) County Supervisor having jurisdiction over the area of the proposed site to be optioned. The letter will be signed by the applicant or its authorized representative and contain, as a minimum, the following information:

(1) A copy of the proposed option that shows a legal description of the land, option price, purchase price, and terms of the option. If more than one site is to be purchased, a schedule of the proposed options should be included.

(2) Information to verify that a regular RHS loan cannot be processed in time to secure the option.

(3) Proposed method repayment of the SO loan.

(4) Resolution from the applicant's governing body authorizing the application for an SO loan from FmHA.

(B) *Responsibility of the County Supervisor.* Upon receipt of an SO loan application, the County Supervisor will:

(1) Determine whether the applicant is eligible. If the applicant is not eligible, or the loan cannot be made for other reasons, the application may be rejected by the County Supervisor with the concurrence of the District Director. The reasons for the rejection should be clearly stated and provided, in writing to the applicant. The applicant will have the right to have the decision reviewed following the procedure established in Subpart B of Part 1900 of this chapter.

(2) Review and verify the accuracy of the information provided.

(3) Make an inspection and a memorandum appraisal of each proposed site "as is." The appraisal will include a narrative statement as to whether the site has been recently sold, verify that the seller is the owner of the property, and indicate whether the purchase price is acceptable based on the selling price of similar properties in the area.

(4) Indicate whether or not it appears that, considering the location and cost of development, adequate building sites can be provided at reasonable costs.

(5) If the option is for a tract of land on which 5 or more sites are proposed, the County Supervisor will forward to the District Director with recommendations as defined in § 1924.119 of Subpart C of Part 1924 of this chapter.

(6) If approval is recommended, prepare and have the applicant execute Form FmHA 1940–1, "Request for Obligation of Funds," for the amount needed. Copies of the form will be distributed as provided in the FMI.

(7) Forward the SO loan application and the applicant's TA application or TA docket to the State Director. The submission will include the appraisal report and the County Supervisor's comments and recommendations.

VII. Loan Approval Authority and State Office Actions

The State Director is authorized to approved SO loans developed in accordance with this Exhibit. The approval or disapproval of the loan will be handled in the same manner as provided in § 1822.272 of Subpart F of Part 1822 of this chapter (FmHA Instruction 444.8, paragraph XII). SO loans will be established in AMAS using Form FmHA 1944–51, "Multiple Family Housing Obligation Fund Analysis". The MIC transaction will be used to request a check for SO loans.

VIII. Loan Closing

(A) *General.* Loan closing instructions will be provided by the Office of the General Counsel (OGC) to assure that the Promissory Note is properly completed and executed. The County Supervisor may then close the loan.

(B) *Security for the loan.* The loan will be secured by a Promissory Note properly executed by the grantee using Form FmHA 440–16, "Promissory Note." A lien on the optioned real estate will not be taken.

(1) The "kind of loan" block on the note will read "SO loan."

(2) The note will be modified to show that the only installment on the loan will be the final installment.

(C) *Loan is closed.* The loan will be considered closed when the note is executed and the loan check delivered to the grantee.

IX. Establishment of SO loan Revolving Account

(A) Supervised bank accounts will not be used for SO loans.

(B) Grantee will deposit SO loan funds in a depository institution of its choice. The use of minority institutions is encouraged. Such funds will remain separate from any other account of the grantee and shall be established as a SO revolving account.

(C) Checks drawn on the revolving account will be for the sole purpose of purchasing land options and must be signed by at least two authorized officials of the grantee who have been properly bonded in accordance with §§ 1944.411 (e) and (g) of this subpart.

(D) Grantees will not expend funds for any options until the site and the option form have been reviewed and approved by the County Supervisor.

(1) Site option funds will not be left unused in the revolving account in excess of 60 days.

(2) If the funds are not used for the intended purpose within the 60 days specified above, the unused portion will be refunded on the account.

(E) When funds become available for repayment of the SO loan, such funds will be deposited in the revolving account for the purchase of additional site options if needed. If such funds are not needed to purchase more options, they will be applied on the SO loan.

X. Source of Funds

SO loans will be funded from the self-help housing land development fund.

Date: March 27, 1989.

Neal Sox Johnson,

Acting Administrator, Farmers Home Administration.

[FR Doc. 89–9606 Filed 4–24–89; 8:45 am]

BILLING CODE 3410–07–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1306

Prescriptions; Extension of Comment Period

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of proposed rulemaking; extention of comment period.

SUMMARY: This will extend the comment period for the notice of proposed rulemaking published on March 16, 1989, 54 FR 11006, regarding an amendment to the requirements for the issuance of prescriptions to patients in Long Term Care Facilities (LTCF) and to the terminally ill. The comment period will now extend to May 25, 1989.

DATE: Comments will be accepted until May 25, 1989.

ADDRESS: Written comments should be submitted in quadruplicate to the Administrator, Drug Enforcement Administration, 1405 I Street NW., Washington, DC 20537, Attention: Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: G. Thomas Gitchel, State and Industry Section, Office of Diversion Control, Drug Enforcement Administration, 1405 I Street NW., Washington, DC 20537, (202) 633–1216.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of March 16, 1989 (54 FR 11006), a notice of proposed rulemaking was published to amend certain provisions of the regulations relating to prescriptions for Schedule II controlled substances. The proposal was designed to facilitate the issuance and filling of Schedule II prescriptions for individuals in a LTCF and individuals who are terminally ill. Several comments have been received in response to this notice. In addition, two organizations, the American Psychiatric Association and the National Association of State Controlled Substances Authorities, have requested that the comment period be extended so that more of their members may comment on the proposal. The Drug Enforcement Administration has determined that an extension of the comment period would be in the public interest. Accordingly, the comment period is hereby extended to May 25, 1989.

Dated: April 18, 1989.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control.

[FR Doc. 89–9839 Filed 4–24–89; 8:45 am]

BILLING CODE 4410–09–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 3560–6]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed rulemaking.

SUMMARY: USEPA proposes to approve a site-specific revision to the Indiana State Implementation Plan (SIP) for ozone. The revision, if finally approved, will provide for a daily weighted-average for the American Can Company (American Can) facility located in Hammond, Lake County, Indiana. This SIP revision will allow American Can to demonstrate compliance with the food and beverage can's end sealing lines through the use of a daily weighted-average. USEPA's action is based upon a February 26, 1986, State submittal and several amendments.

DATE: Comments on this revision and on the proposed USEPA action must be received by June 26, 1989.

ADDRESSES: Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886–6031, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street—26th Floor, Chicago, Illinois 60604.

Air Management Division, Indiana Department of Environmental Management, 105 South Meridian Street, Indianapolis, Indiana 46225.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.)

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT:

Uylaine E. McMahan, Air and Radiation Branch (5AR–26), Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886–6031.

SUPPLEMENTARY INFORMATION: On February 24, 1986, and in subsequent submittals, the Indiana Air Pollution Control Board (Board) submitted to USEPA a request for a site-specific revision revising its ozone SIP. This revision consists of a daily weighted-average for the can coating lines located at American Can in Lake County, Indiana, which is designated as an urban nonattainment area for ozone.

Under the existing federally approved SIP, each can coating line is subject to the VOC limitation contained in Rule 325 IAC–8–2–3. Rule 325 IAC–8–2–3 requires American Can to maintain compliance with a reasonably available control technology (RACT)[1] limit of 5.5 pounds of solvent per gallon of coating applied, excluding water, delivered to the coating applicator for three-piece can side-seam operations. USEPA approved this rule as meeting the RACT requirements of the Clean Air Act on February 10, 1986 (51 FR 4912).

USEPA's December 8, 1980, policy entitled "Compliance with VOC Emission Limitations For Can Coating Operations", (45 FR 80824), explains why a daily weighted-average in conjunction with a plantwide emission limitation can be approved as part of a SIP for can coaters. "This is because of the severe practical problems faced by can manufacturing plants where a number of lines apply as many as 50 different coatings, depending on the end uses of the cans". The 1980 policy suggested that compliance be determined by use of a standardized

[1] A definition of RACT is contained in a December 9, 1976, memorandum from Roger Strelow, former Assistant Administrator for Air and Waste Management. RACT is defined as the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility.

VOL 54 ISS 78 APR 25 1989 UMI

equation expressing the weight of VOC per gallon of coating, less water, in terms of weight of VOC per gallon of solids to compare total actual emissions to total allowable emissions. This is the method that American Can must use to demonstrate its compliance with the limitations set forth herein.

American Can operates 5 varnish coating lines, 6 sheet coating lines and 10 food and beverage can end sealing lines. The VOC emissions from the varnish and sheet coating lines are controlled by afterburners with control efficiencies of 87 percent and 83 percent, respectively. The food and beverage can end sealing lines are presently uncontrolled and use noncomplying end sealing compounds. The food and beverage can end sealing lines are exceeding the limits required by Rule 325 IAC–8–2–3.

VOC Proposed Limits

It is USEPA's understanding that the facility is operating in compliance with the SIP Rule 325 IAC 8–2–3 by establishing emission limits based on total actual emissions calculated from daily units of production. This method of determining compliance is consistent with USEPA's 1980 policy memorandum referred to the above. The proposed actual emission limits are as follows:

VOC EMISSIONS (POUNDS PER DAY)

Source	Line number	Control efficiency	VOC emissions	
			Proposed limits	Under existing SIP
Varnish	3	87	38	124
	4	87	38	124
	5	87	38	124
	6	87	38	124
	7	87	38	124
Coating	21	83	153	499
	22	83	153	499
	23	83	153	499
	24	83	153	499
	25	83	153	499
	26	83	153	499
Food Ends	51	0	118	48
	52	0	118	48
Beer and Beverage Ends	52	0	224	141
	55	0	224	141
	56	0	224	141
	57	0	224	141
	59	0	224	141
	62	0	224	141
	63	0	224	141
	64	0	224	141
			3440	4995

In addition to the above line by line daily limits, and the overall plant daily limit (3440 pounds per day), the compliance method set forth in USEPA's December 8, 1980, policy memorandum must be used by American Can to demonstrate compliance with the SIP emission limits.

Conclusion

USEPA is proposing to approve this SIP revision because it represents a compliance alternative that is consistent with USEPA's December 8, 1980, policy memorandum. This proposed SIP revision will not increase the VOC emissions from the American Can Lake County facility.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

Dated: March 18, 1987.

Valdas V. Adamkus,

Regional Administrator.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89–87, RM–6637]

Television Broadcasting Services; Bessemer and Tuscaloosa, AL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Channel 17 Associates, Inc., licensee of UHF Television Station WDBB(TV), Channel 17, Tuscaloosa, Alabama, proposing to amend the Television Table of Allotments, § 73.606(b) of the Commission's Rules, by changing the community of license of Channel 17 from Tuscaloosa to Bessemer, Alabama, and to modify petitioner's license accordingly, in order to provide Bessemer with its first local television service. The site coordinates of petitioner's transmitter will remain as 33–28–51 and 87–24–03.

DATES: Comments must be filed on or before June 12, 1989, and reply comments on or before June 27, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Howard M. Weiss and Mark N. Lipp, Mullin, Rhyne, Emmons and Topel, P.C., 1000 Connecticut Avenue—Suite 500, Washington, DC 20036 (Counsel for petitioner).

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–87, adopted April 3, 1989, and released April 19, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact. For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 89-84, adopted April 3, 1989, and released April 18, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing precedures for comments, See 47 CFR 1.415 and 1.420.

[Docket No. 89-5; Notice 1]

RIN 2127-AD00

Importation of Vehicles and Equipment Subject to Federal Motor Vehicle Safety Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The purpose of this notice is to propose procedures that would govern the importation of motor vehicles and equipment subject to Federal safety standards on and after January 31, 1990. In most instances, these proposals are mandated by the Imported Vehicle Safety Compliance Act of 1988. The proposals would substantially modify the procedures and exemptions that have been in effect, relatively unchanged, since January 1, 1968. Requirements concerning declarations to be made to the U.S. Customs Service regarding vehicles and equipment that conform to the Federal safety standards, and regarding nonconforming equipment, would remain unchanged.

Exemptions from the statutory prohibition against importing noncomplying motor vehicles would still be provided for foreign diplomatic and military personnel. The 1988 amendments would remove some exemptions, while adding others. New exemptions would be provided for vehicles 25 years old or older, vehicles needing further manufacturing operations to perform their function, and vehicles imported solely for research, investigations, studies, demonstrations or training, or competitive racing events. Nonconforming vehicles imported by exempted persons need not be brought into conformance with the standards.

With one exception, if a nonexempted person offered a nonconforming vehicle for entry on and after January 31, 1990, that person would have to be either someone who has registered with NHTSA to undertake the obligation to bring the vehicle into compliance, or someone who has a conformance contract with a NHTSA registrant. The exception would be that the present rule allowing entry and conformance of any motor vehicle by any non-registered person would continue in effect for vehicles imported for personal use not later than October 31, 1992, by any individual whose assigned place of employment was outside the United States on October 31, 1988, and who owned the vehicle (or had ordered it) as of October 31, 1988.

Nonconforming vehicles imported by nonexempted persons would have to be brought into conformance with the standards. Not all vehicles, however, would be eligible for importation by nonexempted persons. A vehicle cannot be imported at all by a nonexempted person unless NHTSA determines that it is capable of modification to meet the Federal safety standards.

DATES: Comment closing date for the proposal is June 26, 1989. The effective date of the final rule after publication in the **Federal Register** would be January 31, 1990.

ADDRESS: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh St., SW., Washington, DC 20590. Docket hours are from 8 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel, NHTSA, (202-366-5263).

SUPPLEMENTARY INFORMATION: On October 31, 1988, the President signed Pub. L. 100-562, the Imported Vehicle Safety Compliance Act of 1988. Notice of its enactment was published by the agency in the **Federal Register** on December 5, 1988 (53 FR 49003). As the notice stated, the Safety Compliance Act amends those provisions of the National Traffic and Motor Vehicle Safety Act of 1966 ("the Vehicle Safety Act") that relate to the importation of motor vehicles subject to the Federal motor vehicle safety standards (section 108(b), 15 U.S.C. 1397(b)).

Specifically, the 1988 amendments revoke sections 108(b)(3), and (b)(4) of the Vehicle Safety Act, effective January 31, 1990. These sections authorized the issuance of regulations jointly by the Secretaries of Transportation and Treasury to prohibit the importation of motor vehicles and equipment not complying with the Federal motor vehicle safety standards, except under such terms and conditions as may appear to them appropriate to ensure that a noncomplying vehicle or equipment item will be brought into conformance or will be exported or abandoned to the United States. The temporary admission of nonconforming used vehicles and equipment items by exempted persons was also permitted. Pursuant to this authority, the two Secretaries issued an implementing regulation, 19 CFR 12.80, which has governed the importation of merchandise subject to Federal motor vehicle safety standards since 1968, and will continue to do so through January 31, 1990.

Under the 1988 amendments, new sections (c) through (j) are added to section 108 to replace revoked sections (b)(3) and (b)(4). The authority to issue joint regulations is replaced by a rulemaking authority vested alone in the Secretary of Transportation (and delegated to NHTSA through existing delegations of authority).

The purpose of this notice is explain how importation of motor vehicles and equipment will be affected by this new authority, and to propose a regulation that implements it. First of all, the existing regulation, 19 CFR 12.80, will continue to be a regulation under the joint authority of the two Departments with respect to the importation provisions of the Motor Vehicle Information and Cost Savings Act under which the Bumper Standard (49 CFR Part 581) was issued. With respect to the Vehicle Safety Act, however, the proposed new NHTSA regulation, 49 CFR Part 591, will become the primary importation regulation and 19 CFR 12.80, the conforming regulation of the U.S. Customs Service. In the future, substantive changes to importation procedures will be effected by NHTSA alone, through amendments to Part 591, and Customs will make conforming amendments to § 12.80, if necessary.

A similar relationship presently exists between regulations of the Environmental Protection Agency ("EPA") and Customs (See, respectively, 40 CFR 85. 1501 *et seq.* and 19 CFR 12.73). This relationship has established a precedent for Customs to amend it regulations without notice and opportunity for comment on the basis that full notice and opportunity had been offered by EPA in promulgating its regulations, and that the amendments by Customs were merely conforming in nature (See 53 FR 28240).

NHTSA is attempting in this rulemaking action to formulate a program that will ensure that all imported motor vehicles conform to the Federal motor vehicle safety standards without imposing unnecessary burdens on importers. Therefore, NHTSA has tried in this proposal to impose only those requirements that are mandated by the 1988 Act, with amplifications only where it appeared necessary to implement the safety intent of the statute. NHTSA encourages commenters to provide suggestions as to ways to reduce burdens without compromising safety, within the framework of the 1988 Act, in order to assist the agency in developing the final rule.

Importation of Motor Vehicles

Under existing § 12.80, a motor vehicle offered for importation into the United States is admitted pursuant to one of nine declarations regarding the status of the vehicle in relation to the motor vehicle safety and bumper standards. The requirements of the 1988 Act affect some of these declarations, and establish new exceptions. A discussion of these changes follows.

1. The Vehicle is Not a "Motor Vehicle"

Under 19 CFR 12.80(b)(1)(viii), a vehicle is not required to be brought into compliance if it is not a motor vehicle as defined by the Vehicle Safety Act, i.e., that it was not designed primarily for use on the public streets, roads, and highways. This exemption remains § 591.5(a)(i)) because this agency has no jurisdiction regarding non-motor vehicles under the Vehicle Safety Act and the 1988 Act makes no jurisdictional change.

2. The Vehicle Conforms and is so Certified.

A motor vehicle is allowed immediate entry without the posting of bond upon a declaration that it conforms to all applicable Federal motor vehicle safety standards and bears a certification label to that effect permanently affixed by the original manufacturer § 12.80(b)(l)(ii)). This same section also allows immediate entry if a vehicle is only technically noncompliant, i.e., because readily attachable equipment items such as windshield wipers and mirrors have been removed to facilitate shipping, but will be installed before the vehicle is offered for sale. The 1988 Act makes no change affecting these declarations, and they are provided in the proposed regulation § 591.5(b)).

The agency interprets the new amendments, however, as imposing new restrictions upon the importation of vehicles that may have been conformed prior to entry but bear a certification by a person other than the original manufacturer. The 1988 amendments amend Section 1397(a)(1)(A) to add the words "and is covered by a certification issued under section 114" as an addition to the existing requirement that a vehicle may not be imported "unless it is in conformity". A certification issued under section 114 is that of the original

1989
UMI

manufacturer, and not a converter. To reflect this amendment, the agency is proposing a definition of the term "original manufacturer" so that it excludes converters outside the United States who certify and conform vehicles to the standards after the vehicles have been designed, engineered, and manufactured in fully assembled form by a person other than the converter. The agency believes that the 1988 amendments justify this interpretation. An interpretation that would allow free entry of a vehicle pursuant to a declaration of conformity and a certification by a person other than its original manufacturer could well result in the importation of vehicles for which the Administrator had made no determination of capability of modification to meet Federal standards, and defeat the purpose of the 1988 amendments. Further, under this interpretation, even if the converted vehicle is one that the Administrator has deemed eligible for entry and is certified as conforming by its converter, it can enter the country only through a registered importer, or one who has a contract with a registered importer. This also fulfills one of the purposes of the 1988 amendments. i.e., that there be a responsible party who provides NHTSA with certification of conformance of vehicles not originally manufactured in accordance with the standards, and who will assume notification and remedy responsibilities should the statutory preconditions occur. This means that a motor vehicle that has been modified after its manufacture and before entry, and which is certified by a party other than its original manufacturer, will be treated as a nonconforming motor vehicle, and subject to the same entry requirements.

3. The Vehicle is Intended Solely for Export

A nonconforming vehicle is allowed immediate entry without bond upon the declaration that the importation is solely for purposes of export, and bears a label to that effect (12.80(b)(1)(iv)). This declaration is allowed pursuant to a specific statutory exclusion in the Vehicle Safety Act, section 108(b)(5). Under the 1988 amendments, the section becomes 108(b)(3), but is otherwise unchanged, and the exclusion remains § 591.5(c)).

4. Nonresident Temporary Importations

If the importer is a nonresident of the United States and is importing the nonconforming vehicle primarily for personal use for a period of 1 year or less, the current regulations allow entry without bond and conformance, but the declaration must also state that the importer will not sell the nonconforming vehicle in the United States during that period [§ 12.80(b)(1)(v)).

This provison was intended to benefit two classes of importers. The first class is comprised of U.S. citizens who are between foreign work assignments, and need to use their noncomplying cars while in transit, on home leave, or on temporary assignment in the U.S. The second class of importer is comprised of non-U.S. citizens. They may be Mexican or Canadian residents who use the American roads on an infrequent basis, or citizens of other countries who bring their tour buses, campers, or cars with them to facilitate their vacations in the U.S.

One authority for the previously existing allowance was section 1397(b)(4) which authorized the adoption of regulations allowing the "temporary importation" of noncomplying vehicles or equipment items. This authority has been deleted by the 1988 amendments. However, a further authority has been deleted by the 1988 amendments. However, a further authority for the nonresident exemption was the existence of two international treaties to which the United States is a signatory that address the movement of vehicles among various countries (I. Customs Convention on the Temporary Importation of Private Road Vehicles opened for signature June 4, 1954, 8 U.S.T. 2097, T.I.A.S. No. 3943, entered into force December 15, 1957. II. Convention on the Regulation of Inter-American Automotive Traffic, opened for signature December 15, 1943, 61 Stat. 1129, T.I.A.S. No. 1567, entered into force October 29, 1946). NHTSA believes that elimination of the present allowance may be inconsistent with the intent of the treaties, and is retaining it in clarified form, allowing the temporary importation of any vehicle by a nonresident that is registered in a country other than the United States, provided it is for personal use, imported for a period not to exceed one year, will not be resold in the U.S. during that time, and will be exported at the end of that time (§ 591.5(d)).

5. The Vehicle Does Not Conform to Federal Sofety Standards

This is the category of motor vehicle whose importation is most affected by the 1988 amendments. Under 19 CFR 12.80, a nonconforming vehicle is imported pursuant to a declaration that it will be brought into conformance within 120 days of entry. The importer gives a bond for the production of a statement, after conformance, certifying that the conformance work has been accomplished. The statement describes the conformance work, identifies the conformer, and certifies that the vehicle will not be sold until NHTSA has issued an approval letter to the district director of Customs that the bond may be released. The bond is for the dutiable value of the vehicle (§ 12.80(b)(1)(iii) and (e)).

The 1988 amendments impose criteria which motor vehicles must meet in order to be imported. Under new section 108(c)(3)(A), a vehicle cannot be imported at all (with certain exceptions set out below) unless NHTSA determines that it is capable of modification to meet the Federal safety standards. Determinations may be made on NHTSA's own initiative, or upon petition of any registered importer (see discussion below) or any motor vehicle manufacturer, and will be subject to public comment.

A nonconforming vehicle that is not offered for importation under one of the exemptions listed below may be imported under either of the following two scenarios. The first scenario, specified by section 108(c)(3)(A)(i)(I), will involve the making of two determinations: (1) That the nonconforming vehicle is substantially similar to a motor vehicle of the same model year originally manufactured for importation into and sold in the U.S., (and thus in compliance with the safety standards) and (2) that the vehicle is capable of being readily modified to conform.

The second scenario, specifed by section 108(c)(3)(A)(i)(II), will arise if the agency does not make a determination of substantial similarity regarding a vehicle. In that case, it will still be permissible to import the vehicle if the agency determines that the vehicle's safety features comply with the U.S. standards, or are capable of being modified to comply with those standards, "based on destructive crash data or such other evidence" as NHTSA determines is adequate.

Under either scenario, a positive determination regarding a vehicle will permit any registered importer to modify vehicles of the same model covered by the determination.

If the agency makes a negative determination regarding a model's ability to be modified, the agency will be temporarily prohibited from taking up the issue of that model's importability again. If the negative determination was made in response to a petition, section, 108(c)(3)(C)(ii) of the Act prohibits the agency from considering a petition regarding the same model of vehicle until at least 3 months after that decision. If the negative determination was made in a proceeding begun at the agency's own initiative, the agency will not be able to make another determination regarding the same model of motor vehicle until at least 3 months after the negative one (section 108(c)(3)(C)(iii)). The agency addresses these matters in companion notices of proposed rulemaking published simultaneouly with this one, Part 592, *Registered Importers of Noncomforming Vehicles*, and Part 593, *Determinations That a Nonconforming Vehicle is Eligible for Importation.*

Once a vehicle has been determined eligible for importation, it may then be imported by a registered importer who will undertake to conform it with the safety standards (§ 591.5(f)(i)). The importer is required by section 106(c)(2) to give a bond to ensure conformance or alternatively that the vehicle will be exported or abandoned to the United States. The bond is to be not less than the dutiable value of the vehicle as determined by the Secretary of the Treasury, and not more than 150 per cent of the dutiable value. Both NHTSA and the U.S. Customs Service view this bond as one that is separate from the general importation bond, which will continue to be required. Further, the statute is interpreted as requiring a separate bond for each vehicle imported. This means that the 1988 Act requires an individual bond to be given for each vehicle imported. A bond is not blanket in nature, covering any vehicle that may be imported by a registered importer. In other words, the required bond will be of a single entry nature, and not of a continuous nature.

6. The Vehicle Requires Further Manufacturing Operations

Under new section 108(e), a vehicle may be imported without violating section 108(a)(1)(A) if it requires further manufacturing operations to perform its intended function. Currently, pursuant to § 12.80(b)(1)(ix), a vehicle may be imported without bond or conformance documentation if it is an "incomplete vehicle" as defined by 49 CFR Part 568 *Vehicles Built in Two or More Stages.* The justification for this exception is that the vehicle must conform, and be certified as conforming, upon completion by its final stage manufacturer, and that this is an obligation that exists independent of the importation process. Under Part 568, an incomplete vehicle must be accompanied by a document listing the standards that will apply to the completed vehicle, and containing representations of the incomplete vehicle manufacturer with respect to the status of the incomplete vehicle vis-a-vis each standard. Section 108(e) of the Vehicle Safety Act includes this exception but broadens it to apply to any motor vehicle that "requires further manufacturing to perform its intended function (as determined under regulations prescribed by the Secretary)", and is accompanied by a written statement of the manufacturer indicating the applicable safety standard(s) with which the unfinished vehicle does not comply. The question of the type and extent of manufacturing required for performance of intended function, will, of course, vary. However, the existing requirements for alterers of certified vehicles (§ 568.8) afford a basis for proposing criteria that distinguish between completed vehicles and those that require further manufacturing. Accordingly, if a vehicle requires more than the addition of readily attachable equipment components such as mirrors or tire and rim assemblies, or minor finishing operations such as painting, its importer may enter it pursuant to proposed § 591.5(e).

Instances have arisen in the past in which an importer offered for importation a motor vehicle without its engine, or other running gear parts, claiming that the merchandise is, in fact, equipment to which no standard applies, and the importer separately imported the engine or parts. The agency has treated these cases as de facto importations of noncomplying motor vehicles, and required them to be entered as nonconforming motor vehicles and evidence of conformity to be subsequently submitted. This type of importation will now be covered by section 108(e).

7. The Importer has a Contract With a Registered Importer

The primary eligibility requirements placed by the 1988 amendments on persons importing nonconforming vehicles are that they will have to be, subject to certain exceptions, registered as importers, or they will have to have contracts with registered importers to conform the vehicles. The latter, at the time of entry, will have to furnish an appropriate bond (which, under the 1988 amendments, is not less than 100 percent of the dutiable value of the vehicle and not more than 150 percent; this directive will become part of 19 CFR 12.80), a copy of the contract or other agreement with a registered importer, and certification that an affirmative decision has been made regarding the eligibility of the vehicle for importation. For good cause shown, the importer may be allowed additional time to furnish a copy of the contract, but not more than 30 days after the date on which the vehicle was offered for importation. These matters, specified in section 108(f), are covered in the proposals published as § 591.5(f)(ii). Under § 591.6(c), a copy of the contract or agreement would be submitted with the declaration, or, alternatively, a copy of a letter from the Administrator finding good cause shown for affording a period of up to 30 days from the date of declaration in which to provide the contract copy. Under § 591.7(b) an importer seeking permission for delayed submission must present reasons in justification in advance of the arrival of the vehicle. The purpose of the new requirements is to increase the likelihood that nonconforming vehicles will be properly modified and actually brought into compliance with the safety standards.

8. The Importer is Eligible to Import Under Present Requirements

Nonresidents are affected in another way by the 1988 amendments. Under certain circumstances, and for a limited time, section 108(g) of the Vehicle Safety Act permits a nonresident (including any member of the Armed Forces) to continue to import a vehicle under the present regulation, that is, to have it conformed by a person other than a registered importer. This exception applies to a single vehicle imported, for personal use and not for resale, between January 31, 1990, and October 31, 1992, by an individual whose assigned place of employment was outside the United States for the total period between October 31, 1988, and the date of importation, provided that the vehicle was acquired (or was subject to a binding contract to acquire) before October 31, 1988, and that the individual has not previously imported a nonconforming motor vehicle. This amendment is reflected in proposed § 591.5(g).

9. Importation by Diplomats and Foreign Military Personnel

Any person who is a member of the armed forces of a foreign country on assignment in the U.S., or any person who is a member of the Secretariat of a public international organization so designated under the International Organization Immunities Act and who is within the class of persons for whom free entry of motor vehicles has been authorized by the Secretary of State currently may import a nonconforming vehicle for the duration of their stay pursuant ot the declaration that the vehicle is for personal use only § 12.80(b)(1)(vi)). Section 108(h) of the Vehicle Safety Act specifically retains

VOL
54
ISS
78
AP
25
1989
UMI

this exclusion, but in addition requires NHTSA to ensure that any such vehicle will be exported or abandoned when the importer ceases to reside in the U.S. It also forbids the sale while within the United States or any motor vehicle imported under this provision.

The enforcement of this provision would appear to rest with the Office of Foreign Missions of the Department of State. NHTSA understands that foreign personnel in the exempted categories who import nonconforming vehicles into the United States, are required to register their vehicles with this Office. Under the registration process, the Office takes possession of the foreign title of the vehicle, and issues registration plates to the importer after verifying that the vehicle is insured. The importer does not take repossession of the title until the registration plates are returned to the Office. At that time, the Office asks for an explanation. The usual reason is that the importer's assignment in the United States has ended, and that s(he) is leaving the country. Documentary proof is required, such as a copy of the importer's orders. Heretofore, however, no documentary proof has been required that the vehicle is being, or has been, exported. Thus, it is possible that a nonconforming vehicle could be sold between the time the importer repossesses the title and actually leaves the country, but the Office believes that this is only an infrequent occurrence. NHTSA has informally approached the Office as to the possibility that it could require proof of exportation of diplomatic vehicles, and has found the Office amenable to that suggestion. This approach appears less cumbersome than requiring a bond for the exportation of diplomatic vehicles. Accordingly, NHTSA is proposing that one of the declarations an importer make under § 595.5(h) is that s(he) will provide the Office of Foreign Missions, at the conclusion of a tour of duty and before depature from the United States, with documentary proof that the vehicle is being, or has been, exported.

Under the existing law and regulations, it has been the practice to allow an exempted diplomatic importer to sell his nonconforming vehicle to another person in one of the exempted categories. The justification for this practice is that the exempted buyer is himself eligible to import a nonconforming vehicle. The agency does not construe the 1988 Act as forbidding this type of sale between exempted importers.

However, the 1988 amendments do affect another practice. Heretofore, sale of a nonconforming vehicle has been permitted, provided that the importer undertook to conform it to applicable Federal safety standards before the sale. If this practice is to continue, it will have to be greatly modified. If an exempted importer wishes to sell a nonconforming vehicle in the United States, NHTSA proposes that (s)he be prohibited from doing so unless (1) the vehicle is one which the Administrator has determined is modifiable to conform to the safety standards, and (2) the vehicle will be conformed through a registered importer. NHTSA believes that this type of transaction is also within the intent of the 1988 Act, and that otherwise, a nonconforming vehicle may not be sold if imported pursuant to this type of exemption. However, if NHTSA determines during the pendency of this proposal, or on the basis of comments received, that this type of transaction is administratively infeasible, the final rule may forbid any sale other than between exempted importers.

10. The Vehicle is 25 or More Years Old

A motor vehicle is allowed immediate entry under 12.80(b)(1)(i) if it were manufactured on a date when no applicable Federal motor vehicle safety standards were in effect. All motor vehicles, other than motorcycles, manufactured on or after January 1, 1968, have been covered by safety standards. Accordingly, this declaration has been used only for the entry of vehicles manufactured before January 1, 1968. Under section 108(i), added by the 1988 Act, a motor vehicle may be allowed entry without the necessity of conformance if it is 25 years old or older. Thus, after January 1, 1993, vehicles that were manufactured on or after January 1, 1968, will be relieved of the necessity to conform as they reach 25 years of age. The existing declaration will be retained until January 1, 1993, although clarified by specifying the January 1, 1968 date (§ 591.5(i)). This is necessary to prevent the importers of vehicles which are less than 25 years old but manufactured before January 1, 1968, from being inadvertently required to enter their vehicles pursuant to the 1988 amendments. During 1992, the agency will amend § 591.5(i) to implement the 25-year old exclusion effective January 1, 1993.

11. Importation for Research, Investigation, Studies, etc.

Importation of nonconforming vehicles without bond is presently allowed if the importation is solely for the purpose of show, test, experiment, competition, repair, or alteration (§ 12.80(b)(1)(vii)). If the vehicle is imported for test or experiment, it may be licensed for use on the public roads for a period not to exceed one year, extendable for two successive year periods, or a period of three years in all. Importation for show, etc., has been permitted pursuant to the implied statutory authority that motor vehicle safety would not be affected by the temporary importation of noncomplying motor vehicles not generally used on the public roads, and whose appearance on them would be limited.

Section 108(j) of the Vehicle Safety Act modifies these categories. It provides NHTSA with authority to exempt a vehicle upon such terms and conditions as may be necessary solely for the purpose of research, investigations, studies, demonstrations or training, or competitive racing events. It does not include the terms "show" and "repair" currently in use. Prospective importers ought not to be unduly concerned at this. In NHTSA's experience, importation for repair has averaged, perhaps, one vehicle every two years. Manufacturers who have imported nonconforming products for display at auto shows to gauge public reaction to new styling or engineering features will not be precluded from declaring that such importation is for "research" or "demonstrations." And museums will be able to bring in nonconforming vehicles under the 25-year exception. NHTSA is proposing to allow importation for the statutory purposes specified, provided that the declaration is accompanied by certain information and statements. If this information indicates that on-road use for a period that is greater than 1 year is required for these purposes, the importer will not be required to petition NHTSA for yearly extensions, as is presently the case. At the end of 3 years, the importer is subject to termination of the Customs Temporary Importation Bond under which the vehicle entered. At that point, the vehicle may be conformed, destroyed, exported, or permanently entered if duties are paid. If permanently entered, the vehicle remains subject to the original declaration under which it entered, and under the proposed regulation its importer must inform NHTSA of the option chosen for the vehicle at the end of the 3-year period. The proposed regulation would also prohibit an importer of a vehicle imported for competitive racing events from licensing it for use on the public roads, unless it has been brought into conformance with applicable standards.

NHTSA envisions that a registered importer who intends to file a petition under Part 593 for a determination that a vehicle is eligible for importation because it is capable of modification could avail itself of the demonstration exception to import such vehicles as may be necessary in order to develop the documentation needed to demonstrate the vehicle's capability for modification.

Importation of Motor Vehicle Equipment

Under 19 CFR 12.80, the first seven of the nine declarations applicable to motor vehicles also apply to motor vehicle equipment. The primary focus of the 1988 amendments is upon motor vehicles, however, and some of the new exceptions do not apply to motor vehicle equipment. An analysis of the equipment provisions and proposals follows.

The 25-year old exception for motor vehicles does not extend to motor vehicle equipment. This means that equipment covered by an equipment standard continues to be importable without the necessity for conformance (absent other exceptions) only if manufactured on a date before a standard applied to it.

An equipment item that is certified as conforming to applicable equipment standards continues to be admissible without the necessity for bond.

A nonconforming equipment item is not subject to the registered importer and determinations of substantial similarity provisions. The present requirements will continue to apply to it.

Because the importation for export exception is provided for by the Vehicle Safety Act, and not affected substantively by the 1988 Act, noncomforming equipment may continue to be imported for export, provided that it or its container bears a label or tag to that effect at the time of importation. (See section 108(b)(5) of the Vehicle Safety Act, redesignated as 108(b)(3) by the 1988 amendments.)

Under new section 108(e), an equipment item need not comply upon importation if it requires further manufacturing to perform its intended function.

The new provisions regarding importation for purposes of research, investigation, studies, demonstrations or training, or competitive racing events (section 108(j)) expressly include motor vehicle equipment as well as vehicles, and thus supersede existing requirements.

Impacts

NHTSA has considered the impacts of this rulemaking action and has determined that it is not major within the meaning of Executive Order 12291 "Federal Regulation." It implements Pub. L. 100–562 under which primary authority to establish regulations governing the importation of motor vehicles and equipment into the United States is shifted to NHTSA, rather than being jointly shared with the U.S. Customs Service. As such, it establishes the rights and duties of those who may import nonconforming motor vehicles, and the types of nonconforming motor vehicles that may be imported. It is not significant under Department of Transportation regulatory policies and procedures. Less than 3000 motor vehicles a year are currently imported, and it is anticipated that this number will not increase. There is no substantial impact upon a major transportation safety program, and the action does not involve any substantial public interest or controversy. There is no substantial effect on state and local governments. The impact upon the Federal government is that certain present obligations of the U.S. Customs Service are transferred to the Department of Transportation. As discussed previously, many of the new requirements are specified by the 1988 amendments, and thus do not reflect any exercise of agency discretion. These include not only importation through or by contract with a registered importer, but also importation of vehicles and equipment requiring further manufacturing to perform their intended function, importation of vehicles by specified foreign diplomatic and military personnel, importation of vehicles more than 25 years old, and importation of vehicles for the purpose of research, investigations, studies, demonstrations or training, or competitive racing events, and importation under a separate performance bond.

The agency has also considered the effects of this proposal in relation to the Regulatory Flexibility Act. I certify that this proposal would not have a significant economic impact upon a substantial number of small entities. Although entities that currently modify nonconforming vehicles may be small businesses within the meaning of the Regulatory Flexibility Act, there is no restriction prohibiting them from registering as importers under the proposal. Although a registered importer will have to pay a fee or fees to the agency, as required by statute, the agency does not view this requirement as resulting in a significant impact. Further, small organizations and governmental jurisdictions would not be significantly affected as they are not generally importers and purchasers of nonconforming motor vehicles. However, a Regulatory Flexibility Analysis has been prepared covering all regulations proposed to implement the 1988 Act, and will be placed in the public docket.

NHTSA has analyzed this proposal for purposes of the National Environmental Policy Act. It is not anticipated that a rule based on the proposal would have a significant effect upon the environment because it is anticipated that the annual volume of motor vehicles imported under the rule would not vary significantly from that existing before promulgation of the rule. However, to the extent that a rule would result in a larger number of vehicles being brought into compliance with the standards, the use of materials used in conforming vehicles would increase.

The declaration requirements in this proposal are considered to be information collection requirements, as that term is defined by the Office of Management and Budget (OMB) in 5 Part 1320. Although they are modifications of declarations presently existing in agency form HS–7, these proposed declarations are being submitted to OMB for its approval, pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Comments on the proposed information collection requirements should be submitted to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attn: Desk Officer for NHTSA. It is requested that comments sent to the OMB also be sent to the NHTSA rulemaking docket for this proposed action.

The proposed rule has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 "Federalism", and it has been determined that it does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted. All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief

VOL 54 ISS 78 AP 25 1989 UMI

Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the docket section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512.).

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 591

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, it is proposed that a new Part 591 *Importation of Vehicles and Equipment Subject to Federal Motor Vehicle Safety Standards* be added to Title 49, Chapter V, to read as follows:

PART 591—IMPORTATION OF VEHICLES AND EQUIPMENT SUBJECT TO FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Sec.

591.1 Scope.
591.2 Purpose.
591.3 Applicability.
591.4 Definitions.
591.5 Declarations required for importation.
591.6 Documents accompanying declarations.
591.7 Restrictions of importations; entry bond.

Authority: Pub. L. 100-562, delegations of authority at 49 CFR 1.50 and 501.8.

§ 591.1 Scope.

This part establishes procedures governing the importation of motor vehicles and motor vehicle equipment subject to the Federal motor vehicle safety standards.

§ 591.2 Purpose.

The purpose of this part is to ensure that motor vehicles and motor vehicle equipment permanently imported into the United States conform with, or are brought into conformity with, all applicable Federal motor vehicle safety standards issued under Part 571 of this chapter, and to ensure that vehicles and equipment items imported on a temporary basis, are ultimately either exported or abandoned to the United States.

§ 591.3 Applicability.

This part applies to any person offering a motor vehicle or item of motor vehicle equipment into the United States. Regulations prescribing further procedures for importation of motor vehicles and items of motor vehicle equipment into the Customs territory of the United States, as defined in 19 USC 1202, are set forth in 19 CFR 12.80.

§ 591.4 Definitions.

All terms used in this part that are defined in section 102 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391) are used as defined in the Act.

"Administrator" means the Administrator of the National Highway Traffic Safety Administration.

"NHTSA" means the National Highway Traffic Safety Administration.

"Original manufacturer" means the entity responsible for the original design, engineering, and manufacture of a motor vehicle, and does not include any person other than such manufacturer who converts the motor vehicle after its manufacture to conformance with the Federal motor vehicle safety standards.

§ 591.5 Declarations required for importation.

No person shall import a motor vehicle or item of motor vehicle equipment into the United States unless, at the time it is offered for importation, its importer files a declaration, in duplicate, which declares or affirms one of the following:

(a)(1) The vehicle was not manufactured primarily for use on the public roads and thus is not a motor vehicle; or

(2) The equipment item is not a system, part, or component of a motor vehicle.

(b) The vehicle or equipment item conforms with all applicable safety standards (or the vehicle will conform when readily attachable equipment items carried within it are attached), and bears a certification label or tag to that effect permanently affixed by the original manufacturer to the vehicle or to the equipment item or its delivery container.

(c) The vehicle or equipment item does not comply with all applicable Federal motor vehicle safety standards, but is intended solely for export, and the vehicle or equipment item, and the outside of the container of the equipment item, if any, bears a label or tag to that effect.

(d) The vehicle item does not conform with all applicable Federal motor vehicle safety standards, but the importer is eligible to import it because (s)he is a nonresident of the United States and the vehicle is registered in a country other than the United States, and the importer is temporarily importing the vehicle for personal use for a period not to exceed one year, will not sell it during that time, and will export it at the end of that time.

(e) The vehicle or equipment item requires further manufacturing operations to perform its intended function, other than the addition of readily attachable equipment items, or minor finishing operations.

(f) The vehicle does not conform with all applicable Federal motor vehicle safety standards, but the importer is eligible to import it because:

(1) The importer has registered with NHTSA pursuant to Part 592 of this chapter, and such registration has not been revoked or suspended, and the Administrator has determined pursuant to Part 593 of this chapter that the model and model year of the vehicle to be imported is eligible for importation into the United States; or

(2) The importer has executed (or will within 30 days of the date of the declaration execute) a contract (or other agreement) with an importer who has registered with NHTSA pursuant to Part 592 of this chapter and whose registration has not been suspended or revoked; the Administrator has determined pursuant to Part 593 of this chapter that the model and model year of the vehicle to be imported is eligible for importation into the United States; and the vehicle is being imported for personal use and not for purposes of resale.

(g) The vehicle does not conform with all applicable Federal motor vehicle safety standards, but the importer is eligible to import it because:

(1) The importer's assigned place of employment has been outside the United States at all times between October 31, 1988, and the date the vehicle is entered into the United States;

(2) The importer has not previously imported a motor vehicle into the United States that was subject to the Federal motor vehicle safety standards;

(3) The importer had acquired (or entered into a binding contract to acquire) the vehicle before October 31, 1988; and

(4) The vehicle will be entered into the United States not later than October 31, 1992.

(h)(1) The vehicle does not conform with all applicable Federal motor vehicle safety standards, but the importer is eligible to import it because (s)he is a member of:

(i) The armed forces of a foreign country on assignment in the United States; or

(ii) The Secretariat of a public international organization so designated under the International Organizations Immunities Act (22 USC 288), as listed in 19 CFR 148.47, on assignment in the United States; or

(iii) The personnel of a foreign government for whom free entry of vehicles has been authorized by the Department of State;

(2) Will not sell the vehicle to any person in the United States, except to a person eligible to import a vehicle under this subsection; and

(3) Will provide the Office of Foreign Missions of the State Department, before departing the United States at the conclusion of a tour of duty, with documentary proof that the vehicle is being, or has been, exported.

(i)(1) The vehicle was manufactured before January 1, 1968; or

(2) The equipment item was manufactured on a date when no applicable safety standards were in effect.

(j) The vehicle or equipment item does not conform with all applicable Federal motor vehicle safety standards, but is being imported for a temporary period solely for:

(1) research;

(2) investigations;

(3) studies;

(4) demonstrations or training; or

(5) competition racing events;

and will not be licensed for use on the public roads.

§ 591.6 Documents accompanying declarations.

Declarations of eligibility for importation made pursuant to § 591.5 must be accompanied by the following certification and documents, where applicable.

(a) A declaration made pursuant to § 591.5(a) shall be accompanied by a statement substantiating that the vehicle was not manufactured for use on the public roads, or that the equipment item was not manufactured for use on a motor vehicle or is not an item of motor vehicle equipment.

(b) A declaration made pursuant to § 591.5(e) shall be accompanied by a written statement issued by the manufacturer of the vehicle or equipment item which states the applicable Federal motor vehicle safety standard(s) with which the vehicle or equipment item is not in compliance, and describing the further manufacturing required for the vehicle or equipment item to perform its intended function.

(c) A declaration made pursuant to § 591.5(f) by an importer who is not a Registered Importer shall be accompanied by a copy of the contract or other agreement that the importer has with a Registered Importer to bring the vehicle into conformance with all applicable Federal motor vehicle safety standards, or, alternatively, a copy of a letter from the Administrator granting such importer a period not more than 30 days from the date of the declaration in which to provide the Administrator with a copy of the contract (or other agreement).

(d) A declaration made pursuant to § 591.5(g) shall be accompanied by certification, including appropriate documentary proof that the vehicle for which declaration is made had been acquired by the importer as of October 31, 1988, or, if not so acquired, by a copy of a contract to acquire the vehicle, dated before October 31, 1988, which was binding upon the importer.

(e) A declaration made pursuant to § 591.5(h) shall be accompanied by a copy of the importer's official orders, or, if a qualifying member of the personnel of a foreign government on assignment in the United States, the name of the embassy to which the importer is accredited.

(f) A declaration made pursuant to § 591.5(j) shall be accompanied by a full and complete statement identifying the specific purpose(s) of importation, describing the use to be made of the vehicle or equipment item, and stating the estimated period of time necessary to use the vehicle or equipment item on the public roads, if any, and the disposition to be made of the vehicle or equipment item after completion of the purpose for which it is imported. If the importer does not intend to conform, export or destroy the vehicle or equipment item not later than 3 years after its entry, the importer shall request permission in writing from the Administrator for the vehicle or equipment item to remain in the United States for an additional period of time, subject to the limitations of § 591.7(c).

§ 591.7 Restrictions on importations; entry bond.

(a) A vehicle for which entry is sought under a declaration made pursuant to § 591.5(e) is a vehicle that requires further manufacturing operations to perform its intended function, other than the addition of readily attachable components, such as mirrors or tire and rim assemblies, or minor finishing operations such as painting.

(b) A vehicle for which entry is sought under a declaration made pursuant to § 591.5(f) may not be entered into the United States without a copy of a contract (or other agreement) with a Registered Importer, unless the Administrator has found, for good cause shown, that a copy of such contract (or other agreement) may be submitted to the Administrator within 30 calendar days after entry of the vehicle. Any person seeking such a finding should inform NHTSA in writing at least 10 days before a vehicle is offered for importation.

(c) A vehicle or equipment item which has entered the United States under a declaration made pursuant to § 591.5(j), and for which a Temporary Importation Bond has been provided to the Secretary of the Treasury, shall not remain in the United States for a period that exceeds 3 years from its date of entry, unless it has been conformed to meet all applicable Federal motor vehicle safety standards, or unless the conditions of the Bond have been satisfied.

(d) A vehicle or equipment item which has entered the United States under a declaration made pursuant to § 591.5(j), and for which duty has been paid, shall not remain in the United States for a period that exceeds 5 years from its date of entry, unless it has been conformed to meet all applicable Federal motor vehicle safety standards.

(e) An importer of a vehicle which has entered the United States under a declaration made pursuant to § 591.5(j) may license it for use on the public roads only if such use is an integral part of the research, investigations, studies, demonstration or training for which it is imported. An importer of a vehicle imported for competitive racing events shall not license it for use on the public roads, unless it has been brought into conformance with all applicable Federal motor vehicle safety standards.

(f) In the case of any vehicle imported pursuant to a declaration made under § 591.5(f), the importer of the vehicle shall furnish to the Secretary of the

49 CFR Part 592

[Docket 89-6; Notice 1]

RIN 2127-AC97

Registered Importers of Nonconforming Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: With certain exceptions, the National Traffic and Motor Vehicle Safety Act, as amended by the Imported Vehicle Safety Compliance Act of 1988, will permit a motor vehicle not conforming to Federal motor vehicle safety standards to be imported only by a person who has registered with this agency, or by an individual who has a contract with a Registered Importer for making the modification necessary for bringing the vehicle into conformance with applicable safety standards.

In partial implementation of the 1988 amendments, this notice proposes procedures and requirements regarding the registration of importers and the duties and obligations of registered importers. In most instances, the particular provisions of these procedures and requirements are mandated by the 1988 amendments.

The notice proposes eligibility requirements for persons wishing to acquire and maintain registration. Among the requirements are ones regarding recordkeeping, allowance of inspection of records and facilities relating to the motor vehicles which the importer has imported and/or modified, certification to the Administrator that the vehicles have been brought into compliance, and insurance that the importer will be able technically and financially to carry out noncompliance and defect notification and remedy responsibilities should they arise. It also proposes procedures for persons to apply for registration and procedures for this agency's revocation or suspension of registration (and reinstatement) for failures to pay required fees or comply with regulations, or for filing a misleading or false certification. The notice also sets forth proposed inspection and bond release procedures.

Regulations intended to implement the remaining portions of the 1988 Act are being proposed simultaneously with this one. They are Part 591, *Importation of Vehicles and Equipment Subject to Federal Motor Vehicle Safety Standards*, and Part 593, *Determinations That a Nonconforming Vehicle is Eligible for Importation*, and Part 594 *Schedule of Fees Authorized by the Imported Vehicle Safety Compliance Act.*

DATES: Comment closing date for the proposal is June 26, 1989. The effective date of the final rule would be 30 days after publication of the final rule in the Federal Register.

ADDRESS: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Docket hours are from 8 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel, NHTSA (202-366-5263).

SUPPLEMENTARY INFORMATION: On October 31, 1988, the President signed Pub. L. 100-562, the Imported Vehicle Safety Compliance Act of 1988. Notice of its enactment was published by the agency in the Federal Register on December 5, 1988 (FR 49003). As the notice stated, the Compliance Safety Act amends those provisions of the National Traffic and Motor Vehicle Safety Act of 1966 ("the Vehicle Safety Act") (15 U.S.C. 1381, at 1397) that relate to the importation of motor vehicles subject to the Federal motor vehicle safety standards. Specifically, the amendments strike paragraphs (3) and (4) of subsection (b) of 15 U.S.C. 1397. (Section 1397 may also be cited as section 108 of the Vehicle Safety Act), redesignates paragraph (5) as paragraph (3), redesignates subsection (c) of 15 U.S.C. 1397 as subsection (k), and adds new subsections (c) through (j).

The category of importer primarily affected by the amendments is the importer of a motor vehicle that does not conform, at the time of importation, to the Federal motor vehicle safety standards that applied to vehicles of its type at the time of its original manufacture. Under the current regulation, 19 CFR 12.80(b)(1)(iii), a nonconforming vehicle may be imported by any person. Under the 1988 amendments, an importer will have to be, subject to certain exceptions, a "Registered Importer" (one who meets the statutory criteria and has registered with the agency pursuant to the terms and conditions of the regulation that this notice proposes), or an individual who has contracted with a Registered Importer. The principal obligations of the Registered Importer with respect to the nonconforming vehicles it imports are (1) to bring those vehicles into compliance, either directly or through agents, (2) to provide the Administrator with certification that it has done so, and (3) in the event that noncompliances or safety related defects occur in vehicles it certifies, to notify owners, and provide a remedy. With respect to those vehicles it imports for resale, a Registered Importer falls within the long-standing definition of "manufacturer" under the Vehicle Safety Act and is responsible for notification of purchasers and remedy of noncompliances and safety related defects determined to exist in those vehicles. The 1988 amendments add a further responsibility; it makes the Registered Importer responsible for notification and remedy covering any vehicle covered by its certificate of conformity to the standards, whether or not it imported or modified the vehicle, if a noncompliance or defect is determined to exist in substantially similar vehicles originally manufactured and certified for sale in the United States. However, the manufacturer or Registered Importer would be afforded an opportunity to demonstrate to NHTSA that the vehicles covered by the certification do not contain the noncompliance or defect.

NHTSA is attempting in this rulemaking action to formulate a program that will ensure that all imported motor vehicles conform to the Federal motor vehicle safety standards without imposing unnecessary burdens on importers. Therefore, NHTSA has tried in this proposal to impose only those requirements that are mandated by the 1988 Act, with amplifications only where it appeared necessary to implement the safety intent of the statute. NHTSA encourages commenters to provide suggestions as to ways to reduce burdens without compromising safety, within the framework of the 1988 Act, in order to assist the agency in developing the final rule.

Requirements for Registration as Importer

Under the regulation proposed by this notice, any person who wishes to become a Registered Importer, and who has not previously had a registration revoked, may file an application with the Administrator (new section 108(c)(3)(D)(i)). This section also provides that registration may be denied "to any person who is or was, directly or indirectly, owned or controlled by, or under common ownership or control

with, a person who has had a registration revoked * * *." Therefore, as part of the application, an applicant would be required to disclose the names of its owners, shareholders, or partners. The agency does not construe the statute as requiring a Registered Importer to be the person who also physically conforms the vehicles, but the Registered Importer, and not its agent for such work, must conform to all requirements imposed by this regulation. Thus, if an applicant intends to contract with an agent for the performance of conformance work, it must identify such third parties.

Chief among the registration requirements stated in section 108(c)(3)(D)(ii) is proof of financial ability to carry out notification and remedy responsibilities should a noncompliance or safety related defect be found in any vehicle the Registered Importer has imported and/or for which it has furnished the Administrator a certificate of conformity. Implementation of this complex provision is discussed in full later in the notice. The 1988 Act also requires that the regulation contain "provision for ensuring that the importer (or any successor in interest) will be able * * * to carry out the importer's responsibilities * * * relating to discovery, notification, and remedy of defects". The agency proposes that the applicant show that it will maintain a system of VINs, and names and addresses of owners of vehicles for which it provides certifications. With respect to "successors in interest", the regulation makes clear that registrations are not transferable, and that a Registered Importer must notify NHTSA upon any change in its status, such as ownership interest. As required by the 1988 amendments, a registration regulation shall include requirements for "recordkeeping, inspection of records, and facilities, relating to the motor vehicles for which such person has imported, modified, or both". NHTSA has proposed appropriate requirements for each of these, and has specified that it may choose to inspect facilities while an application is pending. Such a provision is included, as well as the applicant's obligation to ensure that representatives of NHTS have equal access to the facilities of third parties with which it contracts to perform conformance work. NHTSA also proposes that such records be kept for a minimum of 8 years, the period specified in the National Traffic and Motor Vehicle Safety Act for which a manufacturer is obliged to remedy a noncompliance or safety related defect at no cost to the vehicle owner. A registration would continue indefinitely until revoked or suspended. However, a registrant, in order to maintain its registration, would be required to affirm annually that there has been no change in previously provided information. This should ensure that the financial ability of a Registered Importer can be monitored, and that fees are received in a timely manner.

Section 108(c)(3)(D)(iii) requires the Secretary to establish procedures for revoking or suspending the registration of any registered importer for failure to comply with any requirement of section 108 of the Vehicle Safety Act or of any regulation issued under that section. Those procedures are also required to provide for automatically suspending the registration of a registered importer which knowingly files a false or misleading certification, or fails to pay a required fee in a timely manner. To cover the expenses of the registration program and certain other activities, the statute provides that each Registered Importer will have to pay an annual fee; this fee will be established on a fiscal year basis. A Registered Importer under suspension may be reinstated when the cause giving rise to the suspension ceases to exist. In determining revocation and suspension, other than automatic suspension as provided by section 108(c)(3)(D)(iii) for nonpayment of fees or for knowingly filing a false or misleading certification, the Administrator would provide notice in writing to the Registered Importer, affording it an opportunity to present data, views, and arguments as to why its registration should not be suspended or revoked. Other than its provision for automatic suspension, the 1988 amendments does not distinguish suspension from revocation; either may be invoked for failure to comply with any requirement of section 108 or the regulations issued under section 108. The agency interprets the 1988 amendments as leaving the decision whether to suspend or to revoke to the discretion of the Administrator, with the exception of the automatic suspension provisions discussed above.

As is currently required, an importer of record, whether a Registered Importer or one who has a conformance contract with a Registered Importer, would have to furnish the Secretary of the Treasury (the U.S. Customs Service, acting for NHTSA), a bond for each vehicle it imports to ensure that the vehicle is brought into compliance with the safety standards. When the modifications of an imported vehicle are completed, the Registered Importer would have to attach its label to the vehicle stating that it complies with the safety standards, and certify that conformance to NHTSA. If the vehicle is one that the Administrator determined to be substantially similar to one certified by its original manufacturer for sale in the U.S., the Registered Importer could rely in making its certification on the original manufacturer's certification with respect to identical safety features if it certified to the Administrator that its modifications did not affect compliance of the vehicle's safety features. In substantiation of certification, the agency proposes that the initial certification submitted by a Registered Importer for a specific model and model year be accompanied by complete substantiating documentation and photographs. A submission would not be required to substantiate certifications for the same specific model and model year, but a Registered Importer would prepare and retain in its files documentation packages for these vehicles which could be inspected by the agency upon demand. This should shorten the certification review process, and enhance the ability of the agency to authorize release of vehicles in a relatively short period of time after certification was received. The Registered Importer would be able to license the vehicle, or release the vehicle from its custody for licensing 30 days after its submission of the certification to NHTSA. NHTSA, however, could demand an inspection of the vehicle within the 30-day period, or ask for certification verification. In that event, the vehicle could be released only upon the agency's written notice of its acceptance of the certification or written notice of its completion of an inspection that does not show any failure to comply. The vehicle and the bond could be released immediately upon issuance of either notification. Section 108(c)(3)(E)(v), added by the 1988 amendments, provides that any release of bond, however, does not constitute a determination under section 152 of the Vehicle Safety Act that the vehicle conforms with all applicable standards.

In developing a provision addressing the financial ability of a Registered Importer to carry out its notification and remedial obligations, the agency has been guided by the experience of the Environmental Protection Agency ("EPA") in developing and promulgating regulatory provisions addressing the financial ability of Independent Commercial Importers ("ICI"s) to honor emissions warranties. (40 CFR 85.1510(b)(2)(i), 52 FR 36136). ICIs are importers of motor vehicles and engines.

who have registered with the EPA, some of whom may be importers who will be registering with NHTSA. Thus, a NHTSA requirement that parallels the EPA one is not likely to add significantly to the regulatory burden of those who import nonconforming vehicles subject to Federal regulations.

Commenters on EPA's regulations at the proposal stage, principally original equipment vehicle and engine manufacturers, and the State of California, suggested that ICIs acquire prepaid insurance and/or bonds to cover ICI warranty and recall liability for the useful life of each vehicle. There was no opposition from ICIs regarding this concept. Based on its experiences under the California emissions standards for motor vehicles, the California Air Resources Board (CARB) noted that the modification industry is composed of small businesses, and argued that it is likely that a number of firms will fall over time. Without a requirement for an insurance policy or bond to cover warranty and recall repairs, owners of vehicles obtained from firms that are no longer in business would have to bear the warranty costs. CARB offers modifiers a choice between obtaining insurance or a bond.

EPA decided to require a prepaid mandatory service insurance policy that, in effect, assures effective warranty coverage. That agency reasoned that it was unnecessary to require a bond to assure an effective recall and warranty program. Because the prepaid mandatory service insurance policy seemed acceptable to modifiers as a means of assuring their performance regarding recalls and warranties, NHTSA is proposing that Registered Importers be required to have a similar insurance policy, to assure fulfillment of the notification and remedial duties imposed by the 1988 amendments. As part of a registration application, a copy of a policy, or a contract to acquire such insurance, would be submitted, which would become effective upon grant of the application. However, NHTSA has no knowledge of the burden the insurance requirement might impose upon an applicant, and requests comments on this point. NHTSA also requests comments upon alternate appropriate means of assuring financial ability to carry out notification and remedial activities.

Finally, NHTSA requests comments on the amount of insurance that would be necessary to demonstrate "sufficient financial responsibility." (section 108(d)(2)). The premium paid for such a policy would appear to encompass the relatively low costs of notification (i.e., discerning through records or R.L. Polk the names and addresses of vehicle owners), and the somewhat higher costs of remedy (through repair, repurchase, or replacement), as affected by the yearly number of vehicles for which the registered importer estimates it will submit certification. NHTSA understands that only one company is currently insuring ICI's under EPA's program, but given the difference between Federal safety and emission standards the cost experience is not directly comparable.

Impacts

After considering the impacts of this rulemaking action, NHTSA has determined that the action is not major within the meaning of Executive Order 12291 "Federal Regulation", because it will not have an impact upon the economy in excess of $100 million. Nor is it significant under Department of Transportation regulatory policies and procedures. The proposed action involves no substantial public interest or controversy. It has no substantial effect on state and local governments. There is no substantial impact on a major transportation safety program. The number of vehicles to be processed through Registered Importers is estimated to be less than 3000.

NHTSA has analyzed this proposal for purposes of the National Environmental Policy Act. It is not anticipated that a rule based on the proposal would have a significant effect upon the environment because it is anticipated that the annual volume of motor vehicles imported through registered importers would not vary significantly from that existing before promulgation of the rule. However, to the extent that a rule would result in a higher percentage of vehicles being brought into compliance with the standards, the materials added to bring the vehicles into conformance would increase.

The agency has also considered the effects of this proposal in relation to the Regulatory Flexibility Act. I certify that this proposal would not have a significant effect upon a substantial number of small entities. Although entities that currently modify nonconforming vehicles may be small businesses within the meaning of the Regulatory Flexibility Act, the agency has no reason to believe that a substantial number of these companies could not qualify. However, small businesses currently conforming vehicles may not choose to register as importers because of the recordkeeping and other requirements, and the obligation to notify/remedy in the event of the occurrence of a noncompliance or safety related defect, and these businesses would no longer be able to perform conformance work after January 31, 1990. The cost to owners or purchasers of modifying nonconforming vehicles to conform with the safety standards may be expected to increase to the extent necessary to reimburse the registered importer for the fees payable to the agency for the cost of administering the registration program and to compensate Customs for its bond processing costs. Governmental jurisdictions would not be affected at all since they are generally neither importers nor purchasers of nonconforming motor vehicles. However, a Regulatory Flexibility Analysis covering all regulations proposed to implement the 1988 Act has been prepared, and will be placed in the public docket.

The agency has analyzed the proposed rule in accordance with the principles and criteria contained in Executive Order 12612 "Federalism" and determined that the proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The registration requirements in this proposal are considered to be information collection requirements, as that term is defined by the Office of Management and Budget (OMB) in 5 CFR Part 1320. Accordingly, these proposed requirements are being submitted to OMB for its approval, pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Comments on the proposed information collection requirements should be submitted to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attn: Desk Officer for NHTSA. It is requested that comments sent to the OMB also be sent to the NHTSA rulemaking docket for this proposed action.

Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted. All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the docket section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 592

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, it is proposed that a new Part 592, *Registered Importers of Nonconforming Vehicles*, be added to Title 49, Chapter V, to read as follows:

PART 592—REGISTERED IMPORTERS OF NONCONFORMING VEHICLES

Sec.

592.1 Scope.
592.2 Purpose.
592.3 Applicability.
592.4 Definitions.
592.5 Requirements for registration and its maintenance.
592.6 Duties of a registered importer.
592.7 Revocation, suspension and reinstatement of registration.
592.8 Inspection; release of vehicle and bond.

Authority: Pub. L. 100-562; delegations of authority at 49 CFR 1.50 and 501.8.

§ 592.1 Scope.

This art establishes procedures under section 108(b)(3)(D) of the National Traffic and Motor Vehicle Safety Act, as amended (15 U.S.C. 1397(b)(3)(D)), for the registration of importers of motor vehicles that do not comply with all applicable Federal motor vehicle safety standards at the time the vehicles are offered for entry into the United States. This part also establishes the duties of Registered Importers.

§ 592.2 Purpose.

The purpose of this part is to provide content and format requirements for persons who desire to register with the Administrator as importers of nonconforming motor vehicles, to provide procedures for the registration of importers and for the suspension, revocation and reinstatement of registration, and to set forth the duties required or Registered Importers.

§ 592.3 Applicability.

This part applies to any person who wishes to register with the Administrator as an importer of nonconforming vehicles, and who has not previously had a registration revoked by the Administrator, and to any person who is registered as an importer.

§ 592.4 Definitions.

All terms in this part that are defined in section 102 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1391) are used as defined therein.

"Administrator" means the Administrator, National Highway Traffic Safety Administration.

"NHTSA" means the National Highway Traffic Safety Administration.

"Registered Importer" means any person that the Administrator has registered as an importer pursuant to § 592.5(b).

§ 592.5 Requirements for registration and its maintenance.

(a) Any person wishing to register as an importer of noncomplying motor vehicles must file an application which:

(1) Is headed with the words "Application for Registration as Importer", and submitted in three copies to: Administrator, National Highway Traffic Safety Administration, Washington, DC 20590, Attn: Importer Registration.

(2) Is written in the English language.

(3) Sets forth the full name, address, and title of the person preparing the application, and the name, address, and telephone number of the person for whom application is made.

(4) Sets forth, as applicable, the names of all owners, including shareholders, partners, or sole proprietors, of the person for whom application is made.

(5) If any of the owners listed in paragraph (a)(4) of this section are corporations, sets forth the names of all shareholders of such corporation whose ownership interest is 10 percent or greater.

(6) Contains a statement that the applicant has never had a registration revoked pursuant to § 592.7, nor is it or was it, directly or indirectly, owned or controlled by, or under common ownership or control with, a person who has had a registration revoked pursuant to § 592.7.

(7) Contains a certified check payable to the Treasurer of the United States, for the amount of the initial annual fee established pursuant to Part 594 of this chapter.

(8) Contains a copy of a contract to acquire, effective upon its registration as an importer, a prepaid mandatory service insurance policy underwritten by an independent insurance company, in an amount sufficient to ensure that the applicant will be able financially to remedy any noncompliance or safety related defect determined to exist in any vehicle for which it has furnished a certificate of conformity to the Administrator, through repair, replacement, or repurchase of such vehicle, in accordance with Part 573 and Part 577 of this chapter.

(9) Sets forth in full data, views, and arguments of the applicant sufficient to establish that the applicant will be able, through a records system of acquiring and maintaining names and addresses of owners of vehicles for which it furnishes a certificate of conformity, and VINs of such vehicles, to notify such owners that a noncompliance or safety related defect exists in such vehicles, and that it will be financially able to remedy a noncompliance or safety related defect through repurchase or replacement of such vehicles, or technically able through repair of such vehicles, in accordance with Part 573 and Part 577 of this chapter.

(10) Segregates and specifies any part of the information and data submitted under this part that the applicant wishes to have withheld from public disclosure in accordance with Part 512 of this chapter.

(11) Contains a statement whether the applicant will modify the vehicles for which it will furnish certificates of conformity to the Administrator.

(12) If the answer to (11) is negative, provides the name and address of all agents who will modify the vehicles.

VOL
54
ISS
78
AP
25
1989
UMI

(13) Contains a statement that the applicant will fully comply with all duties of a registered importer as set forth in § 592.6, and will ensure that any agent with whom it may contract to perform modifications will also fully comply with such duties as if it were the applicant.

(14) Has the applicant's signature acknowledged by a notary public.

(b) If the information submitted is incomplete, the Administrator notifies the applicant of the areas of insufficiency, and that the application is in abeyance.

(c) If the Administrator deems it necessary for a determination upon the application, NHTSA conducts an inspection of the applicant and/or its agents. Subsequent to the inspection, NHTSA calculates the costs attributable to such inspection, and notifies the applicant in writing that such costs comprise a component of the initial annual fee and must be paid before a determination is made upon its application.

(d) When the application is complete (and, if applicable, when a sum representing the inspection component of the initial annual fee is paid), it is reviewed and a determination made whether the applicant should be granted the status of Registered Importer. Such determination may be based, in part, upon an inspection by NHTSA of the conformance, storage, and recordkeeping facilities of the applicant and agents, if any. If the Administrator determines that the application is acceptable, (s)he informs the applicant in writing that its application is approved, and issues it a Registered Importer Number. If the information is not acceptable, the Administrator informs the applicant in writing that its application is not approved. No refund is made of those components of the initial annual fee representing the costs of processing the application, and conducting an inspection. Refund is made of that component of the initial annual fee representing the remaining costs of administration of the registration program.

(e) In order to maintain its registration, a Registered Importer shall provide an annual statement that affirms that all information provided under subsection (a) of this section remains correct. Such statement shall be titled "Yearly Statement of Registered Importer", and shall be filed not later than October 31 of each year. A Registered Importer shall also pay such annual fee or fees as the Administrator may from time to time establish under Part 594 of this chapter. An annual fee shall be paid not later than October 31 of any calendar year, and shall be the annual fee for the fiscal year that began on October 1 of that calendar year. Any other fee shall be payable not later than 30 calendar days after the date that the Administrator has notified the Registered Importer of it in writing.

(f) A Registered Importer shall notify the Administrator in writing of any change that occurs in the information which it submitted in its application, not later than the end of the 30th calendar day after such change.

(g) A registration granted under this part is not transferable.

§ 592.6 Duties of a registered importer.

(a) Each Registered Importer shall:

(1) With respect to each motor vehicle that it imports into the United States, furnish to the Secretary of the Treasury (acting on behalf of the Administrator) a bond in an amount not less than the dutiable value of the vehicle, as determined by the Secretary of the Treasury, nor more than 150 per cent of such value to ensure that such vehicle either will be brought into conformity with all applicable Federal motor vehicle safety standards prescribed under Part 571 of this chapter within 120 calendar days after such importation, or will be exported (at no cost to the United States) by the importer or the Secretary of the Treasury, or abandoned to the United States.

(2) Establish, maintain, and retain for 8 years from the date of entry of any nonconforming vehicle for which it furnishes a certificate of conformity pursuant to paragraph (a)(5) of this section, organized records, correspondence and other documents relating to the importation, modification, and substantiation of certification of conformity to the Administrator, including but not limited to:

(i) The declaration required by § 591.5 of this chapter, and 19 CFR 12.80.

(ii) All vehicle or equipment purchase or sales orders or agreements, principal or agent agreements, conformance agreements with importers other than Registered Importers, and correspondence between the Registered Importer and (1) any agent who performs conformance work on its behalf, and (2) the owner or purchaser of each vehicle for which it has furnished a certificate of conformity.

(iii) The last known name and address of the owner or purchaser of each motor vehicle for which it has furnished a certificate of conformity, and the VIN number of such vehicle.

(iv) Records, both photographic and documentary, reflecting the modifications made and submitted to the Administrator pursuant to subsection (5).

(v) Records, both photographic and documentary, sufficient to substantiate each subsequent certificate furnished to the Administrator for a vehicle of the same model and model year for which documentation has been furnished NHTSA in support of the initial certificate.

(3) Permanently affix to each motor vehicle, upon completion of modifications, a label that meets the requirements of Sec. 567.4 of this chapter, which identifies the Registered Importer, and provide to the Administrator a photocopy of the label attesting that such vehicle has been brought into conformity with all applicable Federal motor vehicle safety and bumper standards.

(4) Certify to the Administrator, upon completion of modifications, that the vehicle has been brought into conformity with all applicable Federal motor vehicle safety and bumper standards, and that it is the person legally responsible for bringing the vehicle into conformity.

(5) In substantiation of the initial certification provided for a specific model and model year, submit to the Administrator photographic and documentary evidence of conformance with each applicable Federal motor vehicle safety and bumper standard, and with respect to subsequent certifications of such model and model year, such information, if any, as the Administrator may request.

(6) With respect to any motor vehicle for which it has furnished a certificate of conformity to the Administrator, provide notification and remedy according to Part 573 and Part 577 of this chapter, upon any determination that a vehicle to which it is substantially similar, as determined under Part 593 of this chapter, incorporates a safety related defect or fails to conform with an applicable Federal motor vehicle safety standard. However, this obligation does not exist if the manufacturer of the vehicle or Registered Importer demonstrates to the Administrator that the defect or noncompliance is not present in such vehicle.

(7) In order to allow the Administrator to determine whether a Registered Importer is meeting its statutory responsibilities, admit representatives of NHTSA during operating hours, upon demand, and upon presentation of credentials, to copy documents, or to inspect, monitor, or photograph any of the following:

(i) Any facility, whether or not owned or controlled by the Registered Importer, where any vehicle, for which a Registered Importer has the responsibility of providing a certificate of conformity to applicable safety standards, is being modified, tested, or stored;

(ii) Any facility, whether or not owned or controlled by the Registered Importer, where any record or other document relating to modification, testing, or storage of vehicles being conformed, is filed;

(iii) Any part or aspect of activities relating to the modification, testing, and/or storage of vehicles, by the Registered Importer or any agent.

(iv) Any motor vehicle for which it has provided a certification of conformity to the Administrator, and which remains in its custody or under its control.

(8) With respect to any vehicle that it imports, provide notification and remedy pursuant to Part 573 and Part 577 of this chapter, upon any determination that the vehicle incorporates a safety related defect or fails to conform with an applicable Federal motor vehicle safety standard, without reference to whether such may exist in a vehicle to which it is substantially similar.

(9) Maintain in effect a prepaid mandatory service insurance policy underwritten by an independent insurance company as a guarantor of its performance under paragraph (a) (6) and (8) of this section.

§ 592.7 Revocation, suspension and reinstatement of registration.

(a) If the Administrator has not received any fee assessed and owing by the end of the 30th calendar day after such fee is due and payable, a registration is automatically suspended at the beginning of the 31st calendar day, and the Registered Importer is immediately notified in writing of the suspension at the address contained in its most recent annual statement or amendment thereof.

(b) If the Administrator has reason to believe that a Registered Importer has knowingly filed a false or misleading certification, and that its registration should be automatically suspended or revoked, (s)he notifies the Registered Importer in writing of the facts giving rise to such reason to believe, affording an opportunity to present data, views, and arguments, either in writing or in person, within 30 calendar days after receipt of the Administrator's letter, as to whether it has submitted false or misleading certification, and as to why the registration ought not to be revoked or suspended. The Administrator then makes a decision after the 30-day period on the basis of all information then available. If, after consideration of all the data available, the Administrator determines that the Registered Importer has knowingly filed a false or misleading certification, the registration is automatically suspended or revoked, and the Registered Importer notified in writing. Any suspension or revocation is effective as of the date of the Administrator's determination. The Administrator shall state the period of any suspension in the notice to the Registered Importer.

(c) The Administrator may suspend a registration if a Registered Importer fails to comply with any requirement set forth in 15 U.S.C. 1397(c)(3)(D), § 592.5(c), or § 592.6, or if s(he) denies an application filed under § 592.5(d). The Administrator may revoke a registration after any failure to comply with any such requirement, or if (s)he denies an application filed under § 592.5(d). If the Administrator has reason to believe that there has been such a failure to comply and that the Registered Importer's registration should be revoked or suspended, (s)he notifies the Registered Importer in writing, affording an opportunity to present data, views, and arguments, either in writing or in person, within 30 calendar days after receipt of the Administrator's letter, as to whether there has been a failure to comply and as to why the registration ought not to be revoked or suspended. The Administrator then makes a decision after the 30-day period on the basis of all information then available. If the Administrator determines that a registration should be revoked or suspended, (s)he notifies the Registered Importer in writing. A revocation is effective immediately. A suspension is effective beginning with a date specified in the written notification.

(d) A Registered Importer whose registration has been revoked or suspended may request reconsideration of the revocation or suspension if the request is supported by factual matter which was not available to the Administrator at the time the registration was suspended or revoked.

(e) If its registration has been revoked, a Registered Importer is ineligible to apply for reregistration under this part. No refund is provided of any annual or other fees the Registered Importer has paid for the fiscal year in which its registration is revoked. If its registration has been suspended, it may file an application for reinstatement of its registration.

(f) The Administrator shall reinstate a suspended registration if the cause that led to the suspension no longer exists, as determined by the Administrator, either upon the Administrator's motion, or upon the submission of further information or fees by the Registered Importer.

§ 592.8 Inspection; release of vehicle and bond.

(a) With respect to any motor vehicle for which it is obligated to provide a certificate of conformity to the Administrator as requested by § 592.6(a)(4), a Registered Importer shall not obtain licensing or registration of the motor vehicle for use on the public roads, or release custody of it for such licensing and registration, except in accordance with the provisions of this section.

(b) When conformance modifications to a motor vehicle have been completed, a Registered Importer shall submit the certification required by § 592.6(a)(4) to the Administrator. In certifying a vehicle that the Administrator has determined to be substantially similar to one that has been certified by its original manufacturer for sale in the United States, the Registered Importer may rely on any certification by the original manufacturer with respect to identical safety features if it also certifies that any modification that it undertook did not affect the compliance of such safety features. Each submission shall either be mailed by certified mail, return receipt requested, to: Administrator, National Highway Traffic Safety Administration, Washington, DC, 20590 ATTN: NEF–32, or be submitted electronically in a manner to be specified by NHTSA. Each submission shall identify the location where the vehicle will be stored and is available for inspection, pending NHTSA action upon the submission.

(c) Before the end of the 30th calendar day after receipt of certification of a motor vehicle pursuant to § 592.6(a)(4), the Administrator may inform the Registered Importer in writing that an inspection of the vehicle is required to ascertain the veracity of the certification. Written notice includes a proposed inspection date, which is as soon as practicable. If inspection of the vehicle indicates that the vehicle has been properly certified, at the conclusion of the inspection the Registered Importer is provided an instrument of release, and the Administrator provides a copy of the instrument to the Department of Treasury as soon as practicable in order to effect release of bond. If inspection of the vehicle shows that the vehicle has not been properly certified, the

VOL 54 ISS 78 AP 25 1989 UMI

Registered Importer shall either make the modifications necessary to substantiate its certification, and provide a new certification for the standard(s) in the manner provided for in subsection (b), or export the vehicle. Before the end of the 30th calendar day after receipt of new certification, the Administrator may require a further inspection in accordance with the provisions of this subsection.

(d) The Administrator may by written notice request certification verification by the Registered Importer before the end of the 30th calendar day after the date the certification was received by the Administrator. If the basis for such request is that the certification is false or contains a misrepresentation, the Registered Importer shall be afforded an opportunity to present written data, views, and arguments as to why the certification is not false or misleading or does not contain a misrepresentation. The Administrator may require an inspection pursuant to paragraph (c) of this section. The motor vehicle and bond involved shall not be released unless and until the Administrator is satisfied with the certification.

(e) If a Registered Importer has received no written notice from the Administrator by the end of the 30th calendar day after it has furnished a certification to the Administrator, the Registered Importer may release the vehicle from custody that is covered by the certification, or have it licensed or registered for use on the public roads.

(f) If the Administrator accepts a certification without requiring an inspection, (s)he notifies the Department of Treasury in writing that it may release the bond on the vehicle covered by the certification, as of a date certain, and provides a copy to the importer of record. Such notification shall be provided not later than the 25th calendar day after the Administrator has received such certification.

(g) Release of bond shall constitute acceptance of certification or completion of inspection of the vehicle concerned, but shall not preclude a subsequent determination by the Administrator pursuant to section 152 of the Act (15 USC 1451) that the vehicle fails to conform to any applicable Federal motor vehicle safety standard.

Issued on April 19, 1989.

George L. Parker,

Associate Administrator for Enforcement.

RIN 2127-AC99

Determinations That a Nonconforming Vehicle is Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: Effective January 31, 1990, the National Traffic and Motor Vehicle Safety Act, as amended by the Imported Vehicle Safety Compliance Act of 1988, will place new limits on the importation of foreign motor vehicles not manufactured to meet Federal motor vehicle safety standards. In most instances, these vehicles will be allowed to be imported into the United States only by an importer that has registered with the Department of Transportation and who will subsequently certify to NHTSA that the vehicle has been modified to conform with the standards, or by a private individual who has a contract with a Registered Importer for such certification.

The 1988 amendments prohibit, with certain exceptions, the importation of a vehicle that does not meet Federal motor vehicle safety standards unless it belongs to a model that meets specified eligibility criteria. The criteria is that the model is determined by this agency to be substantially similar to one that was originally manufactured for importation and sale into the United States, and that it is capable of being readily modified to conform to the Federal safety standards. Alternatively, for a model for which there is not a substantially similar vehicle, the agency must determine that the safety features of the model comply or are capable of being modified to comply with the safety standards. This notice proposes procedural regulations for making determinations regarding the meeting of these criteria. Most details of the proposal are dictated by the 1988 amendments.

Other notices proposing regulations to implement the amendments are being published simultaneously with this one. They are Part 591, *Importation of Vehicles and Equipment Subject to Federal Motor Vehicle Safety Standards* and Part 592, *Registered Importers of Nonconforming Vehicles*, and Part 594, *Schedule of Fees Authorized by the Imported Vehicle Safety Compliance Act*.

DATES: Comment closing date is June 26, 1989. The effective date of the final rule would be 30 days after publication of the final rule in the Federal Register.

ADDRESS: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Docket hours are from 8 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel, NHTSA (202-366-5263).

SUPPLEMENTARY INFORMATION: On October 31, 1988, the President signed into law the Imported Vehicle Safety Compliance Act of 1988, Pub. L. 100-562. The Act amends those provisions of the National Traffic and Motor Vehicle Safety Act of 1966 ("the Vehicle Safety Act") that relate to the importation of motor vehicles subject to the Federal motor vehicle safety standards (section 108(b), 15 U.S.C. 1397(b)). The 1988 amendments impose restrictions upon the eligibility of motor vehicles for importation. The principal restriction upon a motor vehicle is that it cannot be imported at all unless NHTSA determines that the motor vehicle model is capable of modification to meet the Federal safety standards. Determinations will be made on NHTSA's own initiative, or upon petition of any registered importer (see discussion below) or any motor vehicle manufacturer, and will be subject to public comment.

A nonconforming vehicle may be imported under either of the following two scenarios. The first scenario will involve the making of two determinations by the agency: that the nonconforming model is substantially similar to a model of the same "model year" which was originally manufactured for importation into and sale in the United States and was certified as conforming to the Federal safety standards, and that a vehicle belonging to the model is capable of being readily modified to conform fully with the applicable standards.

The second scenario will arise if the agency has not made a substantial similarity determination regarding a model. In that case, it will still be permissible to import a vehicle of that model if the agency determines that its safety features comply with the United States standards, or are capable of being modified to comply with those standards, "based on destructive crash data or such other evidence" as NHTSA determines is adequate.

Under either scenario, a positive determination regarding a model will permit any Registered Importer to import vehicles of the same model that are covered by that determination.

If the agency makes a negative determination regarding a model's ability to be modified, the agency will be temporarily prohibited from taking up the issue again. If the decision was made in response to a petition, the 1988 amendments prohibit the agency from considering a petition regarding the same model of vehicle until at least 3 months after that decision. If the negative determination was made in a proceeding begun at the agency's own initiative, the agency will not be able to make another determination regarding the same model of motor vehicle until at least 3 months after the negative one.

NHTSA is attempting in this rulemaking action to formulate a program that will ensure that all imported motor vehicles conform to the Federal motor vehicle safety standards without imposing unnecessary burdens on importers. Therefore, NHTSA has tried in this proposal to impose only those requirements that are mandated by the 1988 Act, with amplifications only where it appeared necessary to implement the safety intent of the statute. NHTSA encourages commenters to provide suggestions as to ways to reduce burdens without compromising safety, within the framework of the 1988 Act, in order to assist the agency in developing the final rule.

Petitions for Determinations

Section 108(c)(3)(C)(i)(I) requires the Administration to make eligibility determinations "on the petition of any Registered Importer or any manufacturer". Under the National Traffic and Motor Vehicle Safety Act, a "manufacturer" is defined to include any person who imports motor vehicles for resale. Thus, "manufacturer" excludes the individual who imports a vehicle, through a Registered Importer, for his or her own use. It also excludes the general public and trade associations.

This notice proposes basic procedural requirements for a petition that are similar to those the agency specifies for other petitions: that they be in the English language, state the full name and address of the petitioner, be submitted in 3 copies to the Administrator, and state the basis upon which petition is made.

The agency does not intend to specify by regulation the number and types of components that must be identified as capable of modification in order to demonstrate compliance. (The petitioner must, of course, show that a vehicle is readily modifiable, or capable of modification, as the case may be, so that it will comply with all applicable safety standards.) The Federal motor vehicle safety standards are performance standards and the NHTSA believes that registered importers, like original manufacturers, should be free to reach individual design solutions. Whether a petitioner's arguments are persuasive will be reflected in the agency's eventual determination, and NHTSA's conclusions will be discussed in a notice of determination published in the **Federal Register**. The agency will encourage arguments that reflect a performance orientation. To the extent that a petition contains information relating to the specific methodology by which that petitioner intends to achieve conformity, the agency will consider a request for confidentiality on the basis that it is a trade secret or otherwise subject to confidentiality under 49 CFR Part 512.

Specifically, if the basis of the petition is that the model for which a determination is sought is substantially similar to one that was originally manufactured for importation into and sale in the United States, and which bore a certification of compliance affixed by its original manufacturer, the petitioner must identify the original manufacturer of the certified vehicle, and the model and model year of the vehicle to be compared. It must also submit data, views, and arguments, with respect to each applicable Federal motor vehicle safety standard, that the vehicle is capable of being readily modified to meet that standard. The phrases "substantially similar" and "capable of being readily modified" are not defined by the 1988 amendment. However, NHTSA begins with the assumption that a vehicle that is "substantially similar" to one that was originally manufactured for importation and sale in the United States which bore its original manufacturer's certification is one whose visual appearance and structural details are "substantially similar" to the certified model. Under this hypothetical, a Renault 21 manufactured in France would be viewed as "substantially similar" to the Renault/Eagle Medallion, manufactured in France and certified by Renault for sale in the United States because its exterior sheetmetal appears virtually identical. On the other hand, a Renault 25 manufactured in France would not be viewed as substantially similar to the Eagle Premier manufactured in Canada and certified by Chrysler for sale in the United States, even though Chrysler purchases the platform and drive train of the Premier from Renault. Both its exterior and interior appearance and components differ from that of the Premier. There is no common exterior sheetmetal, different dash panels and seats are provided, and there is no interchangeability between doors and glazing. Comments are requested on the degree of interior and exterior similarity of appearance and structural details, and on the extent of parts interchangeability necessary to support a determination of substantial similarity. What parts are most critically related to compliance with the standards, particularly those standards which specify dynamic vehicle crash testing or other types of destructive testing?

Obviously, if a vehicle already conforms to a safety standard, the question of modification capability is not reached. To substantiate that no modifications are required with respect to that standard, a petition may be supported by a letter from the vehicle's original manufacturer confirming that the vehicle model under consideration was manufactured to comply with the standard. This method of substantiation would be appropriate for petitions based on substantial similarity as well as for petitions which are not so based.

As for whether a vehicle is "capable of being readily modified", as the first level of decision, NHTSA suggests that many components that are visible when the vehicle is fully assembled may be considered capable of being readily modified when they may be easily replaced with parts intended as replacement for conforming parts on substantially similar certified vehicles. For passenger cars, these components would include, but are not limited to, tires Standard No. 109), rims (Standard No. 110), and wheel covers (Standard No. 211), glazing marking (Standard No. 205), reflecting surfaces (Standard No. 107), controls and displays (Standard No. 101), and lighting devices (Standard No. 108). Other components, not readily visible, are also easily replaced with conforming parts. These include brake hoses (Standard No. 106), and brake fluid (Standard No. 116). In this event, the petitioner could provide in its petition the part numbers of the components that would be substituted to achieve conformance.

However, this first level of decision, based upon replacement of parts, could not determine conformance with vehicle rather than equipment standards. Visual inspection would not indicate whether the steering column would need to be replaced so that the vehicle would comply with Standard No. 204, or whether the interior fabrics (other than leather) would meet the flammability resistance required by Standard No. 302.

VOL 54 ISS 78 AP 25 1989 UMI

because these tests incorporate destructive demonstration procedures. The second level of decision then rests upon the question whether the modifications necessary for conformance are "readily" achievable. In this instance, a petitioner would be expected to submit data showing that conformance can be achieved without extensive modifications, i.e. information demonstrating that compliance can be achieved without major structural modifications or destructive component testing. A major structural modification could mean, for example, strengthening of the rear frame bars in order to achieve conformance with Standard No. 301. A non-major structural modification could be installation of windshield retaining clips for conformance with Standard No. 212. On the assumption that a "substantially similar" vehicle may be more likely to incorporate structural features of certified vehicles, than vehicles for which there is no U.S. certified model, the Administrator may be more willing to accept data other than crash data to indicate that a vehicle is readily modifiable to achieve conformance. On the other hand, a vehicle would not appear to be capable of being readily modified if major structural modifications are required for compliance, though such modifications might be acceptable to demonstrate capability of modification. Although each petition for substantial similarity determinations will be decided on the merits of the arguments presented, it does not appear that the following components can be readily modified to achieve conformance with the applicable standards: automatic restraints (Standard No. 208), seat belt anchorages (Standard No. 210), roof structure (Standard No. 216), windshield intrusion (Standard No. 219), and fuel system components (Standard No. 301).

NHTSA requests comments on its assumptions and tentative interpretations of "substantially similar" and "capable of being readily modified". In addition, NHTSA is concerned about the possibility that vehicles which appear "substantially similar" to the eye are much less so under the exterior sheetmetal. Therefore, NHTSA also requests comments on the similarity of structural components in such vehicles, such as similarity of dimensions behind the dashboard, roof rails, engine compartment, trunk space, and other structural areas for vehicles that are visually similar. Further, it would like comments on the degree of similarity in the dynamic crush and crush pulse signature of the imported vehicles in front and rear end impacts. At the present time, the agency is not fully sure about the degree of the under-skin similarity of vehicles, and these factors may have to be taken into account in petitions and determinations. The agency is particularly concerned with these issues as they relate to passenger cars manufactured by Mercedes-Benz, BMW, and Jaguar during the past 10 years. On the basis of past experience, NHTSA anticipates that well over 90 percent of vehicles to be imported under the new requirements will be products of these manufacturers.

Similar considerations apply if a vehicle is not substantially similar to any vehicles that have been or are being certified as complying with the FVMSSs and imported into the United States. For such a vehicle, the basis of a petition would be that its safety features comply with, or are capable of being modified to comply with the safety standards to which it would have been subject at the time of its manufacture had it been originally intended for importation into the United States. Because there is no substantially similar model certified for sale in the United States, the statute does not specify that determinations be made with reference to model years. Cognizant of the fact that foreign vehicles may be produced for a number of years without major changes, the Administrator could make a determination applicable to vehicles produced within a model year, or manufactured during a stated inclusive period. Tentatively choosing a conservative approach, the agency is proposing that "capability of modification" determinations also be made on a model year basis.

With respect to the alternative basis of petitions, as with "substantially similar" vehicles, a determination "that the vehicle's safety features comply"could be made on the basis of a letter of confirmation from the vehicle's original manufacturer, or through visual inspection. However, the Act assumes that full conformance with the safety standards may be more difficult to achieve for a non-similar vehicle than for a vehicle that is "substantially similar" to a certified one, as it states that NHTSA's determination shall be "based on destructive test data or such other evidence as the [Administrator] determines to be adequate". In this instance, it would appear that far more detailed information might be required to demonstrate capability of modification with those standards listed at the end of the prior discussion on substantially similar vehicles. Crash test data may be preferable to demonstrate that vehicles are capable of being modified to conform with those standards that incorporate barrier impact demonstration procedures (Standards Nos. 201, 204, 208, 212, 219, and 301). NHTSA contemplates that a registered importer, or a group of registered importers, planning to import a large number of a particular model might sacrifice one or more such vehicles to crash tests in order to generate data to file with a petition. If a petitioner did not wish to conduct a crash test, then the question arises as to the "adequacy" of alternate means of demonstration that the vehicle is capable of modifications to achieve conformance. NHTSA therefore requests specific comments as to the adequacy of computer simulations, engineering analysis, and mathematical calculations as alternative bases of demonstrating compliance with the six safety standards listed above, as well as others, such as Standard No. 105 *Hydraulic brake systems.* It calls attention to the fact that, in the final rule, with respect to these standards, it may be satisfied with nothing less than crash data, or a letter from the vehicle's original manufacturer confirming compliance.

The agency also requests comments with respect to alternate types of evidence of compliance, and their suitability with respect to each of the other standards with complex laboratory demonstration procedures. For example, are computer simulations or mathematical calculations acceptable with respect to the ability of components such as door latches and hings (Standard No. 206) or seat anchorages (Standard No. 207) to withstand certain specified minimum forces? Neither method would appear to be acceptable as a demonstration of the lack of flammability of interior materials (Standard No. 302). For demonstrations of compliance with Standard No. 302, it might be necessary to submit an analysis or the fabric, or to test fabric actually from the vehicle, for example. The Administrator would determine the adequacy of the alternative types of evidence.

The proposed petition requirements are drafted in somewhat general terms, so as to afford petitioners flexibility in presenting arguments and solutions of a performance, rather than of a design nature in keeping with the definition of the Federal motor vehicle safety standards. It is possible that, on the basis of comments, the final rule will be more detailed as to the types of data required to substantiate compliance with each of the safety standards.

If a petition is filed on the basis that the vehicle is "substantially similar" to a certified one, and the Administrator cannot make such a determination, that does not mean that the petition is automatically denied. In that event, the Agency may inform the petitioner that it cannot make a determination on the basis petitioned for, but is willing to proceed to a consideration on the alternative basis, and make a determination on conformance, or capability of conformance, of the vehicle's safety features, on the basis of such further supporting information as the petition may care to submit. A petition for a determination of "substantial similarity" would identify the model and model year of the vehicle for which a determination is sought, and a "capability" determination, the model year. At this time, the agency does not find it necessary to propose a definition of "model". It believes that petitioners will identify with sufficient clarity the vehicles that it wishes to import, and that comparable U.S. models will have comparable designations. For example, Mercedes and BMW use the same series designations for both U.S. and European models, though secondary nomenclature may differ in minor respects, reflecting variations in the type of engines. Although the agency has defined the term "model year" in regulating contents of VINs (49 CFR Part 565), it does not find that definition adequate for purposes of determinations of "substantial similarity". In Part 565 "model year" means "the year used to designate a discrete vehicle model irrespective of the calendar year in which the vehicle was actually produced so long as the actual period is less than two calendar years". It is to be noted in the first instance that Part 565 does not apply to vehicles imported under bond for the production of a conformance statement, the types of vehicles that will be the subject of similarity petitions. In the second instance, the Part 565 definition requires a manufacturer to have determined a model year, and such a determination may not have been made by manufacturers not subject to its jurisdiction.

More specifically, the "model year of the vehicle to be compared" should be easily ascertainable, as it is the practice in the United States for manufacturers to designate their products by model years. Further, that has been the practice of foreign manufacturers selling passenger cars in the United States. However, that has not necessarily been the practice of foreign manufacturers with respect to their domestic products, which are the vehicles for which determinations will be sought. If the manufacturer has not designated a model year, then NHTSA must designate it. In recent years, NHTSA has, with respect to major standards, designated September 1 as the effective date of new requirements, although in earlier years, the effective date was frequently January 1. Accordingly, NHTSA is proposing that "model year" be defined as either the model year designated by the manufacturer,or, in the absence of a designation, that it be a period that begins on September 1 of a year and ends on August 31 of the next succeeding year.

The procedural aspects of eligibility determinations are similar to other agency regulations regarding petitions and their dispositions (see, for example, 49 CFR 555.7 on temporary exemptions from safety standards). Notice of a petition (or agency initiative) will be published in the **Federal Register** and an opportunity afforded for comment. No public hearing, argument, or other formal proceeding will be held directly on the matter before a determination is made. After a decision, the agency will publish a second notice in the **Federal Register** constituting the determination whether the vehicle is eligible or ineligible for importation. If the vehicle is eligible for importation, the determination will extend to all vehicles covered by the determination, whether or not imported by the petitioner. If the vehicle is ineligible for importation, the notice will contain the earliest date on which the Administrator is statutorily able to consider the matter anew. In order to demonstrate that a vehicle is capable of compliance, the agency is willing to permit a registered importer to import a nonconforming vehicle for modification and demonstration purposes under the appropriate provision of Part 591.

Agency Determinations of Eligibility

The 1988 Act also provides that the agency may make determinations on its own initiative. NHTSA will proceed with such determinations in a manner similar to those made by petition. A notice requesting public comment will appear in the **Federal Register**, specifying the basis upon which the Administrator is considering a determination. No formal proceeding will be held. A second notice containing the decision will be published in the **Federal Register**. The agency will publish annually in the **Federal** Register a list of vehicles for which determinations have been made. This will appear as an Annex to Part 593, so that it may also, appear in the Code of Federal Regulations. The agency intends to publish the first list before September 30, 1990, because the CFR publishes NHTSA regulations in revised form as of October 1 of each year.

The agency intends to make available for public inspection in the agency docket room all publicly available information relevant to a determination, whether made pursuant to a petition or on the Administrator's initiative. However, as discussed previously, the agency realizes that a petition by a registered importer may contain arguments as to capability of modification that reflect the methodology by which that petitioner intends to achieve conformance, and which may qualify as a trade secret or confidential information for which confidential treatment may be requested. In that instance, the agency may conclude that considerations of confidentiality outweigh the interests of full disclosure.

Impacts

NHTSA has considered the impacts of this rulemaking action and has determined that it is not major within the meaning of Executive Order 12291 "Federal Regulation." However, it would require the agency to make a determination of capability of modification to meet Federal safety standards with respect to vehicles that did not comply with those standards prior to the time they are offered for importation into the United States. This is a responsibility that did not heretofore exist. It is not significant under Department of Transportation regulatory policies and procedures. Less than 3000 nonconforming vehicles a year that would be affected by this regulation are being imported into the United States. The proposed action has no substantial impact upon a major transportation safety program, nor does it involve any substantial public interest or controversy. There is no substantial impact upon state and local governments.

NHTSA has analyzed this proposal for purposes of the National Environmental Policy Act. It is not anticipated that a rule based on the proposal would have a significant effect upon the environment because it is anticipated that the annual volume of noncomplying motor vehicles imported as a result of eligibility determinations would not vary significantly from that existing before promulgation of the rule. However, the modification of vehicles to bring them into compliance involves the addition of materials to those vehicles. To the extent that the eligibility

VOL
54
ISS
78
AP
25
1989
UMI

determinations would result into a larger number of vehicles being brought into compliance with the standards, the materials used in conforming vehicles will increase.

The agency has also considered the effects of this proposal in relation to the Regulatory Flexibility Act. I certify that this proposal would not have a significant effect upon a substantial number of small entities. Although entities that currently modify nonconforming vehicles may be small businesses within the meaning of the Regulatory Flexibility Act, there is no restriction prohibiting them from applying for registration as importers under the proposal. Further, small organizations and governmental jurisdictions would not be significantly affected as they are not generally importers and purchasers of nonconforming motor vehicles. However, a Regulatory Flexibility Analysis covering all regulations proposed to implement the 1988 Act has been prepared, and will be placed in the public docket.

The petition procedures in this proposal are considered to be information collection requirements, as that term is defined by the Office of Management and Budget (OMB) in 5 Part 1320. Accordingly, these proposed requirements are being submitted to OMB for its approval, pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Comments on the proposed information collection requirements should be submitted to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attn: Desk Officer for NHTSA. It is requested that comments sent to the OMB also be sent to the NHTSA rulemaking docket for this proposed action.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 "Federalism," and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted. All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the docket section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 593

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, it is proposed that a new Part 593 *Determinations That a Nonconforming Vehicle Is Eligible for Importation* be added to Title 49, Chapter V, to read as follows:

PART 593—DETERMINATIONS THAT A NONCONFORMING VEHICLE IS ELIGIBLE FOR IMPORTATION

Sec.

593.1 Scope.
593.2 Purpose.
593.3 Applicability.
593.4 Definitions.
593.5 Petitions for eligibility determinations.
593.6 Basis for petition.
593.7 Processing of petitions.
593.8 Determinations on the agency's initiative.
593.9 Effect of affirmative determinations; lists.
593.10 Availability for public inspection.

Authority: Pub. L. 100-562; delegations of authority at 49 CFR 1.50 and 501.8.

§ 593.1 Scope.

This part establishes procedures under section 108(c) of the National Traffic and Motor Vehicle Safety Act, as amended (15 U.S.C. 1397(c)), for making determinations whether a vehicle that does not comply with all applicable Federal motor vehicle safety standards, and is not otherwise eligible for importation under Part 591 of this chapter, may be imported into the United States because it can be modified to meet the Federal standards.

§ 593.2 Purpose.

The purpose of this part is to provide content and format requirements for registered importers and manufacturers who wish to petition the Administrator for a determination that a nonconforming vehicle is eligible to be imported into the United States because it can be modified to meet the Federal motor vehicle safety standards. The purpose of this part is also to specify procedures under which the Administrator makes eligibility determinations pursuant to those petitions as well as eligibility determinations on the agency's initiative.

§ 593.3 Applicability.

This part applies to a motor vehicle that was not originally manufactured and certified by its original manufacturer to conform with all applicable Federal motor vehicle safety standards which is offered for importation into the United States.

§ 593.4 Definitions.

All terms in this part that are defined in section 102 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1391) are used as defined therein.

"Administrator" means the Administrator of the National Highway Traffic Safety Administration.

"Model year" means the year used by a manufacturer to designate a discrete vehicle model irrespective of the calendar year in which the vehicle was actually produced, or, if a manufacturer has not made such a designation, the calendar year that begins on September 1 and ends on August 31 of the next calendar year.

"NHTSA" means the National Highway Traffic Safety Administration.

"Registered Importer" means any person who has been granted registered importer status by the Administrator pursuant to § 592.5(b) of this chapter, and whose registration has not been revoked.

§ 593.5 Petitions for eligibility determinations.

(a) A manufacturer or Registered Importer may petition the Administrator for a determination that a vehicle that does not comply with all applicable Federal motor vehicle safety standards is eligible for importation, either

(1) On the basis that the vehicle

(i) is substantially similar to a vehicle which was originally manufactured for importation into and sale in the United States and which bore a certification affixed by its manufacturer pursuant to Part 567 of this chapter, and

(ii) is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards; or

(2) On the basis that the vehicle has safety features that comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards.

(b) Each petition filed under this part must—

(1) Be written in the English language;

(2) Be headed with the words "Petition for Import Eligibility Determination" and submitted in three copies to: Administrator, National Highway Traffic Safety Administration, Washington, DC 20590, Attn: Import Eligibility Determinations;

(3) State the full name and address of the petitioner. If the petitioner is a Registered Importer, include the Registered Importer Number assigned by NHTSA pursuant to Part 592 of this chapter.

(4) Set forth the basis for the petition and the information required by § 593.6 (a) or (b), as appropriate;

(5) Specify any part of the information and data submitted which petitioner requests be withheld from public disclosure in accordance with Part 512 of this chapter.

(6) Submit a certified check payable to the Treasurer of the United States, for the amount of the vehicle eligibility petition fee established pursuant to Part 594 of this chapter.

(c) The knowing and willful submission of false, fictitious or fraudulent information may subject the petitioner to the criminal penalties of 18 U.S.C. 1001.

§ 593.6 Basis for petition.

(a) If the basis for the petition is that the vehicle is substantially similar to a vehicle which was originally manufactured for importation into and sale in the United States, and which was certified by its manufacturer pursuant to Part 567 of this chapter, and that it is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards, the petitioner shall provide the following information:

(1) Identification of the original manufacturer, model, and model year of the vehicle for which a determination is sought.

(2) Identification of the original manufacturer, model, and model year of the vehicle which the petitioner believes to be substantially similar to that for which a determination is sought.

(3) Substantiation that the manufacturer of the vehicle identified by the petitioner under paragraph (a)(2) of this section originally manufactured it for importation into and sale in the United States, and permanently affixed a label to it certifying that it complied with all applicable Federal motor vehicle safety standards.

(4) Data, views and arguments demonstrating that the vehicle identified by the petitioner under paragraph (a)(1) of this section is substantially similar to the vehicle identified by the petitioner under paragraph (a)(2) of this section.

(5) With respect to each Federal motor vehicle safety standard that applied to the vehicle identified by the petitioner under paragraph (a)(2) of this section, data, views, and arguments demonstrating that the vehicle identified by the petitioner under paragraph (a)(1) of this section either was originally manufactured to conform to such standard, or is capable of being readily modified to conform to such standard.

(b) If the basis of the petition is that the vehicle's safety features comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards, the petitioner shall provide the following information:

(1) Identification of the model and model year of the vehicle for which a determination is sought.

(2) With respect to each Federal motor vehicle safety standard that would have applied to such vehicle had it been originally manufactured for importation into and sale in the United States, data, views, and arguments demonstrating that the vehicle has safety features that comply with or are capable of being modified to conform with such standard, and after such modifications, will conform with such standard.

§ 593.7 Processing of petitions.

(a) NHTSA will review each petition upon its receipt for its sufficiency under §§ 593.5 and 593.6. If the petition does not contain all the information required by this part, NHTSA notifies the petitioner, pointing out the areas of insufficiency, and stating that the petition will not receive further consideration until the required information is provided. If the additional information is not provided within the time specified by NHTSA in its notification, NHTSA may dismiss the petition as incomplete, and so notify the petitioner. When the petition is complete, its processing continues.

(b) NHTSA publishes in the **Federal Register**, affording opportunity for comment, a notice of each petition containing the information required by this part.

(c) No public hearing, argument, or other formal proceeding is held on a petition filed under this part.

(d) If the Administrator is unable to determine that the vehicle in a petition submitted under § 593.6(a) is one that is substantially similar, or (if it is substantially similar) is capable of being readily modified to meet the standards, (s)he notifieds the petitioner, and offers the petitioner the opportunity to supplement the petition by providing the information required for a petition submitted under § 593.6(b).

(e) If the Administrator determines that the petition does not demonstrate that the vehicle model is eligible for importation, (s)he denies it and notifies the petitioner in writing. (S)he also publishes in the **Federal Register** a notice of denial and the reasons for it. A notice of denial also states that the Adminstrator will not consider a new petition covering the model that is the subject of the denial until at least 3 months from the date of the notice of denial. There is no administrative reconsideration available for petition denials.

(f) If the Administrator determines that the petition demonstrates that the vehicle model is eligible for importation, (s)he grants it and notified the petitioner. (S)he also publishes in the **Federal Register** a notice of grant and the reasons for it.

§ 593.8 Determinations on the agency's initiative.

(a) The Administrator may make a determination of eligibility on his or her own initiative. The agency publishes in the **Federal Register**, affording opportunity for comment, a notice containing the information available to the agency (other than confidential information) relevant to the basis upon which eligibility may be determined.

VOL
54
ISS
78
AP
25
1989
UMI

(b) No public hearing, argument, or other formal proceeding is held upon a notice published under this section.

(c) The Administrator publishes a second notice in the **Federal Register** in which (s)he announces his or her determination whether the vehicle is eligible or ineligible for importation, and states the reasons for the determination. A notice of ineligibility also announces that no further determination for the same model of motor vehicle will be made for at least 3 months following the date of publication of the notice. There is no administrative reconsideration available for a decision of ineligibility.

§ 593.9 Effect of affirmative determinations; lists.

(a) A notice of grant is sufficient authority for the importation by persons other than the petitioner of any vehicle of the same model specified in the grant.

(b) The Administrator publishes annually in the **Federal Register** a list of determinations made under §§ 593.7 and 593.8.

§ 593.10 Availability for public inspection.

(a) Except as specified in paragraph (b) of this section, information relevant to a determination under this part, including a petition and supporting data, and the grant or denial of the petition or the making of a determination on the Administrator's initiative, is available for public inspection in the Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590. Copies of available information may be obtained, as provided in Part 7 of this chapter.

(b) Except for release of confidential information authorized under Part 512 of this chapter, information made available for inspection under paragraph (a) does not include information for which confidentiality has been requested and granted in accordance with Part 512, and 5 U.S.C. 552(b). To the extent that a petition contains material relating to the methodology by which the petitioner intends to achieve conformance with a specific standard, the petitioner may request confidential treatment of such material on the grounds that it contains a trade secret or confidential information in accordance with Part 512 of this chapter.

Issued on: April 19, 1989.

George L. Parker,

Associate Administrator for Enforcement.

[FR Doc. 89-9830 Filed 4-24-89; 8:45 am]
BILLING CODE 4910-59-M

49 CFR Part 594

[Docket No. 89-6; Notice]

RIN 2127-AC96

Schedule of Fees Authorized by the Imported Vehicle Safety Compliance Act

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Traffic and Motor Vehicle Safety Act, as revised by the Imported Vehicle Safety Compliance Act of 1988 (Pub. L. 100-562), provides that motor vehicles not conforming to Federal motor vehicle safety standards may nevertheless be imported into the United States under certain circumstances. In general, a nonconforming vehicle may be imported under bond for its conformance, or exportation in the event it is not conformed, by those who have registered with NHTSA as importers, provided that NHTSA has determined that the nonconforming vehicle is capable of being conformed to meet the safety standards.

The Safety Act authorizes NHTSA to establish fees to cover its cost of administering the registration program, and of making conformance capability determinations, and to reimburse the U.S. Customs Service its costs in processing the importation bond. The purpose of this notice is to propose the fee schedules that will implement the statutory authorization. The agency has tentatively concluded that the initial annual fee for the registration program should be $255. The fee to accompany a petition for a determination that a vehicle is eligible for importation would be either $1560 or $2150, depending upon the basis of the petition. The fee required to reimburse the U.S. Customs Service for bond processing costs is proposed to be $125 per bond.

DATES: Comment closing date for the proposal is June 26, 1989. The effective date of the final rule would be 30 days after its publication in the **Federal Register.**

ADDRESS: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Docket hours are from 8 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel, NHTSA, (202-366-5263).

SUPPLEMENTARY INFORMATION:

Introduction

On December 5, 1988, the National Highway Traffic Safety Administration published a notice of the amendment of section 108 of the National Traffic and Motor Vehicle Safety Act by Pub. L. 100-562, the Imported Vehicle Safety Compliance Act of 1988 (53 FR 49003). The effective date of the amendments is January 31, 1990. On and after that date, with the exceptions sepcified in the notice, motor vehicles that have not been manufactured to conform to the Federal motor vehicle safety standards may be imported only by persons who have registered with NHTSA as undertaking to bring the vehicle into conformance, or by persons who have contracts with Registered Importers to perform conformance work. In addition, a nonconforming vehicle may not be imported unless NHTSA has determined that it is capable of being conformed to the standards. The agency may make such a determination in a response to a petition by a Registered Importer, or on its own initiative. Each nonconforming vehicle permitted entry must be accompanied by a bond given to secure performance of the conformance work, or, to ensure its exportation or abandonment to the United States in the event that the vehicle is not brought into full conformance.

Proposals have been issued to implement the new import provisions of the Vehicle Safety Act described above, and are being published simultaneously with this notice. They are 49 CFR Part 591, *Importation of Vehicles and Equipment Subject to Federal Motor Vehicle Safety Standards;* Part 592, *Registered Importers of Nonconforming Vehicles;* and Part 593, *Determinations That a Nonconforming Vehicle is Eligible for Importation.*

The new provisions also specifically authorize NHTSA to impose fees to cover certain administrative costs incurred in implementation of the new importation procedures. There are two or more types of fees to cover three types of costs for which fees may be charged: an annual fee to cover the costs of administration of the importer registration program, an annual fee or fees to cover the costs of processing the bond furnished to the Customs Service, and an annual fee or fees to cover the costs of making import eligibility determinations.

The purpose of this notice is propose a fee schedule that appears appropriate for recovery of each cost, and to explain the rationale behind each of these fees. In identifying those agency activities that may form the cost basis of a fee authorized by the new import provisions, the agency has been guided by the experience of other agencies in collecting users fees under the Independent Offices Authorization Act (31 U.S.C. 9701), and the Consolidated Omnibus Budget Reconciliation Act (Pub. L. 99-272). Thus, the agency intends to identify each service it provides, to explain why NHTSA is entitled to recover the cost of providing that service, to identify each type of expenditure incurred in providing that service, to explain the criteria used to include or exclude a particular expenditure and to calculate the amount of each such expenditure.

1. Annual Fee for Administration of the Importer Registration Program.

Section 108(c)(3)(A) of the Vehicle Safety Act provides that registered importers must pay "such annual fee as the Secretary establishes to cover the cost of administering the registration program * * *." (15 U.S.C. 1397(c)(3)(A)(iii)).

The first issue addressed by the agency is whether the term "registration program" is inclusive of all activities under section 108 (except for the other activities for which a fee may be imposed), or whether it is restricted to activities relating directly to the registration process, such as reviewing registration applications and acting upon them. The agency has interpreted "registration program" conservatively, concluding that it refers only to activities connected with the development and maintenance of the registration process, including monitoring, and enforcement activities resulting in suspension or revocation of a registration. Although it could be argued that NHTSA's verification of the certification submitted by a registered importer is relevant to the maintenance by that registered importer of its status, this agency believes that Congress did not intend to include such an activity in the registration program. Specifically, section 108(c)(3)(B)(i) prohibits the application of fees collected under the Vehicle Safety Act to NHTSA's inspection of vehicles for which certifications have been filed. Thus, NHTSA has excluded, from the fee structure of the registration program, activities connected with processing of certificates and compliance documentation of motor vehicles.

The second issue addressed by NHTSA, and relevant to the other authorized fees as well, is whether the agency can recover both direct and indirect costs associated with its activities. It notes that there is no modifier of the word "costs," and has concluded that both direct and indirect costs may be recovered. Such costs include all costs of administering the program, including salaries and other personnel costs (retirement, insurance and leave), travel, postage, maintenance and depreciation of equipment, supplies, and a proportionate share of agency management and supervisory costs as well as accrued liabilities, which include severance pay, unemployment compensation, workers compensation, and unused leave costs.

The initital annual fee attributable to the registration program that NHTSA proposes to establish contains three components. The first component is one that would cover the cost of processing an application by a person seeking to become a Registered Importer. It would not be refundable in the event of a denial. The second component represents the costs attributable to such inspection as the agency may deem necessary to conduct prior to a decision on an application. The third component is intended to cover the remaining costs. The first and third components of the initial annual fee would be paid at the time that an applicant seeks to become a Registered Importer. The second component would be paid only if an inspection is actually conducted, and would be payable by the end of the tenth calendar day after notification by the agency. If the application is denied, the amount of the fee representing the third component would be refunded to the applicant.

Annual fees after the initial annual fee would also have three components. Instead of a component attributable to processing an application, the first component of a regular annual fee would cover the costs of processing the Registered Importer's annual statement (or mid-year changes) attesting to no material change in its condition and that it is maintaining its financial and technical ability to meet its statutory obligations. The second component would cover the cost, if any, of such inspections the agency might have conducted with respect to the Registered Importer during the year. The third component is again intended to cover remaining costs.

With respect to the first component of the initial annual fee, the relatively simple, discrete activities involved in processing and acting upon registration applications permit a uniform first component sum to be developed, payable by all who seek to become Registered Importers. Similarly, the agency tasks involved in processing and reviewing annual statements appear to permit a uniform first component sum to be developed. The direct costs that the agency will consider in this regard are the amount of time spent in reviewing applications or annual statements for form and content, analysis, and drafting of documents relating to the analysis and disposition of the application or annual statement, including direct supervisory time. Other direct costs associated, such a postage, computer time, and meetings to discuss the merits of an application or annual statement, may be included in the free structure. However, while the application is pending, NHTSA may wish to inspect the premises of the applicant or its agent. The costs of this inspection would form the basis of the second component of the fee that would be paid before a determination was made on the merits of the application. Inspections conducted after registration has been granted (the second component of the regular annual fee) would be reflected in the next annual fee payable by the registered importer concerned.

The agency would consider indirect costs as well. For example, if one-third of a staffer's time at a word processing terminal is spent in drafting documents relative to an application determination, then a third of the cost of maintaining the space and the terminal may be factored into a registration fee. Indirect general and administrative costs can be included in the fee structure as a pro rata share of the costs attributable to running the program.

Once a registration has been granted, section 108(d)(2) imposes an obligation on a Registered Importer to maintain evidence "satisfactory to the Secretary (of Transportation)" that the Registered Importer continues to be financially able to meet its statutory responsibilities "relating to discovery, notification, and remedy of motor vehicle defects." Further, section 108(c)(3)(D)(ii) directs the agency to set requirements for Registered Importers, including at a minimum (1) requirements for record-keeping; and (2) requirements for records and facilities inspection for Registered Importers. Activities associated with satisfying the agency of financial ability and meeting other specified responsibilities may be included in the cost basis of the registration program annual fee. The initial annual fee would be based upon NHTSA's estimates of costs for the first fiscal year that the registration program is in effect. If the amount of the annual fee for a succeeding year is adjusted, the adjustment would take into account NHTS'a actual experience in the year preceding.

VOL 54 ISS 78 AP 25 1989 UMI

Under proposed § 592.6(a)(7), the agency may inspect a facility or the records which the Registered Importer must keep to fulfill its program responsibilities. There are two purposes for which such inspections may be conducted. The first is to verify that the regulatory criteria for obtaining or maintaining the status of Registered Importer are met. These inspections are directly related to administration of the registration program. The agency may include direct and indirect costs associated with these inspection activities in the fee structure for the program. The second purpose for which an inspection may be conducted is to verify that a certification filed by a Registered Importer is supported by the conformance work performed. This activity is not part of the registration program. Consequently, if inspecting a facility for compliance with registration requirements also involves vehicle inspection, agency staff would be instructed to segregate costs to exclude those attributable to the inspection of vehicles, and only those costs directly attributable to the registration program would be included in the second component of the next regular annual fee.

As with processing an initial application or annual statement, all direct and indirect costs associated with the suspension of Registered Importer status are recoverable, as well as reinstatement of registration. These include costs associated with notifying a registrant that the agency is considering suspension, plus the costs of allowing it to present its opposition to suspension under proposed § 592.7(b), and costs associated with processing a registrant's request that NHTSA reconsider a suspension under proposed § 592.7(e). The final associated cost would be that of notifying the registrant of the determination regarding its suspension.

Similarly, the costs associated with revoking a registration would be recoverable. These include notifying a Registered Importer in writing that NHTSA intends to revoke registration under proposed § 592.7(b), or that the agency has revoked a registration under proposed § 592.7(c) because the registrant knowingly filed a false or misleading certification. Further recoverable costs would be those associated with reviewing, analyzing and responding to the registrant's written opposition to a preliminary decision to revoke its registration.

The agency may include whatever activities are associated with making a determination under proposed § 592.7(d) that the basis for a suspension no longer exists. The nature of the reinstatement process would vary depending on the reason for the suspension. For example, the process would be comparatively simple if the suspension was for failure to pay a fee.

2. Fee for Making Vehicle Eligibility Determinations

Section 108(c)(3)(A)(iii)(II) also requires Registered Importers to pay "such other annual fee or fees as the Secretary reasonably establishes to cover the cost of * * * making the determinations under this section." These determinations are whether the vehicle sought to be imported is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, and certified as meeting the Federal standards, and whether it is capable of being readily modified to meet those standards, or, alternatively, where there is no substantially similar U.S. motor vehicle, whether the safety features of the vehicle comply with or are capable of being modified to comply with the U.S. standards. These determinations are made pursuant to petitions submitted by Registered Importers or manufacturers, or pursuant to determinations made upon the Administrator's initiative.

In developing this regulation, the agency considered the type and frequency of fees that would best implement the purpose of the 1988 Act. With respect to making eligibility determinations, it considered an "annual fee", in which total costs attributable to eligibility determinations would be divided equally among all registered importers. Such a fee would be payable at the time of the next regular annual fee for administration of the registration program. This type of fee appears equitable in the sense that more than one registered importer may benefit from an eligibility determination, and that the costs would not be borne by the petitioner alone. However, if the phrase "annual fee or fees" is construed so that "fees" is not modified by "annual", this construction permits a fee to be charged attributable to individual determinations of eligibility. The benefit of this approach is that permits "pay-as-you-go", under which costs are more quickly recovered. This fee would be payable by a petitioner for a determination, or by the importer who first benefits from a determination made on the agency's initiative (see further discussion below).

The agency requests comments on each approach. For purposes of this notice, however, the agency has chosen the second approach (though calling attention to the fact that, in the final rule, it may chose the first approach). Under the proposed approach, a petition by a manufacturer or registered importer for a determination would be accompanied by the fee specified in Part 594. The payment of this fee by the petitioner is premised upon the likelihood that the petitioner would be the immediate beneficiary of any favorable determination, and therefore ought to pay the costs authorized by statute for consideration of its petition. The immediate beneficiary of a favorable determination made upon the Administrator's initiative would be the first registered importer, or other person, who imports a vehicle that is covered by the determination. Therefore, NHTSA proposes to establish a fee that would be payable by the registered importer who furnishes a certificate of conformity covering the first vehicle imported under a declaration filed after notice of the Administrator's initiative determination has appeared in the **Federal Register**. The notice would include a discussion of the fee to be paid and the basis for it. Subsequently, upon receipt of the first declaration covering the vehicle, NHTSA would notify the registered importer concerned that the stated fee is due at the time the certificate of conformity covering the vehicle is received. However, NHTSA is aware that such costs would remain unrecoverable until such time as (and unless) a declaration is filed on such a vehicle.

Regardless of which approach is chosen, the activities that may form the cost basis for petitions appear identical. These include logging-in, notifying the petitioner of receipt, and evaluating the petition. If the agency grants a written request for the petitioner to appear to discuss a petition under proposed § 593.7(c), it may recover the cost of processing the written request and discussing the petition. Although the Act does not require an actual demonstration of conformance, only that a vehicle is capable of conformance, a petitioner may wish to substantiate its arguments with presentation of a modified vehicle. In that event, it may be necessary for NHTSA to inspect the modified vehicle as part of its role in determining whether the vehicle is eligible for importation. The cost of that inspection would be properly recoverable. The new import provisions require publication of a notice in the **Federal Register**; thus the agency may also recover costs associated with preparing and processing **Federal Register** documents generated in connection with the petition, processing and analyzing comments submitted in connection with a **Federal Register** document; and notifying a petitioner of the agency's decision.

When NHTSA makes a determination on the agency's initiative, it would also publish a notice in the **Federal Register** and receive and evaluate comments on it.

The new import provisions do not require the agency to publish a second **Federal Register** notice immediately after a decision is made. Section 108(c)(3)(C)(iv), however, does require NHTSA to publish annually in the **Federal Register** a list of all vehicles determined to be eligible for import under the Act. Compiling and publishing this list is connected with making and announcing eligibility determinations, and the costs may be included in the fee structure.

3. Fee to Recover the Costs of Processing the Bond

Section 108(c)(3)(A)(iii)(II) also requires a registered importer to pay "such annual fee or fees as the Secretary reasonably establishes to cover the cost of processing the bond furnished to the Secretary of the Treasury" upon the importation of a nonconforming vehicle to ensure that the vehicle will be brought into compliance within a reasonable time, or if the vehicle is not brought into compliance within such time, that it is exported without cost to the United States, or abandoned to the United States.

The statute contemplates that NHTSA make a reasonable determination of the cost to the United States Custom Service of processing the bond. The agency has met with representatives of the Customs Service to obtain such information as would allow it to include the cost basis of processing the bond in the fee structure. NHTSA will ensure that Customs follows the same guidelines as the agency does to determine whether each activity associated with processing the bond gives rise to a recoverable cost.

NHTSA believes that the cost of processing a bond is susceptible to expression as a uniform amount. For administrative reasons, it appears far simpler to impose this fee on each bond given, instead of totalling the sums at the end of a year and assessing an "annual fee" at that time, to be payable at the same time as the next regular annual fee. For this purpose, therefore, the "annual fee" would be the amount that Customs determines is attributable to the cost of processing each bond, and it would be paid on an incremental basis by the registered importer at the time the bond is furnished under this proposal.

4. Calculations of the Agency's Costs in Setting Fees

The agency does not read the statute as directing it to impose a *uniform* fee or fees, as long as a fee is established for the statutory purposes. To the extent possible, each such fee would be based upon an accounting of each discrete activity involved in the process. Thus, the fees imposed by Part 594 would include the agency's best direct and indirect cost estimates of the man-hours involved in each activity, on both the staff and supervisory levels, the costs of computer and word processor usage, postage costs, costs attributable to travel, salary and benefits, and maintenance of work space to name the ones set forth in the proposed regulation.

Specifically, each fee would be calculated on the basis of the direct and indirect costs associated with the activity for which the fee is paid. The direct costs include the average cost per professional staff-hour, computer and word processor time, stationery and postage, and transportation.

The average cost per professional staff-hour is calculated based upon the full costs for time spent (to the nearest quarter-hour) using the following applicable professional staff rates:

(A) Office of Vehicle Safety Compliance—Clerical staff—$13 per hour. Computer contract staff—$25 per hour. Review staff—$26 per hour. Supervisors—$26 per hour.

(B) Office of Chief Counsel—$41 per hour.

The average cost per computer-hour is calculated at the rate of $100 per hour.

The average cost for postage is calculated to be $3.00.

The indirect costs include a pro rata allocation of the average salary and benefits of persons employed in processing the applications and recommending decisions on them, and a pro rata allocation of the costs attributable to maintaining the office space, and the computer or word processor. The staff rates above include benefits; the costs associated with office space, equipment maintenance, communications and other overhead amount to an additional $6.71 per hour.

The cost for determing the salary and benefits of persons employed is calculated based upon the time spent multiplied by the employee's hourly wage.

The cost of maintaining the computer or word processor is calculated based upon maintenance, time sharing, and staff operations.

The cost of maintaining the office space is calculated based upon standard government regulations based upon grade levels.

The cost of travel is based upon an estimated round trip air fare of $250, and a 3-day per diem of $100 a day, for a total trip cost of $550.

A. Registration Program Fee

The Registration Program Annual Fee will have two and in some instances three components: a portion attributable to the registration process, a portion attributable to any inspection of an applicant that the agency deems needed to verify information submitted in an application for registration, and a portion attributable to other activities occurring in the registration program. Exclusive of the inspection portion, the agency has tentatively decided that the initial Annual Registration Program fee shall be $255.

The initial component of the Registration Program Fee is the portion of the fee attributable to processing and acting upon registration applications. The agency estimates this portion of the fee as $85.99.

In calculating the direct costs of processing registration applications, NHTSA estimates that one staff member and one supervisor will spend a total of one man-hour in processing, reviewing, and acting upon applications, that a quarter hour of computer, and computer-operator time will be required to verify that the applicant has not had a registration revoked, that a half hour of clerical time will be required, and that a postal charge will be incurred. These costs are estimated at $74.25.

In calculating the indirect costs of processing registration applications, NHTSA has estimated that these will average $6.71 per hour spent. Processing will require a total of 1.75 hours per application, thus NHTSA estimates that indirect costs will total $11.74. Thus the total direct and indirect costs of this component appear to be $85.99.

With respect to other costs attributable to maintenance of the registration program, these appear to consist principally of reviewing a registrant's annual statement verifying the continuing validity of information already submitted, and processing annual fees. These costs would also appear to include costs attributable to revocation or suspension of a registration.

In calculating the direct costs of administering the registration program other than costs connected with the initial application, NHTSA estimates that one staff member and one

VOL
54
ISS
78
AP
25
1989
UMI

supervisor will spend a total of 1.5 man-hours in administrative activities, that one half-hour of computer time, and computer operator time will be required, that 1.5 hours of clerical and recordkeeping time will be needed, and a postal charge will be incurred. The total direct charges for administering the registration program are estimated at $131.50. The total overhead costs of the 3.5 hours involved are $23.49, or a total of $154.99. These costs, of course, are exclusive of costs associated with revocation or suspension.

At this point it appears fairest that a suspended registrant bear the costs associated with suspension and reinstatement, to be included in its next annual fee. However, it will not be feasible to recover costs from an importer whose registration has been revoked. Equitably, those costs appear best borne by each registered importer paying a pro rata share in its annual fee. Obviously, before the effective date of the 1988 amendments NHTSA has no knowledge of how many Registered Importers there will be or how many suspensions or revocations may occur in the first year of the program. However, for purposes of determining this portion of the registration fee, NHTSA estimates that there will be 20 Registered Importers during the fiscal year beginning October 1, 1989, and ending September 30, 1990, and that there will be one revocation. Under proposed Part 592 the procedures that the agency will follow in determining whether a registration should be revoked or suspended are identical. This means that the direct and indirect costs should also be identical, up to the point of an agency determination. Because a suspended registration may be reinstated, either upon expiration of the term stated in the agency's letter of suspension, or upon cure of the cause giving rise to the suspension, there will be a slight additional cost commensurate with the clerical aspects of ending the suspension.

NHTSA contemplates that its Enforcement Office will recommend suspensions or revocations to the Office of Chief Counsel, and that 1 hour of staff time, and .25 hour computer operator time will be involved in recommendations. In addition, .25 hour of computer time will be used. The Office of Chief Counsel will require 1.75 hours to review the recommendation and draft a letter to the registrant, and an additional 1.75 hours to review the registrant's reply and to draft a letter of suspension, or revocation, or declining to take further action. Postal charges will total $6.00. The total direct costs associated with this procedure are $206.75, and the overhead costs for 4.75 hours of agency time, $34.87. The sum of $238.62 divided by the 20 estimated Registered Importers gives a figure of $11.93 to be added to the portion of the annual fee representing maintenance of the registration program (for reinstatement, to be borne by the registrant, NHTSA estimates that the total direct and indirect costs will be $40.36, representing .25 hour of clerical time, .25 hour of computer time, and .25 hour of computer operator time).

Thus, the total portion attributable to maintenance of the registration program, as estimated by NHTSA, is approximately $166.92. When added to the $85.99 representing the registration application component, the cost per applicant equals $252.91. Therefore, NHTSA proposes that the initial annual registration fee, for the period October 1, 1989 through September 30, 1990, be $255. In the event that an application is denied or withdrawn, NHTSA will refund all but $86 of this amount, or $169.

B. Fee for Vehicle Eligibility Petitions

In calculating the direct costs of processing and acting upon a petition for a determination of eligibility, NHTSA estimates that the costs involved for determinations involving substantially similar vehicles will require substantially less agency time than those for non-similar vehicles. For purposes of this determination, NHTSA has chosen passenger cars and multipurpose passenger vehicles, the most frequently imported types of motor vehicles. The agency estimates the total direct and indirect costs for a determination involving a substantially similar vehicle at $1,558.68, and for a non-similar vehicle at $2,151.61. In this light, a fee of $1,560 for substantially similar vehicle determinations, and one of $2,150 for those that are not substantially similar, appears to fulfill the statutory directive.

More specifically, the following cost breakdown has been estimated for substantially similar (and non-similar) vehicles. The process will result in personnel costs related to 2 (5) supervisory hours, 24 (35) staff hours, .25 (.25) hour computer time, .25 (2) hour(s) data entry time, .50 (2) hour(s) clerical time, and .25 (.50) hour recordkeeping time. In addition, .25 hour of computer time would be used for each. However, costs associated with preparing and publishing the two **Federal Register** notices, and evaluating comments to the first notice, should be identical. Each notice may require two columns of space ($125 per column), for a cost of $250 per notice, and total publication costs of $500. Following agency practice with other petitions, the notices will be prepared by the Office of Chief Counsel. It is estimated that each notice will require 1 hour of preparation time, and .50 hour of clerical time, or a total of 3 hours for both notices. The estimated total direct charges for determinations of eligibility will be $1,342 ($1,817.50).

In calculating the indirect costs of processing and acting upon eligibility petitions, NHTSA estimates that the process, including the **Federal Register** preparation time, will take 30 (47.50) man hours, for a cost of $201.30 ($318.73), or a total of $1,543.30 ($2,136.23). These totals include .25 hour of computer time. To this must be added the pro rata cost of the yearly **Federal Register** notice. It is estimated that this will require 1 hour of Office of Chief Counsel time, .50 hour clerical time, and two columns in the **Federal Register**. The total direct costs to fulfill this statutory requirement would be $297.50. The overhead costs, $10.07. The total of $307.57 divided among the estimated 20 Registered Importers adds $15.38 to each petition cost, or a total of $1,558.68 ($2,151.61). Therefore, a petition fee of $1,560 ($2,150) is being proposed. At this point, costs appear similar for determinations made upon the agency's own initiative, and the same fee will be used in recovery of costs.

C. Bond Processing Costs

With respect to the costs attributable to processing the bond furnished the Secretary of the Treasury, the agency was informed in 1986 by the U.S. Customs Service that the figure was $115. Based on an evaluation of increases in Federal pay rates between 1986 and 1989, yields a 1989 cost of $125 per bond.

Effective Date

Section 108(c)(3)(B) requires that the amount or rate of fees shall be reviewed, and, if appropriate, adjusted by NHTSA at least every 2 years. It also requires that the fee applicable in any fiscal year shall be established by NHTSA before the beginning of each such year. Therefore, a final rule on this proposal will be issued not later than Friday, September 29, 1989, so that the fees it establishes will be applicable in Fiscal Year 1990, which begins October 1, 1989.

Impacts

After considering the impacts of this rulemaking action, NHTSA has determined that the action is not major within the meaning of Executive Order 12291 "Federal Regulation", because it will not have an impact upon the economy in excess of $100 million. Nor is it significant under Department of Transportation regulatory policies and procedures. The proposed action does not involve any substantial public interest or controversy. Nor is there any substantial effect upon state and local governments. There is no substantial impact upon a major transportation safety program. Both the number of registered importers and vehicles for which determinations are estimated to be comparatively small, and the number of vehicles imported per year is estimated to be less than 3000.

NHTSA has analyzed this proposal for purposes of the National Environmental Policy Act. It is not anticipated that a rule based on the proposal would have a significant effect upon the environment because it is anticipated that the annual volume of motor vehicles imported through registered importers would not vary significantly from that existing before promulgation of the rule even with the imposition of fees to be paid by registered importers.

The agency has also considered the effects of this proposal in relation to the Regulatory Flexibility Act. I certify that this proposal would not have a significant effect upon a substantial number of small entities. Although entities that currently modify nonconforming vehicles may be small businesses within the meaning of the Regulatory Flexibility Act, the agency has no reason to believe that a substantial number of these companies could not pay the fees imposed by this proposed regulation. However, small businesses currently conforming vehicles may not choose to register as importers because of the fee and other requirements, and these businesses would no longer be able to perform conformance work after January 31, 1990. The cost to owners or purchasers of modifying nonconforming vehicles to conform with the safety standards may be expected to increase to the extent necessary to reimburse the registered importer for the fees payable to the agency for the cost of administering the registration program and to compensate Customs for its bond processing costs. Governmental jurisdictions would not be affected at all since they are generally neither importers nor purchasers of nonconforming motor vehicles.

The agency has analyzed the proposed rule in accordance with the principles and criteria contained in Executive Order 12612 "Federalism" and determined that the proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted. All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the docket section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 594

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, it is proposed that a new Part 594, *Schedule of Fees Authorized by the Imported Vehicle Safety Compliance Act* be added to title 49, chapter V, to read as follows:

PART 594—SCHEDULE OF FEES AUTHORIZED BY THE NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT

Sec.
594.1 Scope.
594.2 Purpose.
594.3 Applicability.
594.4 Definitions.
594.5 Establishment and payment of fees.
594.6 Annual fee for administration of registration program.
594.7 Fee for filing petition for a determination whether a vehicle is eligible for importation.
594.8 Fee for importing a vehicle pursuant to a determination made on the Administrator's initiative.
594.9 Fee for reimbursement of bond processing costs.

Authority: Sec. 2(b), Pub. L. 100-562, 102 Stat. 2818 (15 U.S.C. 1397); sec. 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1407); delegations of authority at 49 CFR 1.50 and 501.8.

§ 594.1 Scope.

This part establishes the fees payable by Registered Importers, and applicants for Registered Importer status, and manufacturers who are not Registered Importers who petition the Administrator for a determination pursuant to Part 593 of this chapter, as authorized by the National Traffic and Motor Vehicle Safety Act.

§ 594.2 Purpose.

The purpose of this part is to ensure that NHTSA is reimbursed by persons who apply to become Registered Importers, for costs incurred in processing applications, and by those who are granted that status, for costs incurred in administering the registration program, in making determinations whether a nonconforming vehicle is eligible for importation into the United States, and in processing the bond furnished to the Secretary of the Treasury given to ensure that an imported nonconforming vehicle is brought into compliance with the Federal motor vehicle safety standards, or will be exported, or abandoned to the United States.

§ 594.3 Applicability.

This part applies to any person who applies to NHTSA to be granted the status of a Registered Importer, and to any person who has been granted such status.

§ 594.4 Definitions.

All terms used in this part that are defined in section 102 of the National

VOL
54
ISS
78
AP
25
1989
UMI

Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391) are used as defined in the Act.

"Administrator" means the Administrator of the National Highway Traffic Safety Administration.

"NHTSA" means the National Highway Traffic Safety Administration.

"Registered Importer" means any person who has been granted the status of registered importer under Part 592 of this chapter, and whose registration has not been revoked.

§ 594.5 Establishment and payment of fees.

(a) The fees established by this part continue in effect until adjusted by the Administrator. The Administrator reviews the amount or rate of fees established under this part and, if appropriate, adjusts them by rule at least every 2 years.

(b) The fees applicable in any fiscal year are established before the beginning of such year. Each fee is calculated in accordance with this part, and is published in the Federal Register not later than September 30 of each year.

(c) An applicant for status as Registered Importer shall submit an initial annual fee with the application. A fee for a determination that a vehicle is eligible for importation shall be submitted with the petition for a determination. No application or petition will be accepted for filing or processed before payment of the full amount specified. Except as provided in § 594.8(d), a fee shall be paid irrespective of NHTSA's disposition of the application or petition, or of a withdrawal of an application or petition.

(d) A Registered Importer annual fee, other than the initial annual fee, is payable not later than October 31 of each year.

(e) A fee attributable to a determination of eligibility made on the Administrator's initiative shall be paid by a Registered Importer in accordance with § 594.8(b).

(f) A fee for reimbursement for bond processing costs shall be filed with each certificate of conformity furnished the Administrator.

(g) Any other annual fee is payable not later than October 31 of each year. Any other fee is payable not later than 30 calendar days after the date of written notification by the Administrator.

(h) Fee payments shall be by check, draft, money order, or Electronic Funds Transfer System made payable to the Treasurer of the United States.

§ 594.6 Annual fee for administration of the registration program.

(a) Each person filing an application to be granted the status of a Registered Importer pursuant to Part 592 of this chapter during the period October 1, 1989, through September 30, 1990, shall pay an initial annual fee of $255, as calculated below, based upon the direct and indirect costs attributable to:

(1) Processing and acting upon such application;

(2) Any inspection deemed required for a determination upon such application; and

(3) The estimated remaining activities of administering the registration program in the fiscal year in which such application is intended to become effective.

(b) That portion of the initial annual fee attributable to the processing of the application for applications filed from October 1, 1989, through September 30, 1990, is $85.99. The sum of $86, representing this portion, shall not be refundable if the application is denied or withdrawn.

(c) If, in order to make a determination upon an application, NHTSA must make an inspection of the applicant's facilities, or those of any agent, NHTSA notifies the applicant in writing after the conclusion of any such inspection, that a supplement to the initial annual fee in a stated amount is due upon receipt of such notice to recover the direct and indirect costs associated with such inspection and notification, and that no determination will be made upon the application until such sum is received. Such sum is not refundable if the application is denied or withdrawn.

(d) That portion of the initial annual fee attributable to the remaining activities of administering the registration program from October 1, 1989, through September 30, 1990, is set forth in paragraph (i) of this section. This portion shall be refundable if the application is denied, or withdrawn before final action upon it.

(e) Each Registered Importer who wishes to maintain the status of Registered Importer shall pay a regular annual fee based upon the direct and indirect costs of administering the registration program, including the suspension and reinstatement, and revocation of such registration.

(f) The elements of administering the registration program that are included in the regular annual fee are:

(1) Calculating, revising, and publishing the fees to apply in the next fiscal year, including such coordination as may be required with the U.S. Customs Service.

(2) Processing and reviewing the annual statement attesting to the fact that no material change has occurred in the Registered Importer's status since filing its original application.

(3) Processing the annual fee.

(4) Processing and reviewing any amendments to an annual statement received in the course of a fiscal year.

(5) Verifying through inspection or otherwise that a Registered Importer is complying with the requirements of § 592.6(a)(3) of this chapter for recordkeeping.

(6) Verifying through inspection or otherwise that a Registered Importer is able technically and financially to carry out its responsibilities pursuant to 15 U.S.C. 1411 *et seq.*

(7) Invoking procedures for suspension of registration and its reinstatement, and for revocation of registration pursuant to § 592.7 of this chapter.

(g) The direct costs included in establishing the annual fee for maintaining registered importer status are the estimated costs of professional and clerical staff time, computer and computer operator time, and postage, per Registered Importer. The direct costs included in establishing the annual fee for a specific Registered Importer are costs of transportation and *per diem* attributable to inspections conducted with respect to that Registered Importer in administering the registration program, which have not been included in a previous annual fee.

(h) The indirect costs included in establishing the annual fee for maintaining Registered Importer status are a pro rata allocation of the average salary and benefits of persons employed in processing annual statements, or changes thereto, in recommending continuation of Registered Importer status, and a pro rata allocation of the costs attributable to maintaining the office space, and the computer or word processor. NHTSA estimates this cost at $6.71 per man-hour for the period October 1, 1989, through September 30, 1990.

(i) Based upon the elements, and indirect costs of paragraphs (f), (g), and (h) of this section, the component of the initial annual fee attributable to administration of the registration program, covering the period from October 1, 1989, through September 30, 1990, is $166.92. When added to the component representing the costs of registration of $85.99, as set forth in paragraph (b) of this section, the costs per applicant to be recovered through the annual fee is $252.91. The annual registration fee for the period October 1, 1989, through September 30, 1990, is $255.

§ 594.7 Fee for filing petition for a determination whether a vehicle is eligible for importation.

(a) Each manufacturer or registered importer who petitions NHTSA for a determination that:

(1) A nonconforming vehicle is substantially similar to a vehicle originally manufactured for importation into and sale in the United States and of the same model year as the model for which petition is made, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards, or

(2) A nonconforming vehicle has safety features that comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards shall pay a fee based upon the direct and indirect costs of processing and acting upon such petition.

(b) The direct costs attributable to processing a petition filed pursuant to paragraph (a) of this section include the average cost per professional staff-hour, computer and computer operator time, and postage. The direct costs also include those attributable to any inspection of a vehicle requested by a petitioner in substantiation of its petition.

(c) The indirect costs attributable to processing and acting upon a petition filed pursuant to paragraph (a) of this section include a pro rata allocation of the average salary and benefits of persons employed in processing the petitions and recommending decisions on them, and a pro rata allocation of the costs attributable to maintaining the office space, and the computer or word processor.

(d) The direct costs attributable to acting upon a petition filed pursuant to paragraph (a) of this section, also include the cost of publishing a notice in the Federal Register seeking public comment, the costs of publishing a second notice with the agency's determination, and pro rata share of the costs of publishing an annual list of nonconforming vehicles determined to be eligible for importation.

(e) The fee payable for a petition for a determination that a nonconforming vehicle is eligible for importation into the United States for petitions filed from October 1, 1989, through September 30, 1990, is $1560 if a petition is filed under paragraph (a)(1) of this section, and $2150 if filed under paragraph (a)(2) of this section, when the petitioner does not request inspection of a vehicle. When the petitioner requests an inspection of a vehicle, the sum of $550 shall be added to such fee. No portion of this fee is refundable if the petition is withdrawn or denied.

§ 594.8 Fee for importing a vehicle pursuant to a determination made on the Administrator's initiative.

(a) A fee shall be established to cover the direct and indirect costs incurred by NHTSA in determinations made under § 593.8(a) of this part, pursuant to its own initiative, that a vehicle is eligible for importation into the United States. The basis of such fee is that set forth in § 594.7 (b), (c), and (d). If the basis of the determination is that a vehicle meets the criteria of paragraph (a)(1) of § 594.7, the fee is $1560. If the basis of the determination is that a vehicle meets the criteria of paragraph (a)(2) of § 594.7, the fee is $2150. These fees are applicable to each determination made from October 1, 1989, through September 30, 1990.

(b) After NHTSA has made a determination on its own initiative, the notice published in the Federal Register announcing the determination includes a fee attributable to NHTSA's direct and indirect costs incurred pursuant to such determination, and an advisory that such fee shall be payable by the Registered Importer who furnishes a certificate of conformity pursuant to § 592.6(a)(3)(vi) of this chapter, on behalf of the first person who files a declaration pursuant to § 591.5(f) of this chapter that the vehicle is eligible for importation.

(c) After receipt of the first declaration covering a vehicle eligible for importation because of a determination made pursuant to the Administrator's initiative, NHTSA informs the appropriate Registered Importer that a fee in the stated amount shall accompany the certificate of conformity that the Registered Importer must furnish for the vehicle. No certificate shall be accepted for filing or processing unless and until such fee has been paid. A certificate for which no remittance is received may be returned to the registered importer.

§ 594.9 Fee for reimbursement of bond processing costs.

(a) Each Registered Importer shall pay a fee based upon the direct and indirect costs of processing each bond furnished to the Secretary of the Treasury with respect to each vehicle for which it furnishes a certificate of conformity to the Administrator pursuant to § 591.7(e) of this chapter.

(b) The direct and indirect costs attributable to processing a bond are provided to NHTSA by the U.S. Customs Service.

(c) Based upon information from the U.S. Customs Service, the bond processing fee for each vehicle for which a certificate of conformity is furnished from October 1, 1989, through September 30, 1990, is $125.

Issued on April 19, 1989.

George L. Parker,

Associate Administrator for Enforcement.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Agency Information Collection Activities Under OMB Review

AGENCY: Action.

ACTION: Information collection request under review.

SUMMARY: This notice sets forth certain information about an information collection proposal by ACTION, the Federal Domestic Volunteer Agency.

Background: Under the Paperwork Reduction Act (44 U.S.C., Chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted the information collection proposal described below to OMB. OMB and ACTION will consider comments on the proposed collection of information and recordkeeping requirements. Copies of the proposed forms and supporting documents [requests for clearance (SF 83), supporting statement, instructions, transmittal letter, and other documents] may be obtained from the agency clearance officer.

Need and Use: Information from project sponsors on numbers of volunteers, volunteer hours delivered, volunteer activities, volunteer stations, etc. is needed for program management, required reporting to the U.S. Congress, and planning.

To Obtain Information About or To Submit Comments on This Proposed Information Collection, Please Contact Both:

Melvin E. Bettle, Clearance Officer, ACTION, Room M–600, 806 Connecticut Ave., NW., Washington, DC 20525. Tel: (202) 634–9321.

and

James Houser, Desk Officer for ACTION, Office of Management and Budget, New Executive Office Bldg., Room 3002, Washington, DC 20503. Tel: (202) 395–7316.

Office of ACTION Issuing the Proposal: Office of Older American Volunteer Programs/Domestic & Anti-Poverty Operations

Title of Forum: OAVP Project Profile and Volunteer Activity Survey

Type of Request and Respondent's Obligation To Reply: Annual Project activity questionnaire; voluntary

General Description of Respondents: Project Directors of 1139 grantees for FGP, SCP, and RSVP

Estimated Response Burden: Overall Figure in Burden Hours—8087

Number of respondents by group	Average burden minutes per response	Frequency of response
252 FGP project directors.	5.2 hrs	once/year.
143 SCP project directors.	4.2 hrs	once/year.
744 RSVP project directors.	8.3 hrs	once/year.

Dated: April 19, 1989.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Soybean, Research and Field Test Data, Equipment Approval, Program Procedures

AGENCY: Fedeal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: On February 23, 1989, the Federal Grain Inspection Service (FGIS) published a proposal to offer soybean oil and protein testing as official criteria under the United States Grain Standards Act (7 U.S.C. 71 *et seq.*) A public meeting is scheduled for May 10, 1989, to discuss equipment type-evaluation results, field test results, and other informaton that would be related to the program if a decision is made to provide soybean oil and protein testing.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., USDA, FGIS, Resources Management Division, Room 0628 South Building, P.O. Box 96454, Washington, DC 20090–6454– telephone (202) 475–3428.

SUPPLEMENTARY INFORMATION: On February 23, 1989, FGIS published a proposal in the **Federal Register** (54 FR 7778) to offer soybean oil and protein testing as official criteria effective September 4, 1989, and requested comments on the constant moisture basis to be used in reporting the oil and protein results. In the same publication, FGIS also requested comments on a proposed rule to amend § 800.162 of the regulations (7 CFR 800.162) to require such information on all soybean certificates for grade beginning September 2, 1991. Coments on these issues were due April 24, 1989.

The purpose of the public meeting is to review with the industry and interested parties information concerning: research data, proposed analytical procedures, near-infrared (NIR) calibration data and procedures, field test data, equipment type-evaluation data, and the program and inspection procedures if a decision is made to provide soybean oil and protein testing beginning September 4, 1989. The merits of the proposed actions in the February 23, 1989 publication will not be discussed. Interested parties will be offered an opportunity at the meeting to present any data they may have. Oral presentations should be limited to not more than 10 minutes each.

The meeting will be held May 10, 1989, at 8:00 a.m., at the Embassy Suites Hotel, Kansas City International Airport, 7640 Northwest Tiffany Springs Parkway, Kansas City, Missouri 64154; telephone (816) 891–7788. The meeting is open to the public and public participation is invited. Persons who wish to submit written or oral statements at the meeting should contact Lewis Lebakken, Jr., telephone (202) 475–3428. (Pub. L. 94–582, 90 Stat. 2867, as amended, (7 U.S.C. 71 *et seq.*))

Dated: April 20, 1989.

W. Kirk Miller,

Administrator.

BILLING CODE 3410–EN–M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 7–89]

Proposed Foreign-Trade Zone—Brown County, WI (Green Bay Port of Entry); Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by Brown County, Wisconsin, requesting authority to establish a general-purpose foreign-trade zone on a site encompassing the Austin Straubel Airport and two surrounding parcels (2,364 acres). The site includes land in the village of Ashwaubenon, the Town of Hobart and the reservation of the Oneida Tribe of Indians in Wisconsin in Brown County, within the Green Bay Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on April 14, 1989. Brown County is authorized to make this application pursuant to secton 182.50 of the 1985–86 Wisconsin Statutes.

The proposed zone would consist of three parcels: Parcel A (60 acres) is located at South Point Road and Airport Road, Ashwaubenon, and is owned by the County and the Oneida Indian Tribe; Parcel B (1,654 acres) consists of the county-owned Airport facility located in Ashwaubenon and Hobart; and, Parcel C (650 acres), also located in Ashwaubenon and Hobart, includes the Ashwaubenon Industrial Park at Adam Drive and Ridge Road, part of which is owned by the Village of Ashwaubenon.

The application contains evidence of the need for zone services in the Green Bay area. Several firms have indicated an interest in using zone procedures for warehousing/distribution activity, including glassware, auto parts, machinery and marine equipment. Specific manufacturing approvals are not being sought at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr., (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Richard Rudin, District Director, U.S. Customs Service, North Central Region, 517 E. Wisconsin Avenue, Room 554, Milwaukee, Wisconsin 53202; and Colonel John D. Glass, District Engineer, U.S. Army Engineer District, Detroit, P.O. Box 1027, Detroit, Michigan 48231–1027.

As part of its investigation, the examiners committee will hold a public hearing on May 17, 1989, beginning at 9 a.m., in the Brown County Board Chambers, Room 203, Green Bay City Hall, 100 North Jefferson Street, Green Bay, WI 54301.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by May 10, 1989. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through June 19, 1989.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, 2077 Airport Drive, Straubel Field, Green Bay, WI 54303.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th & Pennsylvania Ave., NW., Room 2835, Washington, DC 20230.

Dated: April 18, 1989.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 89–9801 Filed 4–24–89; 8:45 am]

VOL 54 ISS 78 AP 25 1989 UMI

International Trade Administration

[A-307-801]

Initiation of Antidumping Duty Investigation: Aluminum Sulfate from Venezuela

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating an antidumping duty investigation to determine whether imports of aluminum sulfate from Venezuela are being, or are likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of aluminum sulfate materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before May 15, 1989. If that determination is affirmative, we will make a preliminary determination on or before September 5, 1989.

EFFECTIVE DATE: April 25, 1989.

FOR FURTHER INFORMATION CONTACT: Eleanor Shea, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-0184.

SUPPLEMENTARY INFORMATION:

The Petition

On March 29, 1989, we received a petition filed in proper form by General Chemical de Puerto Rico on behalf of a U.S. aluminum sulfate industry. In compliance with the filing requirements of 19 CFR 353.36, petitioner alleges that imports of aluminum sulfate from Venezuela are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

Petitioner has alleged it has standing to file the petition. Specifically, petitioner has alleged that it is an interested party as defined under section 771(9)(C) of the Act and that it has filed the petition on behalf of a U.S. industry producing the product that is subject to this investigation. If any interested party as described under paragraphs (C), (D), (E), or (F) of section 771(9) of the Act wishes to register support for, or opposition to, this petition, please file written notification with the Commerce officials cited in the "FOR FURTHER INFORMATION CONTACT" section of this notice.

United States Price and Foreign Market Value

Petitioner's estimate of United States price (USP) is based on a delivered price per ton of aluminum sulfate imported from Venezuela. This price is set forth in a contract between a U.S. customer and the Venezuelan supplier named in the petition. USP was adjusted to account for inland freight to the liquification plant, liquification in Puerto Rico, inland freight in Puerto Rico from the liquification site to the customer, Venezuelan excise tax, packaging for ocean shipment, and ocean freight and insurance. Petitioner's estimate of foreign market value (FMV) is based on a f.o.b. plant price quote dated March 10, 1989. Petitioner made no adjustments to FMV. Based on a comparison of FMV to USP, petitioner alleges a dumping margin of 96.30 percent.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping duty investigation, and whether it contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on aluminum sulfate from Venezuela and found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether imports of aluminum sulfate from Venezuela are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make a preliminary determination by September 5, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s). The product covered by this investigation is aluminum sulfate from Venezuela, which is used in water purificatioin, in waste water treatment, and for other industrial applications. Prior to Janaury 1, 1989, such merchandise was classifiable under item 417.1600 of the *Toriff Schedules of the United States Annotated* (TSUSA). This merchandise is currently classifiable under HTS item 2833.22.00. The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will allow the ITC access to all privileged and business proprietary information in our files, provided it confirms in writing that it will not disclose such information either publicly or under administrative protective order without the written consent of the Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 15, 1989, whether there is a reasonable indication that imports of aluminum sulfate from Venezuela materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will be terminated; otherwise, it will proceed according to the statutory and regulatory procedures.

This notice is published pursuant to section 732(c)(2) of the Act.

April 17, 1989.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-570-101]

Greige Polyester/Cotton Printcloth From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review and Tentative Determination To Revoke

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review and tentative determination to revoke.

SUMMARY: In response to a request by the respondent, the Department of Commerce has conducted an administrative review of the antidumping duty order on greige polyester/cotton printcloth from the People's Republic of China.

The review covers the one known manufacturer/exporter of this merchandise to the United States and the period September 1, 1987 through August 31, 1988. There were no shipments of this merchandise to the United States by the firm during the period.

As a result of our review, we tentatively determine to revoke the antidumping duty order. Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: April 25, 1989.

FOR FURTHER INFORMATION CONTACT: Maura Kim or Laurie A. Lucksinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-1130.

SUPPLEMENTARY INFORMATION:

Background

On February 12, 1985, the Department of Commerce ("the Department") published in the **Federal Register** (50 FR 5805) the final results of its last administrative review of the antidumping duty order on greige polyester/cotton printcloth from the PRC (48 FR 41614, September 16, 1983). The respondent, China National Textiles Import and Export Corporation ("Chinatex"), requested in accordance with 19 CFR 353.53a(a) that we conduct an administrative review. We published a notice of initiation of antidumping duty administrative review on December 5, 1988 (53 FR 48951). On January 31, 1989, we published a corrected initiation notice (54 FR 4871). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of greige polyester/cotton printcloth, other than 80 × 80 type. Greige polyester/cotton printcloth is unbleached and uncolored printcloth. The term "printcloth" refers to plain woven fabric, not napped, not fancy or figured, of singles yarn, not combed, of average yarn number 26 to 40, weighing not more than 6 ounces per square yard, of a total count of more than 85 yarns per square inch, of which the total count of the warp yarns per inch and the total count of the filling yarns per inch are each less than 62 percent of the total count of the warp and filling yarns per square inch.

During the review period such merchandise was classifiable under items 326.26 through 326.40 of the Tariff Schedules of the United States Annotated ("TSUSA"). This merchandise is currently classifiable under HTS item 5513.11.00. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers one manufacturer/exporter of greige polyester/cotton printcloth, Chinatex, and the period September 1, 1987 through August 31, 1988.

Preliminary Results of Review and Tentative Determination to Revoke

Chinatex made no shipments to the United States for the period September 1, 1984 through August 31, 1988 and has requested revocation of the order. As provided for in 19 CFR 353.54(e), Chinatex has agreed in writing to an immediate suspension of liquidation and reinstatement of the order under circumstances specified in the written agreement. If this tentative determination to revoke is made final, it will apply to all unliquidated entries of this merchandise manufactured and exported to the United States, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttal comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication.

The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

Furthermore, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties shall be required for shipments of this merchandise. The rate currently in effect for Chinatex is 22.4 percent. For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after August 31, 1988, and who is unrelated to Chinatex, a cash deposit of 22.4 percent shall be required.

This administrative review, tentative determination to revoke, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act (19 U.S.C. 1675 (a)(1), (c)) and 19 CFR 353.53a and 353.54.

Date: April 17, 1989.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

Spun Acrylic Yarn From Italy: Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration Commerce

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests by the petitioner and one exporter, the Department of Commerce has conducted an administrative review of the antidumping duty order on spun acrylic yarn from Italy. The review covers five manufacturers/exporters of this merchandise to the United States and the period April 1, 1986 through March 31, 1987. The review indicates the existence of dumping margins during this period.

As a result of the review, the Department has preliminarily determined to assess antidumping duties equal to the calculated differences between United States price and foreign market value.

We used best information available for two firms which failed to respond or provided an inadequate response to our request for information. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 25, 1989.

VOL 54 ISS 78 AP 25 1989 UMI

FOR FURTHER INFORMATION CONTACT: Linda L. Pasden or Robert J. Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On April 8, 1960, the Department of Commerce ("the Department") published in the **Federal Register** (45 FR 23684) an antidumping duty order on spun acrylic yarn from Italy. The petitioner and one exporter requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation of the antidumping duty administrative review on May 20, 1987 (52 FR 18837). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classsified solely according to the appropriate HTS item number(s).

Imports covered by this review are shipments of worsted spun acrylic plied yarn for machine knitting, excluding four-ply craft yarn and certain brushed yarns. During the review period, such merchandise was classifiable under items 310.5015 and 310.5049 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item 5509.3200. The HTS item number(s) are provided for convenience and Customs purposes. The written discription remains dispositive.

The review covers five manufacturers/exporters of spun acrylic yarn from Italy and the period April 1, 1986 through March 31, 1987. Only three manufacturers/exporters with shipments during the period responded adequately to our requests for information. Turriddo Torracchi did not respond to our questionnaire. Mister Joe's response to the Department's questionnaire was inadequate because it provided self-selected home market sales and did not provide any adjustments to U.S. or home market sales. Therefore, the Department used the best information available for these two firms, which was the rate published in the antidumping duty order (45 FR 23684, April 8, 1980). While the petitioner had requested that the Department conduct a review of an additional firm, that firm had no shipments during the period and we have no evidence that it is a manufacturer or exporter of the subject merchandise.

United States Price

In calculating United States price, the Department used purchase price, as defined in section 772 of the Tariff Act. Purchase price was based on the packed c.i.f., f.o.b., or delivered price to unrelated purchasers in the United States. We made adjustments for brokerage and handling, foreign inland freight, ocean freight, marine insurance, and U.S. inland freight.

We disallowed an addition for income due to currency exchange hedging because no provision is made for this adjustment in section 751 administrative reviews. Moreover, although respondent did not request that the income from currency hedging be used as a circumstance of sale adjustment, no circumstance of sale adjustment could be made because the income is not directly related to the sales under consideration. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used third-country price or constructed value as defined in section 773 of the Tariff Act. Third-country price was based on the packed f.o.b. or c.i.f. price to unrelated purchasers in third countries. We made adjustments for foreign inland feight and for differences in credit, packing, and physical characteristics of the merchandise. No other adjustments were claimed or allowed.

We calculated constructed value as the sum of the cost of the materials, fabrication, general expenses and packing, plus profit. The amount added for general expenses was either the actual cost or 10 percent of the sum of the materials and fabrication where the general expenses were less than the statutory minimum of 10 percent. The amount added for profit was either the actual amount of 8 percent of the sum of the costs of materials, fabrication and general expenses where profit was less than the statutory minimum of 8 percent.

The Department determined that Gruppo Bertrand's sales in the home market and to third countries were sold below its cost of production. As a result, we requested that Gruppo Bertrand demonstrate that its sales during the period were at prices which permit recovery of all costs within a reasonable period of time, in the normal course of trade. Gruppo Bertrand did not provide us with any information to establish that its costs could be recouped over time. Therefore, in the absence of any information to the contrary, we assume that Gruppo Bertrand's sales were at prices which do not permit recovery of costs within a reasonable period of time, in this case, the period of review.

Since insufficient quantities of such or similar merchandise were sold at or above the cost of production to provide an adequate basis for comparison, we used constructed value as defined in section 773 of the Tariff Act.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margins exist for the period April 1, 1986 through March 31, 1987.

Manufacturer/Exporter	Margin (percent)
Maniffattura Emmepi S.p.A.	0
Gruppo Bertrand (a.k.a. Fantasia, Cofisa, and Saberfil)	16.21
Lanificio DiNervesa Della Battaglia S.p.A./International Fibre Industries, Ltd.	3.84
Turriddo Torracchi	48.05
Mister Joe	48.05

We are not covering Enichem Fibre S.p.A (a.k.a. Ancifibre S.p.A.) because this firm is not known to be a manufacturer or exporter of the subject merchandise. If the firm should begin to export the subject merchandise, we will treat them as a new exporter.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required. For shipments from the remaining known manufacturers and exporters not covered by this review, the cash deposit will continue to be at the latest rate applicable for each of those firms (47 FR 5280, Feburuary 4, 1982; 48 FR 37682, August 19, 1983; and, 50 FR 35849, September 4, 1985).

For any future entries of this merchandise from a new exporter, not covered in this administrative review, whose first shipments occurred after March 31, 1987, and who is unrelated to any reviewed firm, a cash deposit of 16.21 percent shall be required.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a(a) of the Commerce Regulations (19 CFR 353.53a).

Date: April 18, 1989.

Timothy N. Bergan,

Acting Assistant Secretary for Import Adminstration.

Solid Urea From the German Democratic Republic; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request from one manufacturer/exporter, the Department of Commerce has conducted an administrative review of the antidumping duty order on solid urea from the German Democratic Republic. The review covers one manufacturer/exporter of this merchandise to the United States, Chemie Export-Import, and the period January 2, 1987 through June 30, 1988. There were no known shipments of this merchandise to the United States by Chemie during the period and there are no known unliquidated entries.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 25, 1989.

FOR FURTHER INFORMATION CONTACT: Dennis U. Askey or John R. Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Room B–099, 14th Street & Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–3601.

SUPPLEMENTARY INFORMATION:

Background

On July 14, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 26366) the antidumping duty order on solid urea from the German Democratic Republic. A manufacturer/exporter, Chemie Export-Import ("Chemie"), requested in accordance with 19 CFR 353.53a(a) that we conduct an administrative review. We published a notice of initiation on August 30, 1988 (53 FR 33163). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the *Harmonized Tariff Schedule* ("HTS") as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s). Imports covered in this review are shipments of solid urea. During this review such merchandise was classifiable under item number 480.3000 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item 0511.99.40. The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive as to the scope of the product coverage.

The review covers one manufacturer/exporter of this merchandise to the United States, Chemie, and the period January 2, 1987 through June 30, 1988. There were no known shipments of this merchandise to the U.S. by Chemie during the period and there are no known unliquidated entries.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margin exists:

Manufacturer/exporter	Time period	Margin (percent)
Chemie	1/2/87—6/30/88	*48.80

*No shipments during the period; margin from the last period on which there were shipments.

Parties to the proceeding may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter.

Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of issues raised in any such comments or at a hearing.

Further, as provided for by 19 CFR 353.48(b), a cash deposit of estimated antidumping duties based on the above margin shall continue to be required for all manufacturers/exporters. This deposit requirement is effective for all shipments of East German solid urea entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.53a.

Date: April 17, 1989.

Travel and Tourism Administration

Study on Rural Tourism and Small Businesses

Take notice that by Congressional mandate, the U.S. Travel & Tourism Administration (USTTA) in the Department of Commerce is presently working on a two-part study to explore ways in which rural tourism and small businesses can be promoted through travel and tourism activities. The study will require cooperation and coordination among federal agencies, state and local officials, and the private sector. The study is scheduled to be completed and presented to Congress this summer.

Development of tourism in rural regions is fast becoming an important area of interest, particularly where natural attractions predominate or where special social and cultural opportunities exist. The potential of tourism to enhance local, regional, state, and national economies has been increasingly recognized by Congressional representatives, public officials and economic planners throughout the country over the last decade. The "Study on Rural Tourism and Small Businesses" will attempt to evaluate the diverse ways in which small businesses in rural areas can be promoted through travel and tourism.

In addition, this study will contribute to the U.S. government's efforts in assessing the need for a federal policy concerning the development and promotion of small businesses in rural communities through travel and tourism, and whether there should be a special federal effort to support such a policy.

USTTA welcomes any comments on this initiative. All interested persons wishing to submit information pertaining to this study should contact Mr. Praful B. Shah, Vice President of Economics Research Associates, the U.S. Department of Commerce's contractor for this study. The address is 6321 Old Courthouse Road, Suite 320, Vienna, Virginia 22180. The telephone number is (703) 8953–1560.

Eric C. Peterson,

Acting Under Secretary for Travel and Tourism, U.S. Department of Commerce.

BILLING CODE 3510–11–M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements; Flammability Standards for Carpets and Rugs

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through April 30, 1992, of information collection requirements in regulations implementing flammability standards for carpets and rugs. The regulations are codified at 16 CFR Parts 1630 and 1631, and prescribe requirements for testing and recordkeeping by persons and firms issuing guaranties for products subject to the Standard for the Surface Flammability of Carpets and Rugs and the Standard for the Surface Flammability of Small Carpets and Rugs.

Additional Details About the Requested Extension of Approval of Requirements for Collection of Information

Agency address: Consumer Product Safety Commission, Washington, DC 20207.

Title of information collection: Standard for the Flammability of Carpets and Rugs (FF 1–70), 16 CFR Part 1630; Standard for the Flammability of Small Carpets and Rugs (FF 2–70), 16 CFR Part 1631.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of goods manufactured or imported.

General description of respondents: Manufacturers and importers of products subject to the flammability standards for carpets and rugs.

Estimated number of respondents: 120.

Estimated average number of hours for each respondent: 532 per year.

Estimated total hours for all respondents: 63,840.

Comments: Comments on this requested extension of approval of information collection requirements should be addressed to Pamela Barr, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone: (202) 395–7340. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Planning and Evaluation, Consumer Product Safety Commission, Washington, DC 20207; telephone: (301) 492–6416.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: April 18, 1989.

Sadye E. Dunn,

Secretary, Consumer Product Sofety Commission.

Department of the Army

Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB)

Dates of Meeting: May 17–19, 1989

Time of Meeting: 0900–1700 hours each day

Place: Denver, Colorado

Agenda: The Army Science Board Subgroup on Toxic and Hazardous Waste Management will conduct its fourth meeting with emphasis on a review of Army activities at the Rocky Mountain Arsenal, Army compliance with Federal and State laws, and the public involvement program. Briefings will be conducted by representatives of the Army, EPA and the State of Colorado. Past, current, and planned actions will be discussed in accordance with the Terms of Reference. This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039/7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

Department of the Navy

Record of Decision To Establish the Southeast Alaska Acoustic Measurement Facility (SEAFAC), Behm Canal, Ketchikan Gateway Borough, AK

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 and the Council on Environmental Quality Regulations (40 CFR Parts 1500–1508), the U.S. Navy announces its decision to construct and operate the Southeast Alaska Acoustic Measurement Facility (SEAFAC), in Behm Canal, Ketchikan Gateway Borough, Alaska.

The United States Navy has a continuing program to reduce the radiated noise of its submarines. This has resulted in producing successively quieter designs based upon detailed acoustic measurements of preceding submarine classes. These same measurements are also used to define methods for reducing the noise level of current operational submarines. Operational requirements dictate that the Navy must maintain separate measurement facilities to support the east and west coast submarine fleets.

The capability to obtain measurements of submarine radiated noise is essential both to defining current submarine vulnerability and to furthering the goals of the U.S. silencing program.

Measurement of the radiated noise levels of submarines is currently accomplished on the west coast at Carr Inlet, near Tacoma, Washington, and at Santa Cruz Island, near Santa Barbara, California. Two factors have combined to erode the capability to adequately measure submarine radiated noise at these sites: reductions in U.S. submarine noise levels and the increasing ambient noise levels at the sites. This situation can only be corrected by developing a new measurement facility at a quieter location.

The Navy's proposed action includes establishing an acoustic measurement facility in the western arm of Behm Canal, Southeast Alaska, to measure and define the acoustic signature of quiet operating submarines and predict their vulnerability to detection. The

VOL
54
ISS
78
AP
25
1989
UMI

Behm Canal facility will consist of three major parts: an underway measurement site, located in the central portion of the canal; a static measurement site, located northwest of Back Island; and the use of approximately 15 acres of National Forest land on Back Island for shore support facilities.

The action also includes the designation of five Restricted Areas that will be marked on National Ocean Survey charts. Four of the Restricted Areas will be in effect continuously and are necessary to alert the public to hazards to navigation and to protect both Navy and privately owned equipment and instrumentation. The fifth Restricted Area, which affects traffic transiting the area, will be estalished and will only be in effect during times when the Navy is actually conducting operations at the facility. The Navy anticipates that operations will require activation of this Restricted Area between 10 and 15 times per year and will usually last about 5 days at a time. These operations are not limited to any specific seasonal period, but may occur at any time throughout the year.

Scheduling of operations will take into account the existing uses of Behm Canal by both commercial and recreational boaters. When establishing the operational schedule for acoustic measurements, the Navy will work closely with those groups and agencies that sponsor and control activity in the Behm Canal area. The Navy recognizes that there are times during the commercial fishing season when salmon returns are greater than forecasted and that the Alaksa Department of Fish and Game (ADFG) extends fishing opportunities. These additional fishing oppportunities, or "unscheduled openings," have occurred in western Behm Canal in the past and are expected to continue. If an unscheduled opening occurs while the Navy is conducting tests, all reasonable steps will be taken to allow passage through or fishing in the operating area.

The following sections describe the five Restricted Areas:

Restricted Area No. 1 Area No. 1 is circular in shape and is to be centered at the underway measurement site, located at approximately 55°36' N. latitude and 131°49' W. longitude. The area is approximately 2,000 yards in diameter, and covers about 1 square mile. The Restricted Area is being established to protect privately owned equipment, as well as Navy equipment located at the center of the range course. The regulation allows boaters to transit the area; however, it stipulates that no vessel anchor, tow a drag of any kind, deploy a net, or dump any material within the boundaries of the area. The area will be marked on National Ocean Survey charts; however, the Navy does not intend to install surface buoys or other types of markers to identify the area boundaries became these markers would impose an unnecessary hazard to surface navigation. The subsurface buoys that suspend the measurement arrays will be set approximately 100 feet below the surface, deeper than the draft of any vessel transiting the area.

Restricted Area No. 2 Area No. 2 is also a cricle approximately 2,000 yards in diameter that encompasses the static measurement site and is centered at approximately 55°34' N. latitude and 131°48' W. longitude. The area is being established to protect private and Navy equipment. This equipment and instrumentation will include a power barge, suspension barges, mooring buoys, and underwater measurement arrays. The regulation stipulates that no vessel shall at any time anchor, tow a drag of any kind, deploy a net, dump any material, moor, or tie up to or loiter alongside or near moored structures in the area. The boundaries of the Restricted Area will not be marked, but the power and suspension barges and mooring buoys on the surface will be lighted, and will provide a visible reference for location. The area will also be marked on National Ocean Survey charts.

Restricted Area No. 3 Area No. 3 is being established to protect underwater cables and instrumentation located on or near the bottom from damage that could occur from anchoring or grappling, as in any other underwater cable crossing area. Area No. 3 encloses a triangular shaped section from the edge of Back Island towards the central portion of the canal. The northwestern edge of the triangle is formed by a line extending from near Bittersweet Rock north towards Francis Cove. The southern boundary of the triangle extends from Back Island towards Smugglers Cove in a northwesterly direction to a point south of Trunk Island where it intersects the northwest boundary. The northern boundary extends from Back Island toward Point Francis in a northerly direction to a point where it intersects the northwest boundary. The regulations allow transiting the area, and only exclude anchoring, towing a drag within 100 feet of the bottom, and dumping of material. In establishing this area, the Navy has no intention of prohibiting anchoring along the shores of Back Island, except where electrical and other cables are brought to shore and within 100 yards of the pier and dock facility located on the northwest shore of the island. The Navy anticipates that the underwater cables will be brought to shore along a single route in the vicinity of the facility. The termination location of the cable on the land will be clearly marked with a warning sign that will be visible from the water.

Restricted Area No. 4 Area No. 4 is approximately 500 yards wide, and is being established to protect underwater communication and power transmission cables from Revillagigedo Island to Back Island. The regulations stipulate that no vessel be allowed to anchor, tow a drag on the bottom, or dump any material. In establishing this area, the Navy has no intention of prohibiting anchoring along the shores of Back Island, except as noted for Restricted Area No. 3.

Restricted Area No. 5. The regulations associated with Area No. 5 will only be in effect while the Navy is actually conducting operations in western Behm Canal. The area encompasses a portion of western Behm Canal near the acoustic measurement facility. Boaters who wish to transit Area No. 5 will be able to contact a Navy Range Operations Officer by radio so that their expected time of arrival at the edge of the area can be considered when scheduling acoustic measurement tests. For craft not equipped with radios, the Navy will install flashing beacons to alert boaters when it is safe to pass through the area at any speed. A flashing green beacon means the facility is not operational and vessels can proceed safely through the area at any speed. A flashing red beacon means that a measurement is in progress and vessels should wait for the beacon to change to green to ensure safe passage through the area. Notifying the Range Operations Officer by radio in advance will assist the Navy in coordinating boat movements with the acoustic measurement tests. Depending on the status of the acoustic measurement in progress, if notification of a transit is not received in time, the Navy may require the vessel intending to transit the area to delay 15 to 20 minutes in order to complete the acoustical test in progress. Restrictions for area No. 5 apply to both underway and static acoustic measurement.

The Navy realizes that most boat use for fishing and recreation takes place within 500 yards of the shoreline. Therefore, there will be no restrictions placed on small craft in Area No. 5 that remain within 500 yards of the shoreline and keep their speed below 5 knots, with the exception of the restrictions identified for Restriction Area No. 3.

Submorine Operation Area. An area measuring approximately 3000 yards wide and 10,000 yards long, located roughly along the centerline of Area No. 5, will be used by submarines either operating submerged or surfacing during tests. Since these operations represent a potentially hazardous situation involving the collision of surface vessels and submarines, all vessels will have to clear this area and remain out until signaled by the Navy that the tests have been completed. This area was formerly called the "Danger Zone."

Figures 3.10 and 3.11 of the Final Environmental Impact Statement (FEIS) show locations of the restricted areas.

The Navy has established the same kind of restricted area regulations for the acoustic measurement facility in Carr Inlet near Tacoma, Washington. These regulations have been in effect for over 35 years, and during that time an excellent working relationship has been established between commercial and recreational users of the area and the Navy.

The Navy will notify the public of operations in western Behm Canal by publication in the USCG "Notice to Mariners," publication in the local Ketchikan paper, and radio broadcasts.

A Notice of Intent to prepare an Environmental Impact Statement (EIS) was published in the **Federal Register** on December 17, 1986. Early in the planning stages for this project, the Navy requested public comments to consider siting a proposed submarine acoustic measurement facility in Behm Canal, Southeast Alaska. A media briefing and public open house were also held in Ketchikan to further explain the proposed project and to again request public comments. Those comments and concerns expressed during the scoping process were evaluated and considered in the NEPA analysis. The Notice of Availability of the Draft Environmental Impact Statement (DEIS) was published in the **Federal Register** on September 25, 1987, and the DEIS was distributed to over 250 individuals and agencies. In addition to receiving written public comment on the DEIS, a public hearing was held in Ketchikan, Alaska, on October 15, 1987. Comments received during both the public hearing and the comment period were addressed in a Final Environmental Impact Statement (FEIS). The Notice of Availability for the FEIS was published in the **Federal Register** on May 20, 1988.

In February 1989, the Navy published an Addendum to the FEIS and distributed copies to the recipients of the FEIS. Comments were requested during a 30 day review period. The addendum contained three separate appendices to the FEIS: Revised Appendix A, new Appendix C, and new Appendix D. Appendix B, which was published with the FEIS, was not revised. Appendix A was a revised Subsistence Evaluation performed by the U.S. Forest Service. Appendix C was a detailed description of the SEAFAC site selection process and a consolidation of mitigative measures. The primary purpose of the Appendix C was to further clarify the process that resulted in selecting Behm Canal as the only viable site on the west coast of the United States for conducting submarine acoustic measurements and Back Island as the optimal location within Behm Canal for the required shore facilities. Appendix C also further clarified and summarized the action that will be taken to mitigate possible impacts to the environment, as discussed in the FEIS. Appendix D was a Permit Application and Public Notice issued by the Army Corps of Engineers.

During the NEPA analysis, the comments of other cognizant federal and state agencies were considered. The U.S. Department of Agriculture, Forest Service, and the U.S. Department of the Army, Corps of Engineers were cooperating agencies during the preparation and review of the NEPA documents and both organizations concur in the Navy decision indicated in this ROD. State agency comments were coordinated through the Alaska State Office of the Governor, Division of Governmental Coordination.

Various sites within the Western Pacific Region were investigated, but no other site was found which fulfills operational criteria. All areas under the jurisdiction of the United States in the eastern and central Pacific Ocean basin were examined. International political and information security considerations precluded foreign site selection.

A preliminary screening of Pacific coastal waters resulted in the identification of 14 potential sites. Five of the sites were already being used by the Navy for underwater testing. Acoustic measurement capability varied with each site. The two developed sites in Washington were found to be marginally quiet, but were too shallow for submarine operations at all speeds. The other three developed sites, two in California and one in Hawaii, were too noisy for measuring quiet submarines. None of the current sites with Navy installations was found to be adequate for future submarine noise measurements.

There were nine undeveloped sites identified as potential locations: one in Washington, four in Hawaii, and four in Alaska. Of these, all but two were rejected, primarily because of unsuitable weather conditions and excessive ambient noise. The area to the southwest of the big island of Hawaii required further study, since a large wind shadow suggested that quiet conditions could exist. However, acoustic characterization measurements showed the area to be unsuitable.

Similar acoustic and meteorological measurements were obtained at Behm Canal. This area met all critical requirements. Additional environmental measurements confirmed this conclusion. Although the site is somewhat remote from fleet home ports, the overriding need for a quiet site, operationally compatible with submarine maneuverability, leads to the conclusion that Behm Canal is the only viable site for conducting acoustical measurements well into the next century.

Once Behm Canal was selected, the area was surveyed for a suitable location to locate the shore facilities. Nine sites were evaluated using factors such as accessibility, ease of construction, view of the test area, and environmental impact.

After careful consideration of both the engineering and environmental consequences of establishing a shore facility at a specific site around the margin of western Behm Canal, Back Island was chosen as the preferred location. Access will be unencumbered and there is a considerable sheltered area for maneuvering. The site is easily accessible to Ketchikan, without disturbing acoustic measurement operations, and offers an excellent view of the range location. The pier does not require a breakwater or dredging and only requires minimal fill for the shore facility. As a result, the impact on the marine environment will be minimal.

Since the island is relatively flat, road and shore facilities can be constructed with comparative ease, and the impact on the terrestrial environment will also be minimal. A sizable buffer of trees, at least 50 feet wide, will be maintained to insure that most of the facility is screened from view from the water. Where, for operational reasons, there has to be a clear view of the canal, the buildings will be painted to blend into the surrounding forest canopy.

Three alternatives for routing of the submarine power transmission cable from the bottom of Clover Pass to Back Island were identified in the FEIS. Alternative #3, routing the cable across the northern part of Back Island, has been chosen as the preferred alternative for engineering reasons.

Throughout the course of the SEAPAC planning and design, the Navy has conducted extensive coordination with

1989
UMI

the U.S. Forest Service and the U.S. Fish and Wildlife Service to minimize impacts to nesting bald eagles and insure compliance with the Bald Eagle Protection Act. The access road has been designed to pass no closer than 200 feet from an existing eagle nest, and clear cutting on each site of the road will be reduced from a more typical 20 feet on each side, to 10 feet. In addition, construction blasting will be scheduled around sensitive eagle nesting periods. To monitor this schedule, a trained ornithologist will be at the site to evaluate the behavior of any eagles at active nest locations.

Based on the analysis developed in the EIS, the Navy concludes that adverse biological and physical impacts on the environment caused by the construction and operation of SEAFAC will be minor. In addition, all practicable means have been adopted to avoid adverse impact. Moreover, site activities at SEAFAC will comply with applicable state and federal statutes, including the Clean Water Act, the Endangered Species Act, the Clean Air Act, and the Fish and Wildlife Coordination Act. The potential environmental impacts addressed in the analysis, although relatively minor, included (1) short-term impacts on the physical environment from site preparation and facilities construction, (2) impacts on air and water quality from operations, and (3) impacts on the public from operations. The EIS also addresses the potential social and economic impacts and the potential of a ship accident while conducting tests.

Construction and operation of SEAFAC will cause the release of waste products including diesel exhausts from emergency electrical generators, solid wastes, and domestic waste water. Air emissions from construction will be similar to any other small construction job and will, therefore, have a minimal impact on the environment. Solid wastes from construction and operation will be transported to a commercial landfill in Ketchikan. Treated sewage effluent will meet applicable state and federal standards and will be released into Behm Canal from treatment systems at the rate of about 2 gallons per minute during operation.

Socioeconomic impacts on commercial and sport fishing and navigation in the Behm Canal area have also been assessed and would depend upon the time of year and how operations at the site are actually conducted. If, for example, site operations are conducted so that delays to transit the zone are rare, the economic impact from site operations on sport charters and other commercial traffic would be minor or non-existent. If delays are frequent, sport charters and related business could be adversely affected. In consideration of the many public comments on this matter, the proposed restricted zones have been modified to allow passage of vessels within Behm Canal past the facility. In addition, the Navy has mitigated possible impacts by agreeing to attempt to schedule tests around major sport fishing events. To the extent possible, unscheduled commercial fishing season openings will also be accommodated to allow the maximum practicable public use of the area. Because of these mitigative measures the Navy considers the likelihood of socioeconomic impact from these restrictions to be very low. Several comments were received during the FEIS and Addendum review regarding the possible impact of the restrictions of the range operations on commercial and sports fishing within western Behm Canal. These comments raise essentially the same issues as previously raised and are sufficiently addressed in the FEIS. The Navy has collected and analyzed a substantial amount of data regarding the socioeconomic environment of the area and the potential adverse effects on that environment, including the potential impact on commercial and sports fishing. These data are summarized extensively in the FEIS and no further studies are warranted in order to reach a reasoned choice among the alternatives presented.

Comments were also received suggesting that the economic impact to commercial and sport fishing would be mitigated if the shore facility was moved from Back Island to an area outside the Clover Pass Scenic Area, such as to Francis Cove. This assumption is incorrect. Operational impacts would not be lessened by moving the shore facility because the operating range and the restricted areas would remain as shown in the FEIS to allow sufficient area for submarines to maneuver safely.

The Ketchikan Gateway Boroughs has asked for mitigation in the form of economic compensation to offset the potential negative impacts of operations on the charter and sports fisheries in the Behm Canal area. As stated above and in the NEPA documents, the Navy is planning to work closely with local groups to mitigate potential impacts on fisheries, and therefore feels economic losses, if any, would be minor. A Navy response to the Ketchikan Gateway Borough request stated that "the Department of Defense, Office of Economic Adjustment, has determined that the SEAFAC project does not meet the legal requirements for community impact planning assistance, and that any further studies would be impractical due to the uncertainty of whether there will be any economic impacts."

Other comments questioned whether there would be increased traffic through Clover Pass as a result of Restricted Area No. 5 in Behm Canal. Because the Navy feels delay of boater traffic would be infrequent, any increased boater traffic through Clover Pass would be minimal.

Several individuals commented on the existence of local land use plans and the apparent inconsistency between the proposed action and those plans. The FEIS states that "the [Ketchikan] Borough Assembly will evaluate the compatibility of the proposed SEAFAC with the intent of the scenic area classification." On 18 July 1988, in support of some 1200 signatures to a petition not to change the existing scenic designation, the Ketchikan Gateway Borough Assembly found the Navy's proposed submarine acoustic measurement facility in Western Behm Canal to be inconsistent with the Clover Pass Scenic Area designation in the Borough's Comprehensive Plan and voted not to change the designation. As described in the FEIS and the Addendum to the FEIS, the Navy has identified mitigative measures which will be taken to reconcile the proposed action with the recreational and scenic character of the Clover Pass Area. In accordance with 40 CFR 1502.16(c) and 1506.2(d), the Navy has considered the conflict between the proposed action and the objectives of the local land use plans and finds that the proposed action is consistent to the maximum extent practicable with the Borough's Comprehensive Plan, given safety and mission requirements.

Comments also questioned how Restricted Area No. 5 would affect cruise ships and recreational activities such as scuba diving. Navy testing will have minimal effect on cruise ship traffic within Clarence Strait. Cruise ships which transit western Behm Canal during periods of testing would be subject to the same restrictions as the other vessels. However, coordination between the Navy and either the Southeast Alaska Coast Pilots Association or the particular cruise ship line should eliminate any potential for noticeable delay. Recreational water sports such as SCUBA diving would not be affected by the implementation of Restricted Area No. 5. Transit to and from diving locations, if using a motorized vessel, while the restricted area is in effect would be subject to the same limitations and conditions previously described in the FEIS.

Other comments questioned the potential effect of a submarine traveling at flank speed on migrating salmon. The Carr Inlet Acoustic Range in southern Puget Sound and the Santa Cruz Acoustic Range Facility in southern California have both been used to measure the radiated noise from submarines operating at low and high speeds. There has never been any indication that the speed at which the submarine was operating while being tested had either a direct or indirect long term effect on fish mortality. The relative abundance of salmon migrating through Carr Inlet has been consistent with the relative abundance of salmon within south Puget Sound.

The effects of submarine wakes from both surface travel and underway testing were identified as a potential adverse effect. While within western Behm Canal and operating on the surface, submarines will be restricted to speeds comparable to those used by cruise ships within Tongass Narrows. The surface wake from a submarine traveling at these speeds would be about the same size as that produced by a small crusie ship traveling at the same speed. The speed of submarines during underway testing is classified, however the submarine hulls are designed to minimizelwakes and the Navy has not experienced any effects from operations in Carr Inlet due to submarine wakes.

Another comment suggested that boater communications would become "scrambled" as a result of the Navy conducting operations. Navy communications will be conducted on military frequencies and will not affect frequencies used by boaters.

All other comments received during the processing of the FEIS and the Addendum to the FEIS deal with issues already addressed in the NEPA documents.

Before the implementation of this Decision the Navy will obtain all applicable authorizations and permits. The U.S. Forest Service (USFS) proposes to issue a Special Use Permit for Navy use of Back Island and to amend the current designation of the Back Island Land Use Designation II (LUD II) to allow an exception for the proposed facility. The exception would apply only to Back Island and no other LUD II areas on the Tongass National Forest. The USFS Record of Decision (ROD) for these actions will be signed concurrently with this ROD. The USFS ROD will not be published in the **Federal Register**, however the ROD will be distributed to those on the USFS mailing list and will be available for public review at the following locations:

Forest Supervisor Office, Federal Building, Ketchikan, AK
Ketchikan District Ranger Office, 3031 Tongass Ave., Ketchikan, AK
Ketchikan Public Library, 629 Dock St., Ketchikan, AK

A Biological Assessment has been prepared and submitted to the National Marine Fisheries Service and the U.S. Fish and Wildlife Service in accordance with the Endangered Species Act. Both agencies concurred with the Navy Biological Assessment finding of no effect on Endangered or Threatened Species.

The Navy will obtain authorization to construct the in-water facilities for SEAFAC from the U.S. Army, Corps of Engineers as required by the Clean Water Act and the River and Harbor Act. A Coastal Consistency Determination has also been prepared and submitted to the State of Alaska as required by the Coastal Zone Management Act.

Date: April 20, 1989.

Sandra M. Kay,

Department of the Navy, Alternate Federal Register Liaison Officer.

Naval Research Advisory Committee; Closed Meeting

Notice was published April 10, 1989, at 54 FR 14277 that the Naval Research Advisory Committee will meet on May 4–5, 1989, at the Naval Submarine Base, Kings, Bay, Georgia. The meeting has been conceled. In accordance with 5 U.S.C. 552(e)(2), the meeting cancellation is publicly announced at the earliest practical time.

Date: April 19, 1989.

Sandra M. Kay,

Department of the Navy, Alternate Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Notice Inviting Individuals To Apply To Serve as Field Readers for the Student Literacy Corps Program

AGENCY: Department of Education.

ACTION: Notice inviting individuals to apply to serve as field readers for the Student Literacy Corps Program.

SUMMARY: The Assistant Secretary for Postsecondary Education invites interested individuals to apply as field readers to evaluate grant applications for the Student Literacy Corps Program. This program provides direct grants to eligible institutions of higher education (IHEs) to develop literacy projects at public community agency facilities in which volunteer undergraduates will serve as unpaid tutors

Duties and Compensation of Field Readers

Field readers will review applications according to the applicable selection criteria published in the Notice inviting applications for Fiscal Year 1989. All reviews of applications will take place in Washington, DC. Each field reader will serve for a period of approximately 3 days. Each field reader will receive compensation for certain travel expenses, and an honorarium:

Field Reader Qualifications

Each field reader must have the expertise necessary to accurately assess the grant proposals submitted to the Department of Education. Field readers are sought who meet one or more of the following qualifications: (a) Can function as generalists encompassing a wide range of specialized activities relating to literacy, from the teaching of traditional disciplines (such as sociology, economics and education), to working with volunteers in public community agencies serving youth, the handicapped and disabled veterans as well as individuals in public institutions ranging from schools to prisons; (b) have had direct experience counseling or tutoring educationally or economically disadvantaged individuals limited in basic skills in school, at home or at work; (c) have had experience in administering or teaching in community outreach programs (under the Department's Special Programs for Students from Disadvantaged Backgrounds, Title IV–A of the Higher Education Act of 1965, as amended, cooperative education programs or similar programs) jointly conducted by an IHE and a public community agency; (d) have had experience teaching reading, writing and arithmetis in a secondary school; (e) have provided supervision to undergraduates or others as tutors in community outreach programs.

Application Process

Any individual interested in serving as a field reader should mail his/her resume to the address below indicating that he or she is interested in serving as

VOL 54 ISS 78 AP 25 1989 UMI

a field reader for the Student Literacy Corps Program.

Applicable Regulations

The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hosptials and Nonprofit Organizations), Part 75 (Direct Grant Programs), Part 77 (Definitions that Apply to Department Regulations), and Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

FOR FURTHER INFORMATION CONTACT: Dr. Donald N. Bigelow, Office of Higher Education Programs, U.S. Department of Education, ROB-3, Room 3082, 400 Maryland Avenue, SW., Washington, DC 20202-5131. (202) 732-5596.

Program Authority: 20 U.S.C. 1018-1018f.
Dated: April 14, 1989.

BILLING CODE 4000-01-M

[CFDA No: 84.040]

Invitation of Fiscal Year 1989 Applications Under the School Construction in Areas Affected by Federal Activities Program for Fiscal Year 1990 Funds.

Purpose of Program: Notice is given that the Secretary of Education has established a closing date for the transmittal of applications for assistance under sections 5 and 9 of Pub. L. 81-815, based on increase periods ending June 1989 or June 1990. (An increase period is a period of four consecutive regular school years during which a school district has experienced a substantial increase in school membership as a result of new or increased Federal activities.) This closing date also applies to applications for assistance under section 14 and for supplemental assistance under section 8 of Pub. L. 81-815. (Section 14 authorizes assistance for certain school districts that serve children residing on Indian lands, or that are significantly burdened by the presence of nontaxable Federal property. Section 8 authorizes assistance that supplements certain awards made under sections 5, 9, and 14 of Pub. L. 81-815.)

Approval of these applications is subject to availability of funds.

Deadline for Transmittal of Applications: June 30, 1989.

Deadline for Intergovernmental Review Comments: August 31, 1989.

Available Funds: The fiscal year 1990 budget request for sections 5 and 14(c) is $2,964,000, the same as the fiscal year 1989 appropriation. The fiscal year 1990 budget request for sections 14(a) and 14(b) is $12,746,000, while the fiscal year 1989 appropriation for these sections is $11,856,000.

Applications Available: Application forms may be obtained from the appropriate State educational agency that serves the applicant local educational agency.

Applicable Regulations: (a) The regulations governing the School Construction Program (34 CFR Parts 218 and 221), and (b) the Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75, 77, 79, and 80).

For Information Contact: School Facilities Branch, Impact Aid Program, Program Operations Division, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2117, Washington, DC 20202-6244.

Telephone: (202) 732-4660.

Program Authority: 20 U.S.C. 631-645
Dated: April 17, 1989.

Daniel F. Bonner,

Acting Assistant Secretary for Elementary and Secondary Education.

(Catalog of Federal Domestic Assistance No. 84.040 School Assistance in Federally Affected Areas—Construction)

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration.

ACTION: Notice of requests submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not include information collection requirements contained in new or revised regulations which are to be submitted under 350(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) collection number(s); (3) current OMB docket number (if applicable); (4) collection title; (5) type of request, e.g., new, revision, or extension; (6) frequency of collection; (7) response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) affected public; (9) an estimate of the number of respondents per report period; (10) an estimate of the number of responses annually; (11) an estimate of the average hours per response; (12) the estimated total annual respondent burden, and (13) a brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed on or before May 25, 1989.

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards, at the address below.)

FOR FURTHER INFORMATION CONTACT: Jay Casselberry, Office of Statistical Standards (FI-70), Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586-2171.

SUPPLEMENTARY INFORMATION: If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this Notice, you should advise the OMB DOE Desk Officer of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395-3084. (Also, please notify the DOE contact listed above.)

The energy information collection submitted to OMB for review was:

1. Fossil Energy
2. FE-748
3. 1901-0291
4. Enhanced Oil Recovery Annual Report
5. Extension
6. Annually
7. Voluntary
8. Businesses or other for profit
9. 48 respondents
10. 150 responses annually
11. The estimated average hours per response for each of the respondents is 2 burden hours.
12. The estimated total reporting hours are 300.
13. FE-748 collects data on changes in well data and description of operation, and average monthly production and injection on projects in the enhanced oil recovery incentive program. Data are published. Respondents are individuals or companies that had enhanced oil recovery projects approved for the incentive program.

Statutory Authority: Section 5(a), 5(b), 13(b), and 52, Pub. L. No. 93-275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, April 18, 1989.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

[FR Doc. 89-9803 Filed 4-24-89; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project Nos. 1981-002, et al.]

Hydroelectric Applications; Wisconsin Dept. of Natural Resources, et al.; Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1 a. *Type of Application:* Amendment of License

b. *Project No:* 1981-002

c. *Date Filed:* September 19, 1984; amended September 22, 1987.

d. *Applicant:* Wisconsin Department of Natural Resources

e. *Name of Project:* Stiles Dam Project

f. *Location:* The Stiles Dam Project is located on Oconto River in Oconto County, Wisconsin

g. *Filed Pursuant to:* 18 CFR 385.207 (1988)

h. *Applicant Contact:*
Mr. Michael Caine, Wisconsin Department of Natural Resources, P.O. Box 7921, Madison, WI 53707, (608) 266-2177.

i. *FERC Contact:* Edward L. Melisky, (202) 376-9255.

j. *Comment Date:* May 22, 1989.

k. *Description of Project:* The Oconto Electric Cooperative (licensee) operates the Stiles Dam Project as a peaking facility. The project generates electricity during early mornings and late evening hours on weekdays. The licensee normally curtails generation on weekends to refull the project reservoir. During periods when the project does not generate electricity, the flows downstream of the dam are substantially reduced.

l. *Purpose of Petition:* To maintain fish habitat in the project reservoir and to protect aquatic resources and recreation in the Oconto River downstream of the project, the Wisconsin Department of Natural Resources (DNR) has requested that the Commission require changes in project operation. The DNR requests that the Commission require the licensee to maintain: (a) The elevation of the reservoir between 108.8 and 110 feet (assumed datum); and (b) minimum flows in the Oconto River downstream of the project according to a schedule that ranges from 345 cubic feet per second (cfs) in February to 1,242 cfs in April.

m. *This notice also consists of the following standard paragraphs:* B, C, and D2.

2 a. *Type of Applicotion:* New Major License

b. *Project No.:* 2327-002

c. *Dote Filed:* February 1, 1989

d. *Applicant:* James River—New Hamsphire Electric, Inc.

3. *Name of Project:* Cascade Project

f. *Location:* on the Androscoggin River in Coos County, New Hamsphire

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791 (a)—825(r)

h. *Applicant Contacts:*
Mr. David L. Dunham, Vice President, James River-New Hamsphire Electric, Inc., 650 Main Street, Berlin, NH 03570-2469, (603) 752-4600.

j. *Comment Dote:* June 8, 1989.

k. *Competing Applicotion:* Alpine Project No. 9713-001 *Date Filed:* July 21, 1988

1. *Description of Project:* The existing operating project commenced operation in 1916 and was issued an initial license in 1964, which will expire in 1993. The licensee has filed for a new license for the continued operation of the project. The licensee also proposes major modifications to the existing licensed project. The proposed project would consist of: (1) An existing 53-foot-high and 583-foot-long concrete gravity dam with 3-foot-high flashboards; (2) an existing reservoir with gross storage capacity of 200 acre-feet; (3) an existing headworks structure and forebay; (4) an existing powerhouse with two turbine-generator units rated at 2,400 kW each and one rated at 3,120 kW for a total installed capacity of 7,920 kW; (5) a new intake at the opposite end; (6) a new 18-foot-diameter and 7,400-foot-long steel penstock; (7) a new powerhouse containing a single turbine-generator unit rated at 14,300 kW; and (8) appurtenant facilities. The project would generate an average of 103,300 MWh annually. The dam is owned by the applicant. The existing project would be subject to Federal takeover under sections 14 and 15 of the Federal Power Act. The cost of the project would be $26,359,000.

m. *Purpose of Project:* Project power would be sold to the customers of James River-New Hamsphire Electric, Inc.

n. *This notice also consists of the following standard paragpahs:* B, C and D1.

3 a. *Type of Application:* New Minor License

b. *Project No.:* 2497-002

c. *Dote Filed:* November 28, 1988

d. *Applicant:* Linweave, Inc.

e. *Nome of Project:* Mt. Tom Mill

f. *Location:* On the Holyoke Canal, tributary to the Connecticut River, in the City of Holyoke, County of Hamden, Massachusetts

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)-825(r)

h. *Applicant Contact:* Mr. Robert Belsky, 10 Linweave Drive, Holyoke, MA 01040, (413) 536-6410

i. *FERC Contact:* Charles T. Raabe, (202) 376-9778

j. *Comment Date:* June 1, 1989

k. *Description of Project:* The existing, operating project consists of: (1) A gated intake with submerged trashracks located on the second level canal of the Holyoke Water Power Company; (2) an 8-foot-diameter penstock 230 feet long; (3) a 500-kW generating unit located in the Mt. Tom Mill building; (4) a 9-foot-wide by 8-foot-high arched brick-lined tailrace tunnel 205 feet long extending from the draft tube to a concrete outlet structure; (5) a concrete gated outlet structure where tailwater empties into a channel that leads to the Connecticut River; (6) a 13.8-kV transmission line 90 feet long that connects the project to an existing transmission line; and (7) appurtenant facilities.

The license for Project No. 2497 was issued April 2, 1975, for a period effective March 1, 1941, and terminating February 28, 1991. The average annual energy production is 2,560 MWh. Project power is sold to Fitchburg Gas & Electric Light Company. The project is not subject to Federal takeover under section 14 of the Federal Power Act and is not subject to the provisions of section 15 of the Federal Power Act. No changes to the project are proposed.

Transferor: Mr. Floyd N. Bidwell, Rt. 2, Box 447, Cassel, CA 96106, (916) 335–2797

Transferee: Mr. Mearl Williams, Highland Hydro Construction, Inc., 2576 Hartnell Avenue, Redding, CA 96002, (916) 222–1414

i. *Commission Contact:* Mr. James Hunter, (202) 376–1943

j. *Comment Date:* May 30, 1989

k. *Description of Proposed Action:* On May 18, 1988, a minor license was issued to the Transferor for the construction, operation, and maintenance of the Lost Creek No. 1 project. It is proposed to transfer the license to the Transferee. The proposed transfer will not result in any changes to the proposed development. The Transferor certifies that he has fully complied with the terms and conditions of the license. The Transferee accepts all the terms and conditions of the license and agrees to be bound thereby to the same extent as though it were the original licensee.

i. *FERC Contact:* Michael Spencer at (202) 376–1689

j. *Comment Date:* May 30, 1989

k. *Description of Proposed Action:* The proposed run-of-the-canal project would utilize the U.S. Bureau of Reclamation's Tehama-Colusa/Glen Colusa Canal Interie No. 1. The Licensee seeks to surrender its license claiming that Pacific Gas and Electric Company has transmission constraints and could not receive the generation from this project.

The Licensee states that no construction has been done.

l. *This notice also consists of the following standard paragraphs:* B, C, and D2
